J. Non-Newtonian Fluid Mech., 61 (1995) 1–89

Journal of Non-Newtonian Fluid Mechanics

Cumulative author index

A

Abu-Zaid, S., see Ahmadi, G. **35** (1990) 15

Acierno, D., Iorio, G., La Mantia, F.P. and Marrucci, G.
Surface instabilities arising in drawing cylindrical specimens of low-density polyethylene melts **4** (1978) 99

Acierno, D., La Mantia, F.P., Marrucci, G. and Titomanlio, G.
A non-linear viscoelastic model with structure-dependent relaxation times. 1. Basic formulation **1** (1976) 125

Acierno, D., La Mantia, F.P., Marrucci, G. and Titomanlio, G.
A non-linear viscoelastic model with structure-dependent relaxation times. 2. Comparison with l.d. polyethylene transient stress results **1** (1976) 147

Acierno, D., La Mantia, F.P. and Marrucci, G.
A non-linear viscoelastic model with structure-dependent relaxation times. 3. Comparison with l.d. polyethylene creep and recoil data **2** (1977) 271

Adachi, K.
Laminar jets of a plane liquid sheet falling vertically in the atmosphere **24** (1987) 11

Adachi, K., Spiers, R.P. and Wilkinson, W.L.
Free coating of viscoelastic and viscoplastic fluids onto a vertical surface **3** (1978) 331

Adachi, K., Yoshioka, N. and Sakai, K.
An investigation of non-Newtonian flow past a sphere **3** (1977/1978) 107

Adams, M.J., Edmondson, B., Caughey, D.G. and Yahya, R.
An experimental and theoretical study of the squeeze film deformation and flow of elastoplastic fluids **51** (1994) 61

Adewale, K.E.P. and Leonov, A.I.
On modelling spurt flows of polymers **49** (1993) 133

Adler, P.M., see Amadou, H. **4** (1978) 229

Adler, P.M., see Konuita, A. **7** (1980) 101

Advani, S.G., see Ranganathan, S. **47** (1993) 107

Agassant, J.-F., see Demay, Y. **18** (1985) 187

Agassant, J.-F., see Fortin, A. **45** (1992) 209

Agassant, J.-F., see Kiriakidis, D.G. **47** (1993) 339

Agassant, J.-F., see Maders, H. **45** (1992) 63

Agassant, J.-F., see Sornberger, G. **23** (1987) 123

Agrait, N. and Castellanos, A.
Oscillatory and steady convection in a

dielectric viscoelastic layer subjected to a temperature gradient in the presence of an electric field **21** (1986) 1
Agarwal, U.S. and Mashelkar, R.A.
On the stability of grafted polymer molecules in elongational flows **54** (1994) 1
Ahmadi, G. and Abu-Zaid, S.
A rate dependent thermodynamical model for rapid granular flows **35** (1990) 15
Ahmed, A. and Alexandrou, A.N.
Unsteady flow of semi-concentrated suspensions using finite deformation tensors **55** (1994) 115
Ahmed, R. and Mackley, M.R.
Experimental centreline planar extension of polyethylene melt flowing into a slit die **56** (1995) 127
Ahmed, R., Laing, R.F. and Mackley,M.R.
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes **59** (1995) 129
Ahn, K.H. and Lee, S.J.
Bead spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman theory **43** (1992) 143
Ahn, K.H. and Osaki, K.
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol) sodium borate aqueous solution **55** (1994) 215
Ahn, K.H. and Osaki, K.
Mechanism of shear thickening investigated by a network model **56** (1995) 267
Ahn, K.H., see Osaki, K. **54** (1994) 109
Ahn, K.H., Schrag, J.L. and Lee, S.J.
Bead-spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data **50** (1993) 349
Ahrens, M., Yoo, Y.J. and Joseph, D.D.
Hyperbolicity and change of type in the flow of viscoelastic fluids through pipes **24** (1987) 67
Aït-Kadi, A. and Grmela, M.
Modelling the rheological behaviour of fibre suspensions in viscoelastic media **53** (1994) 65
Aït-Kadi, A., see Grmela, M. **55** (1994) 191
Aït-Kadi, A., see Kabanemi, K.K. **55** (1994) 283
Aitken, L.S. and Wilson, S.D.R.
Rayleigh–Taylor instability in elastic liquids **49** (1993) 13
Akay, G.
Unstable capillary flow of reinforced polymer melts **13** (1983) 309
Akbay, U., Becker, E. and Sponagel, S.
Instability of plane Couette flow of viscoelastic liquids **18** (1985) 123
Aksel, N., see Buggisch, H. **36** (1990) 351
Alderman, N.J., see Sherwood, J.D. **39** (1991) 311
Alderman, N.J., Meeten, G.H. and Sherwood, J.D.
Vane rheometry of bentonite gels **39** (1991) 291
Aldhouse, S.T.E., Mackley, M.R. and Moore, I.P.T.
Experimental and linear viscoelastic stress distribution measurements of high-density polyethylene flowing into and within a slit **21** (1986) 359
Aleman, J.V.
Longitudinal volume viscosity of poly(ethylene oxide) **25** (1987) 365
Alexandrou, A.N., see Ahmed, A. **55** (1994) 115
Alexandrou, A.N., see Papanastasiou, T.C. **25** (1987) 313
Almdal, K., see Winther, G. **39** (1991) 119

Altan, M.C., see Tang, L. **56** (1995) 183
Altan, M.C., Güçeri, S.I. and Pipes, R.B.
Anisotropic channel flow of fibre suspensions **42** (1992) 65
Amadou, H., Adler, P.M. and Piau, J.-M.
Converging radial flow of dilute polymer solutions **4** (1978) 229
Andersson, H.I. and Irgens, F.
Gravity-driven laminar-film flow of power-law fluids along vertical walls **27** (1988) 153
Andersson, H.I. and Toften, T.H.
Numerical solution of the laminar boundary layer equations for power-law fluids **32** (1989) 175
André, P. and Clermont, J.-R.
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation **38** (1990) 1
André, P. and Clermont, J.-R.
Numerical simulation of the die swell problem of a Newtonian fluid by using the concept of stream function and a local analysis of the singularity at the corner **23** (1987) 335
Anturkar, N.R. and Co, A.
Draw resonance in film casting of viscoelastic fluids: a linear-stability analysis **28** (1988) 287
Anturkar, N.R., Papanastasiou, T.C. and Wilkes, J.O.
Stability of coextrusion through converging dies **41** (1991) 1
Aoki, Y.
Rheological properties of ABS polymer melts having a good dispersion of rubber particles **22** (1986) 91
Apelian, M.R., see King, R.C. **29** (1988) 147
Apelian, M.R., Armstrong, R.C. and Brown, R.A.
Impact of the constitutive equation and singularity on the calculation of stick–slip flow: the modified upper-convected Maxwell model (MUCM) **27** (1988) 299
Arigo, M.T., Rajagopalan, D., Shapley, N., and McKinley, G.H.
The sedimentation of a sphere through an elastic fluid: Part 1. Steady motion **60** (1995) 225
Arikol, M.
Kinematics and normal stress differences of a viscoelastic fluid undergoing wiggle flow **19** (1985) 209
Armour, S.J., see James, D.F. **35** (1990) 421
Armour, S.J., see James, D.F. **35** (1990) 445
Armstrong, R.C., see Apelian, M.R. **27** (1988) 299
Armstrong, R.C., see Beris, A. **13** (1983) 109
Armstrong, R.C., see Beris, A. **16** (1984) 141
Armstrong, R.C., see Beris, A.N. **19** (1986) 323
Armstrong, R.C., see Beris, A.N. **22** (1987) 129
Armstrong, R.C., see Burdette, S.R. **33** (1989) 1
Armstrong, R.C., see Coates, P.J. **42** (1992) 141
Armstrong, R.C., see Hassager, O. **34** (1990) 241
Armstrong, R.C., see Khan, S.A. **22** (1986) 1
Armstrong, R.C., see Khan, S.A. **25** (1987) 61
Armstrong, R.C., see Kim-E, M.E. **13** (1983) 341
Armstrong, R.C., see King, R.C. **29** (1988) 147
Armstrong, R.C., see Lawler, J.V. **20** (1986) 51
Armstrong, R.C., see Lunsmann, W.J. **48** (1993) 63

Armstrong, R.C., see McKinley, G.H. **40** (1991) 201
Armstrong, R.C., see Mendelson, M.A. **10** (1982) 31
Armstrong, R.C., see Menon, R.K. **27** (1988) 265
Armstrong, R.C., see Northey, P.J. **36** (1990) 109

Necking in high-speed spinning

revisited **47** (1993) 57
Ziegelbaur, R.S. and Caruthers, J.M.
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 1. Hysteresis behaviour **17** (1985) 45
Zine, A., see Fortin, A. **42** (1992) 1
Zine, A., see Fortin, A. **45** (1992) 209
Zine, A., see Gúenette, R. **45** (1992) 187
Zirnsak, M.A., Hur, D.U. and Boger, D.V.
Normal stresses in fibre suspensions **54** (1994) 153
Zúñiga, I.
Correction to "Orientational instabilities in plane Poiseuille flow of certain nematic liquid crystals" J. Non-Newtonian Fluid Mech., 33 (1989) 123 **36** (1990) 433
Zúñiga, I. and Leslie, F.M.
Orientational instabilities in plane Poiseuille flow of certain nematic liquid crystals **33** (1989) 123
Zúñiga, I., see Barratt, P.J. **11** (1982) 23

ELSEVIER

J. Non-Newtonian Fluid Mech., 61 (1995) 91–268

Journal of Non-Newtonian Fluid Mechanics

Cumulative subject index

A

A1
Porous medium flow of the fluid A1: effects of shear and elongation (Vorwerk) **41** (1991) 119
The A1 project: an overview (Hudson) **46** (1993) 69
White–Metzner models for rod climbing in A1 (Liao) **51** (1994) 111

Acoustic streaming
Characterization of the non-Newtonian flow behaviour of drag-reducing fluids (Vlassopoulos) **49** (1993) 205

Adsorption
Surface rheology (van den Tempel) **2** (1977) 205

Agglomeration
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251

Aggregation of spheres
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Air bearing
A simple constant-stress rheometer (van den Brule) **43** (1992) 127

Air-blast atomization
Air-blast atomization of non-Newtonian liquids (Mansour) **58** (1995) 161

Amplitude
On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77

Analytical solution
An exact non-stationary solution of simple shear flow in a Bingham fluid (Sekimoto) **39** (1991) 107

Annular die
On die swell: some theoretical results (Pearson) **4** (1978) 195
On die swell: some theoretical results (Summary) (Pearson) **5** (1979) 267
An experimental investigation of upstream flow characteristics of viscoelastic fluids in an annular die entry (Tan) **6** (1979) 21
Flow of thermoplastics in an annular die under orthogonal oscillations (Isayev) **34** (1990) 375

Annular gap
Some recent results on the flow of non-Newtonian fluids (Rivlin) **5** (1979) 79
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19
Flow of viscoplastic fluids in eccentric annular geometries (Szabo) **45** (1992) 149

Anisotropic fluids
Suspension of solid particles in a Newtonian fluid (Levy) **13** (1983) 63
Orientation effects in extensional and squeezing flows of certain anisotropic fluids (Duffy) **28** (1988) 77
One modification of the Ericksen–Leslie equations in a two-dimensional motion (Ryskin) **39** (1991) 207
Flow regimes for fibre suspensions in narrow gaps (Tucker III) **39** (1991) 239
A linear stability analysis of flows of transversely isotropic non-Newtonian fluids (Hull) **43** (1992) 325
Symbolic evaluation of the Ericksen–Leslie equations in the computational domain (Güler) **52** (1994) 309

Anisotropic viscosity tensor
Flow of a liquid with an anisotropic viscosity tensor (Duffy) **4** (1978) 177
Flow of a liquid with an anisotropic viscosity tensor: inertial effects (Duffy) **7** (1980) 107
Flow of a liquid with an anisotropic viscosity tensor: some axisymmetric flows (Duffy) **7** (1980) 359
Flow of a liquid with an anisotropic viscosity tensor: a skew initial orientation (Duffy) **8** (1981) 213
Flow of a liquid with an anisotropic viscosity tensor: elongational flow (Duffy) **9** (1981) 1

Anomalous (or hydrodynamic) rolling
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305

Anomalous shear flow
The anomalous shear-flow properties of S1 (Hudson) **52** (1994) 105

Anti-thixotropy
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137

Approximate methods
Two new methods for the approximate determination of the initial coefficient of the first normal stress difference (Friedrich) **17** (1985) 185
Boundary conditions at inflow and outflow planes (Vrentas) **19** (1985) 1
Extremum principles and exact two-side bounds of potential: functional and dissipation for slow motions of nonlinear viscoplastic media (Leonov) **28** (1988) 1

Arnoldi-orthogonalization
Linear stability analysis of viscoelastic Poiseuille flow using an Arnoldi-based orthogonalization algorithm (Sureshkumar) **56** (1995) 151

Aspect ratio
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105

Asymptotic analysis
On the asymptotic behaviour of an Oldroyd fluid B in steady spinning flow (Phan-Thien) **25** (1987) 129
Asymptotic analysis of the finite cone-and-plate flow of a non-Newtonian fluid (Olagunju) **50** (1993) 289

Asymptotic evolution
A numerical study of the asymptotic evolution and breakup of Newtonian and viscoelastic jets (Renardy) **59** (1995) 267

Atomic liquids
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303

Atomization
Ligament-type disintegration of non-Newtonian fluid in spinning disk atomization (Kawase) **10** (1982) 367

Automotive engine mount
Electrorheological fluids applied to an automotive engine mount (Williams) **47** (1993) 221

Axial velocity
A critical re-appraisal of the jet-thrust technique for normal stresses, with particular reference to axial velocity and stress rearrangement at the exit plane (Davies) **3** (1977/1978) 141
The sedimentation of a sphere through an elastic fluid. Part 1. Steady motion (Arigo) **60** (1995) 225

Axisymmetric deformations
On axisymmetric deformations on nonlinear viscoelastic membranes (Wineman) **4** (1978) 249

Axisymmetric flow
Numerical solution for the flow of viscoelastic fluids (Crochet) **5** (1979) 201
Flow of a liquid with an anisotropic viscosity tensor: some axisymmetric flows (Duffy) **7** (1980) 359
Modelling of strain histories for memory integral fluids in steady axisymmetric flows (Winter) **10** (1982) 157
Co-current axisymmetric flow in complex geometries: experiments (Van de Griend) **32** (1989) 229
Co-current axisymmetric flow in complex geometries: numerical simulation (Musarra) **32** (1989) 253

Axisymmetric modes
A note on the viscoelastic instability of circular-Couette flow (Proctor) **51** (1994) 227

Axisymmetric perturbations
Linear stability analysis of cone and plate flow of an Oldroyd-B fluid (Olagunju) **47** (1993) 93

Axisymmetric solutions
Secondary flows in cone and plate flow of an Oldroyd-B fluid (Olagunju) **46** (1993) 29

B

Back-and-forth movement
Mechanism for entry flow instability through a forward-facing step channel (Chiba) **57** (1995) 271

Backward pumping screws
A non-Newtonian model of flow in forward and backward pumping screw regions of a modular tangential counter-rotating twin-screw extruder (Kim) **37** (1990) 37

Bead–spring chain models
Second-order fluid constants for freely jointed bead–rod chain suspensions (Curtiss) **2** (1977) 392
Polymer solution rheology based on a finitely extensible bead–spring chain model (Bird) **7** (1980) 213
Equilibration in momentum space in the kinetic theory of polymer solutions (Bird) **15** (1984) 85
Relaxational interactions and viscoelasticity of polymer melts. 1. Model development (Volkov) **18** (1985) 163
Effect of ring closure on rheological behaviour (Wiest) **24** (1987) 279
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 2. Shear flows (Wedgewood) **27** (1988) 245
Do we understand the physics in the constitutive equation? (Rallison) **29** (1988) 37
A discussion of shear thickening in bead–spring models (Kishbaugh) **34** (1990) 181
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
Brownian dynamics simulation of model polymer fluids in shear flow. 1. Dumbbell models (Rudisill) **41** (1992) 275
Bead–spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman's theory (Ahn) **43** (1992) 143
Bead–spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data (Ahn) **50** (1993) 349

Bending strain
A corotational time derivative for surface tensors, constitutive relations and a new measure of bending strain (Waxman) **9** (1981) 235

Bentonite
Vane rheometry of bentonite gels (Alderman) **39** (1991) 291
Squeeze-film rheometry of non-uniform mudcakes (Sherwood) **39** (1991) 311
Laminar, unidirectional flow of thixotropic fluid in a circular pipe (Billingham) **47** (1993) 21

Bernoulli equation
Bernoulli equation and the competition of elastic and inertial pressures in the potential flow of a second-order fluid (Joseph) **42** (1992) 385

Bi-conical rheometer
Use of the finite element modelling technique for the improvement of viscometry results obtained by cone-and-plate rheometers (Petera) **58** (1995) 1

Biaxial elongation (extension)
The flow of polymer thickened motor oils in convergent jet thrust nozzles (Oliver) **2** (1977) 367
Extensional rheometers for molten polymers; a review (Dealy) **4** (1978) 9
Stretching flows for thin film production. 1. Bubble blowing in the solid phase (Pearson) **4** (1978) 57
Stretching flows for thin film production. 2. Film stretching over a conical mandrel (Gutteridge) **4** (1978) 73
Uniaxial and biaxial unsteady inflations of a viscoelastic material (Khayat) **43** (1992) 31

Bifurcation
Reflections on the numerical viscoelastic flow problem (Josse) **16** (1984) 13

False bifurcations and instability of a Maxwell fluid in fully developed flow (Josse) **20** (1986) 257
Bifurcation and discretization errors in the solution of non-Newtonian flow problems (Vrentas) **21** (1986) 377
Bifurcation phenomena of generalized Newtonian fluids in curved rectangular ducts (Shanthini) **22** (1986) 35
Multiplicity of solutions in von Karman flows of viscoelastic fluids (Ji) **36** (1990) 1
Instability of a Criminale–Ericksen–Filbey fluid in a disk-and-cylinder system (Chiao) **36** (1990) 361
A numerical study of the flow of a K-BKZ fluid between plates rotating about non-coincident axes (Dai) **38** (1991) 289
Orientational transition in radial flow of a nematic liquid (Rey) **40** (1991) 177
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181
Stationary bifurcations and tricriticality in a creeping nematic polymer flow (Han) **50** (1993) 1
A note on the viscoelastic instability of circular-Couette flow (Proctor) **51** (1994) 227
Nonlinear elastic instability of gravity-driven flow of a thin viscoelastic film down an inclined plane (Kang) **57** (1995) 243
Bifurcation analysis of a molecular model for nematic polymers in shear flows (Maffettone) **59** (1995) 73

Bingham fluids

Use of the parallel-plate plastometer for the characterization of viscous fluids with a yield stress (Covey) **8** (1981) 249
Radial flow of a Bingham fluid between two fixed circular disks (Dai) **8** (1981) 349
Flow of Bingham fluids in complex geometries (Lipscomb) **14** (1984) 337
Numerical study of the Bingham squeeze film problem (O'Donovan) **15** (1984) 75
On the shearing zone around rotating vanes in plastic liquids: theory and experiment (Keentok) **17** (1985) 23
An analytical solution of radial flow of a Bingham fluid between two fixed circular disks (Huang) **26** (1987) 143
An exact non-stationary solution of simple shear flow in a Bingham fluid (Sekimoto) **39** (1991) 107
Steady pressure-driven non-Newtonian flow in a partially filled pipe (Davis) **41** (1991) 81
Some boundary value problems for the Bingham model (Atkinson) **41** (1992) 339
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19
Numerical analysis of three-dimensional Bingham plastic flow (Beverly) **42** (1992) 85
Behaviour of a Bingham-like viscous fluid in lubrication flows (Dorier) **45** (1992) 291
Flow of viscoplastic fluids in eccentric annular geometries (Szabo) **45** (1992) 149
Motion of the yield surface in Bingham fluid with a simple-shear flow geometry **46** (1993) 219
Squeezing flow of a Bingham material (Wilson) **47** (1993) 211
Squeezing flow of a yield-stress fluid in a wedge of slowly-varying angle (Wilson) **50** (1993) 45
A new hydrodynamic lubrication theory for bilinear rheological fluids (Wu) **56** (1995) 253

Stability of two-layer Poiseuille flow of Carreau–Yasuda and Bingham-like fluids (Pinarbasi) **57** (1995) 227
On the determination of the plug flow region in Bingham fluids through the application of variational inequalities (Huilgol) **58** (1995) 207

Biot number
Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders **54** (1994) 331

Bird–DeAguiar model
An analysis of the Bird–DeAguiar model for polymer melts (Calderer) **31** (1989) 209

Bird–Dotson–Johnson equation
Fast squeezing flow of viscoelastic fluids (Mochimaru) **9** (1981) 157

Birefringence
Dynamical behaviour of drag-reducing polymer solutions (Scrivener) **5** (1979) 475
Birefringence and pressure drop for the orifice flow of a polymer solution (Eisenbrand) **11** (1982) 37
Evaluation of the Higashitani and Pritchard analysis of the hole pressure using flow birefringence (Pike) **16** (1984) 211
Some experimental results on the development of Couette flow for non-Newtonian fluids (Chow) **17** (1985) 233
Two-dimensional viscoelastic flows: experimentation and modelling (Isayev) **19** (1985) 135
Experimental and linear viscoelastic stress distribution measurements of high-density polyethylene flowing into and within a slit (Aldhouse) **21** (1986) 359
Dilute polystyrene solutions in extensional flows: birefringence and flow modification (Dunlap) **23** (1987) 5
Experimental study of the sharkskin defect in linear low density polyethylene (Sornberger) **23** (1987) 123
The spatial development of transient Couette flow and shear wave propagation in polymeric liquids by flow birefringence (Lee) **26** (1987) 57
Prediction of birefringence, stresses and kinematics in fibre spinning for solutions of finitely extensible macromolecules (Mackay) **27** (1988) 323
Flow visualization and birefringence studies on planar entry flow behaviour of polymer melts (White) **29** (1988) 245
The optical and mechanical response of flexible polymer solutions to extensional flow (Cathey) **34** (1990) 63
Measurements of N1-N2 and η in steady shear-flow and η', η'', and birefringence in small-strain oscillatory shear for the polyisobutylene solution M1 (Chirinos) **35** (1990) 105
Mechanical and optical responses of the M1 fluid subject to stagnation point flow (Schweizer) **35** (1990) 277
Flow birefringence studies in transient flows of a two roll mill for the test-fluid M1 (Geffroy) **35** (1990) 361
Shear wave propagation after stepwise increase of shear rate (Lee) **39** (1991) 1
Steady flow of a White–Metzner fluid in a 2-D abrupt contraction: computation and experiments (Maders) **45** (1992) 63
A study of stress distribution in contraction flows of an LLDPE melt (Kiriakidis) **47** (1993) 339
Spatially resolved birefringence studies of planar entry flow (Galante) **47** (1993) 289

Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 1. Experimental methods and straight channel validations (Davidson) **49** (1993) 317
Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
Birefringence and laser doppler velocimetry (LDV) studies of viscoelastic flow through a planar contraction (Quinzani) **52** (1994) 1
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59
Slip flow of polybutadiene through fluorinated dies (Piau) **59** (1995) 11

Biviscosity model
A numerical simulation of a plastic fluid in a parallel-plate plastometer (Gartling) **14** (1984) 347
Numerical study on the laminar pulsatile flow of slurries (Nakamura) **22** (1987) 191
Numerical analysis of three-dimensional Bingham plastic flow (Beverly) **42** (1992) 85
Squeezing flow of a Bingham material (Wilson) **47** (1993) 211
Electrorheological fluids applied to an automotive engine mount (Williams) **47** (1993) 221

Blends
Estimation of the elongational viscosity of polyethylene blends at high deformation rates (Tremblay) **33** (1989) 137
Visualization of the flow of linear low-density polyethylene low-density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
Visualization of the flow of low density polyethylene/polystyrene blends through a planar step contraction (Tremblay) **52** (1994) 323
Comments on the Doi-Ohta theory of blends (Grmela) **55** (1994) 191

Block copolymer
The dependence of viscoelastic flow properties on the structure for styrene-butadiene copolymers (Ramachandran) **13** (1983) 21
Decomposition of mechanical spectra into elementary Cole-Cole domains: application to the viscoelastic behaviour of a styrene-butadiene-styrene block copolymer (Diogo) **23** (1987) 435

Boger fluids
A highly elastic constant-viscosity fluid (Boger) **3** (1977/1978) 87
Newtonian and non-Newtonian flow near a re-entrant corner (Cochrane) **10** (1982) 95
A rheometrical study of Boger fluids (Jackson) **14** (1984) 173
On the planar extensional viscosity of mobile liquids (Williams) **19** (1985) 53
Flow characteristics associated with abrupt changes in geometry in the case of highly elastic liquids (Evans) **20** (1986) 11
Extrudate swell of Newtonian and non-Newtonian fluids: the effect of gravitational body force (Trang) **20** (1986) 103
The elongation of radial filaments of a Boger fluid on a rotating drum (Jones) **21** (1986) 51
Steady spinning of the Oldroyd fluid B. 2. Experimental results (Sridhar) **21** (1986) 115
An explanation of the rheological properties of Boger fluids (Mackay) **22** (1987) 235
Modelling of Boger fluid jets using the Oldroyd-B equation: a comparison of

experimental and numerical results (Chai) **29** (1988) 433
Dynamics of colloidal particles in sheared, non-Newtonian fluids (Johnson) **34** (1990) 89
A comparison of the drag coefficients of spheres translating in corn-syrup-based and polybutene-based Boger fluids (Chmielewski) **35** (1990) 37
Comparison of the behaviour of filaments of Xanthan solutions with that of filaments of polyacrylamide solutions (Jones) **35** (1990) 77
Crossflow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Compressive flow of the fluid M1 (Rajaiah) **35** (1990) 413
Modelling of fluid M1 using multiple-relaxation-time constitutive equations (Chai) **35** (1990) 459
Observations on the elastic instability in cone-and-plate and parallel-plate flows of a polyisobutylene Boger fluid (McKinley) **40** (1991) 201
Newtonian and non-Newtonian flow in a channel obstructed by an antisymmetric array of cylinders (Georgiou) **40** (1991) 231
Continuum and molecular interpretation of ideal elastic fluids (Boger) **41** (1991) 133
Extending filaments of an Oldroyd fluid (Keiller) **42** (1992) 37
Experimental studies of the onset of oscillatory instability in viscoelastic Taylor-Couette flow (Müller) **46** (1993) 315
Motion of a sphere falling under gravity in a constant-viscosity elastic liquid (Jones) **53** (1994) 175
Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multi-mode Giesekus model (Öztekin) **54** (1994) 351
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
On the motion of a sphere falling through an elastic liquid contained in a tightly-fitting cylindrical container (Degand) **57** (1995) 103

Boltzmann equation

Stokes' first problem for viscoelastic fluids (Preziosi) **25** (1987) 239

Boundary conditions

Boundary conditions at inflow and outflow planes (Vrentas) **19** (1985) 1
Mathematical and physical requirements for successful computations with viscoelastic fluid models (Van der Zanden) **29** (1988) 93
Some remarks on "Useful theorems for the second order fluid" (Kaloni) **31** (1989) 115
Several comments on the paper "Some remarks on 'useful theorems for the second order fluid'" by P.N. Kaloni (Giesekus) **33** (1989) 343
An exact solution of a viscoelastic Ekman layer with suction (Buggisch) **36** (1990) 351
An alternative approach to inflow boundary conditions for Maxwell fluids in three space dimensions (Renardy) **36** (1990) 419
The inlet layer in the flow of viscoelastic fluids (Cook) **40** (1991) 307
Motion of the yield surface in Bingham fluid with a simple-shear flow geometry (Sekimoto) **46** (1993) 219
Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders (Davies) **54** (1994) 331

Boundary element method
Finite element and boundary element methods for extrusion computations (Bush) **16** (1984) 37
Three-dimensional viscous flows with a free surface: flow out of a long square die (Bush) **18** (1985) 211
Influence of wall slip on extrudate swell: a boundary element investigation (Phan-Thien) **26** (1988) 327
Die design by a boundary element method (Tran-Cong) **30** (1988) 37
On the slider-bearing flow of a viscoelastic fluid (Phan-Thien) **33** (1989) 197
Upper and lower bounds for inelastic flows using BEM and FEM (Tanner) **38** (1990) 101
A three-dimensional boundary-element approach to gas-assisted injection molding (Khayat) **57** (1995) 253

Boundary fitted curvilinear coordinates
Use of boundary-fitted curvilinear coordinates for the numerical simulation of complex viscoelastic flows (Papathanasiou) **37** (1990) 139

Boundary integral method
On the use of boundary integral methods in the analysis of non-Newtonian fluid flow (Coleman) **16** (1984) 347
Boundary integral equations for analyzing the flow of a chopped fibre reinforced polymer compound in compression molding (Barone) **26** (1987) 185
High-Deborah-number flow of a dilute polymer solution past a sphere falling along the axis of a cylindrical tube (Harlen) **37** (1990) 157
On the squeezing flow of a fibre-reinforced fluid (Coleman) **37** (1990) 379
Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow (Pozrikidis) **51** (1994) 161
Application of the boundary integral method to the sedimentation of irregular shaped particles (Huilgol) **57** (1995) 49
A boundary intergral method for two-dimensional (non)-Newtonian drops in slow viscous flow **60** (1995) 129

Boundary layer theory
Anomalous heat transfer and drag in laminar flow of viscoelastic fluids (Ruckenstein) **17** (1985) 145
Gravity-driven laminar film flow of power-law fluids along vertical walls (Andersson) **27** (1988) 153
On the Rayleigh problem for a viscoelastic fluid (Phan-Thien) **28** (1988) 117
Numerical solution of the laminar boundary layer equations for power-law fluids (Andersson) **32** (1989) 175
High-Deborah-number flows of dilute polymer solutions (Harlen) **34** (1990) 319

Boundary value problems
An iterative method for solution of a boundary value problem in non-Newtonian fluid flow (Luning) **15** (1984) 145
Some boundary value problems for the Bingham model (Atkinson) **41** (1992) 339

Boundaries
Plane flow of a second-order fluid past submerged boundaries (Pilate) **2** (1977) 323
The behaviour of complex fluids at solid boundaries (Schowalter) **29** (1988) 25

Breakup
A note on the linear vector model of Olbricht, Rallison, and Leal as applied to the breakup of slender axisymmetric drops (Khakhar) **21** (1986) 127
Deformation and breakup of viscoelastic drops in planar extensional flows (Milliken) **40** (1991) 355
A note on the effect of vorticity on the deformation and breakup of polymer drops (Milliken) **42** (1992) 231
A numerical study of the asymptotic evolution and breakup of Newtonian and viscoelastic jets (Renardy) **59** (1995) 267

Bridging
Rheological behaviour of silica suspensions flocculated by bridging (Otsubo) **24** (1987) 265

Brownian dynamics
Brownian dynamics simulation of model polymer fluids in shear-flow. 1. Dumbbell models (Rudisill) **41** (1992) 275
Brownian dynamics simulations of a 2-D suspension of charged colloidal plates under shear (Sherwood) **43** (1992) 195
Brownian dynamics simulations of model hard-sphere suspensions (Heyes) **46** (1993) 1
Calculation of viscoelastic flow using molecular models: The CONNFFESSIT approach (Laso) **47** (1993) 1
Nonequilibrium Brownian dynamics simulations of Hookean and FENE dumbbells with internal viscosity (Hua) **56** (1995) 307
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Bubbles
The dilational properties of suspensions of gas bubbles in incompressible Newtonian and non-Newtonian fluids (Prud'Homme) **3** (1977/1978) 261
Stretching flows for thin film production. 1. Bubble blowing in the solid phase (Pearson) **4** (1978) 57
A note on the slow motion of a bubble in a viscoelastic liquid (Tiefenbruck) **7** (1980) 257
On the abrupt change of velocity of bubbles rising in non-Newtonian liquids (Kawase) **8** (1981) 203
A numerical study of the motion of a viscoelastic fluid past rigid spheres and spherical bubbles (Tiefenbruck) **10** (1982) 115
Velocity fields around spheres and bubbles investigated by laser-Doppler anemometry (Bisgaard) **12** (1983) 283
Dynamics of nonspherical bubbles surrounded by viscoelastic fluid (Hara) **14** (1984) 249
Bubble growth and collapse in viscoelastic liquids analyzed (Papanastasiou) **16** (1984) 53
Transient deformation of an inviscid inclusion in a viscoelastic extensional flow (Bousfield) **27** (1988) 205
Motion and coalescence of gas bubbles in non-Newtonian polymer solutions (De Kee) **37** (1990) 1
The effect of a thermal gradient on the motion of a bubble in a viscoelastic fluid (Chan Man Fong) **53** (1994) 165

Bueche–Ferry hypothesis
Basic principle in the viscoelasticity of polymeric liquids (Doi) **23** (1987) 151

Bundle-like stream
Anomalous flow patterns in viscoelastic entry flow through a planar contraction (Chiba) **36** (1990) 193
The structure of anomalous entry flow patterns through a planar contraction (Chiba) **42** (1992) 315

Buoyancy
A technique to estimate the elastic shear compliance from swell measurements (Matta) **12** (1983) 225

Bursting process
A model of the bursting process in non-Newtonian fluids (Kawase) **12** (1983) 317

C

Cake filtration
Filtration in viscoelastic continua (Kozicki) **53** (1994) 129

Calculus of variations
The non-Newtonian creeping flow around a rotating spheroidal spindle (Wein) **1** (1976) 357
Variational principles and entropy production in creeping flow of non-Newtonian fluids (Astarita) **2** (1977) 343
Variational principle for the KBKZ rheological equation of state with potential function (Hassager) **9** (1981) 321
Elastic free energy of an upper-convected Maxwell fluid undergoing a fully developed planar Poiseuille flow: a variational result (Ghisellini) **46** (1993) 229
On the elastic free energy of a linear viscoelastic fluid undergoing a fully developed viscometric flow (Doghieri) **51** (1994) 239

Calendering
A numerical analysis of calendering (Zheng) **28** (1988) 149

Capillaries
Measurement and modelling of friction in polymer melts during macroscopic slip at the wall (Piau) **54** (1994) 121

Capillary flow
Entrance effect in capillary flow of dilute and semi-dilute polymer solutions (Moan) **5** (1979) 463
Experimental studies of viscoelastic fluid flow (Tomita) **5** (1979) 497
Capillary and slit methods of normal stress measurements (Review) (Boger) **6** (1980) 163
Capillary flow of linear polyethylene melt: sudden increase of flow rate (Weill) **7** (1980) 303
Characteristics of HPAM dilute polymer solutions in three elongational flow situations (Ouibrahim) **7** (1980) 315
Unstable capillary flow of reinforced polymer melts (Akay) **13** (1983) 309
Influence of photodegradation and aging on the viscosity of antimisting polymer solutions (Matthys) **18** (1985) 81
The different capillary flow regimes of entangled polydimethylsiloxane polymers — macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
Computer modelling of transient thermal flows of non-Newtonian fluids (Ding) **47** (1993) 239
Filtration in viscoelastic continua (Kozicki) **53** (1994) 129

Capillary L/D ratio
Additional observations on the surface melt fracture behaviour of linear low-density polyethylene (Moynihan) **36** (1990) 255

Capillary number
Dynamic measurements of surface tension of solutions of polyisobutylene in

mixtures of polybutene oil and decalin (Lewandowski) **52** (1994) 233
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Capillary rheometry
The end correction for power-law fluids in the capillary rheometer (Boger) **4** (1978) 239
Development of a high-pressure, high-shear-rate capillary viscometer (Galvin) **8** (1981) 11
Shear thickening and structure formation in polymer solutions (Vrahopoulou) **25** (1987) 157
Rheology, friction, and heat transfer study of a discontinuously shear-thickening antimisting polymer solution (Matthys) **25** (1987) 177
Longitudinal volume viscosity of poly(ethylene oxide) (Aleman) **25** (1987) 365

Carbon black
Flow patterns in carbon black filled polyethylene at the entrance to a die (Ma) **17** (1985) 275
Extrudate character and post-extrusion shrinkage of rheologically characterized rubber carbon-black compounds and their interpretation (Shin) **37** (1990) 95
Investigations of the rheological behaviour of rubber carbon-black compounds over a wide-range of stresses including very-low stresses (Osanaiye) **49** (1993) 87
Rheological models of rubber carbon-black compounds: low interaction viscoelastic models and high interaction thixotropic plastic viscoelastic models (Montes) **49** (1993) 277

Carreau model
Drag force on a sphere in creeping motion through a Carreau model fluid (Bush) **16** (1984) 303
A phenomenological model for dynamic properties of dilute polymer solutions (Tiu) **33** (1989) 165

Carreau–Yasuda fluids
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121
Stability of two-layer Poiseuille flow of Carreau–Yasuda and Bingham-like fluids (Pinarbasi) **57** (1995) 227

Cauchy problem
Some properties of the upper convected Maxwell model for viscoelastic fluid flow (Olsson) **48** (1993) 125

Cavitation
Dynamics of nonspherical bubbles surrounded by viscoelastic fluid (Hara) **14** (1984) 249
Effect of polymeric additives on cavitation and radiated noise in water flowing past a circular cylinder (Reitzer) **18** (1985) 71
A contour integral approach to some cavity flows of elastic fluids (Coleman) **28** (1988) 239
Collapse of spherical bubbles in Maxwell fluids (Kim) **55** (1994) 37
Non-Newtonian cavitation analysis in journal bearings (Lemaitre) **59** (1995) 31

CEF-model
Secondary flows in straight ducts of rectangular cross section (Gervang) **39** (1991) 217

Cell model theory
The dilational properties of suspensions of gas bubbles in incompressible

Newtonian and non-Newtonian fluids (Prud'Homme) **3** (1977/1978) 261
A cell model theory of the shear viscosity of a concentrated suspension of interacting spheres in a non-Newtonian fluid (Tanaka) **7** (1980) 333

Centreline flow
Flow along the centerline behind a sphere in a uniform stream (Phan-Thien) **41** (1991) 151

Ceramics
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251

Chain breakage rate
Viscoelastic properties of physically cross-linked networks.
2. Dynamic mechanical moduli (Tanaka) **43** (1992) 273

Channel flow
Flow of a liquid with an anisotropic viscosity tensor (Duffy) **4** (1978) 177
The measurement of the second normal stress difference for some polymer solutions (Keentok) **6** (1980) 303
A normal stress amplifier for the second normal stress difference (Sturges) **6** (1980) 325
Flow of a liquid with an anisotropic viscosity tensor: a skew initial orientation (Duffy) **8** (1981) 213
A theoretical study of extrudate swell (Sturges) **9** (1981) 357
Non-isothermal flow of a molten polymer in a narrow rectangular cavity (van Wijngaarden) **11** (1982) 175
Rectilinear oscillatory viscoelastic flow in rectangular ducts (O'Brien) **13** (1983) 33
Elementary implications of viscometry on the free surface profile for the problems of climbing and channel flow (Castro) **15** (1984) 127
Dynamics of rigid and flexible polymer chains in confined geometries. 1. Steady simple shear flow (Park) **15** (1984) 309
Dynamics of rigid dumbbells in confined geometries. 2. Time-dependent shear flow (Park) **18** (1985) 111
Bifurcation phenomena of generalized Newtonian fluids in curved rectangular ducts (Shanthini) **22** (1986) 35
Direct velocity gradient measurements using a dual-point laser-Doppler anemometer (Brunn) **22** (1987) 381
Wall effects in simple shear of dilute polymer solution: exact results for very narrow and very wide channels (Brunn) **24** (1987) 343
Numerical simulation of the non-isothermal flow of a nonlinear viscoelastic fluid in a rectangular channel (Nikoleris) **31** (1989) 193
Curing-oligomers movement with wall sliding in a round channel (Vaganov) **34** (1990) 1
Secondary flows in straight ducts of rectangular cross section (Gervang) **39** (1991) 217
Anisotropic channel flow of fibre suspensions (Altan) **42** (1992) 65
Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation (Park) **52** (1994) 69
Symbolic evaluation of the Ericksen–Leslie equations in the computational domain **52** (1994) 309
Weakly nonlinear behaviour of periodic disturbances in two-layer plane channel flow of upper-convected Maxwell liquids (Renardy) **56** (1995) 101
An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a

converging/diverging channel geometry (Khomami) **58** (1995) 47
A tentative approach to the direct simulation of drag reduction by polymers (Orlandi) **60** (1995) 277

Channels
Rheodynamics of nonlinear viscoplastic media (Bukhman) **10** (1982) 215
Hyperbolicity and change of type in the flow of viscoelastic fluids through channels (Yoo) **19** (1985) 15
Use of boundary-fitted curvilinear coordinates for the numerical simulation of complex viscoelastic flows (Papathanasiou) **37** (1990) 139
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 2. Observations of non-Newtonian behaviour (Davidson) **49** (1993) 345

Chaotic behaviour
Chaos and overstability in the thermal convection of viscoelastic fluids (Khayat) **53** (1994) 227

Change of type
Hyperbolicity and change of type in the flow of viscoelastic fluids through channels (Yoo) **19** (1985) 15
Change of type and loss of evolution in the flow of viscoelastic fluids (Joseph) **20** (1986) 117
Hyperbolicity and change of type in the flow of viscoelastic fluids through pipes (Ahrens) **24** (1987) 67
Anomalous elongational flows and change of type (Joseph) **28** (1988) 47
Numerical simulation and change in type in the developing flow of a nonlinear viscoelastic fluid (Gaidos) **29** (1988) 59
Similarity solutions that give rise to hyperbolicity and change of type in steady flow of a viscoelastic fluid (Verdier) **31** (1989) 301
Change of type and loss of evolution of the White–Metzner model (Verdier) **31** (1989) 325
Numerical prediction of anomalous transport properties in viscoelastic flow (Delvaux) **37** (1990) 297
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
Hyperbolicity and change of type in steady co-extrusion flow of upper convected Maxwell fluids (Chen) **47** (1993) 157
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 1. Experimental methods and straight channel validations (Davidson) **49** (1993) 317
Entry flow of fibre suspensions in a straight channel (Tang) **56** (1995) 183
Modelling and computation of the onset of failure in polymeric liquid filaments (Wang) **58** (1995) 97
An experimental investigation of the flow of dilute polymer solutions through corrugated channels (Yalamanchili) **58** (1995) 243
Higher order finite element techniques for viscoelastic flow problems with change of type and singularities (Talwar) **59** (1995) 49

Charged colloidal plates
Brownian dynamics simulations of a 2-D suspension of charged colloidal plates under shear (Sherwood) **43** (1992) 195

Classification
Objective and generally applicable criteria for flow classification (Astarita) **6** (1979) 69
Comments on "Objective and generally applicable criteria for flow

classification", by G. Astarita (Huilgol) **7** (1980) 91
Reply to R.R. Huilgol (Astarita) **7** (1980) 97
Multiaxial elongational flows of polymer melts — classification and experimental realization (Meissner) **11** (1982) 221

Clausius–Duhem inequality
A rate-dependent thermodynamical model for rapid granular flows (Ahmadi) **35** (1990) 15

Clay
Brownian dynamics simulations of a 2-D suspension of charged colloidal plates under shear **43** (1992) 195

Climbing constant
Climbing constant, second-order correction of Trouton's viscosity, wave speed and delayed die swell for M1 (Hu) **35** (1990) 287

Coalescence
Motion and coalescence of gas bubbles in non-Newtonian polymer solutions (De Kee) **37** (1990) 1

Coating flows
Free coating of viscoelastic and viscoplastic fluids onto a vertical surface (Adachi) **3** (1978) 331
Roll coating operations (Benkreira) **14** (1984) 377
Separating forces in blade coating of viscous and viscoelastic liquids (Hsu) **18** (1985) 273
Film thickness in blade coating of viscous and viscoelastic liquids (Sullivan) **21** (1986) 13
Spin coating of non-Newtonian fluids (Lawrence) **39** (1991) 137
A solver for time dependent viscoelastic fluid flows (Olsson) **51** (1994) 309
Classification and analyses of coating flows (Benkreira) **54** (1994) 437
Viscoelastic free surface flows: spin coating and dynamic contact lines (Spaid) **55** (1994) 249

Coefficient of diffusivity
On the existence of an anomalously high dissolution rate in films of non-Newtonian liquids with short contact times (Peev) **8** (1981) 319

Coefficient of discharge
Theoretical and experimental studies on the coefficient of discharge and spray cone angle of a swirl spray pressure nozzle using a power-law non-Newtonian fluid (Som) **12** (1983) 39

Coexistence of shear and extension
A phenomenological viscosity model for polymeric fluid (Song) **53** (1994) 151

Coextrusion
Fracture of ultrafine fibres in the flow of mixtures of non-Newtonian polymer melts (Tsebrenko) **31** (1989) 1
Interfacial instability due to elastic stratification in concentric coextrusion of two viscoelastic fluids (Chen) **40** (1991) 155
Stability of coextrusion through converging dies (Anturkar) **41** (1991) 1
The instability mechanism for two elastic liquids being coextruded (Hinch) **43** (1992) 311
An experimental investigation of interfacial instabilities in multilayer flow of viscoelastic fluids. 1. Incompatible polymer systems (Wilson) **45** (1992) 355
Hyperbolicity and change of type in steady coextrusion flow of upper convected Maxwell fluids (Chen) **47** (1993) 157

Cole–Cole domains
Decomposition of mechanical spectra into elementary Cole-Cole domains: application to the viscoelastic behaviour of a styrene-butadiene-styrene block copolymer (Diogo) **23** (1987) 435

Colloidal systems
Dynamics of colloidal particles in sheared, non-Newtonian fluids (Johnson) **34** (1990) 89
Brownian dynamics simulations of model hard-sphere suspensions (Heyes) **46** (1993) 1

Compatibility conditions
Remarks on nearly extensional flows (Huilgol) **8** (1981) 169

Complex flows
Developments in non-Newtonian fluid mechanics — A personal view (Walters) **5** (1979) 113
Complex flow of viscoelastic fluids through oscillating pipes. Interesting effects and applications (Mena) **5** (1979) 427
Extensional effects in complex flows (Debbaut) **30** (1988) 169
Numerical simulations of the flow of liquid-crystalline polymers between parallel plates containing a cylinder (Mori) **56** (1995) 85
On the simulation of highly elastic complex flows (Baloch) **59** (1995) 111

Complex fluids
The behaviour of complex fluids at solid boundaries (Schowalter) **29** (1988) 25
Cone-and-plate rheometry of yield stress fluids. Study of an aqueous gel (Magnin) **36** (1990) 85
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267

Complex geometries
Long range memory effects in flows involving abrupt changes in geometry. 1. Flows associated with L-shaped and T-shaped geometries (Perera) **2** (1977) 49
Long range memory effects in flows involving abrupt changes in geometry. 2. The expansion/contraction/expansion problem (Perera) **2** (1977) 191
Long range memory effects in flows involving abrupt changes in geometry. 3. Moving boundaries (Davies) **4** (1979) 325
Long range memory effects in flows involving abrupt changes in geometry. 4. Numerical simulation using integral rheological models (Court) **8** (1981) 95
Computer modelling of flows of elastic liquids through complex vessels and with forced convection (Richards) **10** (1982) 175
Flow of Bingham fluids in complex geometries (Lipscomb) **14** (1984) 337
Implications of boundary singularities in complex geometries (Lipscomb) **24** (1987) 85
The flow of fibre suspensions in complex geometries (Lipscomb) **26** (1988) 297
Co-current axisymmetric flow in complex geometries: experiments (Van de Griend) **32** (1989) 229
Co-current axisymmetric flow in complex geometries: numerical simulation (Musarra) **32** (1989) 253

Complex modulus
Fourier transform mechanical spectroscopy of viscoelastic materials with transient structure (Holly) **27** (1988) 17

Complex variable techniques
On the use of complex variables in the analysis of flows of an elastic fluid (Coleman) **15** (1984) 227
The use of the vane to measure the shear modulus of linear elastic solids (Sherwood) **41** (1991) 101

Complex viscosity
Rimming flow of a viscoelastic liquid inside a rotating horizontal cylinder (Sanders) **9** (1981) 269
Investigation of a new complex viscosity model (De Kee) **26** (1987) 149
Complex viscosity predictions for the S1 fluid using harmonic analysis on applied non-sinusoidal stress waveforms (Davies) **52** (1994) 177

Composite
On the squeezing flow of a fibre-reinforced fluid (Coleman) **37** (1990) 379

Composite overlapping grids
A solver for time dependent viscoelastic fluid flows (Olsson) **51** (1994) 309

Compressible fluids
Drift function tracking with compressibility and variable temperature (Bernstein) **20** (1986) 299
Dynamics of non-Newtonian fluid interfaces in a porous medium: compressible fluids (Pascal) **28** (1988) 227
Remarks concerning compressible viscoelastic fluid models (Edwards) **36** (1990) 411

Compression molding
Flow and heat transfer in compression mold filling (Lee) **24** (1987) 245
Boundary integral equations for analyzing the flow of a chopped fibre reinforced polymer compound in compression molding (Barone) **26** (1987) 185
General results on the flow of chopped fibre compounds in compression molding (Caulk) **28** (1988) 333
Flow regimes for fibre suspensions in narrow gaps (Tucker III) **39** (1991) 239

Compressive flow
Compressive flow between parallel disks. 1. Newtonian fluid with a transverse viscosity gradient (Lee) **10** (1982) 3
Compressive flow between parallel disks. 2. Oscillatory behaviour of viscoelastic materials under a constant load (Lee) **14** (1984) 301
Compressive flow of the fluid M1 (Rajaiah) **35** (1990) 413
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269

Computational molecular rheology
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303
Microscopic and mesoscopic results from non-equilibrium molecular dynamics modelling of FENE dumbbell liquids (Dlugogorski) **49** (1993) 23

Computer modelling
Computer modelling of flows of elastic liquids through complex vessels and with forced convection (Richards) **10** (1982) 175
Computer simulation of an electrorheological fluid (Whittle) **37** (1990) 233

Computer modelling of transient thermal flows of non-Newtonian fluids (Ding) **47** (1993) 239

Concentration gradients
Inhomogeneous flows of non-Newtonian fluids: generation of spatial concentration gradients (Metzner) **5** (1979) 449

Concentric annulus
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19

Cone
On the converging flow of viscoelastic fluids through cones and wedges (Hull) **14** (1984) 219

Cone-and-plate flow
Relaxation of normal and shear stresses after a sudden shear strain in the cone-and-plate experiment using the rheometrics mechanical spectrometer (Pedersen) **3** (1978) 379
The measurement of rapidly changing shear stresses during transient experiments using cone-and-plate rheometry (Attane) **6** (1980) 269
Relaxation of shear and normal stress components in step-strain experiments (Vrentas) **9** (1981) 339
The dependence of viscoelastic flow properties on the structure for styrene-butadiene copolymers (Ramachandran) **13** (1983) 21
Cone-and-plate flow of the Oldroyd-B fluid is unstable (Phan-Thien) **17** (1985) 37
Observations on the elastic instability in cone-and-plate and parallel-plate flows of a polyisobutylene Boger fluid (McKinley) **40** (1991) 201
Secondary flows in cone-and-plate flow of an Oldroyd-B fluid (Olagunju) **46** (1993) 29
Linear stability analysis of cone-and-plate flow of an Oldroyd-B fluid (Olagunju) **47** (1993) 93
Flow in the misaligned cone-and-plate rheometer (Dudgeon) **48** (1993) 21
Asymptotic analysis of the finite cone-and-plate flow of a non-Newtonian fluid (Olagunju) **50** (1993) 289
Flow in the misaligned cone-and-plate rheometer (vol 48, pg 21, 1993) (Dudgeon) **52** (1994) 99
Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multi-mode Giesekus model (Öztekin) **54** (1994) 351
Use of the finite element modelling technique for the improvement of viscometry results obtained by cone-and-plate rheometers (Petera) **58** (1995) 1

Configuration tensor
A simple constitutive equation for polymer fluids based on the concept of deformation-dependent tensorial mobility (Giesekus) **11** (1982) 69
On configuration-dependent generalized Oldroyd derivatives (Giesekus) **14** (1984) 47
A sufficient condition for a positive definite configuration tensor in differential models (Hulsen) **38** (1990) 93
Steady Poiseuille flows for a Giesekus fluid (Schleiniger) **40** (1991) 79
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323
A lower bound for the invariants of the configuration tensor for some well-known differential models (Wapperom) **60** (1995) 349

Configuration-dependent derivative
On configuration-dependent generalized Oldroyd derivatives (Giesekus) **14** (1984) 47

Conformation tensor model
Conformation tensor rheological models (Grmela) **23** (1987) 271
Simulation of viscoelastic flows using a conformation tensor model (Guénette) **45** (1992) 187

Conical flow
Rapid conical flows of viscoelastic solutions (Oliver) **16** (1984) 267

Conservation equations
Numerical modelling of viscoelastic liquids using a finite-volume method (Darwish) **45** (1992) 311

Constant stress rheometer
A simple constant-stress rheometer (van den Brule) **43** (1992) 127

Constitutive equation
A non-linear viscoelastic model with structure-dependent relaxation times. 1. Basic formulation (Acierno) **1** (1976) 125
Experimental study of the rheological properties of butadiene-styrene gum elastomers and compounds (Furuta) **1** (1976) 207
The prediction of time-dependent non-linear stresses in viscoelastic materials. 1.
Selection of constitutive equation and strain measure (Phillips) **2** (1977) 109
A model for viscoelastic fluid behaviour which allows non-affine deformation (Johnson) **2** (1977) 255
A new constitutive equation derived from network theory (Phan-Thien) **2** (1977) 353
Testing thermodynamic constitutive equations for polymers by adiabatic deformation experiments (Sarti) **3** (1977/1978) 65
The maximum amplitude of strain for the validity of linear viscoelasticity (Astarita) **3** (1977/1978) 281
The Langevin approach to the dumbbell kinetic problem in rheology (Phan-Thien) **3** (1978) 309
A constitutive analysis of uniaxial elongational flow data of a low-density polyethylene melt (Wagner) **4** (1978) 39
Viscoelastic properties in plane squeeze-film flows (Zahorski) **4** (1978) 217
On co-rotational and other rate type constitutive equations (Huilgol) **4** (1978) 269
A note on Harnoy's equations of state (Astin) **4** (1979) 359
Some useful constitutive models with a kinematic slip hypothesis (Tanner) **5** (1979) 103
Three alternative approaches to development of constitutive equations (Astarita) **5** (1979) 125
Thixotropy — A general review (Mewis) **6** (1979) 1
Non-isothermal rheology of polymers and its significance in polymer processing (Pearson) **6** (1979) 81
A constitutive equation derived from Lodge's network theory (De Kee) **6** (1979) 127
A finite-element/finite-difference simulation of the injection molding filling process (Hieber) **7** (1980) 1
Some relations and tests on a constitutive equation with a factorized memory function (Menezes) **7** (1980) 45
Flow of a liquid with an anisotropic viscosity tensor: inertial effects (Duffy) **7** (1980) 107

Polymer solution rheology based on a finitely extensible bead–spring chain model (Bird) **7** (1980) 213
Flow of a liquid with an anisotropic viscosity tensor: some axisymmetric flows (Duffy) **7** (1980) 359
A phenomenological theory for elastic fluids (Dashner) **8** (1981) 59
Infinitesimal perturbations of extensional motions (Powell) **8** (1981) 139
Derivation of the Marrucci model from transient network theory (Jongschaap) **8** (1981) 183
Approximate constitutive equations for slow flow of rigid plastic viscoelastic fluids (White) **8** (1981) 195
Flow of a liquid with an anisotropic viscosity tensor: a skew initial orientation (Duffy) **8** (1981) 213
Motion induced by a waving plate (Sturges) **8** (1981) 357
Flow of a liquid with an anisotropic viscosity tensor: elongational flow (Duffy) **9** (1981) 1
A constitutive equation for polymer liquids: application to shear flow (De Cleyn) **9** (1981) 91
A corotational time derivative for surface tensors, constitutive relations and a new measure of bending strain (Waxman) **9** (1981) 235
Constitutive equations for polymer melts predicted by the Doi–Edwards and Curtiss–Bird kinetic theory models (Currie) **11** (1982) 53
A simple constitutive equation for polymer fluids based on the concept of deformation-dependent tensorial mobility (Giesekus) **11** (1982) 69
Finite element simulation of die swell for a Maxwell fluid (Caswell) **12** (1983) 13
Constitutive equations based on the transient network concept (Mewis) **12** (1983) 69
The characterization of polymer melts in a theory for elastic fluids (Dashner) **12** (1983) 375
An encapsulated dumbbell model for concentrated polymer solutions and melts. 1. Theoretical development and constitutive equation (Bird) **13** (1983) 149
Convection and diffusion of polymer network strands (Larson) **13** (1983) 279
An approach to non-Newtonian fluid mechanics (Oldroyd) **14** (1984) 9
A classification of constitutive equations based on stress relaxation predictions for the single-jump shear strain experiment (Lodge) **14** (1984) 67
Predicted effect of polydispersity on rodlike polymer behaviour in concentrated solutions (Marrucci) **14** (1984) 103
A theory of thixotropic plastic viscoelastic fluids with a time-dependent yield surface and its comparison to transient and steady state experiments on small particle filled polymer melts (Suetsugu) **14** (1984) 121
Transverse effects in shear flow of certain isotropic liquids (Leslie) **14** (1984) 161
Theory of dilute polymer solutions in viscoelastic fluid with a single relaxation time (Volkov) **15** (1984) 29
Stability of extensional flows and extending viscoelastic fluid sheets (Shifang) **15** (1984) 181
Bubble growth and collapse in viscoelastic liquids analyzed (Papanastasiou) **16** (1984) 53
On the use of boundary integral methods in the analysis of non-Newtonian fluid flow (Coleman) **16** (1984) 347
Finite element simulation of viscoelastic fluids of the integral type (Dupont) **17** (1985) 157

Constitutive equations for polymer fluids based on the concept of configuration-dependent molecular mobility: a generalized mean-configuration model (Giesekus) **17** (1985) 349
The viscoelastic Ekman layer (Horwitz) **18** (1985) 87
Rheological properties of some polyolefine melts in transient uniaxial elongational flow, described with a special type of constitutive equation (Leblans) **19** (1985) 185
Historical perspectives on the elasticity of liquids (Joseph) **19** (1986) 237
A streamline element scheme for solving viscoelastic flow problems. 1. Differential constitutive equations (Luo) **21** (1986) 179
Thermal convection in a viscoelastic liquid (Rosenblat) **21** (1986) 201
The Doi-Edwards model without independent alignment (Marrucci) **21** (1986) 329
A streamline element scheme for solving viscoelastic flow problems. 2. Integral constitutive models (Luo) **22** (1986) 61
A finite element method for liquid with memory (Papanastasiou) **22** (1987) 271
Ideas about reptation, tube renewal and tube relaxation applied to the description of the non-linear viscoelastic behaviour in shear of some polydisperse polyethylene melts (Booij) **23** (1987) 189
A critical comparison of constitutive equations for polymer melts (Larson) **23** (1987) 249
Unsteady shear flow of nonlinear viscoelastic fluids with finite elements (Bohme) **23** (1987) 321
Convected derivatives for differential constitutive equations (Larson) **24** (1987) 331
On a class of constitutive equations for viscoelastic liquids (Leonov) **25** (1987) 1
New type of equation for the relation between viscosity and particle content in suspensions (Yao) **25** (1987) 197
Stokes' first problem for viscoelastic fluids (Preziosi) **25** (1987) 239
Experimental estimation of elongational stresses of dilute polymer solutions and a related examination of some constitutive equations (Hasegawa) **27** (1988) 133
An extended thermodynamic approach to non-Newtonian fluids and related results in Marangoni instability problem (Lebon) **28** (1988) 61
Do we understand the physics in the constitutive equation ? (Rallison) **29** (1988) 37
A constitutive equation for a dilute solution of Hookean dumbbells with approximate hydrodynamic interaction (Wedgewood) **30** (1988) 21
Prediction of polymer melt extrudate swell using a differential constitutive model (Bush) **31** (1989) 179
Analysis of plane extrudate swell of highly elastic liquids with molecular constitutive equations (Wesson) **32** (1989) 157
Limitation on the use of the retarded motion expansion (Hassager) **34** (1990) 241
Modelling of fluid M1 using multiple-relaxation-time constitutive equations (Chai) **35** (1990) 459
The effect of finite link number on reptation models (Schieber) **36** (1990) 205
Generalized constitutive equation for polymeric liquid crystals. 2. Non-homogeneous systems (Edwards) **36** (1990) 243
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265

An exact solution of a viscoelastic Ekman layer with suction (Buggisch) **36** (1990) 351
Strong flows of polymeric liquids. 1. Rheological behaviour (Yarin) **37** (1990) 113
On the inertial and extensional effects on the corner and lip vortices in a circular 4:1 abrupt contraction (Debbaut) **37** (1990) 281
A sufficient condition for a positive definite configuration tensor in differential models (Hulsen) **38** (1990) 93
A two-dimensional approach to the constitutive equation of nematic polymers (Maffettone) **38** (1991) 273
Yield stress fluid. Structural model and transient shear flow behaviour (Doremus) **39** (1991) 335
Finite amplitude oscillations of viscoelastic fluids (Vrentas) **40** (1991) 1
On the comparison of simple non-monotonic constitutive equations with data showing slip of well-characterized polybutadienes (Deiber) **40** (1991) 141
Utilization of double-step shear strain experiments in the evaluation of rheological constitutive equations (Vrentas) **40** (1991) 381
A spectral domain decomposition method for the planar non-Newtonian stick–slip problem (Owens) **41** (1991) 43
A study of some numerical viscoelastic schemes (Tanner) **41** (1991) 171
Anisotropic channel flow of fibre suspensions (Altan) **42** (1992) 65
Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation (Coates) **42** (1992) 141
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323
Numerical simulation of circular entry flows of fluid M1 using an integral constitutive equation (Park) **42** (1992) 301
Evaluation of an integral constitutive equation for nonlinear viscoelasticity (Vrentas) **42** (1992) 351
Uniaxial and biaxial unsteady inflations of a viscoelastic material (Khayat) **43** (1992) 31
Numerical modelling of viscoelastic liquids using a finite-volume method (Darwish) **45** (1992) 311
A constitutive equation for monodomains of nematic polymers (Maffettone) **45** (1992) 339
Elastic free energy of an upper-convected Maxwell fluid undergoing a fully developed planar Poiseuille flow: a variational result (Ghisellini) **46** (1993) 229
Comparison of computational efficiency of flow simulations with multimode constitutive equations: integral and differential models (Rajagopalan) **46** (1993) 243
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289
Laminar, unidirectional flow of thixotropic fluid in a circular pipe (Billingham) **47** (1993) 21
On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77
On the flow past a needle in a cylindrical tube (Thien) **47** (1993) 137
A study of stress distribution in contraction flows of an LLDPE melt (Kiriakidis) **47** (1993) 339
Numerical simulation of converging flow of polymer melts through a tapered slit die (Kajiwara) **48** (1993) 111
Some properties of the upper convected Maxwell model for viscoelastic fluid (Olsson) **48** (1993) 125

Numerical analysis of start-up planar and axisymmetric contraction flows using multi-mode differential constitutive models (Baaijens) **48** (1993) 147
On the use of stress growth data to determine strain-dependent material functions for factorable K-BKZ equations (Venerus) **49** (1993) 299
On the relationship between phenomenological models for elastic-viscoplastic metals and polymeric liquids (Rubin) **50** (1993) 79
A Taylor-Petrov-Galerkin algorithm for viscoelastic flow (Carew) **50** (1993) 253
Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation (Park) **52** (1994) 69
A rheo-optical study of polydimethylsiloxane melt (Subramanian) **53** (1994) 113
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379
On suspension transport in a fracture: framework for a global model (Pearson) **54** (1994) 503
Experimental centreline planar extension of polyethylene melt flowing into a slit die (Ahmed) **56** (1995) 127
Charged network constitutive equation (Chan Man Fong) **57** (1995) 39
Flow of viscoelastic fluids past periodic square arrays of cylinders: inertial and shear thinning viscosity and elasticity effects (Talwar) **57** (1995) 177
Stability constraints in the formulation of viscoelastic constitutive equations (Kwon) **58** (1995) 25
A new mixed finite element method for viscoelastic flows governed by differential constitutive equations (Szady) **59** (1995) 215

Continuous spectrum
Linear stability analysis of viscoelastic Poiseuille flow using an Arnoldi- based orthogonalization algorithm (Sureshkumar) **56** (1995) 151

Continuum theory
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83
Flow alignment in biaxial nematic liquid crystals (Leslie) **54** (1994) 241

Contour integral approach
A contour integral approach to some cavity flows of elastic fluids (Coleman) **28** (1988) 239

Contraction flows
Influence of the contraction ratio in elongational flow of polymer solutions (Ouibrahim) **11** (1982) 341
Multiple solutions in the calculation of axisymmetric contraction flow of an upper convected Maxwell fluid (Yeh) **16** (1984) 173
Flow characteristics associated with abrupt changes in geometry in the case of highly elastic liquids (Evans) **20** (1986) 11
On the use of flow through a contraction in estimating the extensional viscosity of mobile polymer solutions (Binding) **30** (1988) 233
The shear and extensional flow properties of M1 (Binding) **35** (1990) 121
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265
On the inertial and extensional effects on the corner and lip vortices in a circular 4:1 abrupt contraction (Debbaut) **37** (1990) 281

Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183
Further considerations of axisymmetric contraction flows (Binding) **41** (1991) 27
Simulation of viscoelastic flows using a conformation tensor model (Guénette) **45** (1992) 187
Spatially resolved birefringence studies of planar entry flow (Galante) **47** (1993) 289
Numerical analysis of start-up planar and axisymmetric contraction flows using multi-mode differential constitutive models (Baaijens) **48** (1993) 147

Contractions

Plane flow of a fluid of second grade through a contraction (Crochet) **1** (1976) 247
Long range memory effects in flows involving abrupt changes in geometry. 2. The expansion/contraction/expansion problem (Perera) **2** (1977) 191
Entry flow behaviour of viscoelastic fluids in an annulus (Tan) **3** (1977/1978) 25
The roles of inertia and shear thinning in flow of an inelastic liquid through an axisymmetric sudden contraction (Kim-E) **13** (1983) 341
Numerical simulation of the flow of a viscoelastic fluid through an abrupt contraction (Keunings) **14** (1984) 279
Reflections on the numerical viscoelastic flow problem (Josse) **16** (1984) 13
Numerical simulations of viscoelastic flow: the effect of mesh size (Davies) **16** (1984) 117
Further results on the flow of a viscoelastic fluid through an abrupt contraction (Debbaut) **20** (1986) 173
On the high Weissenberg number problem (Keunings) **20** (1986) 209
Numerical simulation of viscoelastic flow through a sudden contraction using a type dependent difference method (Song) **24** (1987) 221
Entry flow of semi-rigid rod solutions (Binnington) **26** (1987) 115
An approximate analysis for contraction and converging flows (Binding) **27** (1988) 173
The vortex growth of a K-BKZ fluid in an abrupt contraction (Dupont) **29** (1988) 81
Numerical simulation of highly viscoelastic flows through an abrupt contraction (Debbaut) **29** (1988) 119
Further results on the flow of a Maxwell fluid through an abrupt contraction (Rosenberg) **29** (1988) 295
A numerical solution for the flow of dilute fibre suspensions through an axisymmetric contraction (Chiba) **35** (1990) 1
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265
A finite element procedure coupled with the method of characteristics for simulation of viscoelastic fluid flow (El Hadj) **36** (1990) 333
On the inertial and extensional effects on the corner and lip vortices in a circular abrupt contraction (Debbaut) **37** (1990) 281
Flows of viscoelastic fluids treated by the method of characteristics (Basombrío) **39** (1991) 17
Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation (Coates) **42** (1992) 141
Visualization of the flow of linear low density polyethylene/low density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
Viscoelastic flow simulation using cubic stress finite elements (Rao) **43** (1992) 61

On viscoelastic flows through abrupt contractions (Boger) **44** (1992) 267
Steady flow of a White–Metzner fluid in a 2-D abrupt contraction: computation and experiments (Maders) **45** (1992) 63
Calculation of main flows of a memory-integral fluid in an axisymmetric contraction at high Weissenberg numbers (Clermont) **46** (1993) 89
Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modelling (Saramito) **52** (1994) 263
Visualization of the flow of low density polyethylene/polystyrene blends through a planar step contraction (Tremblay) **52** (1994) 323
Extensional effects in flows through contractions with abrupt or rounded corners (Baloch) **54** (1994) 285
A finite volume approach for calculation of viscoelastic flow through an abrupt axisymmetric contraction (Sasmal) **56** (1995) 15

Convected coordinates
Viscoelastic properties in plane squeeze-film flows (Zahorski) **4** (1978) 217
Convected coordinates and elongational flow (Kaye) **40** (1991) 55

Convected derivatives
Physical constants of flowing continuum (Oldroyd) **5** (1979) 141
Measures of deformation and convected derivatives (Petrie) **5** (1979) 147
Convected derivatives for differential constitutive equations (Larson) **24** (1987) 331

Convection
Convection and diffusion of polymer network strands (Larson) **13** (1983) 279
Convection and overstability in a viscoelastic fluid layer (Stastna) **18** (1985) 61
Thermal convection in a viscoelastic liquid (Rosenblat) **21** (1986) 201
On the convected linear stability of a viscoelastic Oldroyd-B fluid heated from below (Kolkka) **25** (1987) 209
Transient free convection from a vertical plate to a non-Newtonian fluid in a porous medium (Haq) **36** (1990) 395
Numerical simulation of thermal convection with Maxwellian viscoelasticity (Harder) **39** (1991) 67
Non-linear overstability in the thermal convection of viscoelastic fluids (Khayat) **58** (1995) 331

Convergence
One dimensional finite element solutions for a Maxwell fluid (Gartling) **17** (1985) 203
On the convergence of the streamline-upwind mixed finite element (Crochet) **34** (1990) 261
A convergence study for the numerical simulation of the IUPAC–LDPE extrusion experiments (Barakos) **58** (1995) 315

Converging flows
Converging flow of a viscoelastic liquid (Black) **1** (1976) 83
Converging flow and stretching flow: a compilation (Cogswell) **4** (1978) 23
Converging radial flow of dilute polymer solutions (Amadou) **4** (1978) 229
Theoretical and experimental study of a viscoelastic fluid in the converging region of a pipe (Clermont) **5** (1979) 387
Non-isothermal developing flow of a generalized power-law fluid in a tapered tube (Jarzębski) **8** (1981) 239

Flow of dilute polymer solutions through converging channels (James) **11** (1982) 317
Non-isothermal developing flow of a power-law fluid in a converging slit (Jarzębski) **12** (1983) 1
On the converging flow of viscoelastic fluids through cones and wedges (Hull) **14** (1984) 219
On the converging flow of generalized Newtonian fluids (Ghoneim) **15** (1984) 375
Stability of coextrusion through converging dies (Anturkar) **41** (1991) 1
The converging flow rheometer reconsidered: an example of flow with dominating extension (Zahorski) **41** (1992) 309
A rheo-optical study of polydimethylsiloxane melt (Subramanian) **53** (1994) 113

Core-annular flow
The instability mechanism for two elastic liquids being co-extruded (Hinch) **43** (1992) 311

Cork flows
The different capillary flow regimes of entangled polydimethylsiloxane polymers: macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
Measurement and modelling of friction in polymer melts during macroscopic slip at the wall (Piau) **54** (1994) 121

Corner flows
Corner flow of a suspension of rigid rods (Keiller) **40** (1991) 323
Some boundary value problems for the Bingham model (Atkinson) **41** (1992) 339
The flow of an Oldroyd fluid around a sharp corner (Hinch) **50** (1993) 161
On corner flows of Oldroyd-B fluids (Davies) **50** (1993) 173
Extensional effects in flows through contractions with abrupt or rounded corners (Baloch) **54** (1994) 285
A matched solution for corner flow of the upper convected Maxwell fluid (Renardy) **58** (1995) 83

Corotational rheological models
On co-rotational and other rate type constitutive equations (Huilgol) **4** (1978) 269
Re-entrant corner singularities in non-Newtonian flow. 1. Theory (Davies) **29** (1988) 269
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57

Corotational time derivative
A corotational time derivative for surface tensors, constitutive relations and a new measure of bending strain (Waxman) **9** (1981) 235

Couette flow
Long range memory effects in flows involving abrupt changes in geometry. 3. Moving boundaries (Davies) **4** (1979) 325
Molecular models and the Taylor stability of dilute polymer solutions (Lhuillier) **9** (1981) 329
Theoretical investigation of the Pieranski–Guyon instability in Couette flow of nematic liquid crystals (Barratt) **11** (1982) 23
The stability of two stratified power-law liquids in Couette flow (Waters) **12** (1983) 85
Unsteady-state development of plane Couette flow for viscoelastic fluids (Mochimaru) **12** (1983) 135
Marangoni effect in the Couette flow (Buggisch) **15** (1984) 1

Some experimental results on the development of Couette flow for non-Newtonian fluids (Chow) **17** (1985) 233
Instability of plane Couette flow of viscoelastic liquids (Akbay) **18** (1985) 123
Stability of plane Poiseuille and Couette flow of a Maxwell fluid (Lee) **21** (1986) 65
Linear stability of plane Couette flow of an upper convected Maxwell fluid (Renardy) **22** (1986) 23
Rheological properties via nonequilibrium molecular dynamics: from simple towards polymeric liquids (Hess) **23** (1987) 305
The stability of two stratified non-Newtonian liquids in Couette flow (Waters) **24** (1987) 161
The spatial development of transient Couette flow and shear wave propagation in polymeric liquids by flow birefringence (Lee) **26** (1987) 57
The effect of weak elasticity on Couette flow between rotating cylinders: (1) spiral flow; (2) eccentric cylinders (Jones) **28** (1988) 255
Stability of the interface in two-layer Couette flow of upper convected Maxwell liquids (Renardy) **28** (1988) 99
Stability of shear flows of viscoelastic fluids under perturbations perpendicular to the plane of flow (Renardy) **32** (1989) 145
Transient processes in Couette flow of a Leonov fluid influenced by dissipation (Braun) **33** (1989) 39
Shear wave propagation after stepwise increase of shear rate (Lee) **39** (1991) 1
Elastic instability of the interface in Couette flow of viscoelastic liquids (Chen) **40** (1991) 261
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83
The stability of inelastic non-Newtonian fluids in Couette flow between concentric cylinders: a finite-element study (Lockett) **43** (1992) 165
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303
A note on the viscoelastic instability of circular-Couette flow (Proctor) **51** (1994) 227

Couette–Poiseuille flow
Weakly nonlinear behaviour of periodic disturbances in two-layer plane channel flow of upper-convected Maxwell liquids (Renardy) **56** (1995) 101

Cox–Merz rule
Viscoelastic properties of physically cross-linked networks. 2. Dynamic mechanical moduli (Tanaka) **43** (1992) 273

Creep
Converging flow of a viscoelastic liquid (Black) **1** (1976) 83
The non-Newtonian creeping flow around a rotating spheroidal spindle (Wein) **1** (1976) 357
A non-linear viscoelastic model with structure-dependent relaxation times. 3. Comparison with l.d. polyethylene creep and recoil data (Acierno) **2** (1977) 271
Variational principles and entropy production in creeping flow of

non-Newtonian fluids (Astarita) **2** (1977) 343
The end correction for power-law fluids in the capillary rheometer (Boger) **4** (1978) 239
The influence of fluid elasticity on the drag coefficient for creeping flow around a sphere (Chhabra) **6** (1980) 187
The swelling of plane extrudates at low Weissenberg numbers (Tanner) **7** (1980) 265
Elastic recovery occurring in step-change tests (Citroen) **10** (1982) 257
Stretching the Phan-Thien–Tanner model: stress growth and creep (Missaghi) **11** (1982) 283
Drag coefficients of a slowly moving sphere in non-Newtonian fluids (Cho) **12** (1983) 243
Some remarks on "Drag coefficients of a slowly moving sphere in non-Newtonian fluids" (Chhabra) **13** (1983) 225
Reply to Chhabra's remarks (Cho) **13** (1983) 229
Extensional flows of Oldroyd fluids (Petrie) **14** (1984) 189
On the creeping flow of the second-order fluid (Rajagopal) **15** (1984) 239
Boundary conditions at inflow and outflow planes (Vrentas) **19** (1985) 1
Re-entrant corner singularities in non-Newtonian flow. 1. Theory (Davies) **29** (1988) 269
Further results on the flow of a Maxwell fluid through an abrupt contraction (Rosenberg) **29** (1988) 295
Creeping flow of dilute polymer solutions past cylinders and spheres (Chilcott) **29** (1988) 381
Creeping motion of spheres in fluid M1 (Tirtaatmadja) **35** (1990) 327
High-Deborah-number flow of a dilute polymer solution past a sphere falling along the axis of a cylindrical tube (Harlen) **37** (1990) 157
Wall effect for spheres falling at small Reynolds number in a viscoplastic medium (Atapattu) **38** (1990) 31
Some boundary value problems for the Bingham model (Atkinson) **41** (1992) 339
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
The effect of viscoelasticity on the translation of a surfactant covered Newtonian drop (Quintana) **45** (1992) 81
Creeping flow regimes of low concentration polymer solutions in thick solvents through an orifice die (Cartalos) **45** (1992) 231
Investigations of the rheological behaviour of rubber carbon-black compounds over a wide range of stresses including very low stresses (Osanaiye) **49** (1993) 87
Stokes paradox for power-law flow around a cylinder (Tanner) **50** (1993) 217
Application of spectral elements to viscoelastic creeping flows (Van Kemenade) **51** (1994) 277

Cross model

Relation between some rheological properties of polysiobutylene solutions and their mode of preparation (Khalil) **52** (1994) 375

Cross-slot cell

Effect of polymer additives on ordered three-dimensional structures arising in cross-slot flow (Kalashnikov) **48** (1993) 215

Cross-wind diffusion
Simulation of director orientation of liquid crystalline polymers in 2-D flows **55** (1994) 1

Crossflow permeability
Crossflow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309

Crouzeix–Raviart triangular element
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283

Crystallization
The Stefan problem in polymer processing: theory and experimentation (Janeschitz-Kriegl) **23** (1987) 107
The mechanisms of neck-like deformation in high-speed melt spinning. 2. Effects of polymer crystallization (Ziabicki) **30** (1988) 157

Curing
Curing-oligomers movement with wall sliding in a round channel (Vaganov) **34** (1990) 1
Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip (Malkin) **39** (1991) 55
Flow with impregnation of a rheokinetic liquid (Malkin) **54** (1994) 489

Currie fluid
A numerical study of the flow of a K-BKZ fluid between plates rotating about non-coincident axes (Dai) **38** (1991) 289

Curtis–Bird theory
A kinetic theory for polymer melts. 6. Calculation of additional material functions (Fan) **15** (1984) 341
Flow of a Curtiss–Bird fluid over a transverse slot using the finite element drift-function method (Malkus) **16** (1984) 77
Non-isothermal flow of polymer melts (Wiest) **27** (1988) 333
An extension of the Curtiss–Bird theory for the rheological properties of concentrated polymer solutions and melts (Geurts) **28** (1988) 319

Cyclohexane
Effect of solvent on polymer degradation in turbulent flow (Moussa) **48** (1993) 261

Cylinders
Elastico-viscous flow around a circular cylinder executing small amplitude, high frequency oscillations (James) **2** (1977) 99
Some recent results on the flow of non-Newtonian fluids (Rivlin) **5** (1979) 79
Secondary flow in the neighbourhood of a cylinder oscillating in a viscoelastic fluid (Chang) **6** (1979) 47
Flow of dilute polymer solutions around circular cylinders (Koniuta) **7** (1980) 101
Superposition of longitudinal and plane flows of a non-Newtonian fluid between eccentric cylinders (Kazakia) **8** (1981) 311
On the slow flow of viscoelastic liquids past a circular cylinder (Manero) **9** (1981) 379
Multiaxial elongational flow of sheets and annular cylinders: growth of disturbances (Minoshima) **11** (1982) 127
Linear stability of flow of viscoelastic fluid between eccentric rotating cylinders (Zhang) **11** (1982) 201
External near-contact of sliding cylinders: polymer solutions give

increased load and reduced friction coefficient (Oliver) **12** (1983) 269
Perturbation theory for viscoelastic fluids between eccentric rotating cylinders (Beris) **13** (1983) 109
Free surface on a simple fluid between rotating eccentric cylinders. 1. Analytical solution (Siginer) **15** (1984) 93
Free surface on a simple fluid between rotating eccentric cylinders. 2. Experiments (Siginer) **15** (1984) 109
Finite element calculation of viscoelastic flow in a journal bearing. 1. Small eccentricities (Beris) **16** (1984) 141
Effect of polymeric additives on cavitation and radiated noise in water flowing past a circular cylinder (Reitzer) **18** (1985) 71
The effect of weak elasticity on Couette flow between rotating cylinders: (1) spiral flow; (2) eccentric cylinders (Jones) **28** (1988) 255
Creeping flow of dilute polymer solutions past cylinders and spheres (Chilcott) **29** (1988) 381
The hydrodynamics of a bent cylinder in a viscoelastic fluid (Kim) **33** (1989) 219
Cross-flow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Finite element calculation of time-dependent two-dimensional viscoelastic flow with the explicitly elliptic momentum equation formulation (Northey) **36** (1990) 109
Calculation of steady viscoelastic flow using a multimode Maxwell model: application of the explicitly elliptic momentum equation (EEME) formulation (Rajagopalan) **36** (1990) 135
Finite element methods for calculation of steady, viscoelastic flow using constitutive equations with a Newtonian viscosity (Rajagopalan) **36** (1990) 159
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
Newtonian and non-Newtonian flow in a channel obstructed by an antisymmetric array of cylinders (Georgiou) **40** (1991) 231
The stability of inelastic non-Newtonian fluids in Couette flow between concentric cylinders: a finite-element study (Lockett) **43** (1992) 165
Elastic instability in crossflow of polymer solutions through periodic arrays of cylinders **48** (1993) 285
Stokes paradox for power-law flow around a cylinder (Tanner) **50** (1993) 217
A note on selection of spaces in computation of viscoelastic flows using the *hp*-finite element method (Talwar) **52** (1994) 293
Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders (Davies) **54** (1994) 331
Flow of viscoelastic fluids past periodic square arrays of cylinders: inertial and shear thinning viscosity and elasticity effects (Talwar) **57** (1995) 177
Wall effects on the flow of viscoelastic fluids around a circular cylinder (Huang) **60** (1995) 179

D

Damping

Nonlinear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247
Electrorheological fluids applied to an automotive engine mount (Williams) **47** (1993) 221

On the use of stress growth data to determine strain-dependent material functions for factorable K-BKZ equations (Venerus) **49** (1993) 299
A simple empirical model describing the steady state shear viscosity and its use in the prediction of the first normal stress function in shear flow (Seo) **51** (1994) 179
Rheological characterization of the time and strain dependence for polyisobutylene solutions (Liang) **52** (1994) 387

Deborah number
A finite element routine for analyzing non-Newtonian flows. 2. The extrusion of a Maxwell fluid (Coleman) **8** (1981) 261
Approximation error in finite element calculation of viscoelastic fluid flows (Mendelson) **10** (1982) 31
Multiple solutions in the calculation of axisymmetric contraction flow of an upper convected Maxwell fluid (Yeh) **16** (1984) 173
Rapid conical flows of viscoelastic solutions (Oliver) **16** (1984) 267
A new mixed finite element for calculating viscoelastic flow (Marchal) **26** (1987) 77
Existence of solutions for all Deborah numbers for a non-Newtonian model modified to include diffusion (El-Kareh) **33** (1989) 257
Limitation on the use of the retarded motion expansion (Hassager) **34** (1990) 241
High-Deborah-number flows of dilute polymer solutions (Harlen) **34** (1990) 319
Flow of test fluid M1 in corrugated tubes (James) **35** (1990) 405
High-Deborah-number flow of a dilute polymer solution past a sphere falling along the axis of a cylindrical tube (Harlen) **37** (1990) 157
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57

Decalin
Relation between some rheological properties of polysiobutylene solutions and their mode of preparation (Khalil) **52** (1994) 375
Stretching flow tests on liquid S1 and similar liquids (Oliver) **52** (1994) 183
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137

Decoupled finite element method
A decoupled finite element streamline-upwind scheme for viscoelastic flow problems (Luo) **31** (1989) 143
A new approach for the FEM simulation of viscoelastic flows (Fortin) **32** (1989) 295
A preconditioned generalized minimal residual algorithm for the numerical solution of viscoelastic fluid flows (Fortin) **36** (1990) 277
Simulation of highly elastic fluid flows without additional numerical diffusivity (Basombrío) **39** (1991) 189
Steady flow of a White–Metzner fluid in a 2-D abrupt contraction: computation and experiments (Maders) **45** (1992) 63
Comparison of computational efficiency of flow simulations with multimode constitutive equations: integral and differential models (Rajagopalan) **46** (1993) 243
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283

Deformation
Measures of deformation and convected derivatives (Petrie) **5** (1979) 147
Problems in describing the large deformation of elastomers: examination of basic concepts for their applicability to material behaviour (Nakajima) **12** (1983) 349
A note on the linear vector model of Olbricht, Rallison, and Leal as applied to the breakup of slender axisymmetric drops (Khakhar) **21** (1986) 127
A critical comparison of constitutive equations for polymer melts (Larson) **23** (1987) 249
The free energy of a deforming Lodge rubber-like liquid (Prakash) **40** (1991) 337
Deformation and breakup of viscoelastic drops in planar extensional flows (Milliken) **40** (1991) 355
A note on the effect of vorticity on the deformation and breakup of polymer drops (Milliken) **42** (1992) 231

Degradation
Enhanced drag reduction via interpolymer associations (Kowalik) **24** (1987) 1
Crossflow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behaviour (Choi) **41** (1992) 289
Effect of solvent on polymer degradation in turbulent flow (Moussa) **48** (1993) 261
Relation between some rheological properties of polysiobutylene solutions and their mode of preparation (Khalil) **52** (1994) 375

Delaunay triangulation
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
A split Lagrangian–Euler method for simulating transient viscoelastic flows (Harlen) **60** (1995) 81

Delayed die swell
Delayed die swell (Joseph) **24** (1987) 31
Climbing constant, second-order correction of Trouton's viscosity, wave speed and delayed die swell for M1 (Hu) **35** (1990) 287
Hyperbolicity and change of type in steady co-extrusion flow of upper convected Maxwell fluids (Chen) **47** (1993) 157
Independent confirmation that delayed die swell is a hyperbolic transition (Joseph) **48** (1993) 225

Depletion
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221

Detergent solutions
Nonlinear viscoelastic behaviour of aqueous detergent solutions (Shikata) **28** (1988) 171

Dewatering
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251

Die design
Die design by a boundary element method (Tran-Cong) **30** (1988) 37
Effect of die geometry and flow characteristics on viscoelastic annular swell (Garcia-Rejon) **60** (1995) 107

Die flows
The effect of die flow on the dynamics of isothermal melt spinning (Tsou) **17** (1985) 331
Three-dimensional viscous flows with a free surface: flow out of a long square die (Bush) **18** (1985) 211
Analysis of lubricated planar stagnation die flow (Secor) **23** (1987) 355
A finite element procedure coupled with the method of characteristics for simulation of viscoelastic fluid flow (El Hadj) **36** (1990) 333

Die swell
Experimental study of a non-viscometric flow: Kinematics of a viscoelastic fluid at the exit of a cylindrical tube (Clermont) **1** (1976) 175
On the stick–slip and die-swell problems for a second order fluid (Coleman) **3** (1977/1978) 288
On die swell: some theoretical results (Pearson) **4** (1978) 195
On die swell: some theoretical results (Summary) (Pearson) **5** (1979) 267
Die swell: the separation of the free surface (Sturges) **6** (1979) 155
Die swell of a Maxwell fluid: numerical predictions (Crochet) **7** (1980) 199
On numerical die swell calculation (Crochet) **10** (1982) 85
Finite element analysis of die swell of a highly elastic fluid (Crochet) **10** (1982) 339
Finite element simulation of die swell for a Maxwell fluid (Caswell) **12** (1983) 13
A boundary element investigation of extrudate swell (Bush) **18** (1985) 143
Numerical simulation of the die swell problem of a Newtonian fluid by using the concept of stream function and a local analysis of the singularity at the corner (Andre) **23** (1987) 335
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129

Diffusion
Convection and diffusion of polymer network strands (Larson) **13** (1983) 279
Existence of solutions for all Deborah numbers for a non-Newtonian model modified to include diffusion (El-Kareh) **33** (1989) 257
Spin coating of non-Newtonian fluids (Lawrence) **39** (1991) 137

Dilation
The dilational properties of suspensions of gas bubbles in incompressible Newtonian and non-Newtonian fluids (Prud'Homme) **3** (1977/1978) 261

Dilute polymer solutions
A note on the analogous behaviour of turbulent jets of dilute polymer solutions and fibre suspensions (Filipsson) **3** (1977/1978) 97
Converging radial flow of dilute polymer solutions (Amadou) **4** (1978) 229
Elongational flow of dilute Polyox solutions (Summary) (James) **5** (1979) 409
Heterogeneity of dilute polymer solutions (Hinch) **5** (1979) 411
Entrance effect in capillary flow of dilute and semi-dilute polymer solutions (Moan) **5** (1979) 463
Flow of dilute polymer solutions around circular cylinders (Koniuta) **7** (1980) 101
Polymer solution rheology based on a finitely extensible bead–spring chain model (Bird) **7** (1980) 213
Normal stress measurement of dilute polymer solutions (Tomita) **7** (1980) 237

Characteristics of HPAM dilute polymer solutions in three elongational flow situations (Ouibrahim) **7** (1980) 315
The effects of conformation-dependent friction and internal viscosity on the dynamics of the nonlinear dumbbell model for a dilute polymer solution (Fuller) **8** (1981) 271
Description of the non-affine motions of dilute polymer solutions by the porous molecule model (Johnson) **9** (1981) 33
Molecular models and the Taylor stability of dilute polymer solutions (Lhuillier) **9** (1981) 329
The stringiness of dilute polymer solutions (Jones) **11** (1982) 257
Drag reduction in exceptionally dilute polymer solutions (Oliver) **12** (1983) 113
Model viscoelastic liquids (Prilutski) **12** (1983) 233
Theory of dilute polymer solutions in viscoelastic fluid with a single relaxation time (Volkov) **15** (1984) 29
Equilibration in momentum space in the kinetic theory of polymer solutions (Bird) **15** (1984) 85
Experiments on elongational flow of dilute polymer solutions. 1. Jet reaction and excess pressure drop for the flow through small apertures (Hasegawa) **15** (1984) 257
Experiments on elongational flow of dilute polymer solutions. 2. Velocity field for the flow through small apertures (Hasegawa) **15** (1984) 279
Thickening behaviour of dilute polymer solutions in non-inertial elongational flows (Chauveteau) **16** (1984) 315
Viscosity, first normal-stress coefficient, and molecular stretching in dilute polymer solutions (Fan) **17** (1985) 125
The role of solvent viscosity in dilute solution polymer rheology (Manke) **19** (1985) 43
Some new observation on the effects of drag reducing agents on the early development of wakes (Boyce) **19** (1985) 229
The nature of flows through porous media (Durst) **22** (1987) 169
Anisotropic equilibrium conformations in solutions of polymers and polyelectrolytes (Drouot) **23** (1987) 295
Wall effects in simple shear of dilute polymer solution: exact results for very narrow and very wide channels (Brunn) **24** (1987) 343
The flow of dilute polymer solutions in confined geometries: a consistent numerical approach (Biller) **25** (1987) 347
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 1. Basic equations and series expansions (Öttinger) **26** (1987) 207
Experimental estimation of elongational stresses of dilute polymer solutions and a related examination of some constitutive equations (Hasegawa) **27** (1988) 133
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 2. Shear flows (Wedgewood) **27** (1988) 245
Do we understand the physics in the constitutive equation ? (Rallison) **29** (1988) 37
Transient extensional viscosity of dilute flexible polymer solutions (Moan) **30** (1988) 343
Turbulent jets of dilute polymer solutions (Koziol) **32** (1989) 311
A phenomenological model for dynamic properties of dilute polymer solutions (Tiu) **33** (1989) 165
A numerical study of extrudate swell in very dilute polymer solutions represented by the Oldroyd-B model (Bush) **34** (1990) 15

A discussion of shear thickening in bead–spring models (Kishbaugh) **34** (1990) 181
The influence of pre-shearing on the elongational behaviour of dilute polymer and surfactant solutions (Vissmann) **34** (1990) 289
High-Deborah-number flows of dilute polymer solutions (Harlen) **34** (1990) 319
Measurement of the extensional viscosity of M1 in a converging channel rheometer (James) **35** (1990) 445
High-Deborah-number flow of a dilute polymer solution past a sphere falling along the axis of a cylindrical tube (Harlen) **37** (1990) 157
Simulation of non-recirculating flows of dilute fibre suspensions (Rosenberg) **37** (1990) 317
Experimental study of the elongational stress of dilute polymer solutions in orifice flows (Hasegawa) **38** (1991) 159
The structure of anomalous entry flow patterns through a planar contraction (Chiba) **42** (1992) 315
Bead–spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data (Ahn) **50** (1993) 349
An experimental investigation of the flow of dilute polymer solutions through corrugated channels (Yalamanchili) **58** (1995) 243
A tentative approach to the direct simulation of drag reduction by polymers (Orlandi) **60** (1995) 277

Dimensional analysis
Scale-up problems arising with non-Newtonian fluids (Review) (Astarita) **4** (1979) 285
Dimensional analysis and a theory of elastic recovery following flow of elastic plastic viscoelastic fluids with application to filled polymer melts (White) **9** (1981) 223

Director
Stability of shear flows of polymeric liquid crystals (Calderer) **43** (1992) 351

Discontinuity capturing technique
On a discontinuity capturing technique for Oldroyd-B fluids (Carew) **51** (1994) 231

Disks
Some consequences of suspension models for nonviscometric flows (Schowalter) **5** (1979) 285
Coaxial-disk flow of an Oldroyd-B fluid: exact solution and stability (Phan-Thien) **13** (1983) 325
A note on the flow of a viscoelastic fluid between eccentric disks (Kaloni) **26** (1987) 125
Instability of a Criminale-Ericksen-Filbey fluid in a disk-and-cylinder system (Chiao) **36** (1990) 361

Dispersions
Rheology of concentrated dispersed systems in a low molecular weight matrix (Coussot) **46** (1993) 179
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Normal stresses in extremely shear thickening polymer dispersions (Laun) **54** (1994) 87
Normal stress differences in liquid crystals and in extremely shear thickening dispersions (Hess) **54** (1994) 201
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Dissipation
The dissipative mechanism in flowing polymers: theory and experiments (Astarita) **1** (1976) 39
Dissipative materials as models of thixotropy and plasticity (Goddard) **14** (1984) 141
Dissipation in a dilute suspension of spheres in a second-order fluid (Mifflin) **17** (1985) 267
Transient processes in Couette flow of a Leonov fluid influenced by dissipation (Braun) **33** (1989) 39
Dissipative behaviour of viscoelastic fluids derived from rheological constitutive equations (Braun) **38** (1990) 81

Dissolution rate
A possibility for an anomalously high rate of dissolution in films of non-Newtonian liquids with short contact times (Peev) **3** (1978) 389
On the existence of an anomalously high dissolution rate in films of non-Newtonian liquids with short contact times (Peev) **8** (1981) 319

Disturbances
On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77

Doi–Edwards model
The Doi–Edwards model in slow flows. Predictions on the Weissenberg effect (Marrucci) **21** (1986) 319
The Doi-Edwards model without independent alignment (Marrucci) **21** (1986) 329
Unified molecular theories of linear and non-linear viscoelasticity of flexible linear polymers: explaining the 3.4 power law of the zero-shear viscosity and the slip-stick melt fracture phenomenon (Lin) **23** (1987) 163
Series expansions for shear-flow properties from the Doi-Edwards model (Öttinger) **37** (1990) 265
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331

Doi–Ohta theory
Comments on the Doi–Ohta theory of blends (Grmela) **55** (1994) 191

Domain perturbation
Flow in the misaligned cone-and-plane rheometer (Dudgeon) **48** (1993) 21
Flow in the misaligned cone-and-plate rheometer (vol 48, pg 21, 1993) (Dudgeon) **52** (1994) 99

Drag
Effect of finite boundaries on the slow laminar isothermal flow of a viscoelastic fluid around a spherical obstacle (Sigli) **2** (1977) 1
A technique to estimate the elastic shear compliance from swell measurements (Matta) **12** (1983) 225
Drag force on a sphere in creeping motion through a Carreau model fluid (Bush) **16** (1984) 303
The drag on a sphere in a power-law fluid (Dazhi) **17** (1985) 1
The drag on spheres in viscoelastic fluids with significant wall effects (Sugeng) **20** (1986) 281
Boundary effects on the drag of an oscillating sphere: applications to the magnetic sphere rheometer (Sellers) **26** (1987) 43
The influence of rheological properties on the slow flow past spheres (Mena) **26** (1987) 247
On the flow past a sphere in a cylindrical tube: limiting Weissenberg number (Zheng) **36** (1990) 27
On viscoelastic effects in swirling flows (Bowen) **38** (1991) 113

The motion of a sphere falling under gravity in a constant-viscosity elastic liquid (Jones) **53** (1994) 175
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
Simple elongational flows which are not simple in reality (Zahorski) **59** (1995) 1
Creeping sphere motion in Herschel–Bulkley fluids: flow field and drag (Atapattu) **59** (1995) 245

Drag coefficient
The influence of fluid elasticity on the drag coefficient for creeping flow around a sphere (Chhabra) **6** (1980) 187
A comparison of the drag coefficients of spheres translating in corn-syrup-based and polybutene-based Boger fluids (Chmielewski) **35** (1990) 37
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105

Drag reduction
Torque suppression in mechanically stirred liquids and multiphase liquid systems (Quaraishi) **1** (1976) 223
Dynamical behaviour of drag-reducing polymer solutions (Scrivener) **5** (1979) 475
Solvent effects on drag reduction of polyox solutions in square duct and capillary tube flows (Kwack) **9** (1981) 79
Drag reduction in exceptionally dilute polymer solutions (Oliver) **12** (1983) 113
Drag reduction in aqueous cationic soap solutions (Elson) **12** (1983) 121
Effect of polymeric additives on cavitation and radiated noise in water flowing past a circular cylinder (Reitzer) **18** (1985) 71
Some new observation on the effects of drag reducing agents on the early development of wakes (Boyce) **19** (1985) 229
Enhanced drag reduction via interpolymer associations (Kowalik) **24** (1987) 1
Effect of roughness on drag reduction for commercially smooth pipes (Brewersdorff) **24** (1987) 365
Drag reduction and rheological properties of cationic viscoelastic surfactant formulations (Rose) **31** (1989) 59
Turbulent jets of dilute polymer solutions (Koziol) **32** (1989) 311
Heat transfer, drag reduction, and fluid characterization for turbulent flow of polymer solutions: recent results and research needs (Matthys) **38** (1991) 313
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe (Pak) **39** (1991) 353
Characterization of the non-Newtonian flow behaviour of drag-reducing fluids (Vlassopoulos) **49** (1993) 205
The structure of turbulence in a dilute polymer solution (Van Dam) **53** (1994) 215
On the stability of grafted polymer molecules in elongational flows (Agarwal) **54** (1994) 1
Collapse of spherical bubbles in Maxwell fluids (Kim) **55** (1994) 37
On the mechanism of drag reduction (Renardy) **59** (1995) 93

Drainage
Start-up of an elastico-viscous liquid draining from a vertical surface (Waters) **22** (1987) 325

The generation of a draining liquid film by the vertical withdrawal of a flat plate from an elastico-viscous liquid (Waters) **26** (1987) 161
Draining thin films. 1. (Keeley) **28** (1988) 213
Draining thin films. 2. Laser measurements of film thickness and velocity profile (Keeley) **32** (1989) 79
The numerical simulation of an Oldroyd liquid draining down a vertical surface (Pennington) **34** (1990) 221
Draining non-Newtonian films. 1. The numerical simulation of a generalized Newtonian liquid draining down a vertical surface (Pennington) **37** (1990) 201
Draining non-Newtonian films. 2. Measurement of the rate of change of film thickness by laser interferometry (Pennington) **37** (1990) 209
Enhancement of the drainage of non-Newtonian liquid films by oscillation (Goshawk) **51** (1994) 21
The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning (Joo) **51** (1994) 125
The effect of oscillation on the drainage of an elastico-viscous liquid (Goshawk) **54** (1994) 449

Draw down
A one-dimensional theory for viscoelastic fluid jets, with application to extrudate swell and draw-down under gravity (Bechtel) **21** (1986) 273

Draw resonance
Experimental study of the draw resonance in fibre spinning (Demay) **18** (1985) 187

Drift function method
Flow of a Curtiss–Bird fluid over a transverse slot using the finite element drift-function method (Malkus) **16** (1984) 77
Drift function tracking with compressibility and variable temperature (Bernstein) **20** (1986) 299

Drops
Some consequences of suspension models for nonviscometric flows (Schowalter) **5** (1979) 285
The stringiness of dilute polymer solutions (Jones) **11** (1982) 257
A note on the linear vector model of Olbricht, Rallison, and Leal as applied to the breakup of slender axisymmetric drops (Khakhar) **21** (1986) 127
The translation of a Newtonian droplet in a 4-constant Oldroyd fluid (Quintana) **22** (1987) 253
The extensional properties of M1 obtained from the stretching of a filament by a falling pendant drop (Jones) **35** (1990) 263
Deformation and breakup of viscoelastic drops in planar extensional flows (Milliken) **40** (1991) 355
A note on the effect of vorticity on the deformation and breakup of polymer drops (Milliken) **42** (1992) 231
The effect of viscoelasticity on the translation of a surfactant covered Newtonian drop (Quintana) **45** (1992) 81
Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow (Pozrikidis) **51** (1994) 161
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121

A boundary intergral method for two-dimensional (non)-Newtonian drops in slow viscous flow (Toose) **60** (1995) 129

Dumbbell model
The Langevin approach to the dumbbell kinetic problem in rheology (Phan-Thien) **3** (1978) 309
The effects of conformation-dependent friction and internal viscosity on the dynamics of the nonlinear dumbbell model for a dilute polymer solution (Fuller) **8** (1981) 271
Unsteady-state development of plane Couette flow for viscoelastic fluids (Mochimaru) **12** (1983) 135
Model viscoelastic liquids (Prilutski) **12** (1983) 233
Dynamics of rigid and flexible polymer chains in confined geometries. 1. Steady simple shear flow (Park) **15** (1984) 309
A note on the encapsulated dumbbell model (Phan-Thien) **17** (1985) 111
The motion of a dumbbell molecule in a torsional flow is unstable at high Weissenberg number (Phan-Thien) **18** (1985) 1
On the stability of a dumbbell molecule in a continuous squeezing flow (Goh) **18** (1985) 19
Configuration-dependent friction coefficients and elastic dumbbell rheology (Fan) **18** (1985) 255
The Schwinger-Dyson approximation in elastic dumbbell models for flexible polymers (Honerkamp) **21** (1986) 157
Nonlinear dumbbell model for flexible polymers: dynamical phenomena (Biller) **22** (1987) 309
Existence of solutions for all Deborah numbers for a non-Newtonian model modified to include diffusion (El-Kareh) **33** (1989) 257
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303
Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59
Nonequilibrium Brownian dynamics simulations of Hookean and FENE dumbbells with internal viscosity (Hua) **56** (1995) 307

Dynamic contact angle
Dynamic measurements of surface tension of solutions of polyisobutylene in mixtures of polybutene oil and decalin (Lewandowski) **52** (1994) 233

Dynamic contact lines
Viscoelastic free surface flows: spin coating and dynamic contact lines (Spaid) **55** (1994) 249

Dynamic mechanical apparatus
Application of interconversions to viscosity measurements of polystyrene (Bernreitner) **30** (1988) 73

Dynamic mechanical properties
Glass transition temperature, specific gravity, viscosity and viscoelastic properties of the test fluid M1 (te Nijenhuis) **35** (1990) 179

Dynamic modelling
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423

Dynamic moduli
An explanation of the rheological properties of Boger fluids (Mackay) **22** (1987) 235
The dynamic moduli and the first normal stress difference of the test fluid M1: a

combination of results of measurements by various research groups (te Nijenhuis) **35** (1990) 169

Dynamic properties
A phenomenological model for dynamic properties of dilute polymer solutions (Tiu) **33** (1989) 165

Dynamic simulation
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181

Dynamic viscoelasticity
A new torsional rod instrument for high frequency dynamic viscoelastic measurements (Nakken) **52** (1994) 217

Dynamic viscosity
Decomposition of mechanical spectra into elementary Cole-Cole domains: application to the viscoelastic behaviour of a styrene-butadiene-styrene block copolymer (Diogo) **23** (1987) 435
The high-frequency dynamic viscosity of Hookean dumbbells in a Maxwell corotational fluid (Stasiak) **43** (1992) 369

E

Eccentric annulus
Numerical analysis of three-dimensional Bingham plastic flow (Beverly) **42** (1992) 85
Flow of viscoplastic fluids in eccentric annular geometries (Szabo) **45** (1992) 149

Eccentric cylinder flow
On purely elastic instabilities in eccentric cylinder flows (Dris) **56** (1995) 349

Edge flow
Stress singularities in non-Newtonian stick–slip and edge flows (Tanner) **50** (1993) 135

Edge fracture
On the rectilinear flow of a second-order fluid and the role of the second normal stress difference in edge fracture in rheometry (Huilgol) **50** (1993) 331

Eigenfunction analysis
Matched eigenfunction expansions for slow flow over a slot (Trogdon) **10** (1982) 185
Spatial decay of steady perturbations of plane Poiseuille flow for the Oldroyd-B equation (Keiller) **46** (1993) 129

Ekman layer
The viscoelastic Ekman layer (Horwitz) **18** (1985) 87
An exact solution of a viscoelastic Ekman layer with suction (Buggisch) **36** (1990) 351

Ekman number
Multiplicity of solutions in von Karman flows of viscoelastic fluids (Ji) **36** (1990) 1

Elastic effects
Non-Newtonian flow caused by an infinite rotating disc (Williams) **1** (1976) 51
Long range memory effects in flows involving abrupt changes in geometry. 1. Flows associated with L-shaped and

T-shaped geometries (Perera) **2** (1977) 49
Elastic and inertial effects in pulsatile flow of polymeric liquids in circular tubes (Davies) **3** (1977/1978) 237
Viscous and elastic effects in extensional flow (Ferguson) **11** (1982) 269
Viscoelastic fluid flow past a submerged spheroidal body (Dairenieh) **19** (1985) 81
Further observations of elastic effects in tubular entry flows (Boger) **20** (1986) 31
Inertial and elastic effects in circular-shear (ERD) flow of viscoelastic fluids (Zhang) **33** (1989) 233
A comparison of the drag coefficients of spheres translating in corn-syrup-based and polybutene-based Boger fluids (Chmielewski) **35** (1990) 37
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105

Elastic free energy
Elastic free energy of an upper-convected Maxwell fluid undergoing a fully developed planar Poiseuille flow: a variational result (Ghisellini) **46** (1993) 229
On the elastic free energy of a linear viscoelastic fluid undergoing a fully developed viscometric flow (Doghieri) **51** (1994) 239

Elastic fluids
Radial flow of viscoelastic liquids. 1. Theoretical (Lee) **1** (1976) 323
On the flow of an elastic liquid past a porous flat plate (Holden) **2** (1977) 83
A highly elastic constant-viscosity fluid (Boger) **3** (1977/1978) 87
Objective and generally applicable criteria for flow classification (Astarita) **6** (1979) 69
A phenomenological theory for elastic fluids (Dashner) **8** (1981) 59
Shear and elongation in a theory for elastic fluids (Dashner) **8** (1981) 69
The characterization of polymer melts in a theory for elastic fluids (Dashner) **12** (1983) 375
Squeezing flow of elastic liquids (McClelland) **13** (1983) 181
On the use of complex variables in the analysis of flows of an elastic fluid (Coleman) **15** (1984) 227
Squeeze film flow of ideal elastic liquids (Phan-Thien) **18** (1985) 227
Heat transfer effects in extrudate swell of elastic liquids (McClelland) **27** (1988) 363
A contour integral approach to some cavity flows of elastic fluids (Coleman) **28** (1988) 239
A transition occurring in ideal elastic liquids during shear flow (Magda) **30** (1988) 1
A low viscosity, highly elastic ideal fluid (Tam) **31** (1989) 163
Analysis of plane extrudate swell of highly elastic liquids with molecular constitutive equations (Wesson) **32** (1989) 157
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251
Cross-flow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Compressive flow of the fluid M1 (Rajaiah) **35** (1990) 413
Fading memory in an incremental model for elastic fluids (Dashner) **36** (1990) 305
Continuum and molecular interpretation of ideal elastic fluids (Boger) **41** (1991) 133
An unusual prediction utilizing FENE-P rheological models in the fibre-spinning problem (Mackay) **41** (1992) 365

The instability mechanism for two elastic liquids being co-extruded (Hinch) **43** (1992) 311

Elastic instability
Elastic instability of the interface in Couette flow of viscoelastic liquids (Chen) **40** (1991) 261
Elastic short wave instability in extrusion flows of viscoelastic liquids (Chen) **42** (1992) 189
Elastic instability in crossflow of polymer solutions through periodic arrays of cylinders (Chmielewski) **48** (1993) 285
The effect of fluid rheology on the elastic Taylor-Couette instability (Larson) **51** (1994) 195
On purely elastic instabilities in eccentric cylinder flows (Dris) **56** (1995) 349
Nonlinear elastic instability of gravity-driven flow of a thin viscoelastic film down an inclined plane (Kang) **57** (1995) 243

Elastic recovery
Elastic recovery occurring in step-change tests (Citroen) **10** (1982) 257

Elastic stress ratio
Rayleigh–Taylor instability in elastic liquids (Aitken) **49** (1993) 13
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Elastic stresses
The onset of elastically driven wavy motion in the flow of two viscoelastic liquid films down an inclined plane (Chen) **45** (1992) 21

Elasticity
The influence of fluid elasticity on the drag coefficient for creeping flow around a sphere (Chhabra) **6** (1980) 187
Rheological study of emulsions with cross-linked polymeric interfaces (Bredimas) **12** (1983) 165
Historical perspectives on the elasticity of liquids (Joseph) **19** (1986) 237
Change of type and loss of evolution in the flow of viscoelastic fluids (Joseph) **20** (1986) 117
On the two-roll mill problem (Townsend) **20** (1986) 293
LDV measurements of viscoelastic flow transitions in abrupt axisymmetric contractions: interaction of inertia and elasticity (Raiford) **32** (1989) 39
Vane rheometry of bentonite gels (Alderman) **39** (1991) 291
Further considerations of axisymmetric contraction flows (Binding) **41** (1991) 27
The use of the vane to measure the shear modulus of linear elastic solids (Sherwood) **41** (1991) 101
Collapse of spherical bubbles in Maxwell fluids (Kim) **55** (1994) 37
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267

Elastohydrodynamic theory
An elastohydrodynamic theory for the rheology of concentrated suspensions of deformable particles (Goddard) **2** (1977) 169

Elastomers
Experimental study of the rheological properties of butadiene-styrene gum elastomers and compounds (Furuta) **1** (1976) 207

Problems in describing the large deformation of elastomers: examination of basic concepts for their applicability to material behaviour (Nakajima) **12** (1983) 349
Rheological models of rubber-carbon black compounds: low interaction viscoelastic models and high interaction thixotropic plastic viscoelastic models (Montes) **49** (1993) 277

Elastoplastic fluids
An experimental and theoretical study of the squeeze-film deformation and flow of elastoplastic fluids (Adams) **51** (1994) 61

Electric field
The electrorheological effect and its possible uses (Shulman) **8** (1981) 29
Oscillatory and steady convection in a dielectric viscoelastic layer subjected to a temperature gradient in the presence of an electric field (Agrait) **21** (1986) 1
Anisotropic equilibrium conformations in solutions of polymers and polyelectrolytes (Drouot) **23** (1987) 295
Damping of mechanical-systems oscillations by a non-Newtonian fluid with electric-field dependent parameters (Shulman) **25** (1987) 329
The mechanism of the viscoelastic behaviour of electrorheological suspensions (Shulman) **33** (1989) 181
Structural viscosity of electrorheological fluids (Mokeev) **42** (1992) 213
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269

Electro-magneto-rheological fluids
A novel apparatus for rheological measurements of electro-magneto-rheological fluids (Minagawa) **52** (1994) 59
Electro-magneto-rheological effects in parallel-field and crossed-field systems (Koyama) **58** (1995) 195

Electrochemical measurement
Determination of normal stresses in dilute polymer solutions using the electrochemical diagnostics of flow around a rotating sphere (Wein) **11** (1982) 163

Electrorheological clutch
Fluid dynamic limitations on the performance of an electrorheological clutch **57** (1995) 61

Electrorheological dampers
Damping of mechanical-systems oscillations by a non-Newtonian fluid with electric-field dependent parameters (Shulman) **25** (1987) 329

Electrorheological fluids
Damping of mechanical-systems oscillations by a non-Newtonian fluid with electric-field dependent parameters (Shulman) **25** (1987) 329
The mechanism of the viscoelastic behaviour of electrorheological suspensions (Shulman) **33** (1989) 181
Electrorheological fluids applied to an automotive engine mount (Williams) **47** (1993) 221

Electrorheology
Computer simulation of an electrorheological fluid (Whittle) **37** (1990) 233
Electrorheological relaxation times derived from pressure response experiments in the flow mode (Whittle) **57** (1995) 1
Electro-magneto-rheological effects in parallel-field and crossed-field systems (Koyama) **58** (1995) 195

Ellipsoids
The motion of ellipsoids in a second order fluid (Kim) **21** (1986) 255

Elliptical cross section
On the behaviour of viscoelastic free jets with elliptical cross section (Bechtel) **27** (1988) 87

Ellis model
A possibility for an anomalously high rate of dissolution in films of non-Newtonian liquids with short contact times (Peev) **3** (1978) 389

Elongation
A boundary element investigation of extrudate swell (Bush) **18** (1985) 143
The elongation of radial filaments of a Boger fluid on a rotating drum (Jones) **21** (1986) 51
The nature of flows through porous media (Durst) **22** (1987) 169
The influence of pre-shearing on the elongational behaviour of dilute polymer and surfactant solutions (Vissmann) **34** (1990) 289
Orientational transition in radial flow of a nematic liquid (Rey) **40** (1991) 177
Porous-medium flow of the fluid A1 — effects of shear and elongation (Vorwerk) **41** (1991) 119
Determination of the elongational behaviour of polypropylene melts from transient shear experiments using Wagner's model (Fulchiron) **48** (1993) 49
Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modeling (Saramito) **52** (1994) 263

Elongational flow
Investigation of failure during elongational flow of polymer melts (Ide) **2** (1977) 281
Elongational flow and the wet spinning process (McKay) **4** (1978) 89
Some results in the theory of melt spinning for model viscoelastic liquids (Petrie) **4** (1978) 137
Elongational flow of dilute Polyox solutions (Summary) (James) **5** (1979) 409
Rheological and coagulation features in the wet spinning process (Ferguson) **6** (1980) 333
Rheo-optics of shear and elongational flow of liquid crystalline polymer solutions:
Hydroypropyl cellulose/water and poly-p-phenylene terephthalamide/sulfuric acid (Onogi) **7** (1980) 121
Characteristics of HPAM dilute polymer solutions in three elongational flow situations (Ouibrahim) **7** (1980) 315
Shear and elongation in a theory for elastic fluids (Dashner) **8** (1981) 69
Flow of a liquid with an anisotropic viscosity tensor: elongational flow (Duffy) **9** (1981) 1
Viscoelastic elongational lubrication (Doremus) **9** (1981) 389
Multiaxial elongational flow of sheets and annular cylinders: growth of disturbances (Minoshima) **11** (1982) 127
Multiaxial elongational flows of polymer melts — classification and experimental realization (Meissner) **11** (1982) 221
Constant force elongational flow of a low-density polyethylene melt — experiment and theory (Raible) **11** (1982) 239

Influence of the contraction ratio in elongational flow of polymer solutions (Ouibrahim) **11** (1982) 341
Experiments on elongational flow of dilute polymer solutions. 1. Jet reaction and excess pressure drop for the flow through small apertures (Hasegawa) **15** (1984) 257
Experiments on elongational flow of dilute polymer solutions. 2. Velocity field for the flow through small apertures (Hasegawa) **15** (1984) 279
Thickening behaviour of dilute polymer solutions in non-inertial elongational flows (Chauveteau) **16** (1984) 315
Rubber-like behaviour of poly(ethylene oxide) solution in elongational flow (Buscall) **17** (1985) 193
Exact solution of the Rouse model with discrete time evolution (Öttinger) **19** (1986) 357
Molecular extension from the Giesekus model (Wiest) **22** (1986) 115
Structural changes during elongation of polymer solutions (Ferguson) **23** (1987) 49
Relaxational interactions and viscoelasticity of polymer melts. 2. Rheological properties in shear and elongational flows (Volkov) **25** (1987) 261
Anomalous elongational flows and change of type (Joseph) **28** (1988) 47
Elongational flow and rheology of monodisperse polymers in solution (Müller) **30** (1988) 99
On the mechanism of stretching and breaking of polymers in elongational flows (Rabin) **30** (1988) 119
The extensional properties of M1 obtained from the Carri-Med elongational viscometer (Ferguson) **35** (1990) 197
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
High-Deborah-number flow of a dilute polymer solution past a sphere falling along the axis of a cylindrical tube (Harlen) **37** (1990) 157
Experimental study of the elongational stress of dilute polymer solutions in orifice flows (Hasegawa) **38** (1991) 159
Convected coordinates and elongational flow (Kaye) **40** (1991) 55
Porous medium flow of the fluid A1: effects of shear and elongation (Vorwerk) **41** (1991) 119
The interaction of polymer additives with vorticity (a case study on vortex rings) (Gyr) **43** (1992) 179
Stretching behaviour of large polymeric and Newtonian liquid bridges in plateau simulation (Kroger) **45** (1992) 385
The A1 project — an overview (Hudson) **46** (1993) 69
A material function from the vibrating jet (Chan Man Fong) **46** (1993) 111
On modelling spurt flows of polymers (Adewale) **49** (1993) 133
Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry (Willenbacher) **52** (1994) 163
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269
Measurement of extensional viscosity by stretching large liquid bridges in microgravity (Berg) **55** (1994) 307
Velocity and elongation rate distributions in stretched polymeric and Newtonian liquid bridges (Kroger) **57** (1995) 137
Simple elongational flows which are not simple in reality (Zahorski) **59** (1995) 1

Elongational history

An experimental and theoretical study of the effect of the elongational history on the dynamics of isothermal melt spinning (Sampers) **30** (1988) 325

Elongational rheometer
Viscoelastic flow between two opposing orifices (Sun) **58** (1995) 219

Elongational stresses
Experimental estimation of elongational stresses of dilute polymer solutions and a related examination of some constitutive equations (Hasegawa) **27** (1988) 133

Elongational thickening
Thickening behaviour of dilute polymer solutions in non-inertial elongational flows (Chauveteau) **16** (1984) 315
Viscoelastic properties of physically cross-linked networks.
1. Non-linear stationary viscoelasticity (Tanaka) **43** (1992) 247

Elongational viscosity
On the suspended syphon elongational rheometer (MacSporran) **8** (1981) 119
The stringiness of dilute polymer solutions (Jones) **11** (1982) 257
Configuration-dependent friction coefficients and elastic dumbbell rheology (Fan) **18** (1985) 255
Equilibrium and steady-state flow properties of a suspension of freely rotating chains (Fan) **19** (1986) 303
Estimation of the elongational viscosity of polyethylene blends at high deformation rates (Tremblay) **33** (1989) 137
Liquid stretching using a falling cylinder (Matta) **35** (1990) 215
The extensional properties of M1 obtained from the stretching of a filament by a falling pendant drop (Jones) **35** (1990) 263
Visualization of the flow of linear low density polyethylene/low density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
Stretching behaviour of large polymeric and Newtonian liquid bridges in plateau simulation (Kroger) **45** (1992) 385
Film casting of a modified Giesekus fluid: a steady-state analysis (Iyengar) **48** (1993) 1
Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modelling (Saramito) **52** (1994) 263
Velocity and elongation rate distributions in stretched polymeric and Newtonian liquid bridges (Kroger) **57** (1995) 137

Emulsions
Some consequences of suspension models for nonviscometric flows (Schowalter) **5** (1979) 285
Rheological study of emulsions with cross-linked polymeric interfaces (Bredimas) **12** (1983) 165
Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow (Pozrikidis) **51** (1994) 161
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221

Energy storage
Dissipative behaviour of viscoelastic fluids derived from rheological constitutive equations (Braun) **38** (1990) 81

Entanglements
Space filling and entanglements in polymeric systems (Rault) **23** (1987) 229
Flow of polymer solutions through porous media (Rodriguez) **49** (1993) 63
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate

aqueous solution at the start of shear flow (Osaki) **54** (1994) 109

Entropy effects
The dissipative mechanism in flowing polymers: theory and experiments (Astarita) **1** (1976) 39
Entropy effects in viscoelastic fluid theory (Christensen) **1** (1976) 371
The continuum description of conformational entropy effects in viscoelastic flow (Astarita) **3** (1977/1978) 77
A note on entropy effects in polymeric fluids (Christensen) **3** (1977/1978) 197

Entry flows
Entry flow behaviour of viscoelastic fluids in an annulus (Tan) **3** (1977/1978) 25
The kinematics and stability of die entry flows (Nguyen) **5** (1979) 353
Finite element simulation of viscoelastic flow (Viriyayuthakorn) **6** (1980) 245
Mechanical energy balances for a capillary viscometer (Vrentas) **12** (1983) 211
Flow patterns in carbon black filled polyethylene at the entrance to a die (Ma) **17** (1985) 275
Further observations of elastic effects in tubular entry flows (Boger) **20** (1986) 31
Review of the entry flow problem: experimental and numerical (White) **24** (1987) 121
Entry flow of semi-rigid rod solutions (Binnington) **26** (1987) 115
A numerical solution for the flow of dilute fibre suspensions through an axisymmetric contraction (Chiba) **35** (1990) 1
Creeping motion of spheres in fluid M1 (Tirtaatmadja) **35** (1990) 327
Circular entry flows of fluid M1 (Boger) **35** (1990) 339
Anomalous flow patterns in viscoelastic entry flow through a planar contraction (Chiba) **36** (1990) 193
Exit and entrance flows of non-Newtonian fluids in parallel slits (Yarusso) **40** (1991) 103
Numerical simulation of circular entry flows of fluid M1 using an integral constitutive equation (Park) **42** (1992) 301
Entry-flow calculations for the Oldroyd-B and FENE equations (Keiller) **46** (1993) 143
Entry flow of fibre suspensions in a straight channel (Tang) **56** (1995) 183

Equation of motion
Some comments on the surface-tension driven break-up (or the lack of it) of viscoelastic jets (Renardy) **51** (1994) 97

Ericksen–Leslie equations
One modification of the Ericksen–Leslie equations in a two-dimensional motion (Ryskin) **39** (1991) 207
Symbolic evaluation of the Ericksen-Leslie equations in the computational domain (Güler) **52** (1994) 309

Errors
Approximation error in finite element calculation of viscoelastic fluid flows (Mendelson) **10** (1982) 31
Numerical filtering and the high Weissenberg number problem (Davies) **16** (1984) 195
Error estimates for a mixed finite element method for a non-Newtonian flow (Baranger) **23** (1987) 415
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25
Use of the finite element modelling technique for the improvement of

viscometry results obtained by cone-and-plate rheometers (Petera) **58** (1995) 1

Elastic-viscous split stress (EVSS) formulations
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283
A finite volume approach for calculation of viscoelastic flow through an abrupt axisymmetric contraction (Sasmal) **56** (1995) 15
Higher order finite element techniques for viscoelastic flow problems with change of type and singularities (Talwar) **59** (1995) 49

Excess pressure drop
Excess pressure losses in a slit (Choplin) **9** (1981) 119
Influence of the contraction ratio in elongational flow of polymer solutions (Ouibrahim) **11** (1982) 341

Excluded volume
Bead–spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data (Ahn) **50** (1993) 349

Existence theorems
Recent advances in the mathematical theory of steady flow of viscoelastic fluids (Renardy) **29** (1988) 11
An alternative approach to inflow boundary conditions for Maxwell fluids in three space dimensions (Renardy) **36** (1990) 419

Exit correction
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67

Exit flow
Experimental study of a non-viscometric flow: Kinematics of a viscoelastic fluid at the exit of a cylindrical tube (Clermont) **1** (1976) 175
An experimental study of nonrheometic flows of viscoelastic fluids. 2. Flow in a liquid jet exiting from a vertical tube (Goulden) **1** (1976) 183
Mechanical energy balances for a capillary viscometer (Vrentas) **12** (1983) 211
Exit and entrance flows of non-Newtonian fluids in parallel slits (Yarusso) **40** (1991) 103

Expansion
Long range memory effects in flows involving abrupt changes in geometry. 2. The expansion/contraction/expansion problem (Perera) **2** (1977) 191
Separation and reattachment of non-Newtonian fluid flows in a sudden expansion pipe (Pak) **37** (1990) 175
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden expansion pipe (Pak) **39** (1991) 353

Experimental observation
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129

Explicitly elliptic momentum equation
Numerically stable finite element techniques for viscoelastic calculations in smooth and singular geometries (King) **29** (1988) 147
Calculations of viscoelastic flow through an axisymmetric corrugated tube using

the explicitly elliptic momentum equation formulation (EEME) (Burdette) **33** (1989) 1
Finite element calculation of time-dependent two-dimensional viscoelastic flow with the explicitly elliptic momentum equation formulation (Northey) **36** (1990) 109
Calculation of steady viscoelastic flow using a multimode Maxwell model: application of the explicitly elliptic momentum equation (EEME) formulation (Rajagopalan) **36** (1990) 135
Adaptive refinement of a viscoelastic flow problem with the explicitly elliptic momentum equation (Rao) **38** (1991) 223
Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation (Coates) **42** (1992) 141

Extension
Stability of extensional flows and extending viscoelastic fluid sheets (Shifang) **15** (1984) 181
Fibre spinning of a weakly elastic liquid (Sridhar) **27** (1988) 349
Extensional effects in complex flows (Debbaut) **30** (1988) 169
Fluid detachment and slip in extensional flows (Sridhar) **30** (1988) 285
On the inertial and extensional effects on the corner and lip vortices in a circular abrupt contraction (Debbaut) **37** (1990) 281
The converging flow rheometer reconsidered: an example of flow with dominating extension (Zahorski) **41** (1992) 309
Extending filaments of an Oldroyd fluid (Keiller) **42** (1992) 37
Extensional effects in flows through contractions with abrupt or rounded corners (Baloch) **54** (1994) 285

Extensional flow
Tensile stress contribution of flow-orientated slender particles in non-Newtonian fluids (Goddard) **1** (1976) 1
Steady and unsteady isochoric simple extensional flows (Balmer) **2** (1977) 307
Rapid extensional flows of polymer-thickened motor oils through a small orifice (Oliver) **3** (1977/1978) 92
An experimental study of isothermal spinning of a Newtonian and viscoelastic liquid (Chang) **5** (1979) 369
Viscous and elastic effects in extensional flow (Ferguson) **11** (1982) 269
Flow of dilute polymer solutions through converging channels (James) **11** (1982) 317
Extensional flows of Oldroyd fluids (Petrie) **14** (1984) 189
Constitutive equations for polymer fluids based on the concept of configuration-dependent molecular mobility: a generalized mean-configuration model (Giesekus) **17** (1985) 349
Dilute polystyrene solutions in extensional flows: birefringence and flow modification (Dunlap) **23** (1987) 5
The role of solution structure in apparent thickening behaviour of dilute PEO/water systems (Georgelos) **27** (1988) 191
Transient deformation of an inviscid inclusion in a viscoelastic extensional flow (Bousfield) **27** (1988) 205
Orientation effects in extensional and squeezing flows of certain anisotropic fluids (Duffy) **28** (1988) 77
Proceedings of an international conference on extensional flow held at Chamonix,
France, January 18th–22nd, 1988 (Walters) **30** (1988) 97

Chain scission in transient extensional flow kinetics and molecular weight dependence (Nguyen) **30** (1988) 125
Polymer complexation effects in extensional flows (Hudson) **30** (1988) 251
Fluid detachment and slip in extensional flows (Sridhar) **30** (1988) 285
Stress relaxation of a polymer melt after extensional flow (te Nijenhuis) **30** (1988) 355
The optical and mechanical response of flexible polymer solutions to extensional flow (Cathey) **34** (1990) 63
The shear and extensional flow properties of M1 (Binding) **35** (1990) 121
Experimental results and constitutive modelling of the extensional flow of M1 (Nguyen) **35** (1990) 207
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251
Crossflow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Modelling of fluid M1 using multiple-relaxation-time constitutive equations (Chai) **35** (1990) 459
An alternative approach to non-isothermal melt spinning with axial and radial viscosity distributions (Zahorski) **36** (1990) 71
Mechanics of the "falling plate" extensional rheometer (Shipman) **40** (1991) 281
The converging flow rheometer reconsidered: an example of flow with dominating extension (Zahorski) **41** (1992) 309
Modelling of the extensional flow of the M1 fluid with the Oldroyd equation (Keiller) **42** (1992) 49
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83
Non-Newtonian flow in porous media: a laboratory study of polyacrylamide solutions (Flew) **47** (1993) 169
Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
Uncoiling a polymer molecule in a strong extensional flow (Hinch) **54** (1994) 209
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59
Simple elongational flows which are not simple in reality (Zahorski) **59** (1995) 1

Extensional flow resistance

Flow of test fluid M1 in corrugated tubes (James) **35** (1990) 405

Extensional rheometry

Fibre spinning of very dilute solutions of polyacrylamide in water (Chan) **30** (1988) 267
A converging channel rheometer for the measurement of extensional viscosity (James) **35** (1990) 421
Measurement of the extensional viscosity of M1 in a converging channel rheometer (James) **35** (1990) 445
Extensional rheometry of fluid S1 (Ooi) **52** (1994) 153

Extensional viscosity

An approximate analysis for contraction and converging flows (Binding) **27** (1988) 173
Extensional effects in complex flows (Debbaut) **30** (1988) 169
On the use of flow through a contraction in estimating the extensional viscosity of

mobile polymer solutions (Binding) **30** (1988) 233
Uniaxial and biaxial extensional viscosity measurements of dilute and semi-dilute solutions of rigid rod polymers (Cathey) **30** (1988) 303
Transient extensional viscosity of dilute flexible polymer solutions (Moan) **30** (1988) 343
Remarks on inertial radii, persistent normal stresses, secondary motions, and non-elastic extensional viscosities (Joseph) **32** (1989) 107
Some asymptotic results for planar extension (Petrie) **34** (1990) 37
The shear and extensional flow properties of M1 (Binding) **35** (1990) 121
Experimental results and constitutive modelling of the extensional flow of M1 (Nguyen) **35** (1990) 207
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251
Mechanical and optical responses of the M1 fluid subject to stagnation point flow (Schweizer) **35** (1990) 277
Climbing constant, second-order correction of Trouton's viscosity, wave speed and delayed die swell for M1 (Hu) **35** (1990) 287
Circular entry flows of fluid M1 (Boger) **35** (1990) 339
A converging channel rheometer for the measurement of extensional viscosity (James) **35** (1990) 421
Measurement of the extensional viscosity of M1 in a converging channel rheometer (James) **35** (1990) 445
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265
On the inertial and extensional effects on the corner and lip vortices in a circular 4:1 abrupt contraction (Debbaut) **37** (1990) 281
Experimental study of the elongational stress of dilute polymer solutions in orifice flows (Hasegawa) **38** (1991) 159
Measurement of extensional viscosity of polymer solutions (Sridhar) **40** (1991) 271
An unusual prediction utilizing FENE-P rheological models in the fibre-spinning problem (Mackay) **41** (1992) 365
Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation (Park) **52** (1994) 69
A phenomenological viscosity model for polymeric fluid (Song) **53** (1994) 151
Large and small force limits for spinning with FENE dumbbell models (Petrie) **54** (1994) 251
Measurement of extensional viscosity by stretching large liquid bridges in microgravity (Berg) **55** (1994) 307

External forces
The motion of ellipsoids in a second order fluid (Kim) **21** (1986) 255

Extrudate distortions
Extrudate distortions in linear low-density polyethylene solutions and melt (Pomar) **54** (1994) 143

Extrudate shrinkage
Extrudate character and post-extrusion shrinkage of rheologically characterized rubber-carbon black compounds and their interpretation (Shin) **37** (1990) 95

Extrudate swell
A new inelastic theory of extrudate swell (Tanner) **6** (1980) 289
The swelling of plane extrudates at low Weissenberg numbers (Tanner) **7** (1980) 265

A theoretical study of extrudate swell (Sturges) **9** (1981) 357
Extrudate swell for a round jet with large surface tension (Tieu) **13** (1983) 203
Extrudate swell of Newtonian and non-Newtonian fluids: the effect of gravitational body force (Trang) **20** (1986) 103
A one-dimensional theory for viscoelastic fluid jets, with application to extrudate swell and draw-down under gravity (Bechtel) **21** (1986) 273
Flow singularity and slip velocity in plane extrudate swell computations (Wesson) **26** (1988) 277
Influence of wall slip on extrudate swell: a boundary element investigation (Phan-Thien) **26** (1988) 327
Heat transfer effects in extrudate swell of elastic liquids (McClelland) **27** (1988) 363
On the behaviour of viscoelastic free jets with elliptical cross section (Bechtel) **27** (1988) 87
Prediction of polymer melt extrudate swell using a differential constitutive model (Bush) **31** (1989) 179
Analysis of plane extrudate swell of highly elastic liquids with molecular constitutive equations (Wesson) **32** (1989) 157
A numerical study of extrudate swell in very dilute polymer solutions represented by the Oldroyd-B model (Bush) **34** (1990) 15
Three-dimensional finite-element method for extrudate swells of a Maxwell fluid (Shiojima) **34** (1990) 269
Extrudate character and post-extrusion shrinkage of rheologically characterized rubber-carbon black compounds and their interpretation (Shin) **37** (1990) 95
Numerical simulation of non-isothermal extrudate swell at high extrudate rates (Chang) **51** (1994) 1
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67

Extrusion
Stretching flow instabilities at the exits of extrusion dies (Cogswell) **2** (1977) 37
Flow patterns in polyethylene and polystyrene melts during extrusion through a die entry region: measurement and interpretation (White) **3** (1977/1978) 41
Experimental studies of viscoelastic fluid flow (Tomita) **5** (1979) 497
A finite element routine for analysing non-Newtonian flows. 1. Basic method and preliminary results (Coleman) **7** (1980) 289
A finite element routine for analyzing non-Newtonian flows. 2. The extrusion of a Maxwell fluid (Coleman) **8** (1981) 261
A study of parison development in extrusion blow molding (Dutta) **10** (1982) 235
Some finite element studies of extrusion (Huynh) **13** (1983) 1
Isothermal extrusion of non-dilute fibre suspensions (Papanastasiou) **25** (1987) 313
Die design by a boundary element method (Tran-Cong) **30** (1988) 37
Investigations of the interaction of flowing rubber compounds with boundaries: basic experiments and air lubricated die (Brzoskowski) **31** (1989) 43
Flow of thermoplastics in an annular die under orthogonal oscillations (Isayev) **34** (1990) 375

The different capillary flow regimes of entangled polydimethylsiloxane polymers: macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation (Andre) **38** (1990) 1
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67

Extrusion velocity
Delayed die swell (Joseph) **24** (1987) 31

F

Fading memory
Fading memory in an incremental model for elastic fluids (Dashner) **36** (1990) 305

Falling cylinder
Liquid stretching using a falling cylinder (Matta) **35** (1990) 215
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105

Falling needle
Steady shear viscosity measurements of viscoelastic fluids with the falling needle viscometer (Park) **34** (1990) 351
On the flow past a needle in a cylindrical tube (Thien) **47** (1993) 137

Falling sphere
Interactions between two spheres falling along their line of centres in a viscoelastic fluid (Riddle) **2** (1977) 23
An experiment to measure the pressure dependence of the zero-shear-rate viscosity (Foltz) **3** (1978) 347
Flow along the centerline behind a sphere in a uniform stream (Phan-Thien) **41** (1991) 151
Application of low-order Discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37
Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration (Ianniruberto) **54** (1994) 231
On the motion of a sphere falling through an elastic liquid contained in a tightly-fitting cylindrical container (Degand) **57** (1995) 103

Falling-ball rheometry
Zero-shear-rate viscosity measurement for polymer solutions by falling ball viscometry (Gottlieb) **6** (1979) 97
Non-Newtonian viscosity measurements in the intermediate shear rate range with the falling-ball viscometer (Cho) **15** (1984) 61
Simulation of non-recirculating flows of dilute fibre suspensions (Rosenberg) **37** (1990) 317

Fano flow
Steady and unsteady isochoric simple extensional flows (Balmer) **2** (1977) 307

FENE chains
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
Brownian dynamics simulation of finitely extensible bead–spring chains (van den Brule) **47** (1993) 357

FENE dumbbell models
Dilute solution rheology: experimental results and finitely extensible nonlinear elastic dumbbell theory (Christiansen) **3** (1977/1978) 161
An encapsulated dumbbell model for concentrated polymer solutions and melts. 1. Theoretical development and constitutive equation (Bird) **13** (1983) 149
An encapsulated dumbbell model for concentrated polymer solutions and melts. 2. Calculation of material functions and experimental comparisons (DeAguiar) **13** (1983) 161
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
Entry-flow calculations for the Oldroyd-B and FENE equations (Keiller) **46** (1993) 143
Microscopic and mesoscopic results from non-equilibrium molecular dynamics modelling of FENE dumbbell liquids (Dlugogorski) **49** (1993) 23
Large and small force limits for spinning with FENE dumbbell models (Petrie) **54** (1994) 251
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
Nonequilibrium Brownian dynamics simulations of Hookean and FENE dumbbells with internal viscosity (Hua) **56** (1995) 307
Finite element simulation of flow around a $3\pi/2$ corner using the FENE dumbbell model (Singh) **58** (1995) 279
A split Lagrangian–Euler method for simulating transient viscoelastic flows (Harlen) **60** (1995) 81

FENE-P dumbbell
Further comments on the FENE-P dumbbell model (Mochimaru) **9** (1981) 179
Possibility of a master plot for material functions of high-polymer solutions (Mochimaru) **13** (1983) 365
An unusual prediction utilizing FENE-P rheological models in the fibre-spinning problem (Mackay) **41** (1992) 365
Bead–spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman's theory (Ahn) **43** (1992) 143

Fibre compounds
Boundary integral equations for analyzing the flow of a chopped fibre reinforced polymer compound in compression molding (Barone) **26** (1987) 185
General results on the flow of chopped fibre compounds in compression molding (Caulk) **28** (1988) 333

Fibre orientation
Unstable capillary flow of reinforced polymer melts (Akay) **13** (1983) 309
A simultaneous solution for flow and fibre orientation in axisymmetric diverging radial flow (Ranganathan) **47** (1993) 107
Unsteady flow of semi-concentrated suspensions using finite deformation tensors (Ahmed) **55** (1994) 115

Fibre spinning
Experimental study of the draw resonance in fibre spinning (Demay) **18** (1985) 187

Steady spinning of the Oldroyd fluid B. 1. Theory (Gupta) **21** (1986) 99
Steady spinning of the Oldroyd fluid B. 2. Experimental results (Sridhar) **21** (1986) 115
A nearly-elongational flow analysis of the fibre spinning flow (Phan-Thien) **21** (1986) 225
Time-dependent fibre spinning equations. 1. Analysis of the mathematical behaviour (Beris) **26** (1988) 341
Time-dependent fibre spinning equations. 2. Analysis of the stability of numerical approximations (Liu) **26** (1988) 363
Prediction of birefringence, stresses and kinematics in fibre spinning for solutions of finitely extensible macromolecules (Mackay) **27** (1988) 323
Fibre spinning of a weakly elastic liquid (Sridhar) **27** (1988) 349
Fibre spinning of very dilute solutions of polyacrylamide in water (Chan) **30** (1988) 267
Experimental results and constitutive modelling of the extensional flow of M1 (Nguyen) **35** (1990) 207
An unusual prediction utilizing FENE-P rheological models in the fibre-spinning problem (Mackay) **41** (1992) 365

Fibre stretching
Extensional rheometry of fluid S1 (Ooi) **52** (1994) 153

Fibre suspensions
A note on the analogous behaviour of turbulent jets of dilute polymer solutions and fibre suspensions (Filipsson) **3** (1977/1978) 97
Simple and explicit equations for the friction factor in turbulent fibre suspension flow (Mansour) **17** (1985) 245
Isothermal extrusion of non-dilute fibre suspensions (Papanastasiou) **25** (1987) 313
The flow of fibre suspensions in complex geometries (Lipscomb) **26** (1988) 297
A numerical solution for the flow of dilute fibre suspensions through an axisymmetric contraction (Chiba) **35** (1990) 1
Simulation of non-recirculating flows of dilute fibre suspensions (Rosenberg) **37** (1990) 317
Flow regimes for fibre suspensions in narrow gaps (Tucker III) **39** (1991) 239
Anisotropic channel flow of fibre suspensions (Altan) **42** (1992) 65
Sink flows of a suspension of rigid rods: the failure of a similarity solution (Keiller) **42** (1992) 249
A simultaneous solution for flow and fibre orientation in axisymmetric diverging radial flow (Ranganathan) **47** (1993) 107
Modelling the rheological behaviour of fibre suspensions in viscoelastic media (Ait-Kadi) **53** (1994) 65
Normal stresses in fibre suspensions (Zirnsak) **54** (1994) 153
Entry flow of fibre suspensions in a straight channel (Tang) **56** (1995) 183
Unsteady flow of semi-concentrated suspensions using finite deformation tensors (Ahmed) **55** (1994) 115

Fibre–fibre interactions
A simultaneous solution for flow and fibre orientation in axisymmetric diverging radial flow (Ranganathan) **47** (1993) 107

Fibre-reinforced composite
On the squeezing flow of a fibre-reinforced fluid (Coleman) **37** (1990) 379

A linear stability analysis of flows of transversely isotropic non-Newtonian fluids (Hull) **43** (1992) 325

Fibres
Fracture of ultrafine fibres in the flow of mixtures of non-Newtonian polymer melts (Tsebrenko) **31** (1989) 1
Practical application of a higher order perturbation theory for slender viscoelastic jets and fibres (Bechtel) **41** (1992) 201

Filament stretching
Comparison of the behaviour of filaments of Xanthan solutions with that of filaments of polyacrylamide solutions (Jones) **35** (1990) 77
Measurement of extensional viscosity of polymer solutions (Sridhar) **40** (1991) 271
Rheological characterization of the time and strain dependence for polyisobutylene solutions (Liang) **52** (1994) 387

Filaments
A new inelastic theory of extrudate swell (Tanner) **6** (1980) 289
A finite difference study of the stretching and break-up of filaments of polymer solutions (Markovich) **17** (1985) 13
Non-linear analysis of the surface tension driven breakup of viscoelastic filaments (Bousfield) **21** (1986) 79
Extending filaments of an Oldroyd fluid (Keiller) **42** (1992) 37
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57
Modelling and computation of the onset of failure in polymeric liquid filaments (Wang) **58** (1995) 97

Film casting
Draw resonance in film casting of viscoelastic fluids: a linear stability analysis (Anturkar) **28** (1988) 287
Film casting of a modified Giesekus fluid: a steady-state analysis (Iyengar) **48** (1993) 1

Film levelling
Analysis of surface tension driven levelling in viscoelastic films (Keunings) **22** (1987) 219
Long-wave analysis of viscoelastic film levelling (Bousfield) **40** (1991) 47

Films
An elastohydrodynamic theory for the rheology of concentrated suspensions of deformable particles (Goddard) **2** (1977) 169
Viscoelastic elongational lubrication (Doremus) **9** (1981) 389
Gas absorption into falling laminar non-Newtonian films (Gottifredi) **10** (1982) 357
Roll coating operations (Benkreira) **14** (1984) 377
Analysis of surface-tension driven leveling in viscoelastic films (Keunings) **22** (1987) 219
Gravity-driven laminar film flow of power-law fluids along vertical walls (Andersson) **27** (1988) 153
Draining thin films. 1. (Keeley) **28** (1988) 213
The stability of gravity driven viscoelastic film flow at low to moderate Reynolds number (Shaqfeh) **31** (1989) 87
Draining non-Newtonian films. 1. The numerical simulation of a generalized Newtonian liquid draining down a vertical surface (Pennington) **37** (1990) 201

Draining non-Newtonian films. 2. Measurement of the rate of change of film thickness by laser interferometry (Pennington) **37** (1990) 209
Spin coating of non-Newtonian fluids (Lawrence) **39** (1991) 137
Long-wave analysis of viscoelastic film leveling (Bousfield) **40** (1991) 47
The onset of elastically driven wavy motion in the flow of two viscoelastic liquid films down an inclined plane (Chen) **45** (1992) 21
Film casting of a modified Giesekus fluid: a steady-state analysis (Iyengar) **48** (1993) 1
Enhancement of the drainage of non-Newtonian liquid films by oscillation (Goshawk) **51** (1994) 21
The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning (Joo) **51** (1994) 125
Nonlinear elastic instability of gravity-driven flow of a thin viscoelastic film down an inclined plane (Kang) **57** (1995) 243

Filtercake
Squeeze-film rheometry of non-uniform mudcakes (Sherwood) **39** (1991) 311

Filtration
Filtration in viscoelastic continua (Kozicki) **53** (1994) 129

Finite amplitude oscillations
Finite amplitude oscillations of viscoelastic fluids (Vrentas) **40** (1991) 1

Finite chain extensibility
A comparison of the drag coefficients of spheres translating in corn-syrup-based and polybutene-based Boger fluids (Chmielewski) **35** (1990) 37

Finite deformation tensors
Unsteady flow of semi-concentrated suspensions using finite deformation tensors (Ahmed) **55** (1994) 115

Finite difference methods
An investigation of non-Newtonian flow past a sphere (Adachi) **3** (1977/1978) 107
Long range memory effects in flows involving abrupt changes in geometry. 3. Moving boundaries (Davies) **4** (1979) 325
Direct numerical solutions of the equations for viscoelastic fluid flow (Perera) **5** (1979) 269
A numerical solution of Newtonian and viscoelastic flow past stationary and rotating cylinders (Townsend) **6** (1980) 219
A singular finite difference treatment of re-entrant corner flow. 1. Newtonian fluids (Holstein) **8** (1981) 81
Long range memory effects in flows involving abrupt changes in geometry. 4. Numerical simulation using integral rheological models (Court) **8** (1981) 95
A finite difference study of the stretching and break-up of filaments of polymer solutions (Markovich) **17** (1985) 13
A technique to solve incompressible non-Newtonian flow problems (Webster) **20** (1986) 227
Draining non-Newtonian films. 1. The numerical simulation of a generalized Newtonian liquid draining down a vertical surface (Pennington) **37** (1990) 201
Numerical simulation of thermal convection with Maxwellian viscoelasticity (Harder) **39** (1991) 67
A solver for time dependent viscoelastic fluid flows (Olsson) **51** (1994) 309

Numerical simulations of the flow of liquid crystalline polymers between parallel plates containing a cylinder (Mori) **56** (1995) 85

Finite element methods

Finite element method for fluids with memory (Summary) (Caswell) **5** (1979) 199
Finite element simulation of viscoelastic flow (Viriyayuthakorn) **6** (1980) 245
Functional derivatives and finite elements for the steady spinning of a viscoelastic filament (Malkus) **8** (1981) 223
Approximation error in finite element calculation of viscoelastic fluid flows (Mendelson) **10** (1982) 31
Calculation of hole pressure. 1. Newtonian fluids (Jackson) **10** (1982) 55
Calculation of hole pressure. 2. Viscoelastic fluids (Jackson) **10** (1982) 71
Finite element analysis of die swell of a highly elastic fluid (Crochet) **10** (1982) 339
A Lagrangian finite element method for the simulation of flow of non-Newtonian liquids (Hassager) **12** (1983) 153
Some finite element studies of extrusion (Huynh) **13** (1983) 1
Finite element and boundary element methods for extrusion computations (Bush) **16** (1984) 37
Finite element simulation of viscoelastic fluids of the integral type (Dupont) **17** (1985) 157
Separating forces in blade coating of viscous and viscoelastic liquids (Hsu) **18** (1985) 273
Finite element calculation of viscoelastic flow in a journal bearing. 2. Moderate eccentricity (Beris) **19** (1986) 323
Non-linear analysis of the surface tension driven breakup of viscoelastic filaments (Bousfield) **21** (1986) 79
A streamline element scheme for solving viscoelastic flow problems. 1. Differential constitutive equations (Luo) **21** (1986) 179
A streamline element scheme for solving viscoelastic flow problems. 2. Integral constitutive models (Luo) **22** (1986) 61
A finite element method for liquid with memory (Papanastasiou) **22** (1987) 271
Analysis of lubricated planar stagnation die flow (Secor) **23** (1987) 355
The viscous squeeze-film behaviour of shear-thinning fluids (Pratt) **27** (1988) 27
Numerically stable finite element techniques for viscoelastic calculations in smooth and singular geometries (King) **29** (1988) 147
Non-Newtonian flow modelling in the screw regions of an intermeshing corotating twin screw extruder (Wang) **32** (1989) 19
Three-dimensional finite-element method for extrudate swells of a Maxwell fluid (Shiojima) **34** (1990) 269
Finite element calculation of time-dependent two-dimensional viscoelastic flow with the explicitly elliptic momentum equation formulation (Northey) **36** (1990) 109
Calculation of steady viscoelastic flow using a multimode Maxwell model: application of the explicitly elliptic momentum equation (EEME) formulation (Rajagopalan) **36** (1990) 135
Finite element methods for calculation of steady, viscoelastic flow using constitutive equations with a Newtonian viscosity (Rajagopalan) **36** (1990) 159
A preconditioned generalized minimal residual algorithm for the numerical solution of viscoelastic fluid flows (Fortin) **36** (1990) 277

A finite element procedure coupled with the method of characteristics for simulation of viscoelastic fluid flow (El Hadj) **36** (1990) 333
Simulation of non-recirculating flows of dilute fibre suspensions (Rosenberg) **37** (1990) 317
Upper and lower bounds for inelastic flows using BEM and FEM (Tanner) **38** (1990) 101
Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183
Flows of viscoelastic fluids treated by the method of characteristics (Basombrío) **39** (1991) 17
Simulation of highly elastic fluid flows without additional numerical diffusivity (Basombrío) **39** (1991) 189
Numerical integration of differential viscoelastic models (Rosenberg) **39** (1991) 269
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25
Newtonian and non-Newtonian flow in a channel obstructed by an antisymmetric array of cylinders (Georgiou) **40** (1991) 231
Numerical analysis of three-dimensional Bingham plastic flow (Beverly) **42** (1992) 85
Finite-amplitude time-periodic states in viscoelastic Taylor–Couette flow described by the UCM model (Northey) **42** (1992) 117
Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation (Coates) **42** (1992) 141
The consistent streamline-upwind/Petrov–Galerkin method for viscoelastic flow revisited (Crochet) **42** (1992) 283
Viscoelastic flow simulation using cubic stress finite elements (Rao) **43** (1992) 61
The stability of inelastic non-Newtonian fluids in Couette flow between concentric cylinders: a finite-element study (Lockett) **43** (1992) 165
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (Bohme) **45** (1992) 1
Simulation of viscoelastic flows using a conformation tensor model (Guénette) **45** (1992) 187
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (vol 45, pg 1, 1992) (Bohme) **46** (1993) 351
Calculation of viscoelastic flow using molecular models: The CONNFFESSIT approach (Laso) **47** (1993) 1
On the flow past a needle in a cylindrical tube (Thien) **47** (1993) 137
Finite element analysis of steady viscoelastic flow around a sphere in a tube: calculations with constant viscosity models (Lunsmann) **48** (1993) 63
Numerical simulation of converging flow of polymer melts through a tapered slit die (Kajiwara) **48** (1993) 111
The stagnation flow behind a sphere (Bush) **49** (1993) 103
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 2. Observations of non-Newtonian behaviour (Davidson) **49** (1993) 345
Numerical simulation of non-isothermal extrudate swell at high extrudate rates (Chang) **51** (1994) 1
Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method (Sato) **51** (1994) 249
A note on selection of spaces in computation of viscoelastic flows using

the *hp*-finite element method (Talwar) **52** (1994) 293
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283
Flow of viscoelastic fluids past periodic square arrays of cylinders: inertial and shear thinning viscosity and elasticity effects (Talwar) **57** (1995) 177
High-order finite element methods for steady viscoelastic flows (Yurun) **57** (1995) 283
The negative wake in a second-order fluid (Joseph) **57** (1995) 313
Viscoelastic flow between two opposing orifices (Sun) **58** (1995) 219
Finite element simulation of flow around a $3\pi/2$ corner using the FENE dumbbell model (Singh) **58** (1995) 279
Higher order finite element techniques for viscoelastic flow problems with change of type and singularities (Talwar) **59** (1995) 49
Comparison of three solvers for viscoelastic flow problems (Tsai) **60** (1995) 155

Finite extensibility
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 1. Basic equations and series expansions (Öttinger) **26** (1987) 207
Prediction of birefringence, stresses and kinematics in fibre spinning for solutions of finitely extensible macromolecules (Mackay) **27** (1988) 323

Finite link number
The effect of finite link number on reptation models (Schieber) **36** (1990) 205

Finite volume method
Secondary flows in straight ducts of rectangular cross section (Gervang) **39** (1991) 217
Numerical modelling of viscoelastic liquids using a finite-volume method (Darwish) **45** (1992) 311
Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method (Sato) **51** (1994) 249
A finite volume approach for calculation of viscoelastic flow through an abrupt axisymmetric contraction (Sasmal) **56** (1995) 15
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67
Numerical study of secondary flows of viscoelastic fluid in straight pipes by an implicit finite volume method (Xue) **59** (1995) 191

First normal stress coefficient
A simple empirical model describing the steady-state shear viscosity and its prediction of the first normal stress function in shear flow (Seo) **51** (1994) 179

First normal stress difference
Journal lubrication and normal stress measurement (Phan-Thien) **9** (1981) 107
Viscosity, first normal-stress coefficient, and molecular stretching in dilute polymer solutions (Fan) **17** (1985) 125
Two new methods for the approximate determination of the initial coefficient of

the first normal stress difference (Friedrich) **17** (1985) 185
Viscosity, first and second normal-stress coefficients, and molecular stretching in concentrated solutions and melts (Fan) **17** (1985) 251
The use of a generalized model based on the relaxation spectrum for calculation of the first normal stress difference from a flow curve (Vlcék) **19** (1985) 113
Extensional effects in complex flows (Debbaut) **30** (1988) 169
The dynamic moduli and the first normal stress difference of the test fluid M1: a combination of results of measurements by various research groups (te Nijenhuis) **35** (1990) 169
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows (Bulters) **38** (1990) 43
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121

Fixman's theory
Bead–spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman's theory (Ahn) **43** (1992) 143

Flammability tests
Rheological behaviour of FM-9 solutions and correlation with flammability test results and interpretations (Peng) **12** (1983) 95

Flexible macromolecules
Use of simple molecular models in the study of the mechanical behaviour of solutions of flexible macromolecules (Bird) **5** (1979) 1
The Schwinger-Dyson approximation in elastic dumbbell models for flexible polymers (Honerkamp) **21** (1986) 157
Nonlinear dumbbell model for flexible polymers: dynamical phenomena (Biller) **22** (1987) 309
The rheology of solutions of liquid crystal polymers formed from flexible chain macromolecules (Ferguson) **54** (1994) 33

Flexible threads
On the motion of flexible threads in a Stokes shear field (Goddard) **13** (1983) 47

Flocculation
Rheological behaviour of silica suspensions flocculated by bridging (Otsubo) **24** (1987) 265
Rheology of concentrated dispersed systems in a low molecular weight matrix (Coussot) **46** (1993) 179

Floquet-type instability
The three-dimensional instability of elliptical vortices in a viscoelastic fluid (Lagnado) **50** (1993) 29

Flow
Physical constants of flowing continuum (Oldroyd) **5** (1979) 141
The electrorheological effect and its possible uses (Shulman) **8** (1981) 29
Anisotropic equilibrium conformations in solutions of polymers and polyelectrolytes (Drouot) **23** (1987) 295
Flow and heat transfer in compression mold filling (Lee) **24** (1987) 245
General results on the flow of chopped fibre compounds in compression molding (Caulk) **28** (1988) 333
Spin coating of non-Newtonian fluids (Lawrence) **39** (1991) 137
Effect of polymer on flow in journal bearings (Berker) **56** (1995) 333
Effect of artificial stress diffusivity on the stability of numerical calculations

and the flow dynamics of time-dependent viscoelastic flows (Sureshkumar) **60** (1995) 53
Effect of die geometry and flow characteristics on viscoelastic annular swell (Garcia-Rejon) **60** (1995) 107
Wall effects on the flow of viscoelastic fluids around a circular cylinder (Huang) **60** (1995) 179

Flow alignment
Flow alignment in biaxial nematic liquid crystals (Leslie) **54** (1994) 241
Non-isothermal Poiseuille flow of a liquid crystalline material.
1. Flow-aligning nematic (Heynderickx) **59** (1995) 155

Flow curve
The use of a generalized model based on the relaxation spectrum for calculation of the first normal stress difference from a flow curve (Vlcék) **19** (1985) 113

Flow in a printing nip
Measurement of tensile stress at the exit of a printing nip (Patel) **22** (1987) 245

Flow instabilities
Stretching flow instabilities at the exits of extrusion dies (Cogswell) **2** (1977) 37
Flow singularities, polymer chain extension and hydrodynamic instabilities (Mackley) **4** (1978) 111
Experiments on free surface phenomena (Beavers) **5** (1979) 323
Non-Newtonian fluid displacement in an irregular annulus of axial symmetry (Graves) **8** (1981) 43
Birefringence and pressure drop for the orifice flow of a polymer solution (Eisenbrand) **11** (1982) 37
Unstable capillary flow of reinforced polymer melts (Akay) **13** (1983) 309
Instability phenomena in tubular film, and melt spinning of rheologically characterized high-density, low-density and linear low-density polyethylenes (Minoshima) **19** (1986) 275
Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
The different capillary flow regimes of entangled polydimethylsiloxane polymers: macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
Observations on the elastic instability in cone-and-plate and parallel-plate flows of a polyisobutylene Boger fluid (McKinley) **40** (1991) 201
Effect of polymer additives on ordered three-dimensional structures arising in cross-slot flow (Kalashnikov) **48** (1993) 215
Rayleigh-Taylor instability in elastic liquids (Aitken) **49** (1993) 13
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137
Mechanism for entry flow instability through a forward-facing step channel (Chiba) **57** (1995) 271

Flow orientation
Considerations of the "freezing-in" of flow-induced orientation in polymer melts by vitrification with application to processing (White) **4** (1979) 299
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269
Simulation of director orientation of liquid crystalline polymers in 2-D flows (Chang) **55** (1994) 1

Flow past a sphere
An investigation of non-Newtonian flow past a sphere (Adachi) **3** (1977/1978) 107
A numerical technique for three-dimensional steady flows of fluids of the memory-integral type (Mifflin) **20** (1986) 323
On the flow past a sphere in a cylindrical tube — limiting Weissenberg number (Zheng) **36** (1990) 27
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379

Flow resistance curve
Laminar and turbulent flow of dilute polymer solutions in smooth and rough pipes (Wójs) **48** (1993) 337

Flow visualization
Flow patterns in polyethylene and polystyrene melts during extrusion through a die entry region: measurement and interpretation (White) **3** (1977/1978) 41
An investigation of non-Newtonian flow past a sphere (Adachi) **3** (1977/1978) 107
Determination of rheological constants of an elastico-viscous fluid by kinematical analysis of oscillatory motions (Sigli) **3** (1977/1978) 221
Experimental and theoretical aspects of the two-roll mill problem (Broadbent) **3** (1978) 359
Entrance effect in capillary flow of dilute and semi-dilute polymer solutions (Moan) **5** (1979) 463
Experimental study of viscoelastic effects in a cylinder-plane lubricated contact (Doremus) **13** (1983) 79
Laminar length of a non-Newtonian fluid jet (Kumar) **15** (1984) 13
Flow visualization and birefringence studies on planar entry flow behaviour of polymer melts (White) **29** (1988) 245
Low Reynolds number flow visualization of linear and branched silicones upstream of orifice dies (Piau) **30** (1988) 197
Flow modification in the two-roll mill (White) **33** (1989) 325
Separation and reattachment of non-Newtonian fluid flows in a sudden expansion pipe (Pak) **37** (1990) 175
Visualization of the flow of linear low density polyethylene/low density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (Bohme) **45** (1992) 1
An experimental investigation of interfacial instabilities in multilayer flow of viscoelastic fluids. 1. Incompatible polymer systems (Wilson) **45** (1992) 355
Visualization of the flow of low density polyethylene/polystyrene blends through a planar step contraction (Tremblay) **52** (1994) 323
An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a converging/diverging channel geometry (Khomami) **58** (1995) 47

Flow-induced anisotropy
An experimental verification of flow-induced anisotropy of concentrated suspensions (Astarita) **34** (1990) 25

Flow-induced structure variation
Effect of molecular parameters on the viscoelastic properties of polymer melts (Pinaud) **23** (1987) 137

Fluid dynamic limitations
Fluid dynamic limitations on the performance of an electrorheological clutch (Whittle) **57** (1995) 61

Fluid mechanics
Is non-Newtonian fluid mechanics a culturally autonomous subject ? (Astarita) **1** (1976) 203
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
Brownian dynamics simulation of finitely extensible bead–spring chains (van den Brule) **47** (1993) 357

Fluorescence
Draining non-Newtonian films. 2. Measurement of the rate of change of film thickness by laser interferometry (Pennington) **37** (1990) 209

Fluorine
Effect of surface properties on polymer melt slip and extrusion defects (El Kissi) **52** (1994) 249
Slip flow of polybutadiene through fluorinated dies (Piau) **59** (1995) 11

Fluoro-elastomer coatings
Additional observations on the surface melt fracture behaviour of linear low-density polyethylene (Moynihan) **36** (1990) 255

Foams
Rheology of foams. 1. Theory for dry foams (Khan) **22** (1986) 1
Rheology of foams. 2. Effects of polydispersity and liquid viscosity for foams having gas fraction approaching unity (Khan) **25** (1987) 61
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Forward pumping screws
A non-Newtonian model of flow in forward and backward pumping screw regions of a modular tangential counter-rotating twin-screw extruder (Kim) **37** (1990) 37

Forward-facing step channel
Mechanism for entry flow instability through a forward-facing step channel (Chiba) **57** (1995) 271

Fountain flow
Non-isothermal radial filling of center-gated disk cavities with viscoelastic polymer melts (Goyal) **28** (1988) 373
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141

Four-roll mill
Deformation and breakup of viscoelastic drops in planar extensional flows (Milliken) **40** (1991) 355

Fractional calculus
Mechanical stress relaxation in polymers: fractional integral model versus fractional differential model (Friedrich) **46** (1993) 307

Fracture
On the mechanism of stretching and breaking of polymers in elongational flows (Rabin) **30** (1988) 119
Chain scission in transient extensional flow kinetics and molecular weight dependence (Nguyen) **30** (1988) 125
Fracture of ultrafine fibres in the flow of mixtures of non-Newtonian polymer melts (Tsebrenko) **31** (1989) 1

On suspension transport in a fracture: framework for a global model (Pearson) **54** (1994) 503

Frank elasticity
Generalized constitutive equation for polymeric liquid crystals. 1. Model formulation using the Hamiltonian (Poisson bracket) formulation (Edwards) **35** (1990) 51

Free coating
Free coating of viscoelastic and viscoplastic fluids onto a vertical surface (Adachi) **3** (1978) 331
Classification and analyses of coating flows (Benkreira) **54** (1994) 437

Free energy
Stability of shear flows of polymeric liquid crystals (Calderer) **43** (1992) 351

Free Lagrangian approach
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331

Free surface
The Weissenberg effect in molten polymers (Dealy) **3** (1977/1978) 127
Experiments on free surface phenomena (Beavers) **5** (1979) 323
Die swell: the separation of the free surface (Sturges) **6** (1979) 155
A normal stress amplifier for the second normal stress difference (Sturges) **6** (1980) 325
Free surface on a simple fluid between rotating eccentric cylinders. 1. Analytical solution (Siginer) **15** (1984) 93
Free surface on a simple fluid between rotating eccentric cylinders. 2. Experiments (Siginer) **15** (1984) 109
Elementary implications of viscometry on the free surface profile for the problems of climbing and channel flow (Castro) **15** (1984) 127
Asymptotic analysis of the finite cone-and-plate flow of a non-Newtonian fluid (Olagunju) **50** (1993) 289

Free surface flow
Finite element simulation of die swell for a Maxwell fluid (Caswell) **12** (1983) 13
Three-dimensional viscous flows with a free surface: flow out of a long square die (Bush) **18** (1985) 211
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation (Andre) **38** (1990) 1
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193
Viscoelastic free surface flows: spin coating and dynamic contact lines (Spaid) **55** (1994) 249
Viscoelastic free surface flows: thin film hydrodynamics of Hele–Shaw and dip coating flows (Ro) **57** (1995) 203

Friction reduction
External near-contact of sliding cylinders: polymer solutions give increased load and reduced friction coefficient (Oliver) **12** (1983) 269

Fumed silica
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 1. Hysteresis behaviour (Ziegelbaur) **17** (1985) 45
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 2. Stress-relaxation and stress growth (Kosinski) **17** (1985) 69

Funnel flow
Further considerations of axisymmetric contraction flows (Binding) **41** (1991) 27

G

Galerkin method
Comparison of computational efficiency of flow simulations with multimode constitutive equations: integral and differential models (Rajagopalan) **46** (1993) 243
Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem (Baaijens) **51** (1994) 141
Application of low-order discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283
Use of the finite element modelling technique for the improvement of viscometry results obtained by cone-and-plate rheometers (Petera) **58** (1995) 1

Gas absorption
Gas absorption into falling laminar non-Newtonian films (Gottifredi) **10** (1982) 357

Gaussian closure
A Gaussian closure of the second-moment equation for a Hookean dumbbell with hydrodynamic interaction (Wedgewood) **31** (1989) 127

Gay–Berne potential
Rheology of several hundred rigid bodies (Dlugogorski) **53** (1994) 25

Gels
Molecular network model for the rheology of gelling polymer solutions (Chu) **22** (1987) 207
Cone-and-plate rheometry of yield stress fluids. Study of an aqueous gel (Magnin) **36** (1990) 85
Vane rheometry of bentonite gels (Alderman) **39** (1991) 291
The use of the vane to measure the shear modulus of linear elastic solids (Sherwood) **41** (1991) 101
Brownian dynamics simulations of a 2-D suspension of charged colloidal plates under shear (Sherwood) **43** (1992) 195
Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration (Ianniruberto) **54** (1994) 231

Generalized minimal residual method
A preconditioned generalized minimal residual algorithm for the numerical solution of viscoelastic fluid flows (Fortin) **36** (1990) 277
An improved GMRES method for solving viscoelastic fluid flow problems (Fortin) **42** (1992) 1
Comparison of three solvers for viscoelastic flow problems (Tsai) **60** (1995) 155

Generalized Newtonian fluids
On the converging flow of generalized Newtonian fluids (Ghoneim) **15** (1984) 375
Bifurcation and discretization errors in the solution of non-Newtonian flow problems (Vrentas) **21** (1986) 377

Bifurcation phenomena of generalized Newtonian fluids in curved rectangular ducts (Shanthini) **22** (1986) 35

Giesekus fluid
Pseudo-spectral analysis of the stability of pressure-driven flow of a Giesekus fluid between parallel planes (Lim) **26** (1987) 135
Numerical simulation of the planar contraction flow of a Giesekus fluid (Choi) **29** (1988) 347
Steady Poiseuille flows for a Giesekus fluid (Schleiniger) **40** (1991) 79
Film casting of a modified Giesekus fluid: a steady-state analysis (Iyengar) **48** (1993) 1

Giesekus model
Finite element calculation of viscoelastic flow in a journal bearing. 1. Small eccentricities (Beris) **16** (1984) 141
Molecular extension from the Giesekus model (Wiest) **22** (1986) 115
A purely hyperbolic model for unsteady viscoelastic flow (Phelan) **32** (1989) 197
Phase space analysis of the spurt phenomenon for the Giesekus viscoelastic fluid model (Kolkka) **33** (1989) 305
Finite element methods for calculation of steady, viscoelastic flow using constitutive equations with a Newtonian viscosity (Rajagopalan) **36** (1990) 159
Numerical simulation of contraction flows using a multimode Giesekus model (Hulsen) **38** (1991) 183
Steady pressure-driven non-Newtonian flow in a partially filled pipe (Davis) **41** (1991) 81
Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multimode Giesekus model (Öztekin) **54** (1994) 351
A solver for time dependent viscoelastic fluid flows (Olsson) **51** (1994) 309
A generalized Giesekus constitutive model with retardation time and its association to the spurt effect (Vlassopoulos) **57** (1995) 119

Giesekus–Leonov fluid
Some properties and analytical expressions for plane flow of Leonov and Giesekus models (Hulsen) **30** (1988) 85
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331

Giesekus–Tanner theorem
On the creeping flow of the second-order fluid (Rajagopal) **15** (1984) 239

Glass oven flow
Computer modelling of transient thermal flows of non-Newtonian fluids (Ding) **47** (1993) 239
Glass transition temperature
Glass transition temperature, specific gravity, viscosity and viscoelastic properties of the test fluid M1 (te Nijenhuis) **35** (1990) 179

Global model
On suspension transport in a fracture: framework for a global model (Pearson) **54** (1994) 503

Goddard–Miller model
Calculation of main flows of a memory-integral fluid in an axisymmetric contraction at high Weissenberg numbers (Clermont) **46** (1993) 89

Gordon–Showalter derivatives
Problems originating from the use of the Gordon–Schowalter derivative in the

Johnson–Segalman and related models in various shear flow situations (Arsac) **55** (1994) 21
A generalized Giesekus constitutive model with retardation time and its association to the spurt effect (Vlassopoulos) **57** (1995) 119

Graetz number
Flows of variable-viscosity fluids in ducts with heated walls (Richardson) **25** (1987) 137

Grafted polymers
On stability of grafted polymer molecules in elongational flows (Agarwal) **54** (1994) 1
Grafting
Effect of surface properties on polymer melt slip and extrusion defects (El Kissi) **52** (1994) 249

Granular flows
New constitutive equations for the rapid flow of granular materials (Shahinpoor) **9** (1981) 147
New constitutive equations for the rapid flow of granular materials. 2. (Shahinpoor) **12** (1983) 31
A rate-dependent thermodynamical model for rapid granular flows (Ahmadi) **35** (1990) 15

Gravitational body force
Extrudate swell of Newtonian and non-Newtonian fluids: the effect of gravitational body force (Trang) **20** (1986) 103

Gravure coating
Classification and analyses of coating flows (Benkreira) **54** (1994) 437

Grease
Shear rheometry of fluids with a yield stress (Magnin) **23** (1987) 91

Grid generation
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141

Gyroscopic torque balance
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181

H

Hadamard stability
On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77
Stability constraints in the formulation of viscoelastic constitutive equations (Kwon) **58** (1995) 25

Hadamard–Rybczynski terminal velocity
On the abrupt change of velocity of bubbles rising in non-Newtonian liquids (Kawase) **8** (1981) 203
Analysis of surface tension driven levelling in viscoelastic films (Keunings) **22** (1987) 219

Hamiltonian formulation
Generalized constitutive equation for polymeric liquid crystals. 1. Model formulation using the Hamiltonian (Poisson bracket) formulation (Edwards) **35** (1990) 51

Generalized constitutive equation for polymeric liquid crystals. 2. Non-homogeneous systems (Edwards) **36** (1990) 243

Heat transfer
Heat transfer to flowing polymer melts (Hulatt) **7** (1980) 345
The electrorheological effect and its possible uses (Shulman) **8** (1981) 29
Anomalous heat transfer and drag in laminar flow of viscoelastic fluids (Ruckenstein) **17** (1985) 145
Flow and heat transfer in compression mold filling (Lee) **24** (1987) 245
Heat transfer effects in extrudate swell of elastic liquids (McClelland) **27** (1988) 363
Heat transfer, drag reduction, and fluid characterization for turbulent flow of polymer solutions: recent results and research needs (Matthys) **38** (1991) 313
Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behaviour (Choi) **41** (1992) 289

Hele–Shaw flow
A finite-element/finite-difference simulation of the injection molding filling process (Hieber) **7** (1980) 1
Singular behaviour of power-law fluids in Hele–Shaw flow (Hassager) **29** (1988) 337
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141

Hermitian shape functions
Hermitian finite elements for calculating viscoelastic flow (Marchal) **20** (1986) 187

Herschel–Bulkley fluid
Use of the parallel-plate plastometer for the characterization of viscous fluids with a yield stress (Covey) **8** (1981) 249
An experimental and theoretical study of the squeeze-film deformation and flow of elastoplastic fluids (Adams) **51** (1994) 61
Creeping sphere motion in Herschel–Bulkley fluids: flow field and drag (Atapattu) **59** (1995) 245

Heterogeneity
Heterogeneity of dilute polymer solutions (Hinch) **5** (1979) 411

Higashitani–Pritchard analysis
Evaluation of the Higashitani and Pritchard analysis of the hole pressure using flow birefringence (Pike) **16** (1984) 211
Pressure-hole errors — an alternative approach (Tanner) **28** (1988) 309

High frequencies
The determination of dynamic moduli at high frequencies (Williams) **42** (1992) 267

High pressure
Development of a high-pressure, high-shear-rate capillary viscometer (Galvin) **8** (1981) 11

High shear-rate expansion
Series expansions for shear-flow properties from the Doi-Edwards model (Öttinger) **37** (1990) 265

Hole pressure
Calculation of hole pressure. 1. Newtonian fluids (Jackson) **10** (1982) 55
Calculation of hole pressure. 2. Viscoelastic fluids (Jackson) **10** (1982) 71
Flows in pressure holes (O'Brien) **12** (1983) 383
Evaluation of the Higashitani and Pritchard analysis of the hole pressure using flow birefringence (Pike) **16** (1984) 211

Corrections for the non-isothermal hole pressure problem (Srinivasan) **27** (1988) 1
Pressure-hole errors — an alternative approach (Tanner) **28** (1988) 309
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25

Homogeneous flows
Molecular shape in homogeneous flows: predictions of the Rouse model (Hoagland) **27** (1988) 223

Hookean dumbbells
A constitutive equation for a dilute solution of Hookean dumbbells with approximate hydrodynamic interaction (Wedgewood) **30** (1988) 21
A Gaussian closure of the second-moment equation for a Hookean dumbbell with hydrodynamic interaction (Wedgewood) **31** (1989) 127
The high-frequency dynamic viscosity of Hookean dumbbells in a Maxwell corotational fluid (Stasiak) **43** (1992) 369

Hookean model
Nonequilibrium Brownian dynamics simulations of Hookean and FENE dumbbells with internal viscosity (Hua) **56** (1995) 307

Horizontal stretching
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251

HPBL equations
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25

Hydrodynamic interaction
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 1. Basic equations and series expansions (Öttinger) **26** (1987) 207
Continuum and molecular interpretation of ideal elastic fluids (Boger) **41** (1991) 133
Bead–spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman's theory (Ahn) **43** (1992) 143
Bead–spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data (Ahn) **50** (1993) 349

Hydrodynamic studies
A model of the bursting process in non-Newtonian fluids (Kawase) **12** (1983) 317

Hydroxypropylcellulose
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197

Hyperbolicity
Hyperbolicity and change of type in the flow of viscoelastic fluids through channels (Yoo) **19** (1985) 15
Change of type and loss of evolution in the flow of viscoelastic fluids (Joseph) **20** (1986) 117
Hyperbolicity and change of type in the flow of viscoelastic fluids through pipes (Ahrens) **24** (1987) 67
Time-dependent fibre spinning equations. 1. Analysis of the mathematical behaviour (Beris) **26** (1988) 341
Similarity solutions that give rise to hyperbolicity and change of type in steady flow of a viscoelastic fluid (Verdier) **31** (1989) 301

Change of type and loss of evolution of the White–Metzner model (Verdier) **31** (1989) 325
A purely hyperbolic model for unsteady viscoelastic flow (Phelan) **32** (1989) 197
Remarks concerning compressible viscoelastic fluid models (Edwards) **36** (1990) 411
Examples of supercritical, linearized, viscoelastic flow past a plate (Fraenkel) **38** (1991) 137
Hyperbolicity and change of type in steady co-extrusion flow of upper convected Maxwell fluids (Chen) **47** (1993) 157
Shocks in shear flows of the Johnson–Segalman type (Basombrío) **49** (1993) 1

Hysteresis loop
Rheological behaviour of rubber carbon black compounds in various shear flow histories (Montes) **28** (1988) 183

I

Immiscible fluids
Comments on the Doi-Ohta theory of blends (Grmela) **55** (1994) 191

Impregnation
Flow with impregnation of a rheokinetic liquid (Malkin) **54** (1994) 489

Inclined plane
Rivulet flow of a viscoelastic liquid (Rosenblat) **13** (1983) 259

Incompressible fluid
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83

Incremental model
Fading memory in an incremental model for elastic fluids (Dashner) **36** (1990) 305

Inelastic flows
A new inelastic theory of extrudate swell (Tanner) **6** (1980) 289
Upper and lower bounds for inelastic flows using BEM and FEM (Tanner) **38** (1990) 101

Inelastic fluids
Use of the falling ball viscometer to obtain flow curves for inelastic, non-Newtonian fluids (Butcher) **36** (1990) 51
Stability of two-layer Poiseuille flow of Carreau-Yasuda and Bingham-like fluids (Pinarbasi) **57** (1995) 227

Inertial effects
Some superposition theorems for second-order fluids (Kazakia) **2** (1977) 151
Steady and unsteady isochoric simple extensional flows (Balmer) **2** (1977) 307
Simple rheological models for the prediction of stretching jet profiles (Waters) **2** (1977) 385
Elastic and inertial effects in pulsatile flow of polymeric liquids in circular tubes (Davies) **3** (1977/1978) 237
Some recent results on the flow of non-Newtonian fluids (Rivlin) **5** (1979) 79
Flow of a liquid with an anisotropic viscosity tensor: inertial effects (Duffy) **7** (1980) 107
The roles of inertia and shear thinning in flow of an inelastic liquid through an axisymmetric sudden contraction (Kim-E) **13** (1983) 341
Reverse squeeze film flow in a continuous flow system (Oliver) **15** (1984) 331

Flow of K-BKZ fluids between parallel plates rotating about distinct axes: shear thinning and inertial effects (Bower) **22** (1987) 289
LDV measurements of viscoelastic flow transitions in abrupt axisymmetric contractions — interaction of inertia and elasticity (Raiford) **32** (1989) 39
Inertial and elastic effects in circular-shear (ERD) flow of viscoelastic fluids (Zhang) **33** (1989) 233
Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
On the inertial and extensional effects on the corner and lip vortices in a circular 4:1 abrupt contraction (Debbaut) **37** (1990) 281
A numerical study of the planar contraction flow of a viscoelastic fluid using the
SIMPLER algorithm (Yoo) **39** (1991) 89
Viscoelastic flow in an undulating tube. 2. Effects of high elasticity, large amplitude of undulation and inertia (Pilitsis) **39** (1991) 375
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57
Rayleigh–Taylor instability in elastic liquids (Aitken) **49** (1993) 13
Simple elongational flows which are not simple in reality (Zahorski) **59** (1995) 1

Infinite-link assumption
The effect of finite link number on reptation models (Schieber) **36** (1990) 205

Inflow conditions
The inlet layer in the flow of viscoelastic fluids (Cook) **40** (1991) 307

Inhomogeneous flow
Inhomogeneous flows of non-Newtonian fluids: generation of spatial concentration gradients (Metzner) **5** (1979) 449

Injection
Injection and suction of an upper convected Maxwell fluid through a porous-walled tube (Menon) **27** (1988) 265
Several comments on the paper "Some remarks on 'useful theorems for the second order fluid'" by P.N. Kaloni (Giesekus) **33** (1989) 343

Injection molding
A finite-element/finite-difference simulation of the injection molding filling process (Hieber) **7** (1980) 1
Flow regimes for fibre suspensions in narrow gaps (Tucker III) **39** (1991) 239
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141
A three-dimensional boundary-element approach to gas-assisted injection molding (Khayat) **57** (1995) 253

Instabilities
Surface instabilities arising in drawing cylindrical specimens of low-density polyethylene melts (Acierno) **4** (1978) 99
An extended thermodynamic approach to non-Newtonian fluids and related results in
Marangoni instability problem (Lebon) **28** (1988) 61
Orientational instabilities in plane Poiseuille flow of certain nematic liquid crystals (Zúñiga) **33** (1989) 123
Influence of upstream instabilities and wall slip on melt fracture and sharkskin phenomena during silicones extrusion through orifice dies (Piau) **34** (1990) 145
Instability of a
Criminale-Ericksen-Filbey fluid in a

disk-and-cylinder system (Chiao) **36** (1990) 361
Non-linear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247
Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip (Malkin) **39** (1991) 55
Sausage instability of a thread in a matrix: linear theory for viscoelastic fluids and interface (Palierne) **40** (1991) 289
The instability mechanism for two elastic liquids being co-extruded (Hinch) **43** (1992) 311
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171
The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning (Joo) **51** (1994) 125
The effect of fluid rheology on the elastic Taylor–Couette instability (Larson) **51** (1994) 195
A note on the viscoelastic instability of circular-Couette flow (Proctor) **51** (1994) 227
How to integrate the upper convected Maxwell (UCM) stresses near a singularity (and maybe elsewhere, too) (Renardy) **52** (1994) 91
Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multi-mode Giesekus model (Öztekin) **54** (1994) 351
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59

Instantaneous acceleration
Start-up flow of an Upper Convected Maxwell fluid over a rotating disk (Borkar) **55** (1994) 163

Instantaneous recovery
Series expansions for shear-flow properties from the Doi-Edwards model (Öttinger) **37** (1990) 265

Interface
The interface between two simple fluids between two oscillating vertical planes (Nguyen) **17** (1985) 289
Motion of the yield surface in Bingham fluid with a simple-shear flow geometry (Sekimoto) **46** (1993) 219

Interfacial instability
Interfacial instability due to elastic stratification in concentric coextrusion of two viscoelastic fluids (Chen) **40** (1991) 155
Elastic instability of the interface in Couette flow of viscoelastic liquids (Chen) **40** (1991) 261
An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a converging/diverging channel geometry (Khomami) **58** (1995) 47

Interfacial stability
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 1. Stability analysis (Khomami) **36** (1990) 289
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 2. Interface deformation (Khomami) **37** (1990) 19
An experimental investigation of interfacial instabilities in multilayer flow of viscoelastic fluids. 1. Incompatible polymer systems (Wilson) **45** (1992) 355

Interfacial tension
Sausage instability of a thread in a matrix: linear theory for viscoelastic fluids and interface (Palierne) **40** (1991) 289

Intersecting planes
Flow of an Oldroyd-B fluid between intersecting planes (Bhatnagar) **46** (1993) 49

Intrapolymer associations
Enhanced drag reduction via interpolymer associations (Kowalik) **24** (1987) 1

Inverse tangent function
A simple empirical model describing the steady state shear viscosity and its prediction of the first normal stress function in shear flow (Seo) **51** (1994) 179

Irregular annulus
Non-Newtonian fluid displacement in an irregular annulus of axial symmetry (Graves) **8** (1981) 43

Isotropic liquids
Transverse effects in shear flow of certain isotropic liquids (Leslie) **14** (1984) 161

Iterative method
An iterative method for solution of a boundary value problem in non-Newtonian fluid flow (Luning) **15** (1984) 145

J

J-integral equation
Stress singularities in non-Newtonian stick–slip and edge flows (Tanner) **50** (1993) 135

J-type models
Mathematical and physical requirements for successful computations with viscoelastic fluid models (Van der Zanden) **29** (1988) 93

Jeffrey–Hamel flow
Jeffrey–Hamel flow of Leslie–Ericksen nematic liquids (Rey) **27** (1988) 375

Jeffreys extended model
Shocks in shear flows of the Johnson–Segalman type (Basombrío) **49** (1993) 1

Jet thrust method
The flow of polymer thickened motor oils in convergent jet thrust nozzles (Oliver) **2** (1977) 367
A critical re-appraisal of the jet-thrust technique for normal stresses, with particular reference to axial velocity and stress rearrangement at the exit plane (Davies) **3** (1977/1978) 141
The flow of polymer-thickened oils in convergent jet-thrust nozzles at a temperature of 84°C (Oliver) **4** (1979) 345
High shear rate normal stress measurement for hot, polymer-thickened oils using the jet thrust method (Oliver) **8** (1981) 177
Experimental study of the elongational stress of dilute polymer solutions in orifice flows (Hasegawa) **38** (1991) 159

Jets
The triple jet: influence of shear history on the stretching of polymer solutions (Oliver) **1** (1976) 105
Laminer swirling power-law non-Newtonian fluid jet impinging on a normal plane (Gorla) **2** (1977) 299
Simple rheological models for the prediction of stretching jet profiles (Waters) **2** (1977) 385
The existence of solutions for a stretching jet (Waters) **4** (1978) 161

On the applicability of directed fluid jets to Newtonian and non-Newtonian flows (Naghdi) **5** (1979) 233
Die swell: the separation of the free surface (Sturges) **6** (1979) 155
Ligament-type disintegration of non-Newtonian fluid in spinning disk atomization (Kawase) **10** (1982) 367
A new elongational rheometer for polymer solutions (Schümmer) **12** (1983) 331
Extrudate swell for a round jet with large surface tension (Tieu) **13** (1983) 203
Laminar length of a non-Newtonian fluid jet (Kumar) **15** (1984) 13
Experiments on elongational flow of dilute polymer solutions. 1. Jet reaction and excess pressure drop for the flow through small apertures (Hasegawa) **15** (1984) 257
A one-dimensional theory for viscoelastic fluid jets, with application to extrudate swell and draw-down under gravity (Bechtel) **21** (1986) 273
Laminar jets of a plane liquid sheet falling vertically in the atmosphere (Adachi) **24** (1987) 11
Effective stress rates of viscoelastic free jets (Bechtel) **26** (1987) 1
On the behaviour of viscoelastic free jets with elliptical cross section (Bechtel) **27** (1988) 87
Modelling of Boger fluid jets using the Oldroyd-B equation: a comparison of experimental and numerical results (Chai) **29** (1988) 433
The mechanisms of neck-like deformation in high-speed melt spinning. 1. Rheological and dynamic factors (Ziabicki) **30** (1988) 141
Turbulence characteristics of impinging jets near the deflecting surface, the effect of polymer additives (Glowacki) **33** (1989) 25
Practical application of a higher order perturbation theory for slender viscoelastic jets and fibres (Bechtel) **41** (1992) 201
A study of submerged pseudoplastic laminar jets (Jordan) **41** (1992) 323
A material function from the vibrating jet (Chan Man Fong) **46** (1993) 111
Some comments on the surface-tension driven break-up (or the lack of it) of viscoelastic jets (Renardy) **51** (1994) 97
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
A numerical study of the asymptotic evolution and breakup of Newtonian and viscoelastic jets (Renardy) **59** (1995) 267

Johnson–Segalman fluids
Analytical and numerical solution of the Poiseuille flow of a Johnson–Segalman fluid (Van Schaftingen) **18** (1985) 335
Loss of evolution in the flow of viscoelastic fluids (Dupret) **20** (1986) 143
Spurt phenomena of the Johnson–Segalman fluid and related models (Kolkka) **29** (1988) 303
On Rankine–Hugoniot conditions for Maxwell liquids (Renardy) **32** (1989) 69
Flows of viscoelastic fluids treated by the method of characteristics (Basombrío) **39** (1991) 17
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331
Shocks in shear flows of the Johnson–Segalman type (Basombrío) **49** (1993) 1
On modelling spurt flows of polymers (Adewale) **49** (1993) 133
Problems originating from the use of the Gordon–Schowalter derivative in the Johnson–Segalman and related models in

various shear flow situations (Arsac) **55** (1994) 21

Journal bearings
Journal lubrication and normal stress measurement (Phan-Thien) **9** (1981) 107
Finite element calculation of viscoelastic flow in a journal bearing. 2. Moderate eccentricity (Beris) **19** (1986) 323
Load enhancement effects due to polymer thickening in a short model journal bearing (Oliver) **30** (1988) 185
Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders (Davies) **54** (1994) 331
Effect of polymer on flow in journal bearings (Berker) **56** (1995) 333
Non-Newtonian cavitation analysis in journal bearings (Lemaitre) **59** (1995) 31

Junction lifetime
Viscoelastic properties of physically cross-linked networks. 2. Dynamic mechanical moduli (Tanaka) **43** (1992) 273

K

K-BKZ fluids
On axisymmetric deformations on nonlinear viscoelastic membranes (Wineman) **4** (1978) 249
On the simultaneous elongation and inflation of a tubular membrane of BKZ fluid (Wineman) **6** (1979) 111
Flow of K-BKZ fluids between parallel plates rotating about distinct axes: shear thinning and inertial effects (Bower) **22** (1987) 289
The vortex growth of a K-BKZ fluid in an abrupt contraction (Dupont) **29** (1988) 81
A numerical study of the flow of a K-BKZ fluid between plates rotating about non-coincident axes (Dai) **38** (1991) 289
The effect of fluid rheology on the elastic Taylor-Couette instability (Larson) **51** (1994) 195

K-BKZ theory
Variational principle for the KBKZ rheological equation of state with potential function (Hassager) **9** (1981) 321
Utilization of double-step shear strain experiments in the evaluation of rheological constitutive equations (Vrentas) **40** (1991) 381
On the use of stress growth data to determine strain-dependent material functions for factorable K-BKZ equations (Venerus) **49** (1993) 299
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67

Kernal equation
The Doi-Edwards model without independent alignment (Marrucci) **21** (1986) 329

Kinematical tensors
A note on kinematical tensors (Walters) **3** (1977/1978) 293

Kinematics
The kinematics and stability of die entry flows (Nguyen) **5** (1979) 353
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289

Kinetic theory
Dilute solution rheology: experimental results and finitely extensible nonlinear elastic dumbbell theory (Christiansen) **3** (1977/1978) 161
The Langevin approach to the dumbbell kinetic problem in rheology (Phan-Thien) **3** (1978) 309
Use of simple molecular models in the study of the mechanical behaviour of solutions of flexible macromolecules (Bird) **5** (1979) 1
Constitutive equations for polymer melts predicted by the Doi–Edwards and Curtiss–Bird kinetic theory models (Currie) **11** (1982) 53
An encapsulated dumbbell model for concentrated polymer solutions and melts. 1. Theoretical development and constitutive equation (Bird) **13** (1983) 149
Kinetic theory and rheology of solutions of rigid rodlike macromolecules (Bird) **14** (1984) 85
Equilibration in momentum space in the kinetic theory of polymer solutions (Bird) **15** (1984) 85
A kinetic theory for polymer melts. 6. Calculation of additional material functions (Fan) **15** (1984) 341
A note on the encapsulated dumbbell model (Phan-Thien) **17** (1985) 111
Configuration-dependent friction coefficients and elastic dumbbell rheology (Fan) **18** (1985) 255
Equilibrium and steady-state flow properties of a suspension of freely rotating chains (Fan) **19** (1986) 303
Multiple-time scale approach to stress growth in suspensions of rodlike macromolecules (Stasiak) **25** (1987) 277
The flow of dilute polymer solutions in confined geometries: a consistent numerical approach (Biller) **25** (1987) 347
Stress growth in dilute solutions of macromolecules in a non-Newtonian solvent (Stasiak) **31** (1989) 289
Renormalization group calculation of viscometric functions based on conventional polymer kinetic theory (Öttinger) **33** (1989) 53
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
Brownian dynamics simulation of model polymer fluids in shear-flow. 1. Dumbbell models (Rudisill) **41** (1992) 275
Best fit for differential constitutive model parameters to non-linear oscillation data (Jeyaseelan) **47** (1993) 267
Brownian dynamics simulation of finitely extensible bead–spring chains (van den Brule) **47** (1993) 357

Kinks dynamics
Uncoiling a polymer molecule in a strong extensional flow (Hinch) **54** (1994) 209

L

Lagrangian frame
A Lagrangian finite element method for the simulation of flow of non-Newtonian liquids (Hassager) **12** (1983) 153
Collapse of spherical bubbles in Maxwell fluids (Kim) **55** (1994) 37

Lagrangian integral method
Simulation of transient viscoelastic flow with second order time integration (Rasmussen) **56** (1995) 65

Lagrangian–Eulerian formulation
Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Laminar length
Laminar length of a non-Newtonian fluid jet (Kumar) **15** (1984) 13

Laser-Doppler anemometry
An experimental study of nonrheometic flows of viscoelastic fluids. 1. Flow into a re-entrant tube (Busby) **1** (1976) 71
Experimental study of a non-viscometric flow: Kinematics of a viscoelastic fluid at the exit of a cylindrical tube (Clermont) **1** (1976) 175
An experimental study of nonrheometic flows of viscoelastic fluids. 2. Flow in a liquid jet exiting from a vertical tube (Goulden) **1** (1976) 183
The study of time-dependent pipe flows of inelastic non-Newtonian fluids using a multiviscous approximation (Ly) **1** (1976) 287
Theoretical and experimental study of a viscoelastic fluid in the converging region of a pipe (Clermont) **5** (1979) 387
Velocity fields around spheres and bubbles investigated by laser-Doppler anemometry (Bisgaard) **12** (1983) 283
Kinematics and normal stress differences of a viscoelastic fluid undergoing wiggle flow (Arikol) **19** (1985) 209
Direct velocity gradient measurements using a dual-point laser-Doppler anemometer (Brunn) **22** (1987) 381
Flow of dilute polyacrylamide solutions through a sudden planar contraction (Wunderlich) **28** (1988) 267
Draining thin films. 2. Laser measurements of film thickness and velocity profile (Keeley) **32** (1989) 79
Secondary flows in straight ducts of rectangular cross section (Gervang) **39** (1991) 217
A study of submerged pseudoplastic laminar jets (Jordan) **41** (1992) 323
A rheo-optical study of polydimethylsiloxane melt (Subramanian) **53** (1994) 113

Laser-Doppler velocimetry
Newtonian and non-Newtonian flow near a re-entrant corner (Cochrane) **10** (1982) 95
Experimental velocity distribution measurements of high-density polyethylene flowing into and within a slit (Mackley) **21** (1986) 337
Flow modification in the two-roll mill (White) **33** (1989) 325
Exit and entrance flows of non-Newtonian fluids in parallel slits (Yarusso) **40** (1991) 103
Laser-Doppler velocimetry measurements of velocity fields and transitions in viscoelastic fluids (Lawler) **20** (1986) 51
Experimental studies of the onset of oscillatory instability in viscoelastic Taylor-Couette flow (Müller) **46** (1993) 315
The stagnation flow behind a sphere (Bush) **49** (1993) 103
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 1. Experimental methods and straight channel validations (Davidson) **49** (1993) 317

Birefringence and laser-Doppler velocimetry (LDV) studies of viscoelastic flow through a planar contraction (Quinzani) **52** (1994) 1
On the stagnation flow behind a sphere in a shear-thinning viscoelastic liquid (Bush) **55** (1994) 229

Laser interferometry
Draining thin films. 2. Laser measurements of film thickness and velocity profile (Keeley) **32** (1989) 79
Draining non-Newtonian films. 2. Measurement of the rate of change of film thickness by laser interferometry (Pennington) **37** (1990) 209

Lennard-Jones potential
Non-Newtonian behaviour of simple liquids (Heyes) **21** (1986) 137

Lesaint–Raviart method
Simulation of highly elastic fluid flows without additional numerical diffusivity (Basombrío) **39** (1991) 189
Computing viscoelastic fluid flow problems at low cost (Fortin) **45** (1992) 209

Leslie–Ericksen model
Jeffrey–Hamel flow of Leslie–Ericksen nematic liquids (Rey) **27** (1988) 375
Simulation of director orientation of liquid crystalline polymers in 2-D flows (Chang) **55** (1994) 1
Influence of a temperature gradient on the simple shear flow of a nematic liquid crystal (Heynderickx) **55** (1994) 137

Levenberg–Marquardt algorithm
Calculation of main flows of a memory-integral fluid in an axisymmetric contraction at high Weissenberg numbers (Clermont) **46** (1993) 89
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193

Linear filtering
Non-linear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247

Linear flow
The stability of two-dimensional linear flows of an Oldroyd-type fluid (Lagnado) **18** (1985) 25
A note on the linear vector model of Olbricht, Rallison, and Leal as applied to the breakup of slender axisymmetric drops (Khakhar) **21** (1986) 127

Linear momentum equations
Symbolic evaluation of the Ericksen-Leslie equations in the computational domain (Güler) **52** (1994) 309

Linear ramping
Start-up flow of an Upper Convected Maxwell fluid over a rotating disk (Borkar) **55** (1994) 163

Linear stability
Surface instabilities arising in drawing cylindrical specimens of low-density polyethylene melts (Acierno) **4** (1978) 99
Linear stability of flow of viscoelastic fluid between eccentric rotating cylinders (Zhang) **11** (1982) 201
Oscillatory and steady convection in a dielectric viscoelastic layer subjected to a temperature gradient in the presence of an electric field (Agrait) **21** (1986) 1
The linear stability of numerical solutions of some elementary viscoelastic flows (Van Schaftingen) **20** (1986) 271

Linear stability of plane Couette flow of an upper convected Maxwell fluid (Renardy) **22** (1986) 23
The stability of two concentric non-Newtonian fluids in circular pipe flow (Wong) **22** (1987) 359
On the convected linear stability of a viscoelastic Oldroyd-B fluid heated from below (Kolkka) **25** (1987) 209
Draw resonance in film casting of viscoelastic fluids: a linear stability analysis (Anturkar) **28** (1988) 287
Steady Poiseuille flows for a Giesekus fluid (Schleiniger) **40** (1991) 79
Linear stability analysis of cone and plate flow of an Oldroyd-B fluid (Olagunju) **47** (1993) 93
Rayleigh-Taylor instability in elastic liquids (Aitken) **49** (1993) 13
The three-dimensional instability of elliptical vortices in a viscoelastic fluid (Lagnado) **50** (1993) 29
Non-axisymmetric modes in viscoelastic Taylor–Couette flow (Avgousti) **50** (1993) 225
Linear stability analysis of viscoelastic Poiseuille flow using an Arnoldi-based orthogonalization algorithm (Sureshkumar) **56** (1995) 151

Linear theory
Linear theory of gravity waves on a Maxwell fluid (Saasen) **34** (1990) 207

Liquid bridge
Stretching behaviour of large polymeric and Newtonian liquid bridges in plateau simulation (Kroger) **45** (1992) 385
Measurement of extensional viscosity by stretching large liquid bridges in microgravity (Berg) **55** (1994) 307
Velocity and elongation rate distributions in stretched polymeric and Newtonian liquid bridges (Kroger) **57** (1995) 137

Liquid crystal polymers
Stress relaxation after oscillatory shear in a thermotropic liquid crystalline polymer (Graziano) **13** (1983) 243
Computer simulation of flow and molecular orientation in liquid crystal polymers (Vanderheyden) **23** (1987) 383
One modification of the Ericksen–Leslie equations in a two-dimensional motion (Ryskin) **39** (1991) 207
A constitutive equation for monodomains of nematic polymers (Maffettone) **45** (1992) 339
The rheology of solutions of liquid crystal polymers formed from flexible chain macromolecules (Ferguson) **54** (1994) 33
Simulation of director orientation of liquid crystalline polymers in 2-D flows (Chang) **55** (1994) 1
Numerical simulations of the flow of liquid crystalline polymers between parallel plates containing a cylinder (Mori) **56** (1995) 85

Liquid crystals
One modification of the Ericksen–Leslie equations in a two-dimensional motion (Ryskin) **39** (1991) 207
Non-planar shear flows for non-aligning nematic liquid crystals (Luskin) **42** (1992) 369
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197
Normal stress differences in liquid crystals and in extremely shear thickening dispersions (Hess) **54** (1994) 201
Flow alignment in biaxial nematic liquid crystals (Leslie) **54** (1994) 241
Non-isothermal Poiseuille flow of a liquid crystalline material.

1. Flow-aligning nematic (Heynderickx) **59** (1995) 155
Non-isothermal Poiseuille flow of a liquid crystalline material.
2. Tumbling nematic (Potze) **59** (1995) 173
Lithosphere
Numerical simulation of thermal convection with Maxwellian viscoelasticity (Harder) **39** (1991) 67

Load enhancement
Definitive load-enhancement effects by polymer-thickened oils in a squeeze film experiment (Oliver) **9** (1981) 257
External near-contact of sliding cylinders: polymer solutions give increased load and reduced friction coefficient (Oliver) **12** (1983) 269
Load enhancement effects by polymer-thickened oils in strip squeeze film flow (Oliver) **13** (1983) 93
Reverse squeeze film flow in a continuous flow system (Oliver) **15** (1984) 331

Lodger–Meissner relation
Viscoelastic properties of physically cross-linked networks. 3.
Time-dependent phenomena (Tanaka) **43** (1992) 289

Long chain branching
Problems in describing the large deformation of elastomers: examination of basic concepts for their applicability to material behaviour (Nakajima) **12** (1983) 349

Long-wave analysis
Long-wave analysis of viscoelastic film leveling (Bousfield) **40** (1991) 47

Loss coefficient
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe (Pak) **39** (1991) 353

Loss of evolution
Loss of evolution in the flow of viscoelastic fluids (Dupret) **20** (1986) 143

Low molecular weights
Rheology of concentrated dispersed systems in a low molecular weight matrix (Coussot) **46** (1993) 179
Turbulent pipe flow characteristics of low molecular weight polymer solutions (Pereira) **55** (1994) 321

Low shear-rate expansion
Series expansions for shear-flow properties from the Doi-Edwards model (Öttinger) **37** (1990) 265

Lubrication
Elastico-viscous squeeze films. 1. (Brindley) **1** (1976) 19
An elastohydrodynamic theory for the rheology of concentrated suspensions of deformable particles (Goddard) **2** (1977) 169
Normal stress effects in viscoelastic fluid lubrication (Christensen) **7** (1980) 63
Journal lubrication and normal stress measurement (Phan-Thien) **9** (1981) 107
Viscoelastic elongational lubrication (Doremus) **9** (1981) 389
Normal and reverse squeezing flows (Avila) **11** (1982) 111
Steady planar extension with lubricated dies (Macosko) **11** (1982) 301
On the planar extensional viscosity of mobile liquids (Williams) **19** (1985) 53

Load enhancement and friction reduction effects by polymer-thickened oils lubricating externally sliding cylinders (Oliver) **21** (1986) 39
Analysis of lubricated planar stagnation die flow (Secor) **23** (1987) 355
Long-wave analysis of viscoelastic film leveling (Bousfield) **40** (1991) 47
Behaviour of a Bingham-like viscous fluid in lubrication flows (Dorier) **45** (1992) 291
A new hydrodynamic lubrication theory for bilinear rheological fluids (Wu) **56** (1995) 253

Lubrication approximation
Radial flow of a Bingham fluid between two fixed circular disks (Dai) **8** (1981) 349
Squeezing flow of elastic liquids (McClelland) **13** (1983) 181
The flow of an Oldroyd liquid in a continuous-flow squeeze film (Waters) **14** (1984) 361
Roll coating operations (Benkreira) **14** (1984) 377
An analytical solution of radial flow of a Bingham fluid between two fixed circular disks (Huang) **26** (1987) 143
Flow regimes for fibre suspensions in narrow gaps (Tucker III) **39** (1991) 239
On suspension transport in a fracture: framework for a global model (Pearson) **54** (1994) 503

Lubrication theory
Lubrication squeeze-film theory for the Oldroyd-B fluid (Phan-Thien) **14** (1984) 327
A non-Newtonian model of flow in a kneading disk region of a modular intermeshing corotating twin screw extruder (Szydlowski) **28** (1988) 29
Squeeze-film flow of a viscoelastic fluid: a lubrication model (Phan-Thien) **28** (1988) 129
Non-Newtonian flow modelling in the screw regions of an intermeshing corotating twin screw extruder (Wang) **32** (1989) 19
Squeezing flow of a Bingham material (Wilson) **47** (1993) 211
Sink flows of a suspension of rigid rods. 2. Lubrication theory (Rallison) **48** (1993) 237
An experimental and theoretical study of the squeeze-film deformation and flow of elastoplastic fluids (Adams) **51** (1994) 61
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

M

M-type models
Mathematical and physical requirements for successful computations with viscoelastic fluid models (Van der Zanden) **29** (1988) 93

M1
An overview of the project M1 (Sridhar) **35** (1990) 85
Preparation and some properties of M1 and its constituents (Nguyen) **35** (1990) 93
Measurements of N1-N2 and η in steady shear-flow and η', η'', and birefringence in small-strain oscillatory shear for the polyisobutylene solution M1 (Chirinos) **35** (1990) 105
The shear and extensional flow properties of M1 (Binding) **35** (1990) 121

Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
The shear flow properties of M1 (Hudson) **35** (1990) 159
The dynamic moduli and the first normal stress difference of the test fluid M1: a combination of results of measurements by various research groups (te Nijenhuis) **35** (1990) 169
Glass transition temperature, specific gravity, viscosity and viscoelastic properties of the test fluid M1 (te Nijenhuis) **35** (1990) 179
Rheological properties of a polyisobutylene in a kerosene/polybutene mixture in simple shear flow (Steiert) **35** (1990) 189
The extensional properties of M1 obtained from the Carri-Med elongational viscometer (Ferguson) **35** (1990) 197
Experimental results and constitutive modelling of the extensional flow of M1 (Nguyen) **35** (1990) 207
Liquid stretching using a falling cylinder (Matta) **35** (1990) 215
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251
The extensional properties of M1 obtained from the stretching of a filament by a falling pendant drop (Jones) **35** (1990) 263
Mechanical and optical responses of the M1 fluid subject to stagnation point flow (Schweizer) **35** (1990) 277
Climbing constant, second-order correction of Trouton's viscosity, wave speed and delayed die swell for M1 (Hu) **35** (1990) 287
Crossflow of elastic liquids through arrays of cylinders (Chmielewski) **35** (1990) 309
Creeping motion of spheres in fluid M1 (Tirtaatmadja) **35** (1990) 327
Circular entry flows of fluid M1 (Boger) **35** (1990) 339
Flow birefringence studies in transient flows of a two roll mill for the test-fluid M1 (Geffroy) **35** (1990) 361
Weissenberg effect of the fluid M1. Study by an optical method (Dupuis) **35** (1990) 401
Flow of test fluid M1 in corrugated tubes (James) **35** (1990) 405
Compressive flow of the fluid M1 (Rajaiah) **35** (1990) 413
Measurement of the extensional viscosity of M1 in a converging channel rheometer (James) **35** (1990) 445
Modelling of fluid M1 using multiple-relaxation-time constitutive equations (Chai) **35** (1990) 459
Extending filaments of an Oldroyd fluid (Keiller) **42** (1992) 37
Modelling of the extensional flow of the M1 fluid with the Oldroyd equation (Keiller) **42** (1992) 49
Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation (Park) **42** (1992) 301

Macromolecules

Hydrodynamics in media with migrating macromolecules: development of FDCF asymptote (Dutta) **16** (1984) 279
Stress growth in dilute solutions of macromolecules in a non-Newtonian solvent (Stasiak) **31** (1989) 289
Strong flows of polymeric liquids. 2. Mechanical degradation of macromolecules (Yarin) **38** (1991) 127
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221

Magnetic sphere rheometer
Boundary effects on the drag of an oscillating sphere: applications to the magnetic sphere rheometer (Sellers) **26** (1987) 43

Magneto-rheological effect
Electro-magneto-rheological effects in parallel-field and crossed-field systems (Koyama) **58** (1995) 195

Magnetoviscometer
Application of interconversions to viscosity measurements of polystyrene (Bernreitner) **30** (1988) 73

Mantle
Numerical simulation of thermal convection with Maxwellian viscoelasticity (Harder) **39** (1991) 67

Marangoni number
The effect of viscoelasticity on the translation of a surfactant covered Newtonian drop (Quintana) **45** (1992) 81

Marrucci model
Derivation of the Marrucci model from transient network theory (Jongschaap) **8** (1981) 183

Mass transfer rate
Gas absorption into falling laminar non-Newtonian films (Gottifredi) **10** (1982) 357

Material functions
A comment on the material functions for steady circular shear in the orthogonal rheometer (Goddard) **4** (1979) 365
A constitutive equation derived from Lodge's network theory (De Kee) **6** (1979) 127
Further comments on the FENE-P dumbbell model (Mochimaru) **9** (1981) 179
An encapsulated dumbbell model for concentrated polymer solutions and melts. 2. Calculation of material functions and experimental comparisons (DeAguiar) **13** (1983) 161
An encapsulated dumbbell model for concentrated polymer solutions and melts. 2. Calculation of material functions and experimental comparisons (DeAguiar) **13** (1983) 161
Possibility of a master plot for material functions of high-polymer solutions (Mochimaru) **13** (1983) 365
A kinetic theory for polymer melts. 6. Calculation of additional material functions (Fan) **15** (1984) 341
A material function from the vibrating jet (Chan Man Fong) **46** (1993) 111
Mechanical stress relaxation in polymers: fractional integral model versus fractional differential model (Friedrich) **46** (1993) 307

Maxwell fluids
Converging flow of a viscoelastic liquid (Black) **1** (1976) 83
Effect of a relaxation time spectrum on mechanics of polymer melt spinning (Denn) **2** (1977) 159
Stability of plane Poiseuille flow of a highly elastic liquid (Ho) **3** (1977/1978) 179
On die swell: some theoretical results (Pearson) **4** (1978) 195
On die swell: some theoretical results (Summary) (Pearson) **5** (1979) 267
Functional derivatives and finite elements for the steady spinning of a viscoelastic filament (Malkus) **8** (1981) 223
A finite element routine for analyzing non-Newtonian flows. 2. The extrusion

of a Maxwell fluid (Coleman) **8** (1981) 261
Finite element simulation of die swell for a Maxwell fluid (Caswell) **12** (1983) 13
Mechanical energy balances for a capillary viscometer (Vrentas) **12** (1983) 211
The evolution of small rotational perturbations to a uniform rotation of a viscoelastic fluid contained between parallel plates (Kazakia) **15** (1984) 45
Finite element and boundary element methods for extrusion computations (Bush) **16** (1984) 37
One dimensional finite element solutions for a Maxwell fluid (Gartling) **17** (1985) 203
Stability of plane Poiseuille and Couette flow of a Maxwell fluid (Lee) **21** (1986) 65
Spectral finite element calculations of the flow of a Maxwell fluid between eccentric rotating cylinders (Beris) **22** (1987) 129
On the accuracy of finite element and finite difference predictions of non-Newtonian slot pressures for a Maxwell fluid (Malkus) **25** (1987) 93
Further results on the flow of a Maxwell fluid through an abrupt contraction (Rosenberg) **29** (1988) 295
On Rankine–Hugoniot conditions for Maxwell liquids (Renardy) **32** (1989) 69
Linear theory of gravity waves on a Maxwell fluid (Saasen) **34** (1990) 207
Three-dimensional finite element method for extrudate swells of a Maxwell fluid (Shiojima) **34** (1990) 269
An alternative approach to inflow boundary conditions for Maxwell fluids in three space dimensions (Renardy) **36** (1990) 419
Examples of supercritical, linearized, viscoelastic flow past a plate (Fraenkel) **38** (1991) 137
The inlet layer in the flow of viscoelastic fluids (Cook) **40** (1991) 307
Porous medium flow of the fluid A1: effects of shear and elongation (Vorwerk) **41** (1991) 119
Flow along the centerline behind a sphere in a uniform stream (Phan-Thien) **41** (1991) 151
Viscoelastic flow simulation using cubic stress finite elements (Rao) **43** (1992) 61
The high-frequency dynamic viscosity of Hookean dumbbells in a Maxwell corotational fluid (Stasiak) **43** (1992) 369
Application of spectral elements to viscoelastic creeping flows (Van Kemenade) **51** (1994) 277
Weakly nonlinear behaviour of periodic disturbances in two-layer plane channel flow of upper-convected Maxwell liquids (Renardy) **56** (1995) 101

Maxwell models

On stretching Maxwell models (Petrie) **2** (1977) 221
Some results in the theory of melt spinning for model viscoelastic liquids (Petrie) **4** (1978) 137
Shear rate dependence of the viscoelasticity of polymer solutions. 2. Xanthan gum (Thurston) **9** (1981) 69
Computer modelling of flows of elastic liquids through complex vessels and with forced convection (Richards) **10** (1982) 175
Spinnability and viscoelasticity (Larson) **12** (1983) 303
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
Rayleigh-Taylor instability in elastic liquids (Aitken) **49** (1993) 13

Modelling and computation of the onset of failure in polymeric liquid filaments (Wang) **58** (1995) 97

Mechanical degradation
Strong flows of polymeric liquids. 2. Mechanical degradation of macromolecules (Yarin) **38** (1991) 127

Mechanical moduli
Viscoelastic properties of physically cross-linked networks. 2. Dynamic mechanical moduli (Tanaka) **43** (1992) 273

Melt fracture
Unified molecular theories of linear and non-linear viscoelasticity of flexible linear polymers: explaining the 3.4 power law of the zero-shear viscosity and the slip-stick melt fracture phenomenon (Lin) **23** (1987) 163
Influence of upstream instabilities and wall slip on melt fracture and sharkskin phenomena during silicones extrusion through orifice dies (Piau) **34** (1990) 145
Short wave instabilities resulting from memory slip (Renardy) **35** (1990) 73
Additional observations on the surface melt fracture behaviour of linear low-density polyethylene (Moynihan) **36** (1990) 255
Extrudate distortions in linear low-density polyethylene solutions and melt (Pomar) **54** (1994) 143

Melt spinning
Effect of a relaxation time spectrum on mechanics of polymer melt spinning (Denn) **2** (1977) 159
Some results in the theory of melt spinning for model viscoelastic liquids (Petrie) **4** (1978) 137
Constant force elongational flow of a low-density polyethylene melt — experiment and theory (Raible) **11** (1982) 239
The effect of die flow on the dynamics of isothermal melt spinning (Tsou) **17** (1985) 331
Instability phenomena in tubular film, and melt spinning of rheologically characterized high-density, low-density and linear low-density polyethylenes (Minoshima) **19** (1986) 275
The mechanisms of neck-like deformation in high-speed melt spinning. 1. Rheological and dynamic factors (Ziabicki) **30** (1988) 141
The mechanisms of neck-like deformation in high-speed melt spinning. 2. Effects of polymer crystallization (Ziabicki) **30** (1988) 157
An experimental and theoretical study of the effect of the elongational history on the dynamics of isothermal melt spinning (Sampers) **30** (1988) 325
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57
Necking in non-isothermal high-speed spinning with radial viscosity variation (Zahorski) **50** (1993) 65

Membranes
On axisymmetric deformations on nonlinear viscoelastic membranes (Wineman) **4** (1978) 249
On the simultaneous elongation and inflation of a tubular membrane of BKZ fluid (Wineman) **6** (1979) 111

Memory functions
The prediction of time-dependent non-linear stresses in viscoelastic materials. 3.
Memory-function non-linearity (Phillips) **2** (1977) 139
Memory-function determination of viscoelastic fluids based on relaxation

tests (normal and shear stresses) (Attane) **3** (1977/1978) 1
Some relations and tests on a constitutive equation with a factorized memory function (Menezes) **7** (1980) 45
The determination of polymer relaxation moduli and memory functions using integral transforms (Kamath) **32** (1989) 119

Memory-integral fluid
Finite element method for fluids with memory (Summary) (Caswell) **5** (1979) 199
Modelling of strain histories for memory integral fluids in steady axisymmetric flows (Winter) **10** (1982) 157
A numerical technique for three-dimensional steady flows of fluids of the memory-integral type (Mifflin) **20** (1986) 323
Calculation of main flows of a memory-integral fluid in an axisymmetric contraction at high Weissenberg numbers (Clermont) **46** (1993) 89

Mesh refinement
On numerical die swell calculation (Crochet) **10** (1982) 85
Numerical simulations of viscoelastic flow: the effect of mesh size (Davies) **16** (1984) 117
Adaptive refinement of a viscoelastic flow problem with the explicitly elliptic momentum equation (Rao) **38** (1991) 223

Metals
On the relationship between phenomenological models for elastic-viscoplastic metals and polymeric liquids (Rubin) **50** (1993) 79

Metered coating
Classification and analyses of coating flows (Benkreira) **54** (1994) 437

Method of characteristics
On the classification of some model equations for viscoelasticity (Luskin) **16** (1984) 3
A finite element procedure coupled with the method of characteristics for simulation of viscoelastic fluid flow (El Hadj) **36** (1990) 333
Flows of viscoelastic fluids treated by the method of characteristics (Basombrío) **39** (1991) 17
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283

Microgravity

Measurement of extensional viscosity by stretching large liquid bridges in microgravity (Berg) **55** (1994) 307

Micromechanical approach
Strong flows of polymeric liquids. 1. Rheological behaviour (Yarin) **37** (1990) 113

Microstructure
Strong flow criteria based on microstructure deformation (Olbricht) **10** (1982) 291
Rheology of concentrated dispersed systems in a low molecular weight matrix (Coussot) **46** (1993) 179

Solving microstructure electrostatics with MIMD parallel supercomputers and Split-C (Traenkle) **53** (1994) 197

Migration
Hydrodynamics in media with migrating macromolecules: development of FDCF asymptote (Dutta) **16** (1984) 279
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221

Mixed finite element method
Numerical solution for the flow of viscoelastic fluids (Crochet) **5** (1979) 201
Die swell of a Maxwell fluid: numerical predictions (Crochet) **7** (1980) 199
A finite element routine for analysing non-Newtonian flows. 1. Basic method and preliminary results (Coleman) **7** (1980) 289
A finite element routine for analyzing non-Newtonian flows. 2. The extrusion of a Maxwell fluid (Coleman) **8** (1981) 261
Error estimates for a mixed finite element method for a non-Newtonian flow (Baranger) **23** (1987) 415
A new mixed finite element for calculating viscoelastic flow (Marchal) **26** (1987) 77
On the convergence of the streamline-upwind mixed finite element (Crochet) **34** (1990) 261
A new mixed finite element method for viscoelastic flows governed by differential constitutive equations (Szady) **59** (1995) 215
A new mixed finite element method for computing viscoelastic flows (Guénette) **60** (1995) 27

Mixing
Power requirement for the mixing of thixotropic liquids (Edwards) **1** (1976) 309
Numerical simulation of non-Newtonian free shear flows at high Reynolds numbers (Azaiez) **52** (1994) 333

Model
Improved correlation for shear-dependent viscosity of polyelectrolyte solutions (Tam) **46** (1993) 275

Modified Doi equation
Numerical simulations of the flow of liquid crystalline polymers between parallel plates containing a cylinder (Mori) **56** (1995) 85

Molecular dynamics
Dynamical behaviour of drag-reducing polymer solutions (Scrivener) **5** (1979) 475
Non-Newtonian behaviour of simple liquids (Heyes) **21** (1986) 137
Molecular shape in homogeneous flows: predictions of the Rouse model (Hoagland) **27** (1988) 223
Brownian dynamics simulation of model polymer fluids in shear-flow. 1. Dumbbell models (Rudisill) **41** (1992) 275
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303
Microscopic and mesoscopic results from non-equilibrium molecular dynamics modelling of FENE dumbbell liquids (Dlugogorski) **49** (1993) 23
Rheology of several hundred rigid bodies (Dlugogorski) **53** (1994) 25

Predicting polymer melt behaviour near the inception of wall slip in oscillatory shear (Jeyaseelan) **53** (1994) 99

Molecular extension
Strong flow criteria based on microstructure deformation (Olbricht) **10** (1982) 291
Viscosity, first normal-stress coefficient, and molecular stretching in dilute polymer solutions (Fan) **17** (1985) 125
Viscosity, first and second normal-stress coefficients, and molecular stretching in concentrated solutions and melts (Fan) **17** (1985) 251
Equilibrium and steady-state flow properties of a suspension of freely rotating chains (Fan) **19** (1986) 303

Molecular models
Use of simple molecular models in the study of the mechanical behaviour of solutions of flexible macromolecules (Bird) **5** (1979) 1
Three alternative approaches to development of constitutive equations (Astarita) **5** (1979) 125
Molecular models and the Taylor stability of dilute polymer solutions (Lhuillier) **9** (1981) 329
Derivation of strain measures from strand convection models for polymer melts (Larson) **17** (1985) 91
Rheology of molecular liquids and concentrated suspensions by microscopic dynamical simulations (Heyes) **27** (1988) 47
Calculation of viscoelastic flow using molecular models: The CONNFFESSIT approach (Laso) **47** (1993) 1

Molecular orientation
Computer simulation of flow and molecular orientation in liquid crystal polymers (Vanderheyden) **23** (1987) 383
Numerical simulations of the flow of liquid crystalline polymers between parallel plates containing a cylinder (Mori) **56** (1995) 85
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269

Molecular structure
Heterogeneity of dilute polymer solutions (Hinch) **5** (1979) 411
Thixotropy — A general review (Mewis) **6** (1979) 1

Molecular weight dependence
Chain scission in transient extensional flow kinetics and molecular weight dependence (Nguyen) **30** (1988) 125

Monodomain
A comparison between texture and rheological behaviour of lyotropic liquid crystalline polymers during flow (Vermant) **53** (1994) 1

Monotonicity enforcement
Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem (Baaijens) **51** (1994) 141

Multi-layer flow
Stability of coextrusion through converging dies (Anturkar) **41** (1991) 1

Multi-mode fluids
Finite element Eulerian–Lagrangian method for time dependent flow of multimode fluids (Serdakowski) **29** (1988) 217

Multi-mode models
Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183

Numerical analysis of start-up planar and axisymmetric contraction flows using multi-mode differential constitutive models (Baaijens) **48** (1993) 147
Quantitative prediction of the viscoelastic instability in cone-and-plate flow of a Boger fluid using a multi-mode Giesekus model (Öztekin) **54** (1994) 351

Multigrid method
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (Bohme) **45** (1992) 1

Multiphase flow
Torque suppression in mechanically stirred liquids and multiphase liquid systems (Quaraishi) **1** (1976) 223
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 1. Stability analysis (Khomami) **36** (1990) 289
An experimental investigation of interfacial instabilities in multilayer flow of viscoelastic fluids. 1. Incompatible polymer systems (Wilson) **45** (1992) 355
An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a converging/diverging channel geometry (Khomami) **58** (1995) 47

Multiple instruction muliple data model
Solving microstructure electrostatics with MIMD parallel supercomputers and Split-C (Traenkle) **53** (1994) 197

N

Nahme number
Flows of variable-viscosity fluids in ducts with heated walls (Richardson) **25** (1987) 137

Navier–Stokes equations
A technique to solve incompressible non-Newtonian flow problems (Webster) **20** (1986) 227

Nearly extensional flow
Nearly extensional flows (Huilgol) **5** (1979) 219
Remarks on nearly extensional flows (Huilgol) **8** (1981) 169

Nearly viscometric flow
Developments in non-Newtonian fluid mechanics — A personal view (Walters) **5** (1979) 113
On viscoelastic effects in swirling flows (Bowen) **38** (1991) 113

Necking

Investigation of failure during elongational flow of polymer melts (Ide) **2** (1977) 281
The mechanisms of neck-like deformation in high-speed melt spinning. 1. Rheological and dynamic factors (Ziabicki) **30** (1988) 141
The mechanisms of neck-like deformation in high-speed melt spinning. 2. Effects of polymer crystallization (Ziabicki) **30** (1988) 157
'Necking' in high-speed spinning revisited (Ziabicki) **47** (1993) 57
Necking in non-isothermal high-speed spinning with radial viscosity variation (Zahorski) **50** (1993) 65
Velocity and elongation rate distributions in stretched polymeric and Newtonian liquid bridges (Kroger) **57** (1995) 137

Nematic liquid crystals
A theoretical investigation of the Pieranski–Guyon instability in Couette

flow of nematic liquid crystals (Barratt) **11** (1982) 23
Jeffrey–Hamel flow of Leslie–Ericksen nematic liquids (Rey) **27** (1988) 375
Orientational instabilities in plane Poiseuille flow of certain nematic liquid crystals (Zúñiga) **33** (1989) 123
Non-planar shear flows for non-aligning nematic liquid crystals (Luskin) **42** (1992) 369
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181
Normal stress differences in liquid crystals and in extremely shear thickening dispersions (Hess) **54** (1994) 201
Flow alignment in biaxial nematic liquid crystals **54** (1994) 241
Influence of a temperature gradient on the simple shear flow of a nematic liquid crystal (Heynderickx) **55** (1994) 137

Nematic polymers
A two-dimensional approach to the constitutive equation of nematic polymers (Maffettone) **38** (1991) 273
Orientational transition in radial flow of a nematic liquid (Rey) **40** (1991) 177
A constitutive equation for monodomains of nematic polymers (Maffettone) **45** (1992) 339
Shear flow of nematic polymers. 2. Stationary regimes and start-up dynamics (Farhoudi) **49** (1993) 175
Stationary bifurcations and tricriticality in a creeping nematic polymer flow (Han) **50** (1993) 1
Air-blast atomization of non-Newtonian liquids (Mansour) **58** (1995) 161
Bifurcation analysis of a molecular model for nematic polymers in shear flows (Maffettone) **59** (1995) 73

Network models
A non-linear viscoelastic model with structure-dependent relaxation times. 1. Basic formulation (Acierno) **1** (1976) 125
A new constitutive equation derived from network theory (Phan-Thien) **2** (1977) 353
Some useful constitutive models with a kinematic slip hypothesis (Tanner) **5** (1979) 103
A constitutive equation derived from Lodge's network theory (De Kee) **6** (1979) 127
Molecular network model for the rheology of gelling polymer solutions (Chu) **22** (1987) 207
Effect of molecular parameters on the viscoelastic properties of polymer melts (Pinaud) **23** (1987) 137
Yield stress fluid. Structural model and transient shear flow behaviour (Doremus) **39** (1991) 335
The free energy of a deforming Lodge rubber-like liquid (Prakash) **40** (1991) 337
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267
Charged network constitutive equation (Chan Man Fong) **57** (1995) 39
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Newtonian fluids
A singular finite difference treatment of re-entrant corner flow. 1. Newtonian fluids (Holstein) **8** (1981) 81
Compressive flow between parallel disks. 1. Newtonian fluid with a

transverse viscosity gradient (Lee) **10** (1982) 3
Calculation of hole pressure. 1. Newtonian fluids (Jackson) **10** (1982) 55
Suspension of solid particles in a Newtonian fluid (Levy) **13** (1983) 63
A nearly-elongational flow analysis of the fibre spinning flow (Phan-Thien) **21** (1986) 225
Stratified flows of Newtonian and viscoelastic fluids (Dheur) **32** (1989) 1
The hydrodynamics of a bent cylinder in a viscoelastic fluid (Kim) **33** (1989) 219
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Non-affine motion
A model for viscoelastic fluid behaviour which allows non-affine deformation (Johnson) **2** (1977) 255
Description of the non-affine motions of dilute polymer solutions by the porous molecule model (Johnson) **9** (1981) 33
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Non-axisymmetric flow
Non-axisymmetric flow of a viscoelastic fluid between rotating disks (Huilgol) **23** (1987) 423

Non-axisymmetric modes
Non-axisymmetric modes in viscoelastic Taylor–Couette flow (Avgousti) **50** (1993) 225

Non-creeping flows
Linear stability analysis of cone and plate flow of an Oldroyd-B fluid (Olagunju) **47** (1993) 93

Non-Fourier effects
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83

Non-homogeneous flows
Hydrodynamics in media with migrating macromolecules: development of FDCF asymptote (Dutta) **16** (1984) 279

Non-isothermal flow
Non-isothermal flow of a molten polymer in a narrow rectangular cavity (van Wijngaarden) **11** (1982) 175
Corrections for the non-isothermal hole pressure problem (Srinivasan) **27** (1988) 1
Time-temperature superposition in non-isothermal flow (Wiest) **27** (1988) 127
Non-isothermal flow of polymer melts (Wiest) **27** (1988) 333
Non-isothermal radial filling of center-gated disk cavities with viscoelastic polymer melts (Goyal) **28** (1988) 373
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281
Non-isothermal Poiseuille flow of a liquid crystalline material. 1. Flow-aligning nematic (Heynderickx) **59** (1995) 155
Non-isothermal Poiseuille flow of a liquid crystalline material. 2. Tumbling nematic (Potze) **59** (1995) 173

Non-isothermal rheology
Non-isothermal rheology of polymers and its significance in polymer processing (Pearson) **6** (1979) 81
Transient processes in Couette flow of a Leonov fluid influenced by dissipation (Braun) **33** (1989) 39
An alternative approach to non-isothermal melt spinning with axial and radial viscosity distributions (Zahorski) **36** (1990) 71
Dissipative behaviour of viscoelastic fluids derived from rheological constitutive equations (Braun) **38** (1990) 81

Non-Newtonian behaviour
Non-Newtonian behaviour of simple liquids (Heyes) **21** (1986) 137

Non-Newtonian flows
A finite element routine for analysing non-Newtonian flows. 1. Basic method and preliminary results (Coleman) **7** (1980) 289
On the use of boundary integral methods in the analysis of non-Newtonian fluid flow (Coleman) **16** (1984) 347
Error estimates for a mixed finite element method for a non-Newtonian flow (Baranger) **23** (1987) 415
Transient free convection from a vertical plate to a non-Newtonian fluid in a porous medium (Haq) **36** (1990) 395
Numerical prediction of anomalous transport properties in viscoelastic flow (Delvaux) **37** (1990) 297
Numerical simulation of hole pressure for a Johnson–Segalman fluid (Yao) **40** (1991) 25

Non-Newtonian fluid mechanics
Is non-Newtonian fluid mechanics a culturally autonomous subject ? (Astarita) **1** (1976) 203
Developments in non-Newtonian fluid mechanics — A personal view (Walters) **5** (1979) 113
An approach to non-Newtonian fluid mechanics (Oldroyd) **14** (1984) 9

Non-Newtonian fluids
Variational principles and entropy production in creeping flow of non-Newtonian fluids (Astarita) **2** (1977) 343
The motion of small particles in non-Newtonian fluids (Leal) **5** (1979) 33
On the abrupt change of velocity of bubbles rising in non-Newtonian liquids (Kawase) **8** (1981) 203
A model of the bursting process in non-Newtonian fluids (Kawase) **12** (1983) 317
Separation and reattachment of non-Newtonian fluid flows in a sudden expansion pipe (Pak) **37** (1990) 175

Non-radial flow
Flow of an Oldroyd-B fluid between intersecting planes (Bhatnagar) **46** (1993) 49

Non-stationary solution
An exact non-stationary solution of simple shear flow in a Bingham fluid (Sekimoto) **39** (1991) 107

Non-uniform flow
Flow of polymer solutions through porous media (Rodriguez) **49** (1993) 63

Non-uniform grid system
A numerical study of the planar contraction flow of a viscoelastic fluid using the
SIMPLER algorithm (Yoo) **39** (1991) 89

Nonlinear behaviour
Nonlinear viscoelastic behaviour of aqueous detergent solutions (Shikata) **28** (1988) 171

Nonlinear integral equations
The Schwinger-Dyson approximation in elastic dumbbell models for flexible polymers (Honerkamp) **21** (1986) 157

Nonlinear iteration
Numerical filtering and the high Weissenberg number problem (Davies) **16** (1984) 195

Nonlinear spring
Bead–spring chain model for the dynamics of dilute polymer solutions. 2. Comparisons with experimental data (Ahn) **50** (1993) 349

Nonlinearities
Bifurcation and discretization errors in the solution of non-Newtonian flow problems (Vrentas) **21** (1986) 377

Normal extensional stresses
Bernoulli equation and the competition of elastic and inertial pressures in the potential flow of a second-order fluid (Joseph) **42** (1992) 385

Normal modes
Bead–spring chain model for the dynamics of dilute polymer solutions. 1. A modification of Fixman's theory (Ahn) **43** (1992) 143

Normal (or dry) rolling
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305

Normal stresses
A critical re-appraisal of the jet-thrust technique for normal stresses, with particular reference to axial velocity and stress rearrangement at the exit plane (Davies) **3** (1977/1978) 141
Relaxation of normal and shear stresses after a sudden shear strain in the cone-and-plate experiment using the rheometrics mechanical spectrometer (Pedersen) **3** (1978) 379
Relations between shear and normal stresses in a step-shear experiment (Hassager) **4** (1978) 261
Capillary and slit methods of normal stress measurements (Review) (Boger) **6** (1980) 163
Normal stress effects in viscoelastic fluid lubrication (Christensen) **7** (1980) 63
Normal stress measurement of dilute polymer solutions (Tomita) **7** (1980) 237
High shear rate normal stress measurement for hot, polymer-thickened oils using the jet thrust method (Oliver) **8** (1981) 177
Journal lubrication and normal stress measurement (Phan-Thien) **9** (1981) 107
New constitutive equations for the rapid flow of granular materials (Shahinpoor) **9** (1981) 147
Determination of normal stresses in dilute polymer solutions using the electrochemical diagnostics of flow around a rotating sphere (Wein) **11** (1982) 163

Remarks on inertial radii, persistent normal stresses, secondary motions, and non-elastic extensional viscosities (Joseph) **32** (1989) 107
Normal stress measurement by speckle photography on the Weissenberg effect (Dupuis) **33** (1989) 95
Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
Rheological properties of a polyisobutylene in a kerosene/polybutene mixture in simple shear flow (Steiert) **35** (1990) 189
Weissenberg effect of the fluid M1. Study by an optical method (Dupuis) **35** (1990) 401
Determination of polymer melt viscosity by squeezing flow with constant plate velocity (Winther) **39** (1991) 119
The instability mechanism for two elastic liquids being co-extruded (Hinch) **43** (1992) 311
Normal stresses in extremely shear thickening polymer dispersions (Laun) **54** (1994) 87
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow (Osaki) **54** (1994) 109
Normal stress differences in liquid crystals and in extremely shear thickening dispersions (Hess) **54** (1994) 201
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215

Nuclear magnetic resonance imaging
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251
Pipe flow of aqueous polyacrylamide solutions studied by means of nuclear magnetic resonance imaging (Li) **57** (1995) 155

Numerical instability
The stability of some numerical schemes for model viscoelastic fluids (Tanner) **10** (1982) 169
Spatial decay of steady perturbations of plane Poiseuille flow for the Oldroyd-B equation (Keiller) **46** (1993) 129

Numerical methods
Plane flow of a fluid of second grade through a contraction (Crochet) **1** (1976) 247
On the simultaneous elongation and inflation of a tubular membrane of BKZ fluid (Wineman) **6** (1979) 111
On numerical die swell calculation (Crochet) **10** (1982) 85
Non-isothermal flow of a molten polymer in a narrow rectangular cavity (van Wijngaarden) **11** (1982) 175
A numerical technique for three-dimensional steady flows of fluids of the memory-integral type (Mifflin) **20** (1986) 323
The squeeze-film flow of a viscoelastic fluid (Phan-Thien) **24** (1987) 97
Flow of an Oldroyd-type fluid through a sinusoidally corrugated tube (Phan-Thien) **24** (1987) 203
On the accuracy of finite element and finite difference predictions of non-Newtonian slot pressures for a Maxwell fluid (Malkus) **25** (1987) 93
The flow of dilute polymer solutions in confined geometries: a consistent numerical approach (Biller) **25** (1987) 347
Finite element Eulerian–Lagrangian method for time dependent flow of multimode fluids (Serdakowski) **29** (1988) 217

The determination of polymer relaxation moduli and memory functions using integral transforms (Kamath) **32** (1989) 119
Non-linear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247
A study of some numerical viscoelastic schemes (Tanner) **41** (1991) 171
Computing viscoelastic fluid flow problems at low cost (Fortin) **45** (1992) 209
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141
Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
The stress of an upper convected Maxwell fluid in a Newtonian velocity field near a reentrant corner (Renardy) **50** (1993) 127
Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem (Baaijens) **51** (1994) 141
The effect of oscillation on the drainage of an elastico-viscous liquid (Goshawk) **54** (1994) 449
A matched solution for corner flow of the upper convected Maxwell fluid (Renardy) **58** (1995) 83
Effect of artificial stress diffusivity on the stability of numerical calculations and the flow dynamics of time-dependent viscoelastic flows (Sureshkumar) **60** (1995) 53

Numerical simulation

A finite-element/finite-difference simulation of the injection molding filling process (Hieber) **7** (1980) 1
Non-isothermal developing flow of a generalized power-law fluid in a tapered tube (Jarzębski) **8** (1981) 239
Special issue on numerical simulation in non-Newtonian fluid mechanics: introduction (Walters) **10** (1982) 1
Non-isothermal developing flow of a power-law fluid in a converging slit (Jarzębski) **12** (1983) 1
On the numerical simulation of two-dimensional time-dependent flows of Oldroyd fluids. 1. Basic method and preliminary results (Townsend) **14** (1984) 265
Numerical simulation of the flow of a viscoelastic fluid through an abrupt contraction (Keunings) **14** (1984) 279
A numerical simulation of a plastic fluid in a parallel-plate plastometer (Gartling) **14** (1984) 347
Papers from the 3rd international workshop on numerical simulation of viscoelastic flows (Armstrong) **16** (1984) 1
One dimensional finite element solutions for a Maxwell fluid (Gartling) **17** (1985) 203
Analytical and numerical solution of the Poiseuille flow of a Johnson–Segalman fluid (Van Schaftingen) **18** (1985) 335
On the high Weissenberg number problem (Keunings) **20** (1986) 209
Structure of the rate-of-deformation field of Newtonian and viscoelastic fluids in a falling-ball experiment (El Kayloubi) **22** (1987) 335
Reptation and tube renewal: experimental and numerical simulation (Marin) **23** (1987) 215
Numerical simulation of the die swell problem of a Newtonian fluid by using the concept of stream function and a local analysis of the singularity at the corner (Andre) **23** (1987) 335
Numerical simulation of viscoelastic flow through a sudden contraction using

a type dependent difference method (Song) **24** (1987) 221
Numerical simulation and change in type in the developing flow of a nonlinear viscoelastic fluid (Gaidos) **29** (1988) 59
Numerical simulation of highly viscoelastic flows through an abrupt contraction (Debbaut) **29** (1988) 119
Numerical simulation of the planar contraction flow of a Giesekus fluid (Choi) **29** (1988) 347
Numerical simulation studies of the planar entry flow of polymer melts (White) **30** (1988) 47
Numerical simulation of the non-isothermal flow of a nonlinear viscoelastic fluid in a rectangular channel (Nikoleris) **31** (1989) 193
Numerical solution of the laminar boundary layer equations for power-law fluids (Andersson) **32** (1989) 175
Co-current axisymmetric flow in complex geometries: numerical simulation (Musarra) **32** (1989) 253
Use of the falling ball viscometer to obtain flow curves for inelastic, non-Newtonian fluids (Butcher) **36** (1990) 51
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 2. Interface deformation (Khomami) **37** (1990) 19
Use of boundary-fitted curvilinear coordinates for the numerical simulation of complex viscoelastic flows (Papathanasiou) **37** (1990) 139
On the inertial and extensional effects on the corner and lip vortices in a circular 4:1 abrupt contraction (Debbaut) **37** (1990) 281
Numerical prediction of anomalous transport properties in viscoelastic flow (Delvaux) **37** (1990) 297
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation (Andre) **38** (1990) 1
Numerical integration of differential viscoelastic models (Rosenberg) **39** (1991) 269
An improved GMRES method for solving viscoelastic fluid flow problems (Fortin) **42** (1992) 1
On the numerical simulation of axisymmetric swirling flows of differential viscoelastic liquids: The rod climbing and the *Quelleffekt* (Debbaut) **43** (1992) 103
Numerical modelling of viscoelastic liquids using a finite-volume method (Darwish) **45** (1992) 311
Entry-flow calculations for the Oldroyd-B and FENE equations (Keiller) **46** (1993) 143
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281
Numerical simulation of converging flow of polymer melts through a tapered slit die (Kajiwara) **48** (1993) 111
On the development of secondary motion induced by the free surface in the rod climbing flow (Debbaut) **48** (1993) 357
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 1. Experimental methods and straight channel validations (Davidson) **49** (1993) 317
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305
Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method (Sato) **51** (1994) 249

Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modelling (Saramito) **52** (1994) 263
Numerical simulation of non-Newtonian free shear flows at high Reynolds numbers (Azaiez) **52** (1994) 333
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Numerical simulation of semi-dilute suspensions of rodlike particles in shear flow (Yamane) **54** (1994) 405
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67
Viscoelastic flow between two opposing orifices (Sun) **58** (1995) 219
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129
A split Lagrangian–Euler method for simulating transient viscoelastic flows (Harlen) **60** (1995) 81

O

Ol-borate complex
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow (Osaki) **54** (1994) 109

Oldroyd derivatives
On configuration-dependent generalized Oldroyd derivatives (Giesekus) **14** (1984) 47

Oldroyd fluids
Rectilinear oscillatory viscoelastic flow in rectangular ducts (O'Brien) **13** (1983) 33
Extensional flows of Oldroyd fluids (Petrie) **14** (1984) 189
On the numerical simulation of two-dimensional time-dependent flows of Oldroyd fluids. 1. Basic method and preliminary results (Townsend) **14** (1984) 265
The flow of an Oldroyd liquid in a continuous-flow squeeze film (Waters) **14** (1984) 361
The stability of two-dimensional linear flows of an Oldroyd-type fluid (Lagnado) **18** (1985) 25
Theoretical simulation of transient viscoelastic flows in a viscoelastic system (Randria) **18** (1985) 199
Flow of an Oldroyd-type fluid through a sinusoidally corrugated tube (Phan-Thien) **24** (1987) 203
The numerical simulation of an Oldroyd liquid draining down a vertical surface (Pennington) **34** (1990) 221
Extending filaments of an Oldroyd fluid (Keiller) **42** (1992) 37

Oldroyd four-constant model
Direct numerical solutions of the equations for viscoelastic fluid flow (Perera) **5** (1979) 269
A numerical solution of Newtonian and viscoelastic flow past stationary and rotating cylinders (Townsend) **6** (1980) 219
The translation of a Newtonian droplet in a 4-constant Oldroyd fluid (Quintana) **22** (1987) 253

The effect of oscillation on the drainage of an elastico-viscous liquid (Goshawk) **54** (1994) 449

Oldroyd model
Radial flow of viscoelastic liquids. 1. Theoretical (Lee) **1** (1976) 323
The existence of solutions for a stretching jet (Waters) **4** (1978) 161
The flow of an elastico-viscous liquid in an axisymmetric pipe of slowly varying cross-section (Williams) **7** (1980) 171
Modelling of the extensional flow of the M1 fluid with the Oldroyd equation (Keiller) **42** (1992) 49
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171

Oldroyd-B fluid
Finite element analysis of die swell of a highly elastic fluid (Crochet) **10** (1982) 339
Coaxial-disk flow of an Oldroyd-B fluid: exact solution and stability (Phan-Thien) **13** (1983) 325
Lubrication squeeze-film theory for the Oldroyd-B fluid (Phan-Thien) **14** (1984) 327
Cone-and-plate flow of the Oldroyd-B fluid is unstable (Phan-Thien) **17** (1985) 37
Flow of viscoelastic fluids between rotating disks. 1. (Huilgol) **18** (1985) 101
On the consequence of discretization errors in the numerical calculation of viscoelastic flow (Dupret) **18** (1985) 173
Squeeze film flow of ideal elastic liquids (Phan-Thien) **18** (1985) 227
Hermitian finite elements for calculating viscoelastic flow (Marchal) **20** (1986) 187
Steady spinning of the Oldroyd fluid B. 1. Theory (Gupta) **21** (1986) 99
A nearly-elongational flow analysis of the fibre spinning flow (Phan-Thien) **21** (1986) 225
On the convected linear stability of a viscoelastic Oldroyd-B fluid heated from below (Kolkka) **25** (1987) 209
On the asymptotic behaviour of an Oldroyd fluid B in steady spinning flow (Phan-Thien) **25** (1987) 129
Multiplicity of solutions in von Karman flows of viscoelastic fluids (Ji) **36** (1990) 1
A numerical study of the planar contraction flow of a viscoelastic fluid using the SIMPLER algorithm (Yoo) **39** (1991) 89
A spectral domain decomposition method for the planar non-Newtonian stick–slip problem (Owens) **41** (1991) 43
Viscoelastic flow simulation using cubic stress finite elements (Rao) **43** (1992) 61
Secondary flows in cone and plate flow of an Oldroyd-B fluid (Olagunju) **46** (1993) 29
Flow of an Oldroyd-B fluid between intersecting planes (Bhatnagar) **46** (1993) 49
A new approach to modelling viscoelastic flow (Yuan) **46** (1993) 331
Linear stability analysis of cone and plate flow of an Oldroyd-B fluid (Olagunju) **47** (1993) 93
The flow of an Oldroyd fluid around a sharp corner (Hinch) **50** (1993) 161
On corner flows of Oldroyd-B fluids (Davies) **50** (1993) 173
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193
A note on the viscoelastic instability of circular-Couette flow (Proctor) **51** (1994) 227

On a discontinuity capturing technique for Oldroyd-B fluids (Carew) **51** (1994) 231
A solver for time-dependent viscoelastic fluid flows (Olsson) **51** (1994) 309
Chaos and overstability in the thermal convection of viscoelastic fluids (Khayat) **53** (1994) 227
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
Comparison of three solvers for viscoelastic flow problems (Tsai) **60** (1995) 155

Oldroyd-B model
Steady spinning of the Oldroyd fluid B. 2. Experimental results (Sridhar) **21** (1986) 115
Flow singularity and slip velocity in plane extrudate swell computations (Wesson) **26** (1988) 277
Transient deformation of an inviscid inclusion in a viscoelastic extensional flow (Bousfield) **27** (1988) 205
Modelling of Boger fluid jets using the Oldroyd-B equation: a comparison of experimental and numerical results (Chai) **29** (1988) 433
A numerical study of extrudate swell in very dilute polymer solutions represented by the Oldroyd-B model (Bush) **34** (1990) 15
Experimental results and constitutive modelling of the extensional flow of M1 (Nguyen) **35** (1990) 207
Compressive flow of the fluid M1 (Rajaiah) **35** (1990) 413
On the flow past a sphere in a cylindrical tube: limiting Weissenberg number (Zheng) **36** (1990) 27
Finite element methods for calculation of steady, viscoelastic flow using constitutive equations with a Newtonian viscosity (Rajagopalan) **36** (1990) 159
A preconditioned generalized minimal residual algorithm for the numerical solution of viscoelastic fluid flows (Fortin) **36** (1990) 277
Viscoelastic flow in an undulating tube. 2. Effects of high elasticity, large amplitude of undulation and inertia (Pilitsis) **39** (1991) 375
Stability of coextrusion through converging dies (Anturkar) **41** (1991) 1
Continuum and molecular interpretation of ideal elastic fluids (Boger) **41** (1991) 133
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
Computing viscoelastic fluid flow problems at low cost (Fortin) **45** (1992) 209
Spatial decay of steady perturbations of plane Poiseuille flow for the Oldroyd-B equation (Keiller) **46** (1993) 129
Entry-flow calculations for the Oldroyd-B and FENE equations (Keiller) **46** (1993) 143
Finite element analysis of steady viscoelastic flow around a sphere in a tube: calculations with constant viscosity models (Lunsmann) **48** (1993) 63
Non-axisymmetric modes in viscoelastic Taylor–Couette flow (Avgousti) **50** (1993) 225
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303

Oldroyd–Maxwell models
A study of some numerical viscoelastic schemes (Tanner) **41** (1991) 171

One point test
Complex viscosity predictions for the S1 fluid using harmonic analysis on applied non-sinusoidal stress waveforms (Davies) **52** (1994) 177

Onset criterion
Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres (Vorwerk) **51** (1994) 79

Opposed jets
Uniaxial and biaxial extensional viscosity measurements of dilute and semi-dilute solutions of rigid rod polymers (Cathey) **30** (1988) 303
The optical and mechanical response of flexible polymer solutions to extensional flow (Cathey) **34** (1990) 63
Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121
Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry (Willenbacher) **52** (1994) 163
Opposing-jet viscometry of fluids with viscosity approaching that of water (Hermansky) **56** (1995) 1

Optical methods
Dynamics of colloidal particles in sheared, non-Newtonian fluids (Johnson) **34** (1990) 89
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 2. Observations of non-Newtonian behaviour (Davidson) **49** (1993) 345

Optimal control technique
Optimal control techniques for computing stationary flows of viscoelastic fluids (Le Tallec) **20** (1986) 241

Order parameter
Stability of shear flows of polymeric liquid crystals (Calderer) **43** (1992) 351

Ordered structure
Effect of polymer additives on ordered three-dimensional structures arising in cross-slot flow (Kalashnikov) **48** (1993) 215

Orientation distribution function
Similarity solutions for the orientation distribution function and rheological properties of suspensions of axisymmetric particles with external couples (Kim) **24** (1987) 297

Orifice flow

Rapid extensional flows of polymer-thickened motor oils through a small orifice (Oliver) **3** (1977/1978) 92
Characteristics of HPAM dilute polymer solutions in three elongational flow situations (Ouibrahim) **7** (1980) 315
Birefringence and pressure drop for the orifice flow of a polymer solution (Eisenbrand) **11** (1982) 37
Circular entry flows of fluid M1 (Boger) **35** (1990) 339
Experimental study of the elongational stress of dilute polymer solutions in orifice flows (Hasegawa) **38** (1991) 159
Creeping flow regimes of low concentration polymer solutions in thick solvents through an orifice die (Cartalos) **45** (1992) 231
Viscoelastic flow between two opposing orifices (Sun) **58** (1995) 219

Orr–Sommerfeld equation
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171

Orthogonal rheometer
A comment on the material functions for steady circular shear in the orthogonal rheometer (Goddard) **4** (1979) 365
A numerical study of the flow of a K-BKZ fluid between plates rotating about non-coincident axes (Dai) **38** (1991) 289

Oscillating vertical surface
The interface between two simple fluids between two oscillating vertical planes (Nguyen) **17** (1985) 289
Enhancement of the drainage of non-Newtonian liquid films by oscillation (Goshawk) **51** (1994) 21

Oscillatory flow
Determination of rheological constants of an elastico-viscous fluid by kinematical analysis of oscillatory motions (Sigli) **3** (1977/1978) 221
Complex flow of viscoelastic fluids through oscillating pipes. Interesting effects and applications (Mena) **5** (1979) 427
Capillary flow of linear polyethylene melt: sudden increase of flow rate (Weill) **7** (1980) 303
Compressive flow between parallel disks. 2. Oscillatory behaviour of viscoelastic materials under a constant load (Lee) **14** (1984) 301
On the propagation of shear oscillations in inelastic power-law fluids (Wein) **21** (1986) 309
The effect of oscillation on the drainage of an elastico-viscous liquid (Goshawk) **54** (1994) 449

Oscillatory instability
Experimental studies of the onset of oscillatory instability in viscoelastic Taylor-Couette flow (Müller) **46** (1993) 315

Oscillatory shear
Stress relaxation after oscillatory shear in a thermotropic liquid crystalline polymer (Graziano) **13** (1983) 243
A rheometrical study of Boger fluids (Jackson) **14** (1984) 173
Exact solution of the Rouse model with discrete time evolution (Öttinger) **19** (1986) 357
Measurements of N1-N2 and η in steady shear-flow and η', η'', and birefringence in small-strain oscillatory shear for the polyisobutylene solution M1 (Chirinos) **35** (1990) 105
Best fit for differential constitutive model parameters to non-linear oscillation data (Jeyaseelan) **47** (1993) 267
The anomalous shear flow properties of S1 (Hudson) **52** (1994) 105
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121
Complex viscosity predictions for the S1 fluid using harmonic analysis on applied non-sinusoidal stress waveforms (Davies) **52** (1994) 177
Predicting polymer melt behaviour near the inception of wall slip in oscillatory shear (Jeyaseelan) **53** (1994) 99
Prediction of suspension viscoelasticity through particle motion modelling (Toivakka) **56** (1995) 49

Oscillatory strain
The maximum amplitude of strain for the validity of linear viscoelasticity (Astarita) **3** (1977/1978) 281

Osmotic pressure effects
Osmotic pressure effects in dispersion rheometry (Woodcock) **19** (1986) 349

Oseen–Burgers tensor
A constitutive equation for a dilute solution of Hookean dumbbells with

approximate hydrodynamic interaction (Wedgewood) **30** (1988) 21
A Gaussian closure of the second-moment equation for a Hookean dumbbell with hydrodynamic interaction (Wedgewood) **31** (1989) 127

Overshoot
Entropy effects in viscoelastic fluid theory (Christensen) **1** (1976) 371
On the corner vortex in abrupt contractions (Debbaut) **36** (1990) 265
Viscoelastic properties of physically cross-linked networks. 3. Time-dependent phenomena (Tanaka) **43** (1992) 289
The motion of a sphere falling under gravity in a constant-viscosity elastic liquid (Jones) **53** (1994) 175

Overstability
Convection and overstability in a viscoelastic fluid layer (Stastna) **18** (1985) 61
Chaos and overstability in the thermal convection of viscoelastic fluids (Khayat) **53** (1994) 227
Nonlinear overstability in the thermal convection of viscoelastic fluids (Khayat) **58** (1995) 331

P

PAA solution
Comparison of the responses of viscoelastic fluids to a new rheometrical test (Sigli) **9** (1981) 191
Stretching behaviour of large polymeric and Newtonian liquid bridges in plateau simulation (Kroger) **45** (1992) 385
Measurement of extensional viscosity by stretching large liquid bridges in microgravity (Berg) **55** (1994) 307
Velocity and elongation rate distributions in stretched polymeric and Newtonian liquid bridges (Kroger) **57** (1995) 137

Paradoxical theory
Squeezing flow of a Bingham material (Wilson) **47** (1993) 211

Parallel computational algorithm
Solving microstructure electrostatics with MIMD parallel supercomputers and Split-C (Traenkle) **53** (1994) 197

Parallel plate rheometer
Use of the parallel-plate plastometer for the characterization of viscous fluids with a yield stress (Covey) **8** (1981) 249
A numerical simulation of a plastic fluid in a parallel-plate plastometer (Gartling) **14** (1984) 347
A novel apparatus for rheological measurements of electro-magneto-rheological fluids (Minagawa) **52** (1994) 59
Time periodic rectilineal simple fluid flows (Dunwoody) **53** (1994) 83

Parallel plates
The flow of a second order fluid between rotating parallel plates (Rajagopal) **9** (1981) 185
Run-up and decay of plane Poiseuille flow (Rivlin) **14** (1984) 203
The evolution of small rotational perturbations to a uniform rotation of a viscoelastic fluid contained between parallel plates (Kazakia) **15** (1984) 45
Decay of shear layers and vortex sheets (Rivlin) **15** (1984) 199
Flow of K-BKZ fluids between parallel plates rotating about distinct axes: shear

thinning and inertial effects (Bower) **22** (1987) 289
Observations on the elastic instability in cone-and-plate and parallel-plate flows of a polyisobutylene Boger fluid (McKinley) **40** (1991) 201
Behaviour of a Bingham-like viscous fluid in lubrication flows (Dorier) **45** (1992) 291

Parameter continuation
A numerical study of the flow of a K-BKZ fluid between plates rotating about non-coincident axes (Dai) **38** (1991) 289

Parametric solution
Draining thin films. 1. (Keeley) **28** (1988) 213

Parison development
A study of parison development in extrusion blow molding (Dutta) **10** (1982) 235

Particles

Tensile stress contribution of flow-orientated slender particles in non-Newtonian fluids (Goddard) **1** (1976) 1
The motion of small particles in non-Newtonian fluids (Leal) **5** (1979) 33
A plastic-viscoelastic constitutive equation to represent the rheological behaviour of concentrated suspensions of small particles in polymer melts (White) **5** (1979) 177
The motion of rigid particles in viscoelastic fluids (Brunn) **7** (1980) 271
Comparison of a plastic-viscoelastic constitutive equation with rheological measurements on a polystyrene melt reinforced with small particles (White) **8** (1981) 1
Kinetic theory and rheology of solutions of rigid rodlike macromolecules (Bird) **14** (1984) 85
Predicted effect of polydispersity on rodlike polymer behaviour in concentrated solutions (Marrucci) **14** (1984) 103
Rheology of suspensions of spherical particles in a Newtonian and a non-Newtonian fluid (Chan) **15** (1984) 165
Approximate solutions for power-law fluid flow past a particle at low Reynolds numbers (Kawase) **21** (1986) 167
Multiple-time scale approach to stress growth in suspensions of rodlike macromolecules (Stasiak) **25** (1987) 277
Orientation and rheology of rodlike particles with strong Brownian diffusion in a second-order fluid under simple shear flow (Chung) **25** (1987) 289
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379
Numerical simulation of semi-dilute suspensions of rodlike particles in shear flow (Yamane) **54** (1994) 405
Settling and transport of spherical particles in power-law fluids at finite Reynolds number (Graham) **54** (1994) 465
Simulation of director orientation of liquid crystalline polymers in 2-D flows (Chang) **55** (1994) 1
Prediction of suspension viscoelasticity through particle motion modelling (Toivakka) **56** (1995) 49
Application of the boundary integral method to the sedimentation of irregular shaped particles (Huilgol) **57** (1995) 49
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67

Pastes
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251

Pearson number
Flows of variable-viscosity fluids in ducts with heated walls (Richardson) **25** (1987) 137

Periodic arrays
Elastic instability in crossflow of polymer solutions through periodic arrays of cylinders (Chmielewski) **48** (1993) 285

Peristaltic flow
Peristaltic flow of a second-order fluid in tubes (Siddiqui) **53** (1994) 257

Perturbation procedure
Perturbation of states of rest and rigid motion of simple fluids and solids (Joseph) **5** (1979) 13
Nearly extensional flows (Huilgol) **5** (1979) 219
Infinitesimal perturbations of extensional motions (Powell) **8** (1981) 139
Comments on "Infinitesimal perturbations of extensional motions", by R.L. Powell and W.H. Schwarz (Huilgol) **10** (1982) 381
Infinitesimal perturbations of extensional motions. Author's reply to comments by R.R. Huilgol (Powell) **10** (1982) 383
Perturbation theory for viscoelastic fluids between eccentric rotating cylinders (Beris) **13** (1983) 109
The inlet layer in the flow of viscoelastic fluids (Cook) **40** (1991) 307
Practical application of a higher order perturbation theory for slender viscoelastic jets and fibres (Bechtel) **41** (1992) 201
Time periodic rectilineal simple fluid flows (Dunwoody) **53** (1994) 83

Phan-Thien–Tanner model
Stretching the Phan-Thien–Tanner model: stress growth and creep (Missaghi) **11** (1982) 283
Further results on the flow of a viscoelastic fluid through an abrupt contraction (Debbaut) **20** (1986) 173
On the two-roll mill problem (Townsend) **20** (1986) 293
A numerical analysis of calendering (Zheng) **28** (1988) 149
Application of low-order discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37
Computing viscoelastic fluid flow problems at low cost (Fortin) **45** (1992) 209
Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem (Baaijens) **51** (1994) 141
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
Problems originating from the use of the Gordon–Schowalter derivative in the Johnson–Segalman and related models in various shear flow situations (Arsac) **55** (1994) 21

Phase
Polymer complexation effects in extensional flows (Hudson) **30** (1988) 251
Stability of shear flows of polymeric liquid crystals (Calderer) **43** (1992) 351

Phase space analysis
Phase space analysis of the spurt phenomenon for the Giesekus

viscoelastic fluid model (Kolkka) **33** (1989) 305

Photodegradation
Influence of photodegradation and aging on the viscosity of antimisting polymer solutions (Matthys) **18** (1985) 81

Photon correlation spectroscopy
The structure of turbulence in a dilute polymer solution (Van Dam) **53** (1994) 215

Physical-constant tensor
Flow of a liquid with an anisotropic viscosity tensor (Duffy) **4** (1978) 177
Physical constants of flowing continuum (Oldroyd) **5** (1979) 141

Piezoelectric sensor
The measurement of rapidly changing shear stresses during transient experiments using cone-and-plate rheometry (Attane) **6** (1980) 269

Pinch-off mold technique
A study of parison development in extrusion blow molding (Dutta) **10** (1982) 235

Pipe flows
Secondary flows in pipes of square cross-section and the measurement of the second normal stress difference (Townsend) **1** (1976) 107
The study of time-dependent pipe flows of inelastic non-Newtonian fluids using a multiviscous approximation (Ly) **1** (1976) 287
A note on secondary flow of a non-Newtonian fluid in a non-circular pipe (Rivlin) **1** (1976) 391
On pulsating flow of polymeric fluids (Phan-Thien) **4** (1978) 167
Flow of a liquid with an anisotropic viscosity tensor (Duffy) **4** (1978) 177
On the applicability of directed fluid jets to Newtonian and non-Newtonian flows (Naghdi) **5** (1979) 233
The effect of longitudinal vibration on Poiseuille flow in a non-circular pipe (Kazakia) **6** (1979) 145
The flow of an elastico-viscous liquid in an axisymmetric pipe of slowly varying cross-section (Williams) **7** (1980) 171
Drag reduction in aqueous cationic soap solutions (Elson) **12** (1983) 121
A variational approach to non-steady non-Newtonian flow in a circular pipe (Gorla) **16** (1984) 251
Steady laminar flow of a power-law fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **19** (1985) 161
False bifurcations and instability of a Maxwell fluid in fully developed flow (Josse) **20** (1986) 257
Steady laminar flow of viscoelastic fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **22** (1986) 101
The stability of two concentric non-Newtonian fluids in circular pipe flow (Wong) **22** (1987) 359
Unsteady shear flow of nonlinear viscoelastic fluids with finite elements (Bohme) **23** (1987) 321
Hyperbolicity and change of type in the flow of viscoelastic fluids through pipes (Ahrens) **24** (1987) 67
Effect of roughness on drag reduction for commercially smooth pipes (Brewersdorff) **24** (1987) 365
Flow of non-Newtonian fluids in a pipe (Pinho) **34** (1990) 129
Heat transfer, drag reduction, and fluid characterization for turbulent flow of polymer solutions: recent results and research needs (Matthys) **38** (1991) 313

Steady pressure-driven non-Newtonian flow in a partially filled pipe (Davis) **41** (1991) 81
Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behaviour (Choi) **41** (1992) 289
Laminar, unidirectional flow of thixotropic fluid in a circular pipe (Billingham) **47** (1993) 21
Laminar and turbulent flow of dilute polymer solutions in smooth and rough pipes (Wójs) **48** (1993) 337
Unsteady flow of power-law fluids through circular pipes (Warsi) **55** (1994) 197
Pipe flow of aqueous polyacrylamide solutions studied by means of nuclear magnetic resonance imaging (Li) **57** (1995) 155
Numerical study of secondary flows of viscoelastic fluid in straight pipes by an implicit finite volume method (Xue) **59** (1995) 191

Planar contraction flow
An approximate analysis for contraction and converging flows (Binding) **27** (1988) 173
Flow of dilute polyacrylamide solutions through a sudden planar contraction (Wunderlich) **28** (1988) 267
Numerical simulation of the planar contraction flow of a Giesekus fluid (Choi) **29** (1988) 347
Further remarks on the lip-vortex mechanism of vortex enhancement in planar-contraction flows (Evans) **32** (1989) 95
Anomalous flow patterns in viscoelastic entry flow through a planar contraction (Chiba) **36** (1990) 193
A numerical study of the planar contraction flow of a viscoelastic fluid using the
SIMPLER algorithm (Yoo) **39** (1991) 89
Numerical analysis of start-up planar and axisymmetric contraction flows using multi-mode differential constitutive models (Baaijens) **48** (1993) 147
On a discontinuity capturing technique for Oldroyd-B fluids (Carew) **51** (1994) 231
Birefringence and laser-Doppler velocimetry (LDV) studies of viscoelastic flow through a planar contraction (Quinzani) **52** (1994) 1

Planar entry flow
The importance of extensional flow properties on planar entry flow patterns of polymer melts (White) **20** (1986) 93
Flow visualization and birefringence studies on planar entry flow behaviour of polymer melts (White) **29** (1988) 245
Numerical simulation studies of the planar entry flow of polymer melts (White) **30** (1988) 47
The structure of anomalous entry flow patterns through a planar contraction (Chiba) **42** (1992) 315
A study of stress distribution in contraction flows of an LLDPE melt (Kiriakidis) **47** (1993) 339
Mechanism for entry flow instability through a forward-facing step channel (Chiba) **57** (1995) 271
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129

Planar extensional flows
Extensional rheometers for molten polymers; a review (Dealy) **4** (1978) 9
Some asymptotic results for planar extension (Petrie) **34** (1990) 37
Deformation and breakup of viscoelastic drops in planar extensional flows (Milliken) **40** (1991) 355

The converging flow rheometer reconsidered: an example of flow with dominating extension (Zahorski) **41** (1992) 309
A note on the effect of vorticity on the deformation and breakup of polymer drops (Milliken) **42** (1992) 231
Experimental centreline planar extension of polyethylene melt flowing into a slit die (Ahmed) **56** (1995) 127

Plane flow
Plane flow of a second-order fluid past submerged boundaries (Pilate) **2** (1977) 323
Numerical solution for the flow of viscoelastic fluids (Crochet) **5** (1979) 201
Matched eigenfunction expansions for slow flow over a slot (Trogdon) **10** (1982) 185
On the use of complex variables in the analysis of flows of an elastic fluid (Coleman) **15** (1984) 227
Flow of a Curtiss–Bird fluid over a transverse slot using the finite element drift-function method (Malkus) **16** (1984) 77
Some properties and analytical expressions for plane flow of Leonov and Giesekus models (Hulsen) **30** (1988) 85

Plane slider
Behaviour of a Bingham-like viscous fluid in lubrication flows (Dorier) **45** (1992) 291

Plastic viscoelastic fluid
A plastic-viscoelastic constitutive equation to represent the rheological behaviour of concentrated suspensions of small particles in polymer melts (White) **5** (1979) 177
Comparison of a plastic-viscoelastic constitutive equation with rheological measurements on a polystyrene melt reinforced with small particles (White) **8** (1981) 1
Approximate constitutive equations for slow flow of rigid plastic viscoelastic fluids (White) **8** (1981) 195
Dimensional analysis and a theory of elastic recovery following flow of elastic plastic viscoelastic fluids with application to filled polymer melts (White) **9** (1981) 223

Plasticine
An experimental and theoretical study of the squeeze-film deformation and flow of elastoplastic fluids (Adams) **51** (1994) 61

Plasticity
Dissipative materials as models of thixotropy and plasticity (Goddard) **14** (1984) 141
Yield stress fluid. Structural model and transient shear flow behaviour (Doremus) **39** (1991) 335

Plug flow
On the determination of the plug flow region in Bingham fluids through the application of variational inequalities (Huilgol) **58** (1995) 207

Poiseuille flow
On the shear-thickening behaviour of dilute solutions of chain macromolecules (Layec-Raphalen) **1** (1976) 159
Stability of plane Poiseuille flow of a highly elastic liquid (Ho) **3** (1977/1978) 179
On the applicability of directed fluid jets to Newtonian and non-Newtonian flows (Naghdi) **5** (1979) 233

The effect of longitudinal vibration on Poiseuille flow in a non-circular pipe (Kazakia) **6** (1979) 145
Run-up and decay of plane Poiseuille flow (Rivlin) **14** (1984) 203
Analytical and numerical solution of the Poiseuille flow of a Johnson–Segalman fluid (Van Schaftingen) **18** (1985) 335
Stability of plane Poiseuille and Couette flow of a Maxwell fluid (Lee) **21** (1986) 65
Orientational instabilities in plane Poiseuille flow of certain nematic liquid crystals (Zúñiga) **33** (1989) 123
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 1. Stability analysis (Khomami) **36** (1990) 289
Steady Poiseuille flows for a Giesekus fluid (Schleiniger) **40** (1991) 79
Some boundary value problems for the Bingham model (Atkinson) **41** (1992) 339
An experimental investigation of interfacial instabilities in multilayer flow of viscoelastic fluids. 1. Incompatible polymer systems (Wilson) **45** (1992) 355
Spatial decay of steady perturbations of plane Poiseuille flow for the Oldroyd-B equation (Keiller) **46** (1993) 129
Elastic free energy of an upper-convected Maxwell fluid undergoing a fully developed planar Poiseuille flow: a variational result (Ghisellini) **46** (1993) 229
Linear stability analysis of viscoelastic Poiseuille flow using an Arnoldi- based orthogonalization algorithm (Sureshkumar) **56** (1995) 151
Stability of two-layer Poiseuille flow of Carreau-Yasuda and Bingham-like fluids (Pinarbasi) **57** (1995) 227

Poisson bracket
Generalized constitutive equation for polymeric liquid crystals. 1. Model formulation using the Hamiltonian (Poisson bracket) formulation (Edwards) **35** (1990) 51
Generalized constitutive equation for polymeric liquid crystals. 2. Non-homogeneous systems (Edwards) **36** (1990) 243
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323

Polyacrylamide
An experimental study of nonrheometic flows of viscoelastic fluids. 1. Flow into a re-entrant tube (Busby) **1** (1976) 71
An experimental study of nonrheometic flows of viscoelastic fluids. 2. Flow in a liquid jet exiting from a vertical tube (Goulden) **1** (1976) 183
On the suspended syphon elongational rheometer (MacSporran) **8** (1981) 119
Flow characteristics associated with abrupt changes in geometry in the case of highly elastic liquids (Evans) **20** (1986) 11
Rheological behaviour of silica suspensions flocculated by bridging (Otsubo) **24** (1987) 265
Flow of dilute polyacrylamide solutions through a sudden planar contraction (Wunderlich) **28** (1988) 267
Fibre spinning of very dilute solutions of polyacrylamide in water (Chan) **30** (1988) 267
Comparison of the behaviour of filaments of Xanthan solutions with that of filaments of polyacrylamide solutions (Jones) **35** (1990) 77
Creeping flow regimes of low concentration polymer solutions in thick

solvents through an orifice die (Cartalos) **45** (1992) 231
Non-Newtonian flow in porous media: a laboratory study of polyacrylamide solutions (Flew) **47** (1993) 169
Pipe flow of aqueous polyacrylamide solutions studied by means of nuclear magnetic resonance imaging (Li) **57** (1995) 155

Polybutadiene
On the comparison of simple non-monotonic constitutive equations with data showing slip of well-characterized polybutadienes (Deiber) **40** (1991) 141
A generalized Giesekus constitutive model with retardation time and its association to the spurt effect (Vlassopoulos) **57** (1995) 119
Slip flow of polybutadiene through fluorinated dies (Piau) **59** (1995) 11

Polybutene oil
The anomalous shear flow properties of S1 (Hudson) **52** (1994) 105
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137

Polydimethylsiloxane
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 1. Hysteresis behaviour (Ziegelbaur) **17** (1985) 45
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 2. Stress-relaxation and stress growth (Kosinski) **17** (1985) 69
Fibre spinning of a weakly elastic liquid (Sridhar) **27** (1988) 349
Low Reynolds number flow visualization of linear and branched silicones upstream of orifice dies (Piau) **30** (1988) 197
Spatially resolved birefringence studies of planar entry flow (Galante) **47** (1993) 289
A rheo-optical study of polydimethylsiloxane melt (Subramanian) **53** (1994) 113

Polydispersity
Predicted effect of polydispersity on rodlike polymer behaviour in concentrated solutions (Marrucci) **14** (1984) 103
Rheology of foams. 2. Effects of polydispersity and liquid viscosity for foams having gas fraction approaching unity (Khan) **25** (1987) 61

Polyelectrolyte
Improved correlation for shear-dependent viscosity of polyelectrolyte solutions (Tam) **46** (1993) 275
Shear thickening and time-dependent phenomena: the case of polyacrylamide solutions (Dupuis) **54** (1994) 11
Charged network constitutive equation (Chan Man Fong) **57** (1995) 39

Polyester
Experimental study of the draw resonance in fibre spinning (Demay) **18** (1985) 187

Polyethylene
A non-linear viscoelastic model with structure-dependent relaxation times. 2. Comparison with l.d. polyethylene transient stress results (Acierno) **1** (1976) 147
A non-linear viscoelastic model with structure-dependent relaxation times. 3. Comparison with l.d. polyethylene creep and recoil data (Acierno) **2** (1977) 271

A constitutive analysis of uniaxial elongational flow data of a low-density polyethylene melt (Wagner) **4** (1978) 39
Surface instabilities arising in drawing cylindrical specimens of low-density polyethylene melts (Acierno) **4** (1978) 99
Capillary flow of linear polyethylene melt: sudden increase of flow rate (Weill) **7** (1980) 303
Constitutive equations for polymer melts predicted by the Doi–Edwards and Curtiss–Bird kinetic theory models (Currie) **11** (1982) 53
Constant force elongational flow of a low-density polyethylene melt — experiment and theory (Raible) **11** (1982) 239
Flow patterns in carbon black filled polyethylene at the entrance to a die (Ma) **17** (1985) 275
A comparative experimental study of the isothermal shear and uniaxial elongational rheological properties of low-density, high-density and linear low-density polyethylenes (Minoshima) **19** (1986) 251
Instability phenomena in tubular film, and melt spinning of rheologically characterized high-density, low-density and linear low-density polyethylenes (Minoshima) **19** (1986) 275
The importance of extensional flow properties on planar entry flow patterns of polymer melts (White) **20** (1986) 93
Experimental velocity distribution measurements of high-density polyethylene flowing into and within a slit (Mackley) **21** (1986) 337
Experimental and linear viscoelastic stress distribution measurements of high-density polyethylene flowing into and within a slit (Aldhouse) **21** (1986) 359
Experimental study of the sharkskin defect in linear low density polyethylene (Sornberger) **23** (1987) 123
Ideas about reptation, tube renewal and tube relaxation applied to the description of the non-linear viscoelastic behaviour in shear of some polydisperse polyethylene melts (Booij) **23** (1987) 189
An experimental and theoretical study of the effect of the elongational history on the dynamics of isothermal melt spinning (Sampers) **30** (1988) 325
Estimation of the elongational viscosity of polyethylene blends at high deformation rates (Tremblay) **33** (1989) 137
Additional observations on the surface melt fracture behaviour of linear low-density polyethylene (Moynihan) **36** (1990) 255
Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183
Visualization of the flow of linear low density polyethylene/low density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
Best fit for differential constitutive model parameters to non-linear oscillation data (Jeyaseelan) **47** (1993) 267
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281
A study of stress distribution in contraction flows of an LLDPE melt (Kiriakidis) **47** (1993) 339
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
On the use of stress growth data to determine strain-dependent material functions for factorable K-BKZ equations (Venerus) **49** (1993) 299
Visualization of the flow of low density polyethylene/polystyrene blends through

a planar step contraction (Tremblay) **52** (1994) 323
Predicting polymer melt behaviour near the inception of wall slip in oscillatory shear (Jeyaseelan) **53** (1994) 99
Extrudate distortions in linear low-density polyethylene solutions and melt (Pomar) **54** (1994) 143
Experimental centreline planar extension of polyethylene melt flowing into a slit die (Ahmed) **56** (1995) 127
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129

Polyethylene oxide
Effect of finite boundaries on the slow laminar isothermal flow of a viscoelastic fluid around a spherical obstacle (Sigli) **2** (1977) 1
Solvent effects on drag reduction of polyox solutions in square duct and capillary tube flows (Kwack) **9** (1981) 79
Flow of dilute polymer solutions through converging channels (James) **11** (1982) 317
Rubber-like behaviour of poly(ethylene oxide) solution in elongational flow (Buscall) **17** (1985) 193
Longitudinal volume viscosity of poly(ethylene oxide) (Aleman) **25** (1987) 365
The role of solution structure in apparent thickening behaviour of dilute PEO/water systems (Georgelos) **27** (1988) 191
Creeping flow regimes of low concentration polymer solutions in thick solvents through an orifice die (Cartalos) **45** (1992) 231
Effect of polymer additives on ordered three-dimensional structures arising in cross-slot flow (Kalashnikov) **48** (1993) 215
Flow of polymer solutions through porous media (Rodriguez) **49** (1993) 63

Polyisobutylene
Measurements of N1-N2 and η in steady shear-flow and η', η'', and birefringence in small-strain oscillatory shear for the polyisobutylene solution M1 (Chirinos) **35** (1990) 105
Measurement of extensional viscosity of polymer solutions (Sridhar) **40** (1991) 271
Effect of solvent on polymer degradation in turbulent flow (Moussa) **48** (1993) 261
The anomalous shear flow properties of S1 (Hudson) **52** (1994) 105
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137
Relation between some rheological properties of polyisobutylene solutions and their mode of preparation (Khalil) **52** (1994) 375
Rheological characterization of the time and strain dependence for polyisobutylene solutions (Liang) **52** (1994) 387

Polyisoprene PI-7
On modelling spurt flows of polymers (Adewale) **49** (1993) 133

Polymer additives
Turbulence characteristics of impinging jets near the deflecting surface, the effect of polymer additives (Glowacki) **33** (1989) 25

Polymer chain extension
Flow singularities, polymer chain extension and hydrodynamic instabilities (Mackley) **4** (1978) 111

Polymer flow
Numerical prediction of anomalous transport properties in viscoelastic flow (Delvaux) **37** (1990) 297
Strong flows of polymeric liquids. 2. Mechanical degradation of macromolecules (Yarin) **38** (1991) 127

Polymer matrix
A numerical solution for the flow of dilute fibre suspensions through an axisymmetric contraction (Chiba) **35** (1990) 1

Polymer melts
Investigation of failure during elongational flow of polymer melts (Ide) **2** (1977) 281
Flow patterns in polyethylene and polystyrene melts during extrusion through a die entry region: measurement and interpretation (White) **3** (1977/1978) 41
The Weissenberg effect in molten polymers (Dealy) **3** (1977/1978) 127
An experiment to measure the pressure dependence of the zero-shear-rate viscosity (Foltz) **3** (1978) 347
Considerations of the "freezing-in" of flow-induced orientation in polymer melts by vitrification with application to processing (White) **4** (1979) 299
A plastic-viscoelastic constitutive equation to represent the rheological behaviour of concentrated suspensions of small particles in polymer melts (White) **5** (1979) 177
A cell model theory of the shear viscosity of a concentrated suspension of interacting spheres in a non-Newtonian fluid (Tanaka) **7** (1980) 333
Dimensional analysis and a theory of elastic recovery following flow of elastic plastic viscoelastic fluids with application to filled polymer melts (White) **9** (1981) 223
Multiaxial elongational flows of polymer melts — classification and experimental realization (Meissner) **11** (1982) 221
The characterization of polymer melts in a theory for elastic fluids (Dashner) **12** (1983) 375
Derivation of strain measures from strand convection models for polymer melts (Larson) **17** (1985) 91
Relaxational interactions and viscoelasticity of polymer melts. 1. Model development (Volkov) **18** (1985) 163
Two-dimensional viscoelastic flows: experimentation and modelling (Isayev) **19** (1985) 135
Rheological properties of ABS polymer melts having a good dispersion of rubber particles (Aoki) **22** (1986) 91
A critical comparison of constitutive equations for polymer melts (Larson) **23** (1987) 249
Non-isothermal flow of polymer melts (Wiest) **27** (1988) 333
An extension of the Curtiss–Bird theory for the rheological properties of concentrated polymer solutions and melts (Geurts) **28** (1988) 319
Numerical simulation studies of the planar entry flow of polymer melts (White) **30** (1988) 47
Stress relaxation of a polymer melt after extensional flow (te Nijenhuis) **30** (1988) 355
The reptating rope model: viscometric functions for concentrated polymer solutions and melts in shear flow (Geurts) **31** (1989) 27
Prediction of polymer melt extrudate swell using a differential constitutive model (Bush) **31** (1989) 179

An analysis of the Bird–DeAguiar model for polymer melts (Calderer) **31** (1989) 209
Numerical simulation of converging flow of polymer melts through a tapered slit die (Kajiwara) **48** (1993) 111
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197
Measurement and modelling of friction in polymer melts during macroscopic slip at the wall (Piau) **54** (1994) 121

Polymer solutions

An experimental investigation of upstream flow characteristics of viscoelastic fluids in an annular die entry (Tan) **6** (1979) 21
Zero-shear-rate viscosity measurement for polymer solutions by falling ball viscometry (Gottlieb) **6** (1979) 97
The measurement of the second normal stress difference for some polymer solutions (Keentok) **6** (1980) 303
A new elongational rheometer for polymer solutions (Schümmer) **12** (1983) 331
Structural changes during elongation of polymer solutions (Ferguson) **23** (1987) 49
Shear thickening and structure formation in polymer solutions (Vrahopoulou) **25** (1987) 157
An extension of the Curtiss–Bird theory for the rheological properties of concentrated polymer solutions and melts (Geurts) **28** (1988) 319
On the use of flow through a contraction in estimating the extensional viscosity of mobile polymer solutions (Binding) **30** (1988) 233
The reptating rope model: viscometric functions for concentrated polymer solutions and melts in shear flow (Geurts) **31** (1989) 27
Flow of non-Newtonian fluids in a pipe (Pinho) **34** (1990) 129
The shear and extensional flow properties of M1 (Binding) **35** (1990) 121
A converging channel rheometer for the measurement of extensional viscosity (James) **35** (1990) 421
Heat transfer, drag reduction, and fluid characterization for turbulent flow of polymer solutions: recent results and research needs (Matthys) **38** (1991) 313
Measurement of extensional viscosity of polymer solutions (Sridhar) **40** (1991) 271
Mechanics of the "falling plate" extensional rheometer (Shipman) **40** (1991) 281
The free energy of a deforming Lodge rubber-like liquid (Prakash) **40** (1991) 337
Porous medium flow of the fluid A1: effects of shear and elongation (Vorwerk) **41** (1991) 119
The interaction of polymer additives with vorticity (a case study on vortex rings) (Gyr) **43** (1992) 179
Creeping flow regimes of low concentration polymer solutions in thick solvents through an orifice die (Cartalos) **45** (1992) 231
Elastic instability in crossflow of polymer solutions through periodic arrays of cylinders (Chmielewski) **48** (1993) 285
Laminar and turbulent flow of dilute polymer solutions in smooth and rough pipes (Wójs) **48** (1993) 337
Flow of polymer solutions through porous media (Rodriguez) **49** (1993) 63
Effects of fluid elasticity on the static and dynamic settling of a spherical particle (van den Brule) **49** (1993) 123

Start-up of a strongly extensional flow of a dilute polymer solution (Harris) **50** (1993) 89
Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres (Vorwerk) **51** (1994) 79
The effect of fluid rheology on the elastic Taylor-Couette instability (Larson) **51** (1994) 195
The anomalous shear flow properties of S1 (Hudson) **52** (1994) 105
Extensional rheometry of fluid S1 (Ooi) **52** (1994) 153
Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry (Willenbacher) **52** (1994) 163
A new torsional rod instrument for high frequency dynamic viscoelastic measurements (Nakken) **52** (1994) 217
Shear thickening and time-dependent phenomena: the case of polyacrylamide solutions (Dupuis) **54** (1994) 11
Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration (Ianniruberto) **54** (1994) 231
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59

Polymer uncoiling
Uncoiling a polymer molecule in a strong extensional flow (Hinch) **54** (1994) 209

Polymer–polymer complexation
Structural changes during elongation of polymer solutions (Ferguson) **23** (1987) 49
Polymer complexation effects in extensional flows (Hudson) **30** (1988) 251

Polymer thickening
The flow of polymer thickened motor oils in convergent jet thrust nozzles (Oliver) **2** (1977) 367
Rapid extensional flows of polymer-thickened motor oils through a small orifice (Oliver) **3** (1977/1978) 92
The flow of polymer-thickened oils in convergent jet-thrust nozzles at a temperature of 84°C (Oliver) **4** (1979) 345
High shear rate normal stress measurement for hot, polymer-thickened oils using the jet thrust method (Oliver) **8** (1981) 177
Definitive load-enhancement effects by polymer-thickened oils in a squeeze film experiment (Oliver) **9** (1981) 257
Load enhancement effects by polymer-thickened oils in strip squeeze film flow (Oliver) **13** (1983) 93
Load enhancement and friction reduction effects by polymer-thickened oils lubricating externally sliding cylinders (Oliver) **21** (1986) 39
Load enhancement effects due to polymer thickening in a short model journal bearing (Oliver) **30** (1988) 185
Polymeric fluids
A note on entropy effects in polymeric fluids (Christensen) **3** (1977/1978) 197
A constitutive equation for polymer liquids: application to shear flow (De Cleyn) **9** (1981) 91
Pulsating flow revisited (Phan-Thien) **11** (1982) 147
Constitutive equations based on the transient network concept (Mewis) **12** (1983) 69
Stressing behaviour in simple shear flow as predicted by a new constitutive model for polymer fluids (Giesekus) **12** (1983) 367
Basic principle in the viscoelasticity of polymeric liquids (Doi) **23** (1987) 151

Rheological properties via nonequilibrium molecular dynamics: from simple towards polymeric liquids (Hess) **23** (1987) 305
The spatial development of transient Couette flow and shear wave propagation in polymeric liquids by flow birefringence (Lee) **26** (1987) 57
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 1. Stability analysis (Khomami) **36** (1990) 289
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323
Non-Newtonian flow in porous media: a laboratory study of polyacrylamide solutions (Flew) **47** (1993) 169
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 1. Experimental methods and straight channel validations (Davidson) **49** (1993) 317
Velocity and stress fields of polymeric liquids flowing in a periodically constricted channel. 2. Observations of non-Newtonian behaviour (Davidson) **49** (1993) 345
On the relationship between phenomenological models for elastic-viscoplastic metals and polymeric liquids (Rubin) **50** (1993) 79
Rheology of several hundred rigid bodies (Dlugogorski) **53** (1994) 25

Polymeric liquid crystals
Relaxational phenomena and anisotropy in lyotropic polymeric liquid crystals (Moldenaers) **34** (1990) 359
Generalized constitutive equation for polymeric liquid crystals. 1. Model formulation using the Hamiltonian (Poisson bracket) formulation (Edwards) **35** (1990) 51
Generalized constitutive equation for polymeric liquid crystals. 2. Non-homogeneous systems (Edwards) **36** (1990) 243
A comparison between texture and rheological behaviour of lyotropic liquid crystalline polymers during flow (Vermant) **53** (1994) 1

Polymeric systems
Space filling and entanglements in polymeric systems (Rault) **23** (1987) 229
Modelling the rheological behaviour of fibre suspensions in viscoelastic media (Ait-Kadi) **53** (1994) 65

Polymerizing material
Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip (Malkin) **39** (1991) 55

Polymers
The use of large transient deformations to evaluate rheological models for molten polymers (Tsang) **9** (1981) 203
An encapsulated dumbbell model for concentrated polymer solutions and melts. 2. Calculation of material functions and experimental comparisons (DeAguiar) **13** (1983) 161
Effect of ring closure on rheological behaviour (Wiest) **24** (1987) 279
Elongational flow and rheology of monodisperse polymers in solution (Müller) **30** (1988) 99
The shear flow properties of M1 (Hudson) **35** (1990) 159
The extensional properties of M1 obtained from the Carri-Med elongational viscometer (Ferguson) **35** (1990) 197
The extensional properties of M1 obtained from the stretching of a

filament by a falling pendant drop (Jones) **35** (1990) 263
The different capillary flow regimes of entangled polydimethylsiloxane polymers: macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
Mechanical stress relaxation in polymers: fractional integral model versus fractional differential model (Friedrich) **46** (1993) 307
Brownian dynamics simulation of finitely extensible bead–spring chains (van den Brule) **47** (1993) 357
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
On modelling spurt flows of polymers (Adewale) **49** (1993) 133
Characterization of the non-Newtonian flow behaviour of drag-reducing fluids (Vlassopoulos) **49** (1993) 205
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197
Effect of polymer on flow in journal bearings (Berker) **56** (1995) 333
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Polypropylene
Stretching flows for thin film production. 2. Film stretching over a conical mandrel (Gutteridge) **4** (1978) 73
Determination of the elongational behaviour of polypropylene melts from transient shear experiments using Wagner's model (Fulchiron) **48** (1993) 49

Polystyrene
On the shear-thickening behaviour of dilute solutions of chain macromolecules (Layec-Raphalen) **1** (1976) 159
Comparison of a plastic-viscoelastic constitutive equation with rheological measurements on a polystyrene melt reinforced with small particles (White) **8** (1981) 1
Behaviour in shear flow of monodisperse polystyrene solutions: analysis and correlations for steady flow and shear-stress relaxation (Attane) **9** (1981) 13
Steady planar extension with lubricated dies (Macosko) **11** (1982) 301
Steady and transient shear flows of polystyrene solutions. 1. Concentration and molecular-weight dependence of non-dimensional viscometric functions (Attane) **18** (1985) 295
Steady and transient shear flows of polystyrene solutions. 2. Shear-rate dependence of non-dimensional viscometric functions: characteristic relaxation times (Attane) **18** (1985) 319
The role of solvent viscosity in dilute solution polymer rheology (Manke) **19** (1985) 43
The importance of extensional flow properties on planar entry flow patterns of polymer melts (White) **20** (1986) 93
Dilute polystyrene solutions in extensional flows: birefringence and flow modification (Dunlap) **23** (1987) 5
Application of interconversions to viscosity measurements of polystyrene (Bernreitner) **30** (1988) 73
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
Visualization of the flow of low density polyethylene/polystyrene blends through a planar step contraction (Tremblay) **52** (1994) 323

Polyvinyl alcohol
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow (Osaki) **54** (1994) 109
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215

Porous media
On the flow of an elastic liquid past a porous flat plate (Holden) **2** (1977) 83
The nature of flows through porous media (Durst) **22** (1987) 169
Dynamics of non-Newtonian fluid interfaces in a porous medium: compressible fluids (Pascal) **28** (1988) 227
Analytic results for viscoelastic flow in a porous tube (Larson) **28** (1988) 349
The effect of shear in porous medium flow of surfactant solutions (Brunn) **30** (1988) 317
Calculations of steady-state viscoelastic flow in an undulating tube (Pilitsis) **31** (1989) 231
Transient free convection from a vertical plate to a non-Newtonian fluid in a porous medium (Haq) **36** (1990) 395
Porous medium flow of the fluid A1: effects of shear and elongation (Vorwerk) **41** (1991) 119
Non-Newtonian flow in porous media: a laboratory study of polyacrylamide solutions (Flew) **47** (1993) 169
Flow of polymer solutions through porous media (Rodriguez) **49** (1993) 63
Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres (Vorwerk) **51** (1994) 79
Flow of viscoelastic fluids past periodic square arrays of cylinders: inertial and shear thinning viscosity and elasticity effects (Talwar) **57** (1995) 177

Porous molecule theory
Description of the non-affine motions of dilute polymer solutions by the porous molecule model (Johnson) **9** (1981) 33

Potential function
Variational principle for the KBKZ rheological equation of state with potential function (Hassager) **9** (1981) 321

Potential-free algorithm
Brownian dynamics simulations of model hard-sphere suspensions (Heyes) **46** (1993) 1

Powell–Eyring model
Non-Newtonian viscosity measurements in the intermediate shear rate range with the falling-ball viscometer (Cho) **15** (1984) 61

Power requirements
Power requirement for the mixing of thixotropic liquids (Edwards) **1** (1976) 309

Power-law flow
Stokes paradox for power-law flow around a cylinder (Tanner) **50** (1993) 217

Power-law fluids
The end correction for power-law fluids in the capillary rheometer (Boger) **4** (1978) 239
Unsteady flow of an inelastic power-law fluid in a circular tube (Balmer) **7** (1980) 189
A cell model theory of the shear viscosity of a concentrated suspension of

interacting spheres in a non-Newtonian fluid (Tanaka) **7** (1980) 333
Non-isothermal developing flow of a generalized power-law fluid in a tapered tube (Jarzębski) **8** (1981) 239
Momentum transfer for multi-solid-particle power-law fluid systems at high Reynolds numbers (Hua) **9** (1981) 301
Axisymmetric stagnation point flow and mass transfer for power-law fluids (Trainham) **10** (1982) 281
Non-isothermal developing flow of a power-law fluid in a converging slit (Jarzębski) **12** (1983) 1
Theoretical and experimental studies on the coefficient of discharge and spray cone angle of a swirl spray pressure nozzle using a power-law non-Newtonian fluid (Som) **12** (1983) 39
Drag coefficients of a slowly moving sphere in non-Newtonian fluids (Cho) **12** (1983) 243
Frictional resistance of spheres rotating in pseudoplastic non-Newtonian fluids (Mitschka) **12** (1983) 361
Some finite element studies of extrusion (Huynh) **13** (1983) 1
Some remarks on "Drag coefficients of a slowly moving sphere in non-Newtonian fluids" (Chhabra) **13** (1983) 225
Reply to Chhabra's remarks (Cho) **13** (1983) 229
An iterative method for solution of a boundary value problem in non-Newtonian fluid flow (Luning) **15** (1984) 145
Axisymmetric stagnation point flow and mass transfer for power-law fluids. 2. Moderate Schmidt number correction (Trainham) **15** (1984) 155
A variational approach to non-steady non-Newtonian flow in a circular pipe (Gorla) **16** (1984) 251
The drag on a sphere in a power-law fluid (Dazhi) **17** (1985) 1
Steady laminar flow of a power-law fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **19** (1985) 161
Approximate solutions for power-law fluid flow past a particle at low Reynolds numbers (Kawase) **21** (1986) 167
On the propagation of shear oscillations in inelastic power-law fluids (Wein) **21** (1986) 309
Flows of variable-viscosity fluids in ducts with heated walls (Richardson) **25** (1987) 137
Gravity-driven laminar film flow of power-law fluids along vertical walls (Andersson) **27** (1988) 153
Singular behaviour of power-law fluids in Hele–Shaw flow (Hassager) **29** (1988) 337
Numerical solution of the laminar boundary layer equations for power-law fluids (Andersson) **32** (1989) 175
Use of the falling ball viscometer to obtain flow curves for inelastic, non-Newtonian fluids (Butcher) **36** (1990) 51
A non-Newtonian model of flow in forward and backward pumping screw regions of a modular tangential counter-rotating twin-screw extruder (Kim) **37** (1990) 37
Determination of polymer melt viscosity by squeezing flow with constant plate velocity (Winther) **39** (1991) 119
Steady pressure-driven non-Newtonian flow in a partially filled pipe (Davis) **41** (1991) 81
Settling and transport of spherical particles in power-law fluids at finite Reynolds number (Graham) **54** (1994) 465

Unsteady flow of power-law fluids through circular pipes (Warsi) **55** (1994) 197

Power-law model
Laminer swirling power-law non-Newtonian fluid jet impinging on a normal plane (Gorla) **2** (1977) 299
Pulsating flow revisited (Phan-Thien) **11** (1982) 147
The stability of two stratified power-law liquids in Couette flow (Waters) **12** (1983) 85
On the relationship between a dimensional and a thermodynamic peculiarity of the power law constitutive equation (Astarita) **13** (1983) 223
Film thickness in blade coating of viscous and viscoelastic liquids (Sullivan) **21** (1986) 13
A comparison between combined steady and oscillatory stress on a controlled stress rheometer and a pulsatile pipe flow apparatus (Davies) **23** (1987) 73
A numerical analysis of calendering (Zheng) **28** (1988) 149
A non-Newtonian model of flow in a kneading disk region of a modular intermeshing corotating twin screw extruder (Szydlowski) **28** (1988) 29
Non-Newtonian flow modelling in the screw regions of an intermeshing corotating twin screw extruder (Wang) **32** (1989) 19

Prediction
Prediction of suspension viscoelasticity through particle motion modelling (Toivakka) **56** (1995) 49

Pressure fluctuation
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe (Pak) **39** (1991) 353

Pressure gradients
Elongational flow of dilute Polyox solutions (Summary) (James) **5** (1979) 409
Run-up and decay of plane Poiseuille flow (Rivlin) **14** (1984) 203
Unsteady flow of power-law fluids through circular pipes (Warsi) **55** (1994) 197

Pressure thickening
Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders (Davies) **54** (1994) 331

Pressure-driven flow
Steady pressure-driven non-Newtonian flow in a partially filled pipe (Davis) **41** (1991) 81

Pseudoplastic
Frictional resistance of spheres rotating in pseudoplastic non-Newtonian fluids (Mitschka) **12** (1983) 361
A study of submerged pseudoplastic laminar jets (Jordan) **41** (1992) 323

Pseudospectral method
Pseudo-spectral analysis of the stability of pressure-driven flow of a Giesekus fluid between parallel planes (Lim) **26** (1987) 135
Time-dependent fibre spinning equations. 2. Analysis of the stability of numerical approximations (Liu) **26** (1988) 363
Instability of a Criminale-Ericksen-Filbey fluid in a disk-and-cylinder system (Chiao) **36** (1990) 361
Viscoelastic flow in an undulating tube. 2. Effects of high elasticity, large amplitude of undulation and inertia (Pilitsis) **39** (1991) 375

Numerical modelling of pressure and temperature effects in viscoelastic flow between eccentrically rotating cylinders (Davies) **54** (1994) 331

Pullout
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows (Bulters) **38** (1990) 43

Pulsatile flow
Elastic and inertial effects in pulsatile flow of polymeric liquids in circular tubes (Davies) **3** (1977/1978) 237
On pulsating flow of polymeric fluids (Phan-Thien) **4** (1978) 167
Pulsating flow revisited (Phan-Thien) **11** (1982) 147
Numerical study on the laminar pulsatile flow of slurries (Nakamura) **22** (1987) 191
A comparison between combined steady and oscillatory stress on a controlled stress rheometer and a pulsatile pipe flow apparatus (Davies) **23** (1987) 73
Pulsating flow of viscoelastic fluids in tubes (Khabakhpasheva) **33** (1989) 289

Q

Quasi-elongational approximation
An alternative approach to non-isothermal melt spinning with axial and radial viscosity distributions (Zahorski) **36** (1990) 71

Quenching
The Stefan problem in polymer processing: theory and experimentation (Janeschitz-Kriegl) **23** (1987) 107

R

Radial flow
Radial flow of viscoelastic liquids. 1. Theoretical (Lee) **1** (1976) 323
Radial flow of viscoelastic liquids. 2. Experimental (Lee) **1** (1976) 343
Converging radial flow of dilute polymer solutions (Amadou) **4** (1978) 229
Radial flow of a Bingham fluid between two fixed circular disks (Dai) **8** (1981) 349
An analytical solution of radial flow of a Bingham fluid between two fixed circular disks (Huang) **26** (1987) 143
Orientational transition in radial flow of a nematic liquid (Rey) **40** (1991) 177
Further considerations of axisymmetric contraction flows (Binding) **41** (1991) 27

Ram extruder
NMR-imaging of pastes in a ram extruder (Gotz) **49** (1993) 251

Rankine–Hugoniot conditions
On Rankine–Hugoniot conditions for Maxwell liquids (Renardy) **32** (1989) 69

Rate dependent thermodynamical model
A rate-dependent thermodynamical model for rapid granular flows (Ahmadi) **35** (1990) 15

Rate parameter
Effective stress rates of viscoelastic free jets (Bechtel) **26** (1987) 1

Rate-of-strain tensor
A note on Harnoy's equations of state (Astin) **4** (1979) 359

Rayleigh problem
Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem (Huilgol) **8** (1981) 337
Correction and extensions to "Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem", J. Non-Newtonian Fluid Mech., 8 (1981) 337–347 (Huilgol) **12** (1983) 249
On the Rayleigh problem for a viscoelastic fluid (Phan-Thien) **28** (1988) 117

Rayleigh–Bernard thermal convection
Chaos and overstability in the thermal convection of viscoelastic fluids (Khayat) **53** (1994) 227

Re-entrant corner
A singular finite difference treatment of re-entrant corner flow. 1. Newtonian fluids (Holstein) **8** (1981) 81
Newtonian and non-Newtonian flow near a re-entrant corner (Cochrane) **10** (1982) 95
Re-entrant corner singularities in non-Newtonian flow. 1. Theory (Davies) **29** (1988) 269
Spatially resolved birefringence studies of planar entry flow (Galante) **47** (1993) 289
The stress of an upper convected Maxwell fluid in a Newtonian velocity field near a re-entrant corner (Renardy) **50** (1993) 127
The flow of an Oldroyd fluid around a sharp corner (Hinch) **50** (1993) 161
On corner flows of Oldroyd-B fluids (Davies) **50** (1993) 173
How to integrate the upper convected Maxwell (UCM) stresses near a singularity (and maybe elsewhere, too) (Renardy) **52** (1994) 91
A matched solution for corner flow of the upper convected Maxwell fluid (Renardy) **58** (1995) 83

Reactive parameter
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181

Reattachment length
Separation and reattachment of non-Newtonian fluid flows in a sudden expansion pipe (Pak) **37** (1990) 175

Rebound
Collapse of spherical bubbles in Maxwell fluids (Kim) **55** (1994) 37

Recoil
A non-linear viscoelastic model with structure-dependent relaxation times. 3. Comparison with l.d. polyethylene creep and recoil data (Acierno) **2** (1977) 271

Recoverable strain tensor
On a class of constitutive equations for viscoelastic liquids (Leonov) **25** (1987) 1

Rectilinear flow
Rectilinear oscillatory viscoelastic flow in rectangular ducts (O'Brien) **13** (1983) 33
On the rectilinear flow of a second-order fluid and the role of the second normal stress difference in edge fracture in rheometry (Huilgol) **50** (1993) 331
Time periodic rectilineal simple fluid flows (Dunwoody) **53** (1994) 83

Reduced parameter method
Improved correlation for shear-dependent viscosity of polyelectrolyte solutions (Tam) **46** (1993) 275

Relaxation
Memory-function determination of viscoelastic fluids based on relaxation tests (normal and shear stresses) (Attane) **3** (1977/1978) 1
Testing thermodynamic constitutive equations for polymers by adiabatic deformation experiments (Sarti) **3** (1977/1978) 65
Relaxation of normal and shear stresses after a sudden shear strain in the cone-and-plate experiment using the rheometrics mechanical spectrometer (Pedersen) **3** (1978) 379
Behaviour in shear flow of monodisperse polystyrene solutions: analysis and correlations for steady flow and shear-stress relaxation (Attane) **9** (1981) 13
Relaxation of shear and normal stress components in step-strain experiments (Vrentas) **9** (1981) 339
Stress relaxation after oscillatory shear in a thermotropic liquid crystalline polymer (Graziano) **13** (1983) 243
A classification of constitutive equations based on stress relaxation predictions for the single-jump shear strain experiment (Lodge) **14** (1984) 67
Convected derivatives for differential constitutive equations (Larson) **24** (1987) 331
Stress relaxation of a polymer melt after extensional flow (te Nijenhuis) **30** (1988) 355
On an invariance property of the solution to Stokes' first problem for viscoelastic fluids (Preziosi) **33** (1989) 225
Relaxational phenomena and anisotropy in lyotropic polymeric liquid crystals (Moldenaers) **34** (1990) 359
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
Mechanical stress relaxation in polymers: fractional integral model versus fractional differential model (Friedrich) **46** (1993) 307

Relaxation spectrum
Effect of a relaxation time spectrum on mechanics of polymer melt spinning (Denn) **2** (1977) 159
The use of a generalized model based on the relaxation spectrum for calculation of the first normal stress difference from a flow curve (Vlcék) **19** (1985) 113
The determination of polymer relaxation moduli and memory functions using integral transforms (Kamath) **32** (1989) 119
Modelling of fluid M1 using multiple-relaxation-time constitutive equations (Chai) **35** (1990) 459
Rheological characterization of the time and strain dependence for polyisobutylene solutions (Liang) **52** (1994) 387

Relaxation time

A non-linear viscoelastic model with structure-dependent relaxation times. 1. Basic formulation (Acierno) **1** (1976) 125
A non-linear viscoelastic model with structure-dependent relaxation times. 2. Comparison with l.d. polyethylene transient stress results (Acierno) **1** (1976) 147
A low viscosity, highly elastic ideal fluid (Tam) **31** (1989) 163
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267

Reptation
A simple constitutive equation for polymer fluids based on the concept of deformation-dependent tensorial mobility (Giesekus) **11** (1982) 69
Reptation and tube renewal: experimental and numerical simulation (Marin) **23** (1987) 215
The effect of finite link number on reptation models (Schieber) **36** (1990) 205
Strong flows of polymeric liquids. 1. Rheological behaviour (Yarin) **37** (1990) 113
Series expansions for shear-flow properties from the Doi-Edwards model (Öttinger) **37** (1990) 265

Retarded motion expansion
Limitation on the use of the retarded motion expansion (Hassager) **34** (1990) 241

Return flow
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171

Reverse flow
Flow reversal of an elastico-viscous liquid between a stationary and torsionally oscillating disc (Waters) **3** (1977/1978) 13
Experimental and theoretical aspects of the two-roll mill problem (Broadbent) **3** (1978) 359
Experimental study of viscoelastic effects in a cylinder-plane lubricated contact (Doremus) **13** (1983) 79

Review
Review of the entry flow problem: experimental and numerical (White) **24** (1987) 121

Reynolds equation
Behaviour of a Bingham-like viscous fluid in lubrication flows (Dorier) **45** (1992) 291

Reynolds number
Plane flow of a fluid of second grade through a contraction (Crochet) **1** (1976) 247
An experimental investigation of upstream flow characteristics of viscoelastic fluids in an annular die entry (Tan) **6** (1979) 21
The turbulent flow of non-Newtonian fluids in the absence of anomalous wall effects (Edwards) **7** (1980) 77
Normal stress measurement of dilute polymer solutions (Tomita) **7** (1980) 237
Momentum transfer for multi-solid-particle power-law fluid systems at high Reynolds numbers (Hua) **9** (1981) 301
Excess pressure losses in a slit (Choplin) **9** (1981) 119
Approximate solutions for power-law fluid flow past a particle at low Reynolds numbers (Kawase) **21** (1986) 167
Low Reynolds number flow visualization of linear and branched silicones upstream of orifice dies (Piau) **30** (1988) 197
The stability of gravity driven viscoelastic film flow at low to moderate Reynolds number (Shaqfeh) **31** (1989) 87
Flow of non-Newtonian fluids in a pipe (Pinho) **34** (1990) 129
Settling and transport of spherical particles in power-law fluids at finite Reynolds number (Graham) **54** (1994) 465

Rheo-optical study
Rheo-optics of shear and elongational flow of liquid crystalline polymer solutions:

Hydroypropyl cellulose/water and poly-p-phenylene terephthalamide/sulfuric acid (Onogi) **7** (1980) 121
A rheo-optical study of polydimethylsiloxane melt (Subramanian) **53** (1994) 113

Rheokinetic liquids
Flow with impregnation of a rheokinetic liquid (Malkin) **54** (1994) 489

Rheological measurement
A novel apparatus for rheological measurements of electro-magneto-rheological fluids (Minagawa) **52** (1994) 59

Rheological models
Long range memory effects in flows involving abrupt changes in geometry. 1. Flows associated with L-shaped and T-shaped geometries (Perera) **2** (1977) 49
Simple rheological models for the prediction of stretching jet profiles (Waters) **2** (1977) 385
Shear rate dependence of the viscoelasticity of polymer solutions. 1. Theoretical model (Thurston) **9** (1981) 57
The use of large transient deformations to evaluate rheological models for molten polymers (Tsang) **9** (1981) 203
Conformation tensor rheological models (Grmela) **23** (1987) 271
Anisotropic channel flow of fibre suspensions (Altan) **42** (1992) 65
Modelling the rheological behaviour of fibre suspensions in viscoelastic media (Ait-Kadi) **53** (1994) 65
A new hydrodynamic lubrication theory for bilinear rheological fluids (Wu) **56** (1995) 253

Rheological properties
Experimental study of the rheological properties of butadiene-styrene gum elastomers and compounds (Furuta) **1** (1976) 207
Possibility of a master plot for material functions of high-polymer solutions (Mochimaru) **13** (1983) 365
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 1. Hysteresis behaviour (Ziegelbaur) **17** (1985) 45
Rheological properties of poly(dimethylsiloxane) filled with fumed silica. 2. Stress-relaxation and stress growth (Kosinski) **17** (1985) 69
Rheological properties of some polyolefine melts in transient uniaxial elongational flow, described with a special type of constitutive equation (Leblans) **19** (1985) 185
A comparative experimental study of the isothermal shear and uniaxial elongational rheological properties of low-density, high-density and linear low-density polyethylenes (Minoshima) **19** (1986) 251
Rheological properties of ABS polymer melts having a good dispersion of rubber particles (Aoki) **22** (1986) 91
An explanation of the rheological properties of Boger fluids (Mackay) **22** (1987) 235
Conformation tensor rheological models (Grmela) **23** (1987) 271
Rheological properties via nonequilibrium molecular dynamics: from simple towards polymeric liquids (Hess) **23** (1987) 305
Similarity solutions for the orientation distribution function and rheological properties of suspensions of axisymmetric particles with external couples (Kim) **24** (1987) 297

Computation of rheological properties of suspensions of rigid rods: stress growth after inception of steady shear flow (Strand) **24** (1987) 311
Relaxational interactions and viscoelasticity of polymer melts. 2. Rheological properties in shear and elongational flows (Volkov) **25** (1987) 261
Effect of temperature on rheological properties of suspensions (Tsutsumi) **26** (1987) 175
The influence of rheological properties on the slow flow past spheres (Mena) **26** (1987) 247
Time-temperature superposition in non-isothermal flow (Wiest) **27** (1988) 127
Rheological behaviour of rubber carbon black compounds in various shear flow histories (Montes) **28** (1988) 183
An extension of the Curtiss–Bird theory for the rheological properties of concentrated polymer solutions and melts (Geurts) **28** (1988) 319
A transition occurring in ideal elastic liquids during shear flow (Magda) **30** (1988) 1
Load enhancement effects due to polymer thickening in a short model journal bearing (Oliver) **30** (1988) 185
Drag reduction and rheological properties of cationic viscoelastic surfactant formulations (Rose) **31** (1989) 59
Further considerations of axisymmetric contraction flows (Binding) **41** (1991) 27
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267

Rheology
Is non-Newtonian fluid mechanics a culturally autonomous subject ? (Astarita) **1** (1976) 203
Surface rheology (van den Tempel) **2** (1977) 205
Objective and generally applicable criteria for flow classification (Astarita) **6** (1979) 69
Rheological behaviour of FM-9 solutions and correlation with flammability test results and interpretations (Peng) **12** (1983) 95
Kinetic theory and rheology of solutions of rigid rodlike macromolecules (Bird) **14** (1984) 85
Rheology of suspensions of spherical particles in a Newtonian and a non-Newtonian fluid (Chan) **15** (1984) 165
Rheology of foams. 1. Theory for dry foams (Khan) **22** (1986) 1
Molecular network model for the rheology of gelling polymer solutions (Chu) **22** (1987) 207
The rheology of strongly-flocculated suspensions (Buscall) **24** (1987) 183
Rheology of foams. 2. Effects of polydispersity and liquid viscosity for foams having gas fraction approaching unity (Khan) **25** (1987) 61
Rheology, friction, and heat transfer study of a discontinuously shear-thickening antimisting polymer solution (Matthys) **25** (1987) 177
Orientation and rheology of rodlike particles with strong Brownian diffusion in a second-order fluid under simple shear flow (Chung) **25** (1987) 289
Rheology of molecular liquids and concentrated suspensions by microscopic dynamical simulations (Heyes) **27** (1988) 47
Elongational flow and rheology of monodisperse polymers in solution (Müller) **30** (1988) 99
The shear flow properties of M1 (Hudson) **35** (1990) 159

Rheological properties of a polyisobutylene in a kerosene/polybutene mixture in simple shear flow (Steiert) **35** (1990) 189
The extensional properties of M1 obtained from the Carri-Med elongational viscometer (Ferguson) **35** (1990) 197
Strong flows of polymeric liquids. 1. Rheological behaviour (Yarin) **37** (1990) 113
Vane rheometry of bentonite gels (Alderman) **39** (1991) 291
A finitely extensible bead–spring chain model for dilute polymer solutions (Wedgewood) **40** (1991) 119
The A1 project — an overview (Hudson) **46** (1993) 69
Rheology of concentrated dispersed systems in a low molecular weight matrix (Coussot) **46** (1993) 179
A comparison between texture and rheological behaviour of lyotropic liquid crystalline polymers during flow (Vermant) **53** (1994) 1
Rheology of several hundred rigid bodies (Dlugogorski) **53** (1994) 25
The rheology of solutions of liquid crystal polymers formed from flexible chain macromolecules (Ferguson) **54** (1994) 33
Air-blast atomization of non-Newtonian liquids (Mansour) **58** (1995) 161
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Rheometer design

Elastico-viscous squeeze films. 1. (Brindley) **1** (1976) 19
Elastico-viscous squeeze films. 3. The torsional balance rheometer (Binding) **1** (1976) 277
A new elongational rheometer for polymer solutions (Schümmer) **12** (1983) 331
A simple constant-stress rheometer (van den Brule) **43** (1992) 127
Investigations of the rheological behaviour of rubber carbon-black compounds over a wide range of stresses including very low stresses (Osanaiye) **49** (1993) 87

Rheometry

Comparison of the responses of viscoelastic fluids to a new rheometrical test (Sigli) **9** (1981) 191
A rheometrical study of Boger fluids (Jackson) **14** (1984) 173
Osmotic pressure effects in dispersion rheometry (Woodcock) **19** (1986) 349
A comparison between combined steady and oscillatory stress on a controlled stress rheometer and a pulsatile pipe flow apparatus (Davies) **23** (1987) 73
Shear rheometry of fluids with a yield stress (Magnin) **23** (1987) 91
Rheological properties of a polyisobutylene in a kerosene/polybutene mixture in simple shear flow (Steiert) **35** (1990) 189
Cone-and-plate rheometry of yield stress fluids. Study of an aqueous gel (Magnin) **36** (1990) 85
Mechanics of the "falling plate" extensional rheometer (Shipman) **40** (1991) 281
On the flow past a needle in a cylindrical tube (Phan-Thien) **47** (1993) 137

Normal stresses in extremely shear thickening polymer dispersions (Laun) **54** (1994) 87

Rigid rods
A note on rods falling near a vertical wall in a viscoelastic liquid (Tiefenbruck) **6** (1980) 201
Entry flow of semi-rigid rod solutions (Binnington) **26** (1987) 115
Uniaxial and biaxial extensional viscosity measurements of dilute and semi-dilute solutions of rigid rod polymers (Cathey) **30** (1988) 303
Corner flow of a suspension of rigid rods (Keiller) **40** (1991) 323
Sink flows of a suspension of rigid rods. 2. Lubrication theory (Keiller) **42** (1992) 249
A constitutive equation for monodomains of nematic polymers (Maffettone) **45** (1992) 339

Rivlin–Ericksen fluid
A note on secondary flow of a non-Newtonian fluid in a non-circular pipe (Rivlin) **1** (1976) 391
An experimental investigation of the flow about a sphere rotating in a Rivlin–Ericksen fluid (Cairncross) **3** (1977/1978) 203
The effect of longitudinal vibration on Poiseuille flow in a non-circular pipe (Kazakia) **6** (1979) 145
Superposition of longitudinal and plane flows of a non-Newtonian fluid between eccentric cylinders (Kazakia) **8** (1981) 311
A note on the flow of a viscoelastic fluid between eccentric disks (Kaloni) **26** (1987) 125

Rivlin–Ericksen tensors
A note on kinematical tensors (Walters) **3** (1977/1978) 293

Rivulet flow
Rivulet flow of a viscoelastic liquid (Rosenblat) **13** (1983) 259
A short comment on the "Rivulet flow of a viscoelastic liquid" by S. Rosenblat (Giesekus) **15** (1984) 383

Rotating cylinder
A numerical solution of Newtonian and viscoelastic flow past stationary and rotating cylinders (Townsend) **6** (1980) 219
Rimming flow of a viscoelastic liquid inside a rotating horizontal cylinder (Sanders) **9** (1981) 269
Linear stability of flow of viscoelastic fluid between eccentric rotating cylinders (Zhang) **11** (1982) 201
Load enhancement and friction reduction effects by polymer-thickened oils lubricating externally sliding cylinders (Oliver) **21** (1986) 39
The elongation of radial filaments of a Boger fluid on a rotating drum (Jones) **21** (1986) 51
Spectral finite element calculations of the flow of a Maxwell fluid between eccentric rotating cylinders (Beris) **22** (1987) 129
The effect of weak elasticity on Couette flow between rotating cylinders: (1) spiral flow; (2) eccentric cylinders (Jones) **28** (1988) 255
Stretching flow tests on liquid S1 and similar liquids (Oliver) **52** (1994) 183

Rotating disk
Non-Newtonian flow caused by an infinite rotating disc (Williams) **1** (1976) 51
Computation of viscoelastic flow in a cylindrical tank with a rotating lid (Nirschl) **16** (1984) 233

Flow of viscoelastic fluids between rotating disks. 1. (Huilgol) **18** (1985) 101
Non-axisymmetric flow of a viscoelastic fluid between rotating disks (Huilgol) **23** (1987) 423
Start-up flow of an Upper Convected Maxwell fluid over a rotating disk (Borkar) **55** (1994) 163

Rotating sphere
An experimental investigation of the flow about a sphere rotating in a Rivlin–Ericksen fluid (Cairncross) **3** (1977/1978) 203
Rotational quasi-viscometric flow around a rotating sphere (Wein) **5** (1979) 297
Determination of normal stresses in dilute polymer solutions using the electrochemical diagnostics of flow around a rotating sphere (Wein) **11** (1982) 163
Frictional resistance of spheres rotating in pseudoplastic non-Newtonian fluids (Mitschka) **12** (1983) 361

Rotational flow
Elastico-viscous squeeze films. 2. Superimposed rotation (Binding) **1** (1976) 259
The non-Newtonian creeping flow around a rotating spheroidal spindle (Wein) **1** (1976) 357
Rotational quasi-viscometric flow around a rotating sphere (Wein) **5** (1979) 297
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19
Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry (Willenbacher) **52** (1994) 163

Roughness
Experimental study of the sharkskin defect in linear low density polyethylene (Sornberger) **23** (1987) 123
Effect of roughness on drag reduction for commercially smooth pipes (Brewersdorff) **24** (1987) 365

Rouse model
Exact solution of the Rouse model with discrete time evolution (Öttinger) **19** (1986) 357
Molecular shape in homogeneous flows: predictions of the Rouse model (Hoagland) **27** (1988) 223
Renormalization group calculation of viscometric functions based on conventional polymer kinetic theory (Öttinger) **33** (1989) 53

Rubber
High-rate start-up behaviour of unvulcanized rubber compounds (Hull) **12** (1983) 175
Rheological properties of ABS polymer melts having a good dispersion of rubber particles (Aoki) **22** (1986) 91
Investigations of the interaction of flowing rubber compounds with boundaries: basic experiments and air lubricated die (Brzoskowski) **31** (1989) 43
Rheological models of rubber carbon-black compounds: low interaction viscoelastic models and high interaction thixotropic plastic viscoelastic models (Montes) **49** (1993) 277

Rubber–carbon black compounds
Rheological behaviour of rubber carbon black compounds in various shear flow histories (Montes) **28** (1988) 183

Extrudate character and post-extrusion shrinkage of rheologically characterized rubber-carbon black compounds and their interpretation (Shin) **37** (1990) 95
Investigations of the rheological behaviour of rubber-carbon black compounds over a wide range of stresses including very low stresses (Osanaiye) **49** (1993) 87

Rubber-like liquid
Stress growth for a generalized rubberlike liquid (Petrie) **11** (1982) 295
The free energy of a deforming Lodge rubber-like liquid (Prakash) **40** (1991) 337

Rubber-like strain behaviour
The horizontal stretching of test liquid M1 (Oliver) **35** (1990) 251

S

S1
The shear and extensional flow properties of S1 (Ferguson) **52** (1994) 121
The rheometry of solutions of polyisobutylene in a mixed solvent (Binding) **52** (1994) 137
Extensional rheometry of fluid S1 (Ooi) **52** (1994) 153
Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry (Willenbacher) **52** (1994) 163
Complex viscosity predictions for the S1 fluid using harmonic analysis on applied non-sinusoidal stress waveforms (Davies) **52** (1994) 177
Stretching flow tests on liquid S1 and similar liquids (Oliver) **52** (1994) 183
On the motion of a sphere falling through an elastic liquid contained in a tightly-fitting cylindrical container (Degand) **57** (1995) 103

Saint-Venant number
Rheodynamics of nonlinear viscoplastic media (Bukhman) **10** (1982) 215

Salt concentration
Nonlinear viscoelastic behaviour of aqueous detergent solutions (Shikata) **28** (1988) 171

Scale-up theory
Scale-up problems arising with non-Newtonian fluids (Review) (Astarita) **4** (1979) 285

Schmidt number
Axisymmetric stagnation point flow and mass transfer for power-law fluids (Trainham) **10** (1982) 281
Axisymmetric stagnation point flow and mass transfer for power-law fluids. 2. Moderate Schmidt number correction (Trainham) **15** (1984) 155

Second normal stress difference
Secondary flows in pipes of square cross-section and the measurement of the second normal stress difference (Townsend) **1** (1976) 107
The measurement of the second normal stress difference for some polymer solutions (Keentok) **6** (1980) 303
A normal stress amplifier for the second normal stress difference (Sturges) **6** (1980) 325
Viscosity, first and second normal-stress coefficients, and molecular stretching in concentrated solutions and melts (Fan) **17** (1985) 251

The shear and extensional flow properties of M1 (Binding) **35** (1990) 121
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281

Second-order time integration
Simulation of transient viscoelastic flow with second order time integration (Rasmussen) **56** (1995) 65

Second-order fluid
The separation of a second-order fluid at a straight edge (Huilgol) **2** (1977) 89
Some superposition theorems for second-order fluids (Kazakia) **2** (1977) 151
Plane flow of a second-order fluid past submerged boundaries (Pilate) **2** (1977) 323
Second-order fluid constants for freely jointed bead–rod chain suspensions (Curtiss) **2** (1977) 392
On the stick–slip and die-swell problems for a second order fluid (Coleman) **3** (1977/1978) 288
A note on rods falling near a vertical wall in a viscoelastic liquid (Tiefenbruck) **6** (1980) 201
Normal stress effects in viscoelastic fluid lubrication (Christensen) **7** (1980) 63
The motion of rigid particles in viscoelastic fluids (Brunn) **7** (1980) 271
The flow of a second order fluid between rotating parallel plates (Rajagopal) **9** (1981) 185
Matched eigenfunction expansions for slow flow over a slot (Trogdon) **10** (1982) 185
Local effect of suspended particles in flows of a viscoelastic fluid past convexly curved boundaries (Brunn) **10** (1982) 319
On the creeping flow of the second-order fluid (Rajagopal) **15** (1984) 239
Marangoni effect in the Couette flow (Buggisch) **15** (1984) 1
Dissipation in a dilute suspension of spheres in a second-order fluid (Mifflin) **17** (1985) 267
The motion of ellipsoids in a second order fluid (Kim) **21** (1986) 255
Orientation and rheology of rodlike particles with strong Brownian diffusion in a second-order fluid under simple shear flow (Chung) **25** (1987) 289
Some remarks on "Useful theorems for the second order fluid" (Kaloni) **31** (1989) 115
Rheological properties of a polyisobutylene in a kerosene/polybutene mixture in simple shear flow (Steiert) **35** (1990) 189
An exact solution of a viscoelastic Ekman layer with suction (Buggisch) **36** (1990) 351
Bernoulli equation and the competition of elastic and inertial pressures in the potential flow of a second-order fluid (Joseph) **42** (1992) 385
On the rectilinear flow of a second-order fluid and the role of the second normal stress difference in edge fracture in rheometry (Huilgol) **50** (1993) 331
Peristaltic flow of a second-order fluid in tubes (Siddiqui) **53** (1994) 257
The negative wake in a second-order fluid (Joseph) **57** (1995) 313

Secondary flows
Secondary flows in pipes of square cross-section and the measurement of the second normal stress difference (Townsend) **1** (1976) 107
A note on secondary flow of a non-Newtonian fluid in a non-circular pipe (Rivlin) **1** (1976) 391

On a thermorheological second-order effect in cylindrical tubes (Bohme) **5** (1979) 191
Secondary flow in the neighbourhood of a cylinder oscillating in a viscoelastic fluid (Chang) **6** (1979) 47
Remarks on inertial radii, persistent normal stresses, secondary motions, and non-elastic extensional viscosities (Joseph) **32** (1989) 107
Secondary flows in straight ducts of rectangular cross section (Gervang) **39** (1991) 217
Secondary flows in cone and plate flow of an Oldroyd-B fluid (Olagunju) **46** (1993) 29
On the development of secondary motion induced by the free surface in the rod climbing flow (Debbaut) **48** (1993) 357
Numerical study of secondary flows of viscoelastic fluid in straight pipes by an implicit finite volume method (Xue) **59** (1995) 191

Sedimentation
Effects of fluid elasticity on the static and dynamic settling of a spherical particle (van den Brule) **49** (1993) 123
Application of the boundary integral method to the sedimentation of irregular shaped particles (Huilgol) **57** (1995) 49
The sedimentation of a sphere through an elastic fluid. Part 1. Steady motion (Arigo) **60** (1995) 225

Self-similar flows
Sink flows of a suspension of rigid rods. 2 Lubrication theory (Rallison) **48** (1993) 237
Sensitivity to external disturbance Simple elongational flows which are not simple in reality (Zahorski) **59** (1995) 1

Separation
The separation of a second-order fluid at a straight edge (Huilgol) **2** (1977) 89

Settling
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305
The motion of a sphere falling under gravity in a constant-viscosity elastic liquid (Jones) **53** (1994) 175
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Settling and transport of spherical particles in power-law fluids at finite Reynolds number (Graham) **54** (1994) 465
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Sharkskin
Experimental study of the sharkskin defect in linear low-density polyethylene (Sornberger) **23** (1987) 123
Influence of upstream instabilities and wall slip on melt fracture and sharkskin phenomena during silicones extrusion through orifice dies (Piau) **34** (1990) 145
Effect of surface properties on polymer melt slip and extrusion defects (El Kissi) **52** (1994) 249
Extrudate distortions in linear low-density polyethylene solutions and melt (Pomar) **54** (1994) 143
Slip flow of polybutadiene through fluorinated dies (Piau) **59** (1995) 11

Shear
Decay of shear layers and vortex sheets (Rivlin) **15** (1984) 199
A boundary element investigation of extrudate swell (Bush) **18** (1985) 143
A comparative experimental study of the isothermal shear and uniaxial elongational rheological properties of low-density, high-density and linear low-density polyethylenes (Minoshima) **19** (1986) 251

The effect of shear in porous medium flow of surfactant solutions (Brunn) **30** (1988) 317
Determination of the elongational behaviour of polypropylene melts from transient shear experiments using Wagner's model (Fulchiron) **48** (1993) 49

Shear flows

Elongational flow and the wet spinning process (McKay) **4** (1978) 89
On finite amplitude shear waves in viscoelastic fluids (Zahorski) **5** (1979) 315
Rheological and coagulation features in the wet spinning process (Ferguson) **6** (1980) 333
On unimodular constitutive expressions (Fahy) **7** (1980) 33
Rheo-optics of shear and elongational flow of liquid crystalline polymer solutions:
Hydroypropyl cellulose/water and poly-p-phenylene terephthalamide/sulfuric acid (Onogi) **7** (1980) 121
Shear and elongation in a theory for elastic fluids (Dashner) **8** (1981) 69
New constitutive equations for the rapid flow of granular materials (Shahinpoor) **9** (1981) 147
Behaviour in shear flow of monodisperse polystyrene solutions: analysis and correlations for steady flow and shear-stress relaxation (Attane) **9** (1981) 13
A constitutive equation for polymer liquids: application to shear flow (De Cleyn) **9** (1981) 91
New constitutive equations for the rapid flow of granular materials. 2. (Shahinpoor) **12** (1983) 31
On the motion of flexible threads in a Stokes shear field (Goddard) **13** (1983) 47
Transverse effects in shear flow of certain isotropic liquids (Leslie) **14** (1984) 161
Constitutive equations for polymer fluids based on the concept of configuration-dependent molecular mobility: a generalized mean-configuration model (Giesekus) **17** (1985) 349
Steady and transient shear flows of polystyrene solutions. 1. Concentration and molecular-weight dependence of non-dimensional viscometric functions (Attane) **18** (1985) 295
Steady and transient shear flows of polystyrene solutions. 2. Shear-rate dependence of non-dimensional viscometric functions: characteristic relaxation times (Attane) **18** (1985) 319
Stability of arbitrary plane shear flows of viscoelastic fluids with fading memory (Dunwoody) **21** (1986) 235
Relaxational interactions and viscoelasticity of polymer melts. 2. Rheological properties in shear and elongational flows (Volkov) **25** (1987) 261
A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. 2. Shear flows (Wedgewood) **27** (1988) 245
A transition occurring in ideal elastic liquids during shear flow (Magda) **30** (1988) 1
Development of the velocity field in transient shear flows of viscoelastic fluids (Burdette) **32** (1989) 269
The shear flow properties of M1 (Hudson) **35** (1990) 159
An exact non-stationary solution of simple shear flow in a Bingham fluid (Sekimoto) **39** (1991) 107

Yield stress fluid. Structural model and transient shear flow behaviour (Doremus) **39** (1991) 335
Non-planar shear flows for non-aligning nematic liquid crystals (Luskin) **42** (1992) 369
The interaction of polymer additives with vorticity (a case study on vortex rings) (Gyr) **43** (1992) 179
Stability of shear flows of polymeric liquid crystals (Calderer) **43** (1992) 351
The A1 project — an overview (Hudson) **46** (1993) 69
Motion of the yield surface in Bingham fluid with a simple-shear flow geometry (Sekimoto) **46** (1993) 219
Shocks in shear flows of the Johnson–Segalman type (Basombrío) **49** (1993) 1
Effects of fluid elasticity on the static and dynamic settling of a spherical particle (van den Brule) **49** (1993) 123
On modelling spurt flows of polymers (Adewale) **49** (1993) 133
Shear flow of nematic polymers. 2. Stationary regimes and start-up dynamics (Farhoudi) **49** (1993) 175
Stationary bifurcations and tricriticality in a creeping nematic polymer flow (Han) **50** (1993) 1
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197
Numerical simulation of non-Newtonian free shear flows at high Reynolds numbers (Azaiez) **52** (1994) 333
Flow alignment in biaxial nematic liquid crystals (Leslie) **54** (1994) 241
Numerical simulation of semi-dilute suspensions of rodlike particles in shear flow (Yamane) **54** (1994) 405
Problems originating from the use of the Gordon–Schowalter derivative in the Johnson–Segalman and related models in various shear flow situations (Arsac) **55** (1994) 21
Bifurcation analysis of a molecular model for nematic polymers in shear flows (Maffettone) **59** (1995) 73

Shear history

The triple jet: influence of shear history on the stretching of polymer solutions (Oliver) **1** (1976) 105
The Stefan problem in polymer processing: theory and experimentation (Janeschitz-Kriegl) **23** (1987) 107

Shear modulus

The use of the vane to measure the shear modulus of linear elastic solids (Sherwood) **41** (1991) 101

Shear rate

Development of a high-pressure, high-shear-rate capillary viscometer (Galvin) **8** (1981) 11
Shear rate dependence of the viscoelasticity of polymer solutions. 1. Theoretical model (Thurston) **9** (1981) 57
Shear rate dependence of the viscoelasticity of polymer solutions. 2. Xanthan gum (Thurston) **9** (1981) 69
Normal stresses in fibre suspensions (Zirnsak) **54** (1994) 153

Shear strain jump

A classification of constitutive equations based on stress relaxation predictions for the single-jump shear strain experiment (Lodge) **14** (1984) 67

Shear stress

Relaxation of normal and shear stresses after a sudden shear strain in the cone-and-plate experiment using the rheometrics mechanical spectrometer (Pedersen) **3** (1978) 379

Relations between shear and normal stresses in a step-shear experiment (Hassager) **4** (1978) 261
Spurt phenomena of the Johnson–Segalman fluid and related models (Kolkka) **29** (1988) 303
Utilization of double-step shear strain experiments in the evaluation of rheological constitutive equations (Vrentas) **40** (1991) 381
Structural viscosity of electrorheological fluids (Mokeev) **42** (1992) 213

Shear thickening
On the shear-thickening behaviour of dilute solutions of chain macromolecules (Layec-Raphalen) **1** (1976) 159
Rheological behaviour of FM-9 solutions and correlation with flammability test results and interpretations (Peng) **12** (1983) 95
Shear thickening and structure formation in polymer solutions (Vrahopoulou) **25** (1987) 157
Rheology, friction, and heat transfer study of a discontinuously shear-thickening antimisting polymer solution (Matthys) **25** (1987) 177
The role of solution structure in apparent thickening behaviour of dilute PEO/water systems (Georgelos) **27** (1988) 191
A discussion of shear thickening in bead–spring models (Kishbaugh) **34** (1990) 181
Shear thickening and time-dependent phenomena: the case of polyacrylamide solutions (Dupuis) **54** (1994) 11
Normal stresses in extremely shear thickening polymer dispersions (Laun) **54** (1994) 87
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow (Osaki) **54** (1994) 109
Normal stress differences in liquid crystals and in extremely shear thickening dispersions (Hess) **54** (1994) 201
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215
Mechanism of shear thickening investigated by a network model (Ahn) **56** (1995) 267
Brownian dynamics simulation of reversible polymeric networks (van den Brule) **60** (1995) 303

Shear thinning
Entropy effects in viscoelastic fluid theory (Christensen) **1** (1976) 371
The roles of inertia and shear thinning in flow of an inelastic liquid through an axisymmetric sudden contraction (Kim-E) **13** (1983) 341
Flow of K-BKZ fluids between parallel plates rotating about distinct axes: shear thinning and inertial effects (Bower) **22** (1987) 289
Isothermal extrusion of non-dilute fibre suspensions (Papanastasiou) **25** (1987) 313
The viscous squeeze-film behaviour of shear-thinning fluids (Pratt) **27** (1988) 27
Anomalous flow patterns in viscoelastic entry flow through a planar contraction (Chiba) **36** (1990) 193
Viscoelastic properties of physically cross-linked networks. 1. Non-linear stationary viscoelasticity (Tanaka) **43** (1992) 247
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (Bohme) **45** (1992) 1
The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning (Joo) **51** (1994) 125

On the stagnation flow behind a sphere in a shear-thinning viscoelastic liquid (Bush) **55** (1994) 229
Turbulent pipe flow characteristics of low molecular weight polymer solutions (Pereira) **55** (1994) 321

Sheets
Multiaxial elongational flow of sheets and annular cylinders: growth of disturbances (Minoshima) **11** (1982) 127
Laminar jets of a plane liquid sheet falling vertically in the atmosphere (Adachi) **24** (1987) 11

Shock profiles
Shocks in shear flows of the Johnson–Segalman type (Basombrío) **49** (1993) 1

Similarity solution
Laminer swirling power-law non-Newtonian fluid jet impinging on a normal plane (Gorla) **2** (1977) 299
Scale-up problems arising with non-Newtonian fluids (Review) (Astarita) **4** (1979) 285
On the propagation of shear oscillations in inelastic power-law fluids (Wein) **21** (1986) 309
Similarity solutions for the orientation distribution function and rheological properties of suspensions of axisymmetric particles with external couples (Kim) **24** (1987) 297
Sink flows of a suspension of rigid rods: the failure of a similarity solution (Keiller) **42** (1992) 249

Simple fluids
Determination of the velocity profile in a non-Newtonian fluid for certain types of steady viscometric flows (Lucius) **1** (1976) 383
Relations between shear and normal stresses in a step-shear experiment (Hassager) **4** (1978) 261
Perturbation of states of rest and rigid motion of simple fluids and solids (Joseph) **5** (1979) 13
Nearly extensional flows (Huilgol) **5** (1979) 219
Rotational quasi-viscometric flow around a rotating sphere (Wein) **5** (1979) 297
Infinitesimal perturbations of extensional motions (Powell) **8** (1981) 139
The flow of a second order fluid between rotating parallel plates (Rajagopal) **9** (1981) 185
A theoretical study of extrudate swell (Sturges) **9** (1981) 357
A note on the simple fluid (Rivlin) **11** (1982) 209
On unfounded criticism of the simple fluid of Noll (Murdoch) **12** (1983) 387
On the fallacy in a paper by A.I. Murdoch (Rivlin) **12** (1983) 393
Reply to the note "On the fallacy in a paper by A.I. Murdoch" by R.S. Rivlin and G.F. Smith, this journal vol. **12** (1983) 393–394 (Murdoch) 15 (1984) 247
Correction of some errors published in this journal (Truesdell) **15** (1984) 249
A reply to notes by A.I. Murdoch and C. Truesdell (Rivlin) **15** (1984) 253
Free surface on a simple fluid between rotating eccentric cylinders. 1. Analytical solution (Siginer) **15** (1984) 93
Free surface on a simple fluid between rotating eccentric cylinders. 2. Experiments (Siginer) **15** (1984) 109
The interface between two simple fluids between two oscillating vertical planes (Nguyen) **17** (1985) 289
Time periodic rectilineal simple fluid flows (Dunwoody) **53** (1994) 83

A note on path-dependent strain measures and strain jumps in isotropic simple materials (Goddard) **54** (1994) 195

Simple shear flow
Flow of a liquid with an anisotropic viscosity tensor (Duffy) **4** (1978) 177
Some relations and tests on a constitutive equation with a factorized memory function (Menezes) **7** (1980) 45
Flow of a liquid with an anisotropic viscosity tensor: a skew initial orientation (Duffy) **8** (1981) 213
Rheological study of emulsions with cross-linked polymeric interfaces (Bredimas) **12** (1983) 165
High-rate start-up behaviour of unvulcanized rubber compounds (Hull) **12** (1983) 175
Stressing behaviour in simple shear flow as predicted by a new constitutive model for polymer fluids (Giesekus) **12** (1983) 367
Dynamics of rigid and flexible polymer chains in confined geometries. 1. Steady simple shear flow (Park) **15** (1984) 309
The linear stability of numerical solutions of some elementary viscoelastic flows (Van Schaftingen) **20** (1986) 271
Orientation and rheology of rodlike particles with strong Brownian diffusion in a second-order fluid under simple shear flow (Chung) **25** (1987) 289
A rate-dependent thermodynamical model for rapid granular flows (Ahmadi) **35** (1990) 15
Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow (Pozrikidis) **51** (1994) 161
Influence of a temperature gradient on the simple shear flow of a nematic liquid crystal (Heynderickx) **55** (1994) 137

SIMPLER algorithm
A numerical study of the planar contraction flow of a viscoelastic fluid using the
SIMPLER algorithm (Yoo) **39** (1991) 89

Simulation
Theoretical simulation of transient viscoelastic flows in a viscoelastic system (Randria) **18** (1985) 199
Reptation and tube renewal: experimental and numerical simulation (Marin) **23** (1987) 215
Computer simulation of flow and molecular orientation in liquid crystal polymers (Vanderheyden) **23** (1987) 383
A new approach for the FEM simulation of viscoelastic flows (Fortin) **32** (1989) 295
The numerical simulation of an Oldroyd liquid draining down a vertical surface (Pennington) **34** (1990) 221
Calculation of viscoelastic flow using molecular models: The CONNFFESSIT approach (Laso) **47** (1993) 1
Simulation of transient viscoelastic flow with second order time integration (Rasmussen) **56** (1995) 65
On the simulation of highly elastic complex flows (Baloch) **59** (1995) 111

Singularities
The separation of a second-order fluid at a straight edge (Huilgol) **2** (1977) 89
Flow singularities, polymer chain extension and hydrodynamic instabilities (Mackley) **4** (1978) 111
Implications of boundary singularities in complex geometries (Lipscomb) **24** (1987) 85
Impact of the constitutive equation and singularity on the calculation of stick–slip flow: the modified upper-convected Maxwell model (MUCM) (Apelian) **27** (1988) 299

Singular behaviour of power-law fluids in Hele-Shaw flow (Hassager) **29** (1988) 337
Transient free convection from a vertical plate to a non-Newtonian fluid in a porous medium (Haq) **36** (1990) 395
Corner flow of a suspension of rigid rods (Keiller) **40** (1991) 323
Stress singularities in non-Newtonian stick–slip and edge flows (Tanner) **50** (1993) 135
The flow of an Oldroyd fluid around a sharp corner (Hinch) **50** (1993) 161
On corner flows of Oldroyd-B fluids (Davies) **50** (1993) 173
How to integrate the upper convected Maxwell (UCM) stresses near a singularity (and maybe elsewhere, too) (Renardy) **52** (1994) 91
Higher order finite element techniques for viscoelastic flow problems with change of type and singularities (Talwar) **59** (1995) 49

Sink flows
Sink flows of a suspension of rigid rods. 1. The failure of a similarity solution (Keiller) **42** (1992) 249
Sink flows of a suspension of rigid rods. 2. Lubrication theory (Rallison) **48** (1993) 237

Sinuous mode (Varicose mode)
The instability mechanism for two elastic liquids being co-extruded (Hinch) **43** (1992) 311

Slender-body theory
On the motion of flexible threads in a Stokes shear field (Goddard) **13** (1983) 47

Slender-jet theory
Practical application of a higher order perturbation theory for slender viscoelastic jets and fibres (Bechtel) **41** (1992) 201

Slider-bearing
Normal stress effects in viscoelastic fluid lubrication (Christensen) **7** (1980) 63
On the slider-bearing flow of a viscoelastic fluid (Phan-Thien) **33** (1989) 197

Slip
A new constitutive equation derived from network theory (Phan-Thien) **2** (1977) 353
Some useful constitutive models with a kinematic slip hypothesis (Tanner) **5** (1979) 103
The behaviour of complex fluids at solid boundaries (Schowalter) **29** (1988) 25
Fluid detachment and slip in extensional flows (Sridhar) **30** (1988) 285
Investigations of the interaction of flowing rubber compounds with boundaries: basic experiments and air lubricated die (Brzoskowski) **31** (1989) 43
Influence of upstream instabilities and wall slip on melt fracture and sharkskin phenomena during silicones extrusion through orifice dies (Piau) **34** (1990) 145
Cone-and-plate rheometry of yield stress fluids. Study of an aqueous gel (Magnin) **36** (1990) 85
The different capillary flow regimes of entangled polydimethylsiloxane polymers: macroscopic slip at the wall, hysteresis and cork flow (El Kissi) **37** (1990) 55
On the comparison of simple non-monotonic constitutive equations with data showing slip of well-characterized polybutadienes (Deiber) **40** (1991) 141

Effect of surface properties on polymer melt slip and extrusion defects (El Kissi) **52** (1994) 249
Measurement and modelling of friction in polymer melts during macroscopic slip at the wall (Piau) **54** (1994) 121
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221
Slip flow of polybutadiene through fluorinated dies (Piau) **59** (1995) 11

Slit dies
Experimental velocity distribution measurements of high-density polyethylene flowing into and within a slit (Mackley) **21** (1986) 337
Experimental and linear viscoelastic stress distribution measurements of high-density polyethylene flowing into and within a slit (Aldhouse) **21** (1986) 359
Laminar jets of a plane liquid sheet falling vertically in the atmosphere (Adachi) **24** (1987) 11
Additional observations on the surface melt fracture behaviour of linear low-density polyethylene (Moynihan) **36** (1990) 255
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
Numerical simulation of converging flow of polymer melts through a tapered slit die (Kajiwara) **48** (1993) 111
Experimental centreline planar extension of polyethylene melt flowing into a slit die (Ahmed) **56** (1995) 127

Slits
Capillary and slit methods of normal stress measurements (Review) (Boger) **6** (1980) 163
An exact solution for the slow flow of a general linear viscoelastic fluid through a slit (Hull) **8** (1981) 327
Excess pressure losses in a slit (Choplin) **9** (1981) 119
On the accuracy of finite element and finite difference predictions of non-Newtonian slot pressures for a Maxwell fluid (Malkus) **25** (1987) 93
Numerical simulation and change in type in the developing flow of a nonlinear viscoelastic fluid (Gaidos) **29** (1988) 59
Exit and entrance flows of non-Newtonian fluids in parallel slits (Yarusso) **40** (1991) 103
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19

Slow flows
Developments in non-Newtonian fluid mechanics — A personal view (Walters) **5** (1979) 113
Flow of dilute polymer solutions around circular cylinders (Koniuta) **7** (1980) 101
Approximate constitutive equations for slow flow of rigid plastic viscoelastic fluids (White) **8** (1981) 195
An exact solution for the slow flow of a general linear viscoelastic fluid through a slit (Hull) **8** (1981) 327
On the slow flow of viscoelastic liquids past a circular cylinder (Manero) **9** (1981) 379
A low cost laser-speckle photographic technique for velocity measurement in slow flows (Binnington) **12** (1983) 255
The Doi–Edwards model in slow flows. Predictions on the Weissenberg effect (Marrucci) **21** (1986) 319
A boundary intergral method for two-dimensional (non)-Newtonian drops in slow viscous flow (Toose) **60** (1995) 129

Slow motion
A note on the slow motion of a bubble in a viscoelastic liquid (Tiefenbruck) **7** (1980) 257
Extremum principles and exact two-side bounds of potential: functional and dissipation for slow motions of nonlinear viscoplastic media (Leonov) **28** (1988) 1

Slurries
Numerical study on the laminar pulsatile flow of slurries (Nakamura) **22** (1987) 191

Small angle light scattering
A comparison between texture and rheological behaviour of lyotropic liquid crystalline polymers during flow (Vermant) **53** (1994) 1

Small sample volume
A new torsional rod instrument for high frequency dynamic viscoelastic measurements (Nakken) **52** (1994) 217

Small-amplitude oscillations
Elastico-viscous flow around a circular cylinder executing small amplitude, high frequency oscillations (James) **2** (1977) 99
Flow reversal of an elastico-viscous liquid between a stationary and torsionally oscillating disc (Waters) **3** (1977/1978) 13
Secondary flow in the neighbourhood of a cylinder oscillating in a viscoelastic fluid (Chang) **6** (1979) 47

Soap solutions
Drag reduction in aqueous cationic soap solutions (Elson) **12** (1983) 121

Solidification
Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip (Malkin) **39** (1991) 55

Solutions
The shear flow properties of M1 (Hudson) **35** (1990) 159
The extensional properties of M1 obtained from the Carri-Med elongational viscometer (Ferguson) **35** (1990) 197
Stagnation-point extensional flow behaviour of M1 (Müller) **35** (1990) 231
The rheology of solutions of liquid crystal polymers formed from flexible chain macromolecules (Ferguson) **54** (1994) 33

Solvent effects
Solvent effects on drag reduction of polyox solutions in square duct and capillary tube flows (Kwack) **9** (1981) 79

Solvent layer formation
A possibility for an anomalously high rate of dissolution in films of non-Newtonian liquids with short contact times (Peev) **3** (1978) 389
On the existence of an anomalously high dissolution rate in films of non-Newtonian liquids with short contact times (Peev) **8** (1981) 319

Solvent purity
Relation between some rheological properties of polysiobutylene solutions and their mode of preparation (Khalil) **52** (1994) 375

Specific gravity
Glass transition temperature, specific gravity, viscosity and viscoelastic

properties of the test fluid M1 (te Nijenhuis) **35** (1990) 179

Speckle photography
A low cost laser-speckle photographic technique for velocity measurement in slow flows (Binnington) **12** (1983) 255
Co-current axisymmetric flow in complex geometries: experiments (Van de Griend) **32** (1989) 229
Normal stress measurement by speckle photography on the Weissenberg effect (Dupuis) **33** (1989) 95
Weissenberg effect of the fluid M1. Study by an optical method (Dupuis) **35** (1990) 401

Spectral domain decomposition methods
A spectral domain decomposition method for the planar non-Newtonian stick–slip problem (Owens) **41** (1991) 43

Spectral element method
Spectral finite element calculations of the flow of a Maxwell fluid between eccentric rotating cylinders (Beris) **22** (1987) 129
Application of spectral elements to viscoelastic creeping flows (Van Kemenade) **51** (1994) 277

Spectroscopy
Fourier transform mechanical spectroscopy of viscoelastic materials with transient structure (Holly) **27** (1988) 17

Spheres
The influence of fluid elasticity on the drag coefficient for creeping flow around a sphere (Chhabra) **6** (1980) 187
A cell model theory of the shear viscosity of a concentrated suspension of interacting spheres in a non-Newtonian fluid (Tanaka) **7** (1980) 333
Momentum transfer for multi-solid-particle power-law fluid systems at high Reynolds numbers (Hua) **9** (1981) 301
A numerical study of the motion of a viscoelastic fluid past rigid spheres and spherical bubbles (Tiefenbruck) **10** (1982) 115
Drag coefficients of a slowly moving sphere in non-Newtonian fluids (Cho) **12** (1983) 243
Velocity fields around spheres and bubbles investigated by laser-Doppler anemometry (Bisgaard) **12** (1983) 283
Some remarks on "Drag coefficients of a slowly moving sphere in non-Newtonian fluids" (Chhabra) **13** (1983) 225
Reply to Chhabra's remarks (Cho) **13** (1983) 229
Drag force on a sphere in creeping motion through a Carreau model fluid (Bush) **16** (1984) 303
The drag on a sphere in a power-law fluid (Dazhi) **17** (1985) 1
Structure of the rate-of-deformation field of Newtonian and viscoelastic fluids in a falling-ball experiment (El Kayloubi) **22** (1987) 335
Boundary effects on the drag of an oscillating sphere: applications to the magnetic sphere rheometer (Sellers) **26** (1987) 43
The influence of rheological properties on the slow flow past spheres (Mena) **26** (1987) 247
Creeping flow of dilute polymer solutions past cylinders and spheres (Chilcott) **29** (1988) 381
Creeping motion of spheres in fluid M1 (Tirtaatmadja) **35** (1990) 327

On the flow past a sphere in a cylindrical tube: limiting Weissenberg number (Zheng) **36** (1990) 27
Use of the falling ball viscometer to obtain flow curves for inelastic, non-Newtonian fluids (Butcher) **36** (1990) 51
Wall effect for spheres falling at small Reynolds number in a viscoplastic medium (Atapattu) **38** (1990) 31
Finite element analysis of steady viscoelastic flow around a sphere in a tube: calculations with constant viscosity models (Lunsmann) **48** (1993) 63
The stagnation flow behind a sphere (Bush) **49** (1993) 103
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
On the stagnation flow behind a sphere in a shear-thinning viscoelastic liquid (Bush) **55** (1994) 229
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217
Creeping sphere motion in Herschel–Bulkley fluids: flow field and drag (Atapattu) **59** (1995) 245

Sphere in a cylinder
Effect of finite boundaries on the slow laminar isothermal flow of a viscoelastic fluid around a spherical obstacle (Sigli) **2** (1977) 1
A Lagrangian finite element method for the simulation of flow of non-Newtonian liquids (Hassager) **12** (1983) 153
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289
A split Lagrangian–Euler method for simulating transient viscoelastic flows (Harlen) **60** (1995) 81

Spheroids
Viscoelastic fluid flow past a submerged spheroidal body (Dairenieh) **19** (1985) 81
Rheology of several hundred rigid bodies (Dlugogorski) **53** (1994) 25

Spinline rheometer
Rubber-like behaviour of poly(ethylene oxide) solution in elongational flow (Buscall) **17** (1985) 193

Spinning
Elongational flow and the wet spinning process (McKay) **4** (1978) 89
An experimental study of isothermal spinning of a Newtonian and viscoelastic liquid (Chang) **5** (1979) 369
Rheological and coagulation features in the wet spinning process (Ferguson) **6** (1980) 333
Functional derivatives and finite elements for the steady spinning of a viscoelastic filament (Malkus) **8** (1981) 223
Viscous and elastic effects in extensional flow (Ferguson) **11** (1982) 269
Spinnability and viscoelasticity (Larson) **12** (1983) 303
Steady spinning of the Oldroyd fluid B. 1. Theory (Gupta) **21** (1986) 99
On the asymptotic behaviour of an Oldroyd fluid B in steady spinning flow (Phan-Thien) **25** (1987) 129
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows (Bulters) **38** (1990) 43
Necking in non-isothermal high-speed spinning with radial viscosity variation (Zahorski) **50** (1993) 65

Spinning disk atomizer
Ligament-type disintegration of non-Newtonian fluid in spinning disk atomization (Kawase) **10** (1982) 367

Spiral flow
The effect of weak elasticity on Couette flow between rotating cylinders: (1) spiral flow; (2) eccentric cylinders (Jones) **28** (1988) 255

Split-C
Solving microstructure electrostatics with MIMD parallel supercomputers and Split-C (Traenkle) **53** (1994) 197

Spray cone angle
Theoretical and experimental studies on the coefficient of discharge and spray cone angle of a swirl spray pressure nozzle using a power-law non-Newtonian fluid (Som) **12** (1983) 39

Spurt flows
Spurt phenomena of the Johnson–Segalman fluid and related models (Kolkka) **29** (1988) 303
Phase space analysis of the spurt phenomenon for the Giesekus viscoelastic fluid model (Kolkka) **33** (1989) 305
On modelling spurt flows of polymers (Adewale) **49** (1993) 133
A generalized Giesekus constitutive model with retardation time and its association to the spurt effect (Vlassopoulos) **57** (1995) 119

Squeeze-film flow
Elastico-viscous squeeze films. 1. (Brindley) **1** (1976) 19
Elastico-viscous squeeze films. 2. Superimposed rotation (Binding) **1** (1976) 259
Elastico-viscous squeeze films. 3. The torsional balance rheometer (Binding) **1** (1976) 277
Viscoelastic properties in plane squeeze-film flows (Zahorski) **4** (1978) 217
An experimental test of equations predicting the load bearing capacity of squeeze films of elastico-viscous liquid (Oliver) **7** (1980) 369
Fast squeezing flow of viscoelastic fluids (Mochimaru) **9** (1981) 157
Definitive load-enhancement effects by polymer-thickened oils in a squeeze film experiment (Oliver) **9** (1981) 257
Normal and reverse squeezing flows (Avila) **11** (1982) 111
Load enhancement effects by polymer-thickened oils in strip squeeze film flow (Oliver) **13** (1983) 93
Squeezing flow of elastic liquids (McClelland) **13** (1983) 181
Lubrication squeeze-film theory for the Oldroyd-B fluid (Phan-Thien) **14** (1984) 327
The flow of an Oldroyd liquid in a continuous-flow squeeze film (Waters) **14** (1984) 361
Numerical study of the Bingham squeeze film problem (O'Donovan) **15** (1984) 75
Reverse squeeze film flow in a continuous flow system (Oliver) **15** (1984) 331
Squeezing a viscoelastic liquid from a wedge: an exact solution (Phan-Thien) **16** (1984) 329
On the stability of a dumbbell molecule in a continuous squeezing flow (Goh) **18** (1985) 19
Squeeze film flow of ideal elastic liquids (Phan-Thien) **18** (1985) 227
The squeeze-film flow of a viscoelastic fluid (Phan-Thien) **24** (1987) 97
The viscous squeeze-film behaviour of shear-thinning fluids (Pratt) **27** (1988) 27

Orientation effects in extensional and squeezing flows of certain anisotropic fluids (Duffy) **28** (1988) 77
Squeeze-film flow of a viscoelastic fluid: a lubrication model (Phan-Thien) **28** (1988) 129
On the squeezing flow of a fibre-reinforced fluid (Coleman) **37** (1990) 379
Determination of polymer melt viscosity by squeezing flow with constant plate velocity (Winther) **39** (1991) 119
Squeeze-film rheometry of non-uniform mudcakes (Sherwood) **39** (1991) 311
Squeezing flow of a Bingham material (Wilson) **47** (1993) 211
An experimental and theoretical study of the squeeze-film deformation and flow of elastoplastic fluids (Adams) **51** (1994) 61

Stability

Stability of plane Poiseuille flow of a highly elastic liquid (Ho) **3** (1977/1978) 179
The kinematics and stability of die entry flows (Nguyen) **5** (1979) 353
A theoretical investigation of the Pieranski–Guyon instability in Couette flow of nematic liquid crystals (Barratt) **11** (1982) 23
The stability of two stratified power-law liquids in Couette flow (Waters) **12** (1983) 85
Coaxial-disk flow of an Oldroyd-B fluid: exact solution and stability (Phan-Thien) **13** (1983) 325
Stability of extensional flows and extending viscoelastic fluid sheets (Shifang) **15** (1984) 181
Computation of viscoelastic flow in a cylindrical tank with a rotating lid (Nirschl) **16** (1984) 233
Cone-and-plate flow of the Oldroyd-B fluid is unstable (Phan-Thien) **17** (1985) 37
Normal and reverse squeezing flows (Avila) **11** (1982) 111
The effect of die flow on the dynamics of isothermal melt spinning (Tsou) **17** (1985) 331
On the stability of a dumbbell molecule in a continuous squeezing flow (Goh) **18** (1985) 19
The stability of two-dimensional linear flows of an Oldroyd-type fluid (Lagnado) **18** (1985) 25
Instability of plane Couette flow of viscoelastic liquids (Akbay) **18** (1985) 123
Stability of plane Poiseuille and Couette flow of a Maxwell fluid (Lee) **21** (1986) 65
Stability of arbitrary plane shear flows of viscoelastic fluids with fading memory (Dunwoody) **21** (1986) 235
The stability of two concentric non-Newtonian fluids in circular pipe flow (Wong) **22** (1987) 359
The stability of two stratified non-Newtonian liquids in Couette flow (Waters) **24** (1987) 161
Pseudo-spectral analysis of the stability of pressure-driven flow of a Giesekus fluid between parallel planes (Lim) **26** (1987) 135
Stability of the interface in two-layer Couette flow of upper convected Maxwell liquids (Renardy) **28** (1988) 99
The stability of gravity driven viscoelastic film flow at low to moderate Reynolds number (Shaqfeh) **31** (1989) 87
Stability of shear flows of viscoelastic fluids under perturbations perpendicular to the plane of flow (Renardy) **32** (1989) 145

Short wave instabilities resulting from memory slip (Renardy) **35** (1990) 73
Non-planar shear flows for non-aligning nematic liquid crystals (Luskin) **42** (1992) 369
A linear stability analysis of flows of transversely isotropic non-Newtonian fluids (Hull) **43** (1992) 325
The onset of elastically driven wavy motion in the flow of two viscoelastic liquid films down an inclined plane (Chen) **45** (1992) 21
The stability and nonlinear flow developments of a viscoelastic draining film with shear thinning (Joo) **51** (1994) 125
Application of low-order discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37
On stability of grafted polymer molecules in elongational flows (Agarwal) **54** (1994) 1
Extrudate distortions in linear low-density polyethylene solutions and melt (Pomar) **54** (1994) 143
Stability constraints in the formulation of viscoelastic constitutive equations (Kwon) **58** (1995) 25

Stagnation point flows

Characteristics of HPAM dilute polymer solutions in three elongational flow situations (Ouibrahim) **7** (1980) 315
Axisymmetric stagnation point flow and mass transfer for power-law fluids (Trainham) **10** (1982) 281
Steady planar extension with lubricated dies (Macosko) **11** (1982) 301
Experimental study of viscoelastic effects in a cylinder-plane lubricated contact (Doremus) **13** (1983) 79
Axisymmetric stagnation point flow and mass transfer for power-law fluids. 2. Moderate Schmidt number correction (Trainham) **15** (1984) 155
On the planar extensional viscosity of mobile liquids (Williams) **19** (1985) 53
Mechanical and optical responses of the M1 fluid subject to stagnation point flow (Schweizer) **35** (1990) 277
Sink flows of a suspension of rigid rods. 2. Lubrication theory (Rallison) **48** (1993) 237
The stagnation flow behind a sphere (Bush) **49** (1993) 103
Instabilities of a stagnation point flow of a dilute polymer solution (Harris) **55** (1994) 59
On the stagnation flow behind a sphere in a shear-thinning viscoelastic liquid (Bush) **55** (1994) 229

Start up

The effects of conformation-dependent friction and internal viscosity on the dynamics of the nonlinear dumbbell model for a dilute polymer solution (Fuller) **8** (1981) 271
High-rate start-up behaviour of unvulcanized rubber compounds (Hull) **12** (1983) 175
Two new methods for the approximate determination of the initial coefficient of the first normal stress difference (Friedrich) **17** (1985) 185
Some experimental results on the development of Couette flow for non-Newtonian fluids (Chow) **17** (1985) 233
Start-up of an elastico-viscous liquid draining from a vertical surface (Waters) **22** (1987) 325
The generation of a draining liquid film by the vertical withdrawal of a flat plate from an elastico-viscous liquid (Waters) **26** (1987) 161
Draining non-Newtonian films. 1. The numerical simulation of a generalized

Newtonian liquid draining down a vertical surface (Pennington) **37** (1990) 201
Shear flow of nematic polymers. 2. Stationary regimes and start-up dynamics (Farhoudi) **49** (1993) 175
Start-up flow of an Upper Convected Maxwell fluid over a rotating disk (Borkar) **55** (1994) 163

State variable model
A phenomenological theory for elastic fluids (Dashner) **8** (1981) 59
Fading memory in an incremental model for elastic fluids (Dashner) **36** (1990) 305

Stationary flows
Optimal control techniques for computing stationary flows of viscoelastic fluids (Le Tallec) **20** (1986) 241

Steady flows
A comment on the material functions for steady circular shear in the orthogonal rheometer (Goddard) **4** (1979) 365
A rheometrical study of Boger fluids (Jackson) **14** (1984) 173
Constitutive equations for polymer fluids based on the concept of configuration-dependent molecular mobility: a generalized mean-configuration model (Giesekus) **17** (1985) 349
Steady laminar flow of a power-law fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **19** (1985) 161
Exact solution of the Rouse model with discrete time evolution (Öttinger) **19** (1986) 357
A technique to solve incompressible non-Newtonian flow problems (Webster) **20** (1986) 227
Molecular extension from the Giesekus model (Wiest) **22** (1986) 115
Effect of molecular parameters on the viscoelastic properties of polymer melts (Pinaud) **23** (1987) 137
Computation of rheological properties of suspensions of rigid rods: stress growth after inception of steady shear flow (Strand) **24** (1987) 311
Recent advances in the mathematical theory of steady flow of viscoelastic fluids (Renardy) **29** (1988) 11
Measurements of N1-N2 and η in steady shear-flow and η', η'', and birefringence in small-strain oscillatory shear for the polyisobutylene solution M1 (Chirinos) **35** (1990) 105
An alternative approach to inflow boundary conditions for Maxwell fluids in three space dimensions (Renardy) **36** (1990) 419
The anomalous shear flow properties of S1 (Hudson) **52** (1994) 105

Steady solutions
On a discontinuity capturing technique for Oldroyd-B fluids (Carew) **51** (1994) 231

Steady state
Instability of a Criminale-Ericksen-Filbey fluid in a disk-and-cylinder system (Chiao) **36** (1990) 361
Shear flow of nematic polymers. 2. Stationary regimes and start-up dynamics (Farhoudi) **49** (1993) 175

Step-change tests
Relaxation of shear and normal stress components in step-strain experiments (Vrentas) **9** (1981) 339
Elastic recovery occurring in step-change tests (Citroen) **10** (1982) 257

Utilization of double-step shear strain experiments in the evaluation of rheological constitutive equations (Vrentas) **40** (1991) 381
A note on path-dependent strain measures and strain jumps in isotropic simple materials (Goddard) **54** (1994) 195

Stick–slip
On the stick–slip and die-swell problems for a second order fluid (Coleman) **3** (1977/1978) 288
Impact of the constitutive equation and singularity on the calculation of stick–slip flow: the modified upper-convected Maxwell model (MUCM) (Apelian) **27** (1988) 299
Numerically stable finite element techniques for viscoelastic calculations in smooth and singular geometries (King) **29** (1988) 147
A spectral domain decomposition method for the planar non-Newtonian stick–slip problem (Owens) **41** (1991) 43
Stress singularities in non-Newtonian stick–slip and edge flows (Tanner) **50** (1993) 135
Numerical experiments with a discontinuous Galerkin method including monotonicity enforcement on the stick–slip problem (Baaijens) **51** (1994) 141
Application of low-order discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37

Stirring
Torque suppression in mechanically stirred liquids and multiphase liquid systems (Quaraishi) **1** (1976) 223

Stokes drag
On the motion of a sphere falling through an elastic liquid contained in a tightly-fitting cylindrical container (Degand) **57** (1995) 103

Stokes paradox
Stokes paradox for power-law flow around a cylinder (Tanner) **50** (1993) 217

Strain history
Modelling of strain histories for memory integral fluids in steady axisymmetric flows (Winter) **10** (1982) 157

Strain measures
Derivation of strain measures from strand convection models for polymer melts (Larson) **17** (1985) 91
A note on path-dependent strain measures and strain jumps in isotropic simple materials (Goddard) **54** (1994) 195

Strain-coupling
Evaluation of an integral constitutive equation for nonlinear viscoelasticity (Vrentas) **42** (1992) 351

Straining flow
A viscous line vortex in an imposed axisymmetric straining flow of an upper convected Maxwell fluid (Lagnado) **34** (1990) 247

Stratified flows
The stability of two stratified non-Newtonian liquids in Couette flow (Waters) **24** (1987) 161
Stratified flows of Newtonian and viscoelastic fluids (Dheur) **32** (1989) 1

Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 2. Interface deformation (Khomami) **37** (1990) 19

Stream-tube method
Numerical simulation of the die swell problem of a Newtonian fluid by using the concept of stream function and a local analysis of the singularity at the corner (Andre) **23** (1987) 335
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation (Andre) **38** (1990) 1
Calculation of main flows of a memory-integral fluid in an axisymmetric contraction at high Weissenberg numbers (Clermont) **46** (1993) 89
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193

Streamline integration
Simulation of non-recirculating flows of dilute fibre suspensions (Rosenberg) **37** (1990) 317
Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183
Numerical integration of differential viscoelastic models (Rosenberg) **39** (1991) 269

Streamline patterns
Experimental study of viscoelastic effects in a cylinder-plane lubricated contact (Doremus) **13** (1983) 79
Flow of an Oldroyd-B fluid between intersecting planes (Bhatnagar) **46** (1993) 49

Streamline-upwinding
A decoupled finite element streamline-upwind scheme for viscoelastic flow problems (Luo) **31** (1989) 143
On the convergence of the streamline-upwind mixed finite element (Crochet) **34** (1990) 261
Non-linear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247
Numerical integration of differential viscoelastic models (Rosenberg) **39** (1991) 269
The consistent streamline-upwind/Petrov–Galerkin method for viscoelastic flow revisited (Crochet) **42** (1992) 283
A Taylor-Petrov-Galerkin algorithm for viscoelastic flow (Carew) **50** (1993) 253
Numerical simulation of non-isothermal extrudate swell at high extrudate rates (Chang) **51** (1994) 1
High-order finite element methods for steady viscoelastic flows (Yurun) **57** (1995) 283

Stress
Effective stress rates of viscoelastic free jets (Bechtel) **26** (1987) 1
Comparison of computational efficiency of flow simulations with multimode constitutive equations: integral and differential models (Rajagopalan) **46** (1993) 243
Normal stresses in fibre suspensions (Zirnsak) **54** (1994) 153
Use of the finite element modelling technique for the improvement of viscometry results obtained by cone-and-plate rheometers (Petera) **58** (1995) 1
Effect of artificial stress diffusivity on the stability of numerical calculations and the flow dynamics of time-dependent

viscoelastic flows (Sureshkumar) **60** (1995) 53

Stress growth
Further comments on the FENE-P dumbbell model (Mochimaru) **9** (1981) 179
Stretching the Phan-Thien–Tanner model: stress growth and creep (Missaghi) **11** (1982) 283
Stress growth for a generalized rubberlike liquid (Petrie) **11** (1982) 295
Nonlinear dumbbell model for flexible polymers: dynamical phenomena (Biller) **22** (1987) 309
Computation of rheological properties of suspensions of rigid rods: stress growth after inception of steady shear flow (Strand) **24** (1987) 311
Multiple-time scale approach to stress growth in suspensions of rodlike macromolecules (Stasiak) **25** (1987) 277
Stress growth in dilute solutions of macromolecules in a non-Newtonian solvent (Stasiak) **31** (1989) 289
Liquid stretching using a falling cylinder (Matta) **35** (1990) 215
Measurement of extensional viscosity of polymer solutions (Sridhar) **40** (1991) 271
On the use of stress growth data to determine strain-dependent material functions for factorable K-BKZ equations (Venerus) **49** (1993) 299

Stress profiles
A critical re-appraisal of the jet-thrust technique for normal stresses, with particular reference to axial velocity and stress rearrangement at the exit plane (Davies) **3** (1977/1978) 141

Stress tensor
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323
Some properties of the upper convected Maxwell model for viscoelastic fluid flow (Olsson) **48** (1993) 125

Stress-induced migration
Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration (Ianniruberto) **54** (1994) 231

Stretching flow
The triple jet: influence of shear history on the stretching of polymer solutions (Oliver) **1** (1976) 105
Stretching flow instabilities at the exits of extrusion dies (Cogswell) **2** (1977) 37
Converging flow and stretching flow: a compilation (Cogswell) **4** (1978) 23
Stretching flows: Proceedings of part of the British Society of Rheology conference, Edinburgh, September 7–9, 1977: Introduction (Petrie) **4** (1978) 3
Extensional rheometers for molten polymers; a review (Dealy) **4** (1978) 9
Stretching flows for thin film production. 1. Bubble blowing in the solid phase (Pearson) **4** (1978) 57
Stretching flows for thin film production. 2. Film stretching over a conical mandrel (Gutteridge) **4** (1978) 73
Rapid conical flows of viscoelastic solutions (Oliver) **16** (1984) 267
A finite difference study of the stretching and break-up of filaments of polymer solutions (Markovich) **17** (1985) 13
On the mechanism of stretching and breaking of polymers in elongational flows (Rabin) **30** (1988) 119
Stretching flow tests on liquid S1 and similar liquids (Oliver) **52** (1994) 183

Strong flows
Strong flow criteria based on microstructure deformation (Olbricht) **10** (1982) 291
Strong flows of polymeric liquids. 1. Rheological behaviour (Yarin) **37** (1990) 113

Suction
On the flow of an elastic liquid past a porous flat plate (Holden) **2** (1977) 83
Injection and suction of an upper convected Maxwell fluid through a porous-walled tube (Menon) **27** (1988) 265
Several comments on the paper "Some remarks on 'useful theorems for the second order fluid'" by P.N. Kaloni (Giesekus) **33** (1989) 343
An exact solution of a viscoelastic Ekman layer with suction (Buggisch) **36** (1990) 351

Summary
An overview of the project M1 (Sridhar) **35** (1990) 85

Supercritical and subcritical
Stationary bifurcations and tricriticality in a creeping nematic polymer flow (Han) **50** (1993) 1

Superposed flow
Some superposition theorems for second-order fluids (Kazakia) **2** (1977) 151
Superposition of longitudinal and plane flows of a non-Newtonian fluid between eccentric cylinders (Kazakia) **8** (1981) 311

Surface tension
Surface rheology (van den Tempel) **2** (1977) 205
Extrudate swell for a round jet with large surface tension (Tieu) **13** (1983) 203
Non-linear analysis of the surface tension driven breakup of viscoelastic filaments (Bousfield) **21** (1986) 79
Analysis of surface tension driven levelling in viscoelastic films (Keunings) **22** (1987) 219
Long-wave analysis of viscoelastic film leveling (Bousfield) **40** (1991) 47
Some comments on the surface-tension driven break-up (or the lack of it) of viscoelastic jets (Renardy) **51** (1994) 97
Dynamic measurements of surface tension of solutions of polyisobutylene in mixtures of polybutene oil and decalin (Lewandowski) **52** (1994) 233

Surfactants
The effect of shear in porous medium flow of surfactant solutions (Brunn) **30** (1988) 317
Drag reduction and rheological properties of cationic viscoelastic surfactant formulations (Rose) **31** (1989) 59
The influence of pre-shearing on the elongational behaviour of dilute polymer and surfactant solutions (Vissmann) **34** (1990) 289
The effect of viscoelasticity on the translation of a surfactant covered Newtonian drop (Quintana) **45** (1992) 81
Characterization of the non-Newtonian flow behaviour of drag-reducing fluids (Vlassopoulos) **49** (1993) 205
Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres (Vorwerk) **51** (1994) 79

Suspension flow
A simultaneous solution for flow and fibre orientation in axisymmetric

diverging radial flow (Ranganathan) **47** (1993) 107
Suspension parameter
Entry flow of fibre suspensions in a straight channel (Tang) **56** (1995) 183

Suspensions
Interactions between two spheres falling along their line of centres in a viscoelastic fluid (Riddle) **2** (1977) 23
Dilute solution rheology: experimental results and finitely extensible nonlinear elastic dumbbell theory (Christiansen) **3** (1977/1978) 161
Local effect of suspended particles in flows of a viscoelastic fluid past convexly curved boundaries (Brunn) **10** (1982) 319
Suspension of solid particles in a Newtonian fluid (Levy) **13** (1983) 63
Rheology of suspensions of spherical particles in a Newtonian and a non-Newtonian fluid (Chan) **15** (1984) 165
Dissipation in a dilute suspension of spheres in a second-order fluid (Mifflin) **17** (1985) 267
The rheology of strongly-flocculated suspensions (Buscall) **24** (1987) 183
New type of equation for the relation between viscosity and particle content in suspensions (Yao) **25** (1987) 197
Effect of temperature on rheological properties of suspensions (Tsutsumi) **26** (1987) 175
The flow of fibre suspensions in complex geometries (Lipscomb) **26** (1988) 297
Rheology of molecular liquids and concentrated suspensions by microscopic dynamical simulations (Heyes) **27** (1988) 47
An experimental verification of flow-induced anisotropy of concentrated suspensions (Astarita) **34** (1990) 25
Structural viscosity of electrorheological fluids (Mokeev) **42** (1992) 213
Brownian dynamics simulations of model hard-sphere suspensions (Heyes) **46** (1993) 1
Normal stresses in fibre suspensions (Zirnsak) **54** (1994) 153
Orientation of rigid, interacting particles in uniaxial flow combined with electric field (Ziabicki) **54** (1994) 269
Numerical simulation of semi-dilute suspensions of rodlike particles in shear flow (Yamane) **54** (1994) 405
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67
Electro-magneto-rheological effects in parallel-field and crossed-field systems (Koyama) **58** (1995) 195
A thixotropy model for coal-water mixtures (Usui) **60** (1995) 259

Swell
A technique to estimate the elastic shear compliance from swell measurements (Matta) **12** (1983) 225

Swelling phenomenon
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193

Swirling flows

Multiplicity of solutions in von Karman flows of viscoelastic fluids (Ji) **36** (1990) 1

On the numerical simulation of axisymmetric swirling flows of differential viscoelastic liquids: The rod climbing and the *Quelleffekt* (Debbaut) **43** (1992) 103

Syphons
On the suspended syphon elongational rheometer (MacSporran) **8** (1981) 119
Transient extensional viscosity of dilute flexible polymer solutions (Moan) **30** (1988) 343

T

Tanner–Keentok theory
On the rectilinear flow of a second-order fluid and the role of the second normal stress difference in edge fracture in rheometry (Huilgol) **50** (1993) 331

Taylor–Couette flow
Finite-amplitude time-periodic states in viscoelastic Taylor–Couette flow described by the UCM model (Northey) **42** (1992) 117
Experimental studies of the onset of oscillatory instability in viscoelastic Taylor–Couette flow (Müller) **46** (1993) 315
Non-axisymmetric modes in viscoelastic Taylor–Couette flow (Avgousti) **50** (1993) 225

Taylor–Galerkin pressure correction
A Taylor–Petrov–Galerkin algorithm for viscoelastic flow (Carew) **50** (1993) 253

Temperature effects
Testing thermodynamic constitutive equations for polymers by adiabatic deformation experiments (Sarti) **3** (1977/1978) 65
On a thermorheological second-order effect in cylindrical tubes (Bohme) **5** (1979) 191
Marangoni effect in the Couette flow (Buggisch) **15** (1984) 1
Drift function tracking with compressibility and variable temperature (Bernstein) **20** (1986) 299
Oscillatory and steady convection in a dielectric viscoelastic layer subjected to a temperature gradient in the presence of an electric field (Agrait) **21** (1986) 1
Effect of temperature on rheological properties of suspensions (Tsutsumi) **26** (1987) 175
Influence of a temperature gradient on the simple shear flow of a nematic liquid crystal (Heynderickx) **55** (1994) 137

Temperature equation
Dissipative behaviour of viscoelastic fluids derived from rheological constitutive equations (Braun) **38** (1990) 81

Temporal cross-links
Viscoelastic properties of physically cross-linked networks.
1. Non-linear stationary viscoelasticity (Tanaka) **43** (1992) 247

Tensile stress
Tensile stress contribution of flow-orientated slender particles in non-Newtonian fluids (Goddard) **1** (1976) 1
Measurement of tensile stress at the exit of a printing nip (Patel) **22** (1987) 245

Tensorial order parameter
Generalized constitutive equation for polymeric liquid crystals. 2.

Non-homogeneous systems (Edwards) **36** (1990) 243

Terminal velocity
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105
The effect of a thermal gradient on the motion of a bubble in a viscoelastic fluid (Chan Man Fong) **53** (1994) 165

Texture
A comparison between texture and rheological behaviour of lyotropic liquid crystalline polymers during flow (Vermant) **53** (1994) 1

Thermal gradient
The effect of a thermal gradient on the motion of a bubble in a viscoelastic fluid (Chan Man Fong) **53** (1994) 165

Thermodynamics
The dissipative mechanism in flowing polymers: theory and experiments (Astarita) **1** (1976) 39
A model for viscoelastic fluid behaviour which allows non-affine deformation (Johnson) **2** (1977) 255
The continuum description of conformational entropy effects in viscoelastic flow (Astarita) **3** (1977/1978) 77
A note on entropy effects in polymeric fluids (Christensen) **3** (1977/1978) 197
A note on the functional form of the equations of continuum thermodynamics (Johnson) **3** (1977/1978) 297
Inhomogeneous flows of non-Newtonian fluids: generation of spatial concentration gradients (Metzner) **5** (1979) 449
On the relationship between a dimensional and a thermodynamic peculiarity of the power law constitutive equation (Astarita) **13** (1983) 223
An extended thermodynamic approach to non-Newtonian fluids and related results in
Marangoni instability problem (Lebon) **28** (1988) 61

Thermoplastics
Non-isothermal rheology of polymers and its significance in polymer processing (Pearson) **6** (1979) 81
Flow of thermoplastics in an annular die under orthogonal oscillations (Isayev) **34** (1990) 375

Thermomechanical theory
Three alternative approaches to development of constitutive equations (Astarita) **5** (1979) 125

Thermoviscous theory
A new thermoviscous theory for fluids (Green) **56** (1995) 289

Thin film hydrodynamics
Viscoelastic free surface flows: thin film hydrodynamics of Hele–Shaw and dip coating flows (Ro) **57** (1995) 203
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Third invariant rate of deformation tensor
A phenomenological viscosity model for polymeric fluid (Song) **53** (1994) 151

Thixotropic-plastic-viscoelastic models
A theory of thixotropic plastic viscoelastic fluids with a time-dependent yield surface and its comparison to transient and steady state experiments on small particle filled polymer melts (Suetsugu) **14** (1984) 121

Rheological models of rubber-carbon black compounds: low interaction viscoelastic models and high interaction thixotropic plastic viscoelastic models (Montes) **49** (1993) 277

Thixotropy
Power requirement for the mixing of thixotropic liquids (Edwards) **1** (1976) 309
Thixotropy — A general review (Mewis) **6** (1979) 1
Dissipative materials as models of thixotropy and plasticity (Goddard) **14** (1984) 141
Laminar, unidirectional flow of thixotropic fluid in a circular pipe (Billingham) **47** (1993) 21
Shear thickening and time-dependent phenomena: the case of polyacrylamide solutions (Dupuis) **54** (1994) 11
A thixotropy model for coal-water mixtures (Usui) **60** (1995) 259

Three-dimensional analysis
A novel hybrid numerical technique to model 3-D fountain flow in injection molding processes (Friedrichs) **49** (1993) 141

Time stepping
On a discontinuity capturing technique for Oldroyd-B fluids (Carew) **51** (1994) 231

Time-dependent flow
On the numerical simulation of two-dimensional time-dependent flows of Oldroyd fluids. 1. Basic method and preliminary results (Townsend) **14** (1984) 265
Dynamics of rigid dumbbells in confined geometries. 2. Time-dependent shear flow (Park) **18** (1985) 111
Finite element Eulerian–Lagrangian method for time dependent flow of multimode fluids (Serdakowski) **29** (1988) 217
Numerical instability of time-dependent flows (Keiller) **43** (1992) 229
Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method (Sato) **51** (1994) 249
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Effect of artificial stress diffusivity on the stability of numerical calculations and the flow dynamics of time-dependent viscoelastic flows (Sureshkumar) **60** (1995) 53

Time-strain separability
Viscoelastic properties of physically cross-linked networks. 3. Time-dependent phenomena **43** (1992) 289

Time-temperature superposition
Time-temperature superposition in non-isothermal flow (Wiest) **27** (1988) 127

Toluene
Effect of solvent on polymer degradation in turbulent flow (Moussa) **48** (1993) 261

Torsional flow
Elastico-viscous squeeze films. 3. The torsional balance rheometer (Binding) **1** (1976) 277
The motion of a dumbbell molecule in a torsional flow is unstable at high Weissenberg number (Phan-Thien) **18** (1985) 1

Transfer coating
Classification and analyses of coating flows (Benkreira) **54** (1994) 437

Transient flows
Non-Newtonian fluid displacement in an irregular annulus of axial symmetry (Graves) **8** (1981) 43
The use of large transient deformations to evaluate rheological models for molten polymers (Tsang) **9** (1981) 203
A variational approach to non-steady non-Newtonian flow in a circular pipe (Gorla) **16** (1984) 251
Constitutive equations for polymer fluids based on the concept of configuration-dependent molecular mobility: a generalized mean-configuration model (Giesekus) **17** (1985) 349
Theoretical simulation of transient viscoelastic flows in a viscoelastic system (Randria) **18** (1985) 199
Rheological properties of some polyolefine melts in transient uniaxial elongational flow, described with a special type of constitutive equation (Leblans) **19** (1985) 185
The spatial development of transient Couette flow and shear wave propagation in polymeric liquids by flow birefringence (Lee) **26** (1987) 57
Chain scission in transient extensional flow kinetics and molecular weight dependence (Nguyen) **30** (1988) 125
Development of the velocity field in transient shear flows of viscoelastic fluids (Burdette) **32** (1989) 269
Flow birefringence studies in transient flows of a two roll mill for the test-fluid M1 (Geffroy) **35** (1990) 361
Finite element calculation of time-dependent two-dimensional viscoelastic flow with the explicitly elliptic momentum equation formulation (Northey) **36** (1990) 109
Shear wave propagation after stepwise increase of shear rate (Lee) **39** (1991) 1
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289
Computer modelling of transient thermal flows of non-Newtonian fluids (Ding) **47** (1993) 239
Simulation of transient viscoelastic flow with second order time integration (Rasmussen) **56** (1995) 65

Transient networks
Derivation of the Marrucci model from transient network theory (Jongschaap) **8** (1981) 183
Constitutive equations based on the transient network concept (Mewis) **12** (1983) 69
Viscoelastic properties of physically cross-linked networks.
1. Non-linear stationary viscoelasticity (Tanaka) **43** (1992) 247
Viscoelastic Properties of physically cross-linked networks.
2. Dynamic mechanical moduli (Tanaka) **43** (1992) 273
Viscoelastic properties of physically cross-linked networks.
3. Time-dependent phenomena (Tanaka) **43** (1992) 289

Transient rheological behaviour
On stretching Maxwell models (Petrie) **2** (1977) 221
The measurement of rapidly changing shear stresses during transient experiments using cone-and-plate rheometry (Attane) **6** (1980) 269
Relaxational phenomena and anisotropy in lyotropic polymeric liquid crystals (Moldenaers) **34** (1990) 359

Transient stresses
Elastico-viscous squeeze films. 2. Superimposed rotation (Binding) **1** (1976) 259
The prediction of time-dependent non-linear stresses in viscoelastic materials. 1. Selection of constitutive equation and strain measure (Phillips) **2** (1977) 109
The prediction of time-dependent non-linear stresses in viscoelastic materials. 2. Prediction of shear and uniaxial elongation behaviour (Phillips) **2** (1977) 123
The prediction of time-dependent non-linear stresses in viscoelastic materials. 3. Memory-function non-linearity (Phillips) **2** (1977) 139
A non-linear viscoelastic model with structure-dependent relaxation times. 2. Comparison with l.d. polyethylene transient stress results (Acierno) **1** (1976) 147
Shear flow of nematic polymers. 2. Stationary regimes and start-up dynamics (Farhoudi) **49** (1993) 175

Transition
Orientational transition in radial flow of a nematic liquid (Rey) **40** (1991) 177
Independent confirmation that delayed die swell is a hyperbolic transition (Joseph) **48** (1993) 225
Stationary bifurcations and tricriticality in a creeping nematic polymer flow (Han) **50** (1993) 1

Transport
Settling and transport of spherical particles in power-law fluids at finite reynolds number (Graham) **54** (1994) 465
On suspension transport in a fracture: framework for a global model (Pearson) **54** (1994) 503

Transverse flow
Elastic instability in crossflow of polymer solutions through periodic arrays of cylinders (Chmielewski) **48** (1993) 285

Transverse viscosity gradient
Compressive flow between parallel disks. 1. Newtonian fluid with a transverse viscosity gradient (Lee) **10** (1982) 3

Trouton ratio
An experimental verification of flow-induced anisotropy of concentrated suspensions (Astarita) **34** (1990) 25
A phenomenological viscosity model for polymeric fluid (Song) **53** (1994) 151

Tubes
An experimental study of nonrheometic flows of viscoelastic fluids. 1. Flow into a re-entrant tube (Busby) **1** (1976) 71
On a thermorheological second-order effect in cylindrical tubes (Bohme) **5** (1979) 191
Unsteady flow of an inelastic power-law fluid in a circular tube (Balmer) **7** (1980) 189
Heat transfer to flowing polymer melts (Hulatt) **7** (1980) 345
Flow of an Oldroyd-type fluid through a sinusoidally corrugated tube (Phan-Thien) **24** (1987) 203
Calculations of steady-state viscoelastic flow in an undulating tube (Pilitsis) **31** (1989) 231
Calculations of viscoelastic flow through an axisymmetric corrugated tube using the explicitly elliptic momentum

equation formulation (EEME) (Burdette) **33** (1989) 1
Pulsating flow of viscoelastic fluids in tubes (Khabakhpasheva) **33** (1989) 289
Flow of test fluid M1 in corrugated tubes (James) **35** (1990) 405
Finite element methods for calculation of steady, viscoelastic flow using constitutive equations with a Newtonian viscosity (Rajagopalan) **36** (1990) 159
Viscoelastic flow in an undulating tube. 2. Effects of high elasticity, large amplitude of undulation and inertia (Pilitsis) **39** (1991) 375
The consistent streamline-upwind/Petrov–Galerkin method for viscoelastic flow revisited (Crochet) **42** (1992) 283
The stagnation flow behind a sphere (Bush) **49** (1993) 103
A note on selection of spaces in computation of viscoelastic flows using the *hp*-finite element method (Talwar) **52** (1994) 293
Peristaltic flow of a second-order fluid in tubes (Siddiqui) **53** (1994) 257

Tube renewal
Ideas about reptation, tube renewal and tube relaxation applied to the description of the non-linear viscoelastic behaviour in shear of some polydisperse polyethylene melts (Booij) **23** (1987) 189
Reptation and tube renewal: experimental and numerical simulation (Marin) **23** (1987) 215

Tumbling nematic
Non-isothermal Poiseuille flow of a liquid crystalline material. 2. Tumbling nematic (Potze) **59** (1995) 173

Turbulence
A note on the analogous behaviour of turbulent jets of dilute polymer solutions and fibre suspensions (Filipsson) **3** (1977/1978) 97
The turbulent flow of non-Newtonian fluids in the absence of anomalous wall effects (Edwards) **7** (1980) 77
The use of eddy viscosity expressions for predicting velocity profiles in Newtonian, non-Newtonian and drag-reducing turbulent pipe flow (Edwards) **7** (1980) 153
Drag reduction in exceptionally dilute polymer solutions (Oliver) **12** (1983) 113
Simple and explicit equations for the friction factor in turbulent fibre suspension flow (Mansour) **17** (1985) 245
Turbulent jets of dilute polymer solutions (Koziol) **32** (1989) 311
Turbulence characteristics of impinging jets near the deflecting surface, the effect of polymer additives (Glowacki) **33** (1989) 25
Heat transfer, drag reduction, and fluid characterization for turbulent flow of polymer solutions: recent results and research needs (Matthys) **38** (1991) 313
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe (Pak) **39** (1991) 353
Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behaviour (Choi) **41** (1992) 289
Effect of solvent on polymer degradation in turbulent flow (Moussa) **48** (1993) 261
The structure of turbulence in a dilute polymer solution (Van Dam) **53** (1994) 215

Turbulent pipe flow characteristics of low molecular weight polymer solutions (Pereira) **55** (1994) 321
On the mechanism of drag reduction (Renardy) **59** (1995) 93

Twin-screw extruders
A non-Newtonian model of flow in a kneading disk region of a modular intermeshing corotating twin screw extruder (Szydlowski) **28** (1988) 29
Non-Newtonian flow modelling in the screw regions of an intermeshing corotating twin screw extruder (Wang) **32** (1989) 19
A non-Newtonian model of flow in forward and backward pumping screw regions of a modular tangential counter-rotating twin-screw extruder (Kim) **37** (1990) 37

Two phase flow
Interfacial stability and deformation of two stratified power law fluids in plane Poiseuille flow. 2. Interface deformation (Khomami) **37** (1990) 19

Two-dimensional flows
Use of boundary-fitted curvilinear coordinates for the numerical simulation of complex viscoelastic flows (Papathanasiou) **37** (1990) 139
One modification of the Ericksen–Leslie equations in a two-dimensional motion (Ryskin) **39** (1991) 207
Comparison of computational efficiency of flow simulations with multimode constitutive equations: integral and differential models (Rajagopalan) **46** (1993) 243

Two-fluid theory
Falling spheres in polymeric solutions. Limiting results of the two-fluid theory of migration (Ianniruberto) **54** (1994) 231

Two-layer flow
Stability of the interface in two-layer Couette flow of upper convected Maxwell liquids (Renardy) **28** (1988) 99
Weakly nonlinear behaviour of periodic disturbances in two-layer plane channel flow of upper-convected Maxwell liquids (Renardy) **56** (1995) 101

Two-roll mill
Experimental and theoretical aspects of the two-roll mill problem (Broadbent) **3** (1978) 359
On the two-roll mill problem (Townsend) **20** (1986) 293
Flow modification in the two-roll mill (White) **33** (1989) 325
Flow birefringence studies in transient flows of a two roll mill for the test-fluid M1 (Geffroy) **35** (1990) 361

U

Undeformed region
Creeping sphere motion in Herschel–Bulkley fluids: flow field and drag (Atapattu) **59** (1995) 245

Uniaxial elongation (extension)
The prediction of time-dependent non-linear stresses in viscoelastic materials. 2.
Prediction of shear and uniaxial elongation behaviour (Phillips) **2** (1977) 123
The flow of polymer thickened motor oils in convergent jet thrust nozzles (Oliver) **2** (1977) 367

On stretching Maxwell models (Petrie) **2** (1977) 221
Extensional rheometers for molten polymers; a review (Dealy) **4** (1978) 9
A constitutive analysis of uniaxial elongational flow data of a low-density polyethylene melt (Wagner) **4** (1978) 39
The flow of polymer-thickened oils in convergent jet-thrust nozzles at a temperature of 84°C (Oliver) **4** (1979) 345
Stress growth for a generalized rubberlike liquid (Petrie) **11** (1982) 295
High-rate start-up behaviour of unvulcanized rubber compounds (Hull) **12** (1983) 175
Rheological properties of some polyolefine melts in transient uniaxial elongational flow, described with a special type of constitutive equation (Leblans) **19** (1985) 185
A comparative experimental study of the isothermal shear and uniaxial elongational rheological properties of low-density, high-density and linear low-density polyethylenes (Minoshima) **19** (1986) 251
Some asymptotic results for planar extension (Petrie) **34** (1990) 37
Uniaxial and biaxial unsteady inflations of a viscoelastic material (Khayat) **43** (1992) 31

Uniaxial flow
Opposing-jet viscometry of fluids with viscosity approaching that of water (Hermansky) **56** (1995) 1

Unidirectional flow
Laminar, unidirectional flow of thixotropic fluid in a circular pipe (Billingham) **47** (1993) 21

Uniform stream
Flow along the centerline behind a sphere in a uniform stream (Phan-Thien) **41** (1991) 151

Unimodular transformations
On unimodular constitutive expressions (Fahy) **7** (1980) 33

Universal rheometer
Determination of polymer melt viscosity by squeezing flow with constant plate velocity (Winther) **39** (1991) 119

Unstable flow
Anomalous flow patterns in viscoelastic entry flow through a planar contraction (Chiba) **36** (1990) 193
The structure of anomalous entry flow patterns through a planar contraction (Chiba) **42** (1992) 315

Unsteady flow
The study of time-dependent pipe flows of inelastic non-Newtonian fluids using a multiviscous approximation (Ly) **1** (1976) 287
Unsteady flow of an inelastic power-law fluid in a circular tube (Balmer) **7** (1980) 189
Comments on "Unsteady flow of an inelastic power-law fluid in a circular tube", by R.T. Balmer and M.A. Fiorina (Choplin) **10** (1982) 373
Unsteady flow of an inelastic power-law fluid in a circular tube. Authors' reply to comments by L. Choplin and M. Dupuis (Balmer) **10** (1982) 377
Unsteady shear flow of nonlinear viscoelastic fluids with finite elements (Bohme) **23** (1987) 321

A purely hyperbolic model for unsteady viscoelastic flow (Phelan) **32** (1989) 197
Unsteady flow of power-law fluids through circular pipes (Warsi) **55** (1994) 197
Unsteady flow of semi-concentrated suspensions using finite deformation tensors (Ahmed) **55** (1994) 115
Unsteady axial viscoelastic pipe flows (Rahaman) **57** (1995) 27

Unsteady inflations
Uniaxial and biaxial unsteady inflations of a viscoelastic material (Khayat) **43** (1992) 31

Upper convected Maxwell fluid
Die swell of a Maxwell fluid: numerical predictions (Crochet) **7** (1980) 199
Multiple solutions in the calculation of axisymmetric contraction flow of an upper convected Maxwell fluid (Yeh) **16** (1984) 173
False bifurcations and instability of a Maxwell fluid in fully developed flow (Josse) **20** (1986) 257
Linear stability of plane Couette flow of an upper convected Maxwell fluid (Renardy) **22** (1986) 23
Injection and suction of an upper convected Maxwell fluid through a porous-walled tube (Menon) **27** (1988) 265
Stability of the interface in two-layer Couette flow of upper convected Maxwell liquids (Renardy) **28** (1988) 99
Analytic results for viscoelastic flow in a porous tube (Larson) **28** (1988) 349
A viscous line vortex in an imposed axisymmetric straining flow of an upper convected Maxwell fluid (Lagnado) **34** (1990) 247
Steady flow of a White–Metzner fluid in a 2-D abrupt contraction: computation and experiments (Maders) **45** (1992) 63
Elastic free energy of an upper convected Maxwell fluid undergoing a fully developed planar Poiseuille flow: a variational result (Ghisellini) **46** (1993) 229
The stress of an upper convected Maxwell fluid in a Newtonian velocity field near a reentrant corner (Renardy) **50** (1993) 127
How to integrate the upper convected Maxwell (UCM) stresses near a singularity (and maybe elsewhere, too) (Renardy) **52** (1994) 91
Start-up flow of an upper convected Maxwell fluid over a rotating disk (Borkar) **55** (1994) 163
A matched solution for corner flow of the upper convected Maxwell fluid (Renardy) **58** (1995) 83

Upper convected Maxwell model
The existence of solutions for a stretching jet (Waters) **4** (1978) 161
Long range memory effects in flows involving abrupt changes in geometry. 4. Numerical simulation using integral rheological models (Court) **8** (1981) 95
On the classification of some model equations for viscoelasticity (Luskin) **16** (1984) 3
Flow singularity and slip velocity in plane extrudate swell computations (Wesson) **26** (1988) 277
Time-dependent fibre spinning equations. 1. Analysis of the mathematical behaviour (Beris) **26** (1988) 341
Time-dependent fibre spinning equations. 2. Analysis of the stability of

numerical approximations (Liu) **26** (1988) 363
Impact of the constitutive equation and singularity on the calculation of stick–slip flow: the modified upper-convected Maxwell model (MUCM) (Apelian) **27** (1988) 299
Finite element calculation of time-dependent two-dimensional viscoelastic flow with the explicitly elliptic momentum equation formulation (Northey) **36** (1990) 109
Calculation of steady viscoelastic flow using a multimode Maxwell model: application of the explicitly elliptic momentum equation (EEME) formulation (Rajagopalan) **36** (1990) 135
Finite-amplitude time-periodic states in viscoelastic Taylor–Couette flow described by the UCM model (Northey) **42** (1992) 117
Finite element analysis of steady viscoelastic flow around a sphere in a tube: calculations with constant viscosity models (Lunsmann) **48** (1993) 63
Some properties of the upper convected Maxwell model for viscoelastic fluid flow (Olsson) **48** (1993) 125
A solver for time dependent viscoelastic fluid flows (Olsson) **51** (1994) 309
A note on selection of spaces in computation of viscoelastic flows using the *hp*-finite element method (Talwar) **52** (1994) 293
A finite volume approach for calculation of viscoelastic flow through an abrupt axisymmetric contraction (Sasmal) **56** (1995) 15

Uzawa algorithm
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283

V

Vane rheometer
On the shearing zone around rotating vanes in plastic liquids: theory and experiment (Keentok) **17** (1985) 23
The use of the vane to measure the shear modulus of linear elastic solids (Sherwood) **41** (1991) 101

Variational inequalities
On the determination of the plug flow region in Bingham fluids through the application of variational inequalities (Huilgol) **58** (1995) 207

Velocity field
A low cost laser-speckle photographic technique for velocity measurement in slow flows (Binnington) **12** (1983) 255
Velocity fields around spheres and bubbles investigated by laser-Doppler anemometry (Bisgaard) **12** (1983) 283
Experiments on elongational flow of dilute polymer solutions. 2. Velocity field for the flow through small apertures (Hasegawa) **15** (1984) 279
Laser-Doppler velocimetry measurements of velocity fields and transitions in viscoelastic fluids (Lawler) **20** (1986) 51
Development of the velocity field in transient shear flows of viscoelastic fluids (Burdette) **32** (1989) 269
The stress of an upper convected Maxwell fluid in a Newtonian velocity field near a reentrant corner (Renardy) **50** (1993) 127

Velocity gradient
Direct velocity gradient measurements using a dual-point laser-Doppler anemometer (Brunn) **22** (1987) 381
Some properties of the upper convected Maxwell model for viscoelastic fluid flow (Olsson) **48** (1993) 125

Velocity profiles
Determination of the velocity profile in a non-Newtonian fluid for certain types of steady viscometric flows (Lucius) **1** (1976) 383
The use of eddy viscosity expressions for predicting velocity profiles in Newtonian, non-Newtonian and drag-reducing turbulent pipe flow (Edwards) **7** (1980) 153

Viscoelastic behaviour
An experimental investigation of the flow about a sphere rotating in a Rivlin–Ericksen fluid (Cairncross) **3** (1977/1978) 203
Shear rate dependence of the viscoelasticity of polymer solutions. 1. Theoretical model (Thurston) **9** (1981) 57
Rimming flow of a viscoelastic liquid inside a rotating horizontal cylinder (Sanders) **9** (1981) 269
The mechanism of the viscoelastic behaviour of electrorheological suspensions (Shulman) **33** (1989) 181
A study of some numerical viscoelastic schemes (Tanner) **41** (1991) 171

Viscoelastic flow
The continuum description of conformational entropy effects in viscoelastic flow (Astarita) **3** (1977/1978) 77
Direct numerical solutions of the equations for viscoelastic fluid flow (Perera) **5** (1979) 269
Experimental studies of viscoelastic fluid flow (Tomita) **5** (1979) 497
A numerical solution of Newtonian and viscoelastic flow past stationary and rotating cylinders (Townsend) **6** (1980) 219
Finite element simulation of viscoelastic flow (Viriyayuthakorn) **6** (1980) 245
Local effect of suspended particles in flows of a viscoelastic fluid past convexly curved boundaries (Brunn) **10** (1982) 319
The dependence of viscoelastic flow properties on the structure for styrene-butadiene copolymers (Ramachandran) **13** (1983) 21
Reflections on the numerical viscoelastic flow problem (Josse) **16** (1984) 13
Numerical simulations of viscoelastic flow: the effect of mesh size (Davies) **16** (1984) 117
Finite element calculation of viscoelastic flow in a journal bearing. 1. Small eccentricities (Beris) **16** (1984) 141
Computation of viscoelastic flow in a cylindrical tank with a rotating lid (Nirschl) **16** (1984) 233
On the consequence of discretization errors in the numerical calculation of viscoelastic flow (Dupret) **18** (1985) 173
Theoretical simulation of transient viscoelastic flows in a viscoelastic system (Randria) **18** (1985) 199
Viscoelastic fluid flow past a submerged spheroidal body (Dairenieh) **19** (1985) 81
Two-dimensional viscoelastic flows: experimentation and modelling (Isayev) **19** (1985) 135
Finite element calculation of viscoelastic flow in a journal bearing. 2. Moderate eccentricity (Beris) **19** (1986) 323
Further results on the flow of a viscoelastic fluid through an abrupt contraction (Debbaut) **20** (1986) 173

Hermitian finite elements for calculating viscoelastic flow (Marchal) **20** (1986) 187
The linear stability of numerical solutions of some elementary viscoelastic flows (Van Schaftingen) **20** (1986) 271
A streamline element scheme for solving viscoelastic flow problems. 1. Differential constitutive equations (Luo) **21** (1986) 179
A streamline element scheme for solving viscoelastic flow problems. 2. Integral constitutive models (Luo) **22** (1986) 61
Steady laminar flow of viscoelastic fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **22** (1986) 101
A finite element method for liquid with memory (Papanastasiou) **22** (1987) 271
Non-axisymmetric flow of a viscoelastic fluid between rotating disks (Huilgol) **23** (1987) 423
Implications of boundary singularities in complex geometries (Lipscomb) **24** (1987) 85
Numerical simulation of viscoelastic flow through a sudden contraction using a type dependent difference method (Song) **24** (1987) 221
A new mixed finite element for calculating viscoelastic flow (Marchal) **26** (1987) 77
A note on the flow of a viscoelastic fluid between eccentric disks (Kaloni) **26** (1987) 125
Analytic results for viscoelastic flow in a porous tube (Larson) **28** (1988) 349
Numerical simulation of highly viscoelastic flows through an abrupt contraction (Debbaut) **29** (1988) 119
A decoupled finite element streamline-upwind scheme for viscoelastic flow problems (Luo) **31** (1989) 143
An analysis of the Bird–DeAguiar model for polymer melts (Calderer) **31** (1989) 209
Calculations of steady-state viscoelastic flow in an undulating tube (Pilitsis) **31** (1989) 231
LDV measurements of viscoelastic flow transitions in abrupt axisymmetric contractions — interaction of inertia and elasticity (Raiford) **32** (1989) 39
A new approach for the FEM simulation of viscoelastic flows (Fortin) **32** (1989) 295
Calculations of viscoelastic flow through an axisymmetric corrugated tube using the explicitly elliptic momentum equation formulation (EEME) (Burdette) **33** (1989) 1
On the flow past a sphere in a cylindrical tube: limiting Weissenberg number (Zheng) **36** (1990) 27
Calculation of steady viscoelastic flow using a multimode Maxwell model: application of the explicitly elliptic momentum equation (EEME) formulation (Rajagopalan) **36** (1990) 135
A finite element procedure coupled with the method of characteristics for simulation of viscoelastic fluid flow (El Hadj) **36** (1990) 333
Use of boundary-fitted curvilinear coordinates for the numerical simulation of complex viscoelastic flows (Papathanasiou) **37** (1990) 139
Numerical prediction of anomalous transport properties in viscoelastic flow (Delvaux) **37** (1990) 297
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
Examples of supercritical, linearized, viscoelastic flow past a plate (Fraenkel) **38** (1991) 137
Adaptive refinement of a viscoelastic flow problem with the explicitly elliptic

momentum equation (Rao) **38** (1991) 223
Numerical integration of differential viscoelastic models (Rosenberg) **39** (1991) 269
Steady Poiseuille flows for a Giesekus fluid (Schleiniger) **40** (1991) 79
Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation (Coates) **42** (1992) 141
The consistent streamline-upwind/Petrov–Galerkin method for viscoelastic flow revisited (Crochet) **42** (1992) 283
Viscoelastic flow simulation using cubic stress finite elements (Rao) **43** (1992) 61
Computing viscoelastic fluid flow problems at low cost (Fortin) **45** (1992) 209
Simulation of viscoelastic flows using a conformation tensor model (Guénette) **45** (1992) 187
Calculation of viscoelastic flow using molecular models: The CONNFFESSIT approach (Laso) **47** (1993) 1
Finite element analysis of steady viscoelastic flow around a sphere in a tube: calculations with constant viscosity models (Lunsmann) **48** (1993) 63
Some properties of the upper convected Maxwell model for viscoelastic fluid flow (Olsson) **48** (1993) 125
On the development of secondary motion induced by the free surface in the rod climbing flow (Debbaut) **48** (1993) 357
A Taylor-Petrov-Galerkin algorithm for viscoelastic flow (Carew) **50** (1993) 253
Birefringence and laser-Doppler velocimetry (LDV) studies of viscoelastic flow through a planar contraction (Quinzani) **52** (1994) 1
Application of low-order discontinuous Galerkin methods to the analysis of viscoelastic flows (Baaijens) **52** (1994) 37
A note on selection of spaces in computation of viscoelastic flows using the *hp*-finite element method (Talwar) **52** (1994) 293
The time-dependent flow of a viscoelastic fluid around a sphere (Bodart) **54** (1994) 303
Computation of steady flow past a sphere in a tube using a PTT integral model (Sun) **54** (1994) 379
A pseudo-transient finite element method for the resolution of viscoelastic fluid flow problems by the method of characteristics (Kabanemi) **55** (1994) 283
A finite volume approach for calculation of viscoelastic flow through an abrupt axisymmetric contraction (Sasmal) **56** (1995) 15
Simulation of transient viscoelastic flow with second order time integration (Rasmussen) **56** (1995) 65
Linear stability analysis of viscoelastic Poiseuille flow using an Arnoldi- based orthogonalization algorithm (Sureshkumar) **56** (1995) 151
Flow of viscoelastic fluids past periodic square arrays of cylinders: inertial and shear thinning viscosity and elasticity effects (Talwar) **57** (1995) 177
High-order finite element methods for steady viscoelastic flows (Yurun) **57** (1995) 283
An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a converging/diverging channel geometry (Khomami) **58** (1995) 47
Higher order finite element techniques for viscoelastic flow problems with change of type and singularities (Talwar) **59** (1995) 49
A new mixed finite element method for viscoelastic flows governed by

differential constitutive equations (Szady) **59** (1995) 215
A new mixed finite element method for computing viscoelastic flows (Guénette) **60** (1995) 27
A split Lagrangian–Euler method for simulating transient viscoelastic flows (Harlen) **60** (1995) 81
Effect of die geometry and flow characteristics on viscoelastic annular swell (Garcia-Rejon) **60** (1995) 107
Efficient simulation of nonlinear viscoelastic fluid flows **60** (1995) 199

Viscoelastic fluid layer
Convection and overstability in a viscoelastic fluid layer (Stastna) **18** (1985) 61
Capillary instability due to shear stress on the free surface of a viscoelastic fluid layer (Dávalos-Orozco) **45** (1992) 171

Viscoelastic fluids
Non-Newtonian flow caused by an infinite rotating disc (Williams) **1** (1976) 51
An experimental study of nonrheometic flows of viscoelastic fluids. 2. Flow in a liquid jet exiting from a vertical tube (Goulden) **1** (1976) 183
Radial flow of viscoelastic liquids. 1. Theoretical (Lee) **1** (1976) 323
Radial flow of viscoelastic liquids. 2. Experimental (Lee) **1** (1976) 343
Interactions between two spheres falling along their line of centres in a viscoelastic fluid (Riddle) **2** (1977) 23
Elastico-viscous flow around a circular cylinder executing small amplitude, high frequency oscillations (James) **2** (1977) 99
Memory-function determination of viscoelastic fluids based on relaxation tests (normal and shear stresses) (Attane) **3** (1977/1978) 1
Flow reversal of an elastico-viscous liquid between a stationary and torsionally oscillating disc (Waters) **3** (1977/1978) 13
Entry flow behaviour of viscoelastic fluids in an annulus (Tan) **3** (1977/1978) 25
Determination of rheological constants of an elastico-viscous fluid by kinematical analysis of oscillatory motions (Sigli) **3** (1977/1978) 221
Some results in the theory of melt spinning for model viscoelastic liquids (Petrie) **4** (1978) 137
On pulsating flow of polymeric fluids (Phan-Thien) **4** (1978) 167
Numerical solution for the flow of viscoelastic fluids (Crochet) **5** (1979) 201
On finite amplitude shear waves in viscoelastic fluids (Zahorski) **5** (1979) 315
An experimental study of isothermal spinning of a Newtonian and viscoelastic liquid (Chang) **5** (1979) 369
Theoretical and experimental study of a viscoelastic fluid in the converging region of a pipe (Clermont) **5** (1979) 387
Complex flow of viscoelastic fluids through oscillating pipes. Interesting effects and applications (Mena) **5** (1979) 427
A note on rods falling near a vertical wall in a viscoelastic liquid (Tiefenbruck) **6** (1980) 201
The flow of an elastico-viscous liquid in an axisymmetric pipe of slowly varying cross-section (Williams) **7** (1980) 171
A note on the slow motion of a bubble in a viscoelastic liquid (Tiefenbruck) **7** (1980) 257
The motion of rigid particles in viscoelastic fluids (Brunn) **7** (1980) 271

An experimental test of equations predicting the load bearing capacity of squeeze films of elastico-viscous liquid (Oliver) **7** (1980) 369
An exact solution for the slow flow of a general linear viscoelastic fluid through a slit (Hull) **8** (1981) 327
Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem (Huilgol) **8** (1981) 337
Fast squeezing flow of viscoelastic fluids (Mochimaru) **9** (1981) 157
Comparison of the responses of viscoelastic fluids to a new rheometrical test (Sigli) **9** (1981) 191
On the slow flow of viscoelastic liquids past a circular cylinder (Manero) **9** (1981) 379
Calculation of hole pressure. 2. Viscoelastic fluids (Jackson) **10** (1982) 71
A numerical study of the motion of a viscoelastic fluid past rigid spheres and spherical bubbles (Tiefenbruck) **10** (1982) 115
The stability of some numerical schemes for model viscoelastic fluids (Tanner) **10** (1982) 169
Normal and reverse squeezing flows (Avila) **11** (1982) 111
Linear stability of flow of viscoelastic fluid between eccentric rotating cylinders (Zhang) **11** (1982) 201
Unsteady-state development of plane Couette flow for viscoelastic fluids (Mochimaru) **12** (1983) 135
Model viscoelastic liquids (Prilutski) **12** (1983) 233
Correction and extensions to "Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem", J. Non-Newtonian Fluid Mech., 8 (1981) 337–347 (Huilgol) **12** (1983) 249
Perturbation theory for viscoelastic fluids between eccentric rotating cylinders (Beris) **13** (1983) 109
Rivulet flow of a viscoelastic liquid (Rosenblat) **13** (1983) 259
On the converging flow of viscoelastic fluids through cones and wedges (Hull) **14** (1984) 219
Dynamics of nonspherical bubbles surrounded by viscoelastic fluid (Hara) **14** (1984) 249
Numerical simulation of the flow of a viscoelastic fluid through an abrupt contraction (Keunings) **14** (1984) 279
Theory of dilute polymer solutions in viscoelastic fluid with a single relaxation time (Volkov) **15** (1984) 29
The evolution of small rotational perturbations to a uniform rotation of a viscoelastic fluid contained between parallel plates (Kazakia) **15** (1984) 45
A short comment on the "Rivulet flow of a viscoelastic liquid" by S. Rosenblat (Giesekus) **15** (1984) 383
Bubble growth and collapse in viscoelastic liquids analyzed (Papanastasiou) **16** (1984) 53
Squeezing a viscoelastic liquid from a wedge: an exact solution (Phan-Thien) **16** (1984) 329
Anomalous heat transfer and drag in laminar flow of viscoelastic fluids (Ruckenstein) **17** (1985) 145
Finite element simulation of viscoelastic fluids of the integral type (Dupont) **17** (1985) 157
The propagation of vorticity in a viscoelastic fluid (Rivlin) **17** (1985) 313
Flow of viscoelastic fluids between rotating disks. 1. (Huilgol) **18** (1985) 101
Instability of plane Couette flow of viscoelastic liquids (Akbay) **18** (1985) 123

Separating forces in blade coating of viscous and viscoelastic liquids (Hsu) **18** (1985) 273
Kinematics and normal stress differences of a viscoelastic fluid undergoing wiggle flow (Arikol) **19** (1985) 209
Laser-Doppler velocimetry measurements of velocity fields and transitions in viscoelastic fluids (Lawler) **20** (1986) 51
Loss of evolution in the flow of viscoelastic fluids (Dupret) **20** (1986) 143
Optimal control techniques for computing stationary flows of viscoelastic fluids (Le Tallec) **20** (1986) 241
The drag on spheres in viscoelastic fluids with significant wall effects (Sugeng) **20** (1986) 281
Film thickness in blade coating of viscous and viscoelastic liquids (Sullivan) **21** (1986) 13
Thermal convection in a viscoelastic liquid (Rosenblat) **21** (1986) 201
Stability of arbitrary plane shear flows of viscoelastic fluids with fading memory (Dunwoody) **21** (1986) 235
Start-up of an elastico-viscous liquid draining from a vertical surface (Waters) **22** (1987) 325
Unsteady shear flow of nonlinear viscoelastic fluids with finite elements (Bohme) **23** (1987) 321
Hyperbolicity and change of type in the flow of viscoelastic fluids through pipes (Ahrens) **24** (1987) 67
The squeeze-film flow of a viscoelastic fluid (Phan-Thien) **24** (1987) 97
On a class of constitutive equations for viscoelastic liquids (Leonov) **25** (1987) 1
Stokes' first problem for viscoelastic fluids (Preziosi) **25** (1987) 239
The generation of a draining liquid film by the vertical withdrawal of a flat plate from an elastico-viscous liquid (Waters) **26** (1987) 161
Fourier transform mechanical spectroscopy of viscoelastic materials with transient structure (Holly) **27** (1988) 17
On the Rayleigh problem for a viscoelastic fluid (Phan-Thien) **28** (1988) 117
Squeeze-film flow of a viscoelastic fluid: a lubrication model (Phan-Thien) **28** (1988) 129
Draw resonance in film casting of viscoelastic fluids: a linear stability analysis (Anturkar) **28** (1988) 287
Recent advances in the mathematical theory of steady flow of viscoelastic fluids (Renardy) **29** (1988) 11
Numerical simulation of the non-isothermal flow of a nonlinear viscoelastic fluid in a rectangular channel (Nikoleris) **31** (1989) 193
Similarity solutions that give rise to hyperbolicity and change of type in steady flow of a viscoelastic fluid (Verdier) **31** (1989) 301
Stratified flows of Newtonian and viscoelastic fluids (Dheur) **32** (1989) 1
Stability of shear flows of viscoelastic fluids under perturbations perpendicular to the plane of flow (Renardy) **32** (1989) 145
Development of the velocity field in transient shear flows of viscoelastic fluids (Burdette) **32** (1989) 269
On the slider-bearing flow of a viscoelastic fluid (Phan-Thien) **33** (1989) 197
The hydrodynamics of a bent cylinder in a viscoelastic fluid (Kim) **33** (1989) 219
On an invariance property of the solution to Stokes' first problem for viscoelastic fluids (Preziosi) **33** (1989) 225

Inertial and elastic effects in circular-shear (ERD) flow of viscoelastic fluids (Zhang) **33** (1989) 233
Pulsating flow of viscoelastic fluids in tubes (Khabakhpasheva) **33** (1989) 289
Steady shear viscosity measurements of viscoelastic fluids with the falling needle viscometer (Park) **34** (1990) 351
Flow of test fluid M1 in corrugated tubes (James) **35** (1990) 405
A converging channel rheometer for the measurement of extensional viscosity (James) **35** (1990) 421
Measurement of the extensional viscosity of M1 in a converging channel rheometer (James) **35** (1990) 445
Dissipative behaviour of viscoelastic fluids derived from rheological constitutive equations (Braun) **38** (1990) 81
Simulation of highly elastic fluid flows without additional numerical diffusivity (Basombrío) **39** (1991) 189
Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe (Pak) **39** (1991) 353
Finite amplitude oscillations of viscoelastic fluids (Vrentas) **40** (1991) 1
Interfacial instability due to elastic stratification in concentric coextrusion of two viscoelastic fluids (Chen) **40** (1991) 155
Elastic instability of the interface in Couette flow of viscoelastic liquids (Chen) **40** (1991) 261
The inlet layer in the flow of viscoelastic fluids (Cook) **40** (1991) 307
Stability of coextrusion through converging dies (Anturkar) **41** (1991) 1
Degradation effects of dilute polymer solutions on turbulent friction and heat transfer behaviour (Choi) **41** (1992) 289
An improved GMRES method for solving viscoelastic fluid flow problems (Fortin) **42** (1992) 1
Analysis of simple constitutive equations for viscoelastic liquids (Leonov) **42** (1992) 323
On the numerical simulation of axisymmetric swirling flows of differential viscoelastic liquids: The rod climbing and the Quelleffekt (Debbaut) **43** (1992) 103
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105
Numerical modelling of viscoelastic liquids using a finite-volume method (Darwish) **45** (1992) 311
Simulation of transient viscoelastic flow (Rasmussen) **46** (1993) 289
Experimental studies of the onset of oscillatory instability in viscoelastic Taylor–Couette flow (Müller) **46** (1993) 315
Flow in the misaligned cone-and-plane rheometer (Dudgeon) **48** (1993) 21
The stagnation flow behind a sphere (Bush) **49** (1993) 103
The three-dimensional instability of elliptical vortices in a viscoelastic fluid (Lagnado) **50** (1993) 29
Asymptotic analysis of the finite cone-and-plate flow of a non-Newtonian fluid (Olagunju) **50** (1993) 289
Anomalous rolling of spheres down an inclined plane (Liu) **50** (1993) 305
Numerical simulation of non-isothermal extrudate swell at high extrudate rates (Chang) **51** (1994) 1
Enhancement of the drainage of non-Newtonian liquid films by oscillation (Goshawk) **51** (1994) 21
On the elastic free energy of a linear viscoelastic fluid undergoing a fully developed viscometric flow (Doghieri) **51** (1994) 239

Application of spectral elements to viscoelastic creeping flows (Van Kemenade) **51** (1994) 277
Flow in the misaligned cone-and-plate rheometer (vol 48, pg 21, 1993) (Dudgeon) **52** (1994) 99
The effect of a thermal gradient on the motion of a bubble in a viscoelastic fluid (Chan Man Fong) **53** (1994) 165
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
The effect of oscillation on the drainage of an elastico-viscous liquid (Goshawk) **54** (1994) 449
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217
The negative wake in a second-order fluid (Joseph) **57** (1995) 313
Modelling and computation of the onset of failure in polymeric liquid filaments (Wang) **58** (1995) 97
Non-linear overstability in the thermal convection of viscoelastic fluids (Khayat) **58** (1995) 331
Numerical study of secondary flows of viscoelastic fluid in a straight pipes by an implicit finite volume method (Xue) **59** (1995) 191
Nonlinear hydrodynamic stability of viscoelastic fluids heated from below (Park) **60** (1995) 1
Wall effects on the flow of viscoelastic fluids around a circular cylinder (Huang) **60** (1995) 179
Efficient simulation of nonlinear viscoelastic fluid flows (Saramito) **60** (1995) 199
The sedimentation of a sphere through an elastic fluid. Part 1. Steady motion (Arigo) **60** (1995) 225

Viscoelastic material
The prediction of time-dependent non-linear stresses in viscoelastic materials. 1.
Selection of constitutive equation and strain measure (Phillips) **2** (1977) 109
The prediction of time-dependent non-linear stresses in viscoelastic materials. 2.
Prediction of shear and uniaxial elongation behaviour (Phillips) **2** (1977) 123
The prediction of time-dependent non-linear stresses in viscoelastic materials. 3.
Memory-function non-linearity (Phillips) **2** (1977) 139
Perturbation of states of rest and rigid motion of simple fluids and solids (Joseph) **5** (1979) 13
Compressive flow between parallel disks. 2. Oscillatory behaviour of viscoelastic materials under a constant load (Lee) **14** (1984) 301
Investigation of a new complex viscosity model (De Kee) **26** (1987) 149
Fourier-transform mechanical spectroscopy of viscoelastic materials with transient structure (Holly) **27** (1988) 17
Uniaxial and biaxial unsteady inflations of a viscoelastic material (Khayat) **43** (1992) 31
Filtration in viscoelastic continua (Kozicki) **53** (1994) 129

Viscoelastic matrix
Modelling the rheological behaviour of fibre suspensions in viscoelastic media (Ait-Kadi) **53** (1994) 65

Viscoelasticity
The maximum amplitude of strain for the validity of linear viscoelasticity (Astarita) **3** (1977/1978) 281

The turbulent flow of non-Newtonian fluids in the absence of anomalous wall effects (Edwards) **7** (1980) 77
The interaction of yield stress and viscoelasticity on the Weissenberg effect (Elson) **11** (1982) 1
Spinnability and viscoelasticity (Larson) **12** (1983) 303
On the classification of some model equations for viscoelasticity (Luskin) **16** (1984) 3
Relaxational interactions and viscoelasticity of polymer melts. 1. Model development (Volkov) **18** (1985) 163
Basic principle in the viscoelasticity of polymeric liquids (Doi) **23** (1987) 151
Unified molecular theories of linear and non-linear viscoelasticity of flexible linear polymers: explaining the 3.4 power law of the zero-shear viscosity and the slip-stick melt fracture phenomenon (Lin) **23** (1987) 163
Relaxational interactions and viscoelasticity of polymer melts. 2. Rheological properties in shear and elongational flows (Volkov) **25** (1987) 261
Non-isothermal radial filling of center-gated disk cavities with viscoelastic polymer melts (Goyal) **28** (1988) 373
Rheological characterization of the fluid M1 and of its components (Laun) **35** (1990) 137
A preconditioned generalized minimal residual algorithm for the numerical solution of viscoelastic fluid flows (Fortin) **36** (1990) 277
Remarks concerning compressible viscoelastic fluid models (Edwards) **36** (1990) 411
Motion and coalescence of gas bubbles in non-Newtonian polymer solutions (De Kee) **37** (1990) 1
Separation and reattachment of non-Newtonian fluid flows in a sudden expansion pipe (Pak) **37** (1990) 175
Experimental and numerical study of the swelling of a viscoelastic liquid using the stream tube method and a kinematic singularity approximation (Andre) **38** (1990) 1
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows (Bulters) **38** (1990) 43
On viscoelastic effects in swirling flows (Bowen) **38** (1991) 113
Non-linear computational instability, damping and filtering in viscoelastic flow simulations (Gong) **38** (1991) 247
Flows of viscoelastic fluids treated by the method of characteristics (Basombrío) **39** (1991) 17
Numerical simulation of thermal convection with Maxwellian viscoelasticity (Harder) **39** (1991) 67
Viscoelastic flow in an undulating tube. 2. Effects of high elasticity, large amplitude of undulation and inertia (Pilitsis) **39** (1991) 375
Sausage instability of a thread in a matrix: linear theory for viscoelastic fluids and interface (Palierne) **40** (1991) 289
Numerical simulation of circular entry flows of fluid M1 using an integral constitutive equation (Park) **42** (1992) 301
Evaluation of an integral constitutive equation for nonlinear viscoelasticity (Vrentas) **42** (1992) 351
Viscoelastic properties of physically cross-linked networks. 1. Non-linear stationary viscoelasticity (Tanaka) **43** (1992) 247
The effect of viscoelasticity on the translation of a surfactant covered Newtonian drop (Quintana) **45** (1992) 81

On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77
Best fit for differential constitutive model parameters to non-linear oscillation data (Jeyaseelan) **47** (1993) 267
A study of stress distribution in contraction flows of an LLDPE melt (Kiriakidis) **47** (1993) 339
Determination of the elongational behaviour of polypropylene melts from transient shear experiments using Wagner's model (Fulchiron) **48** (1993) 49
Effects of fluid elasticity on the static and dynamic settling of a spherical particle (van den Brule) **49** (1993) 123
Numerical simulation of extrudate swell for Oldroyd-B fluids using the stream-tube analysis and a streamline approximation (Clermont) **50** (1993) 193
Non-axisymmetric modes in viscoelastic Taylor–Couette flow (Avgousti) **50** (1993) 225
Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation (Park) **52** (1994) 69
Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modelling (Saramito) **52** (1994) 263
Prediction of suspension viscoelasticity through particle motion modelling (Toivakka) **56** (1995) 49
Numerical simulation of particle migration in concentrated suspensions by a finite volume method (Fang) **58** (1995) 67
Anisotropic viscoelasticity of side chain nematic polymers (Rey) **58** (1995) 131

Viscometer
Steady shear viscosity measurements of viscoelastic fluids with the falling needle viscometer (Park) **34** (1990) 351
Use of the falling ball viscometer to obtain flow curves for inelastic, non-Newtonian fluids (Butcher) **36** (1990) 51
Observations on the elastic instability in cone-and-plate and parallel-plate flows of a polyisobutylene Boger fluid (McKinley) **40** (1991) 201

Viscometric flow
Determination of the velocity profile in a non-Newtonian fluid for certain types of steady viscometric flows (Lucius) **1** (1976) 383
A theoretical and numerical study of non-Fourier effects in viscometric and extensional flows of an incompressible simple fluid (Huilgol) **43** (1992) 83
On the elastic free energy of a linear viscoelastic fluid undergoing a fully developed viscometric flow (Doghieri) **51** (1994) 239

Viscometric functions
Steady and transient shear flows of polystyrene solutions. 1. Concentration and molecular-weight dependence of non-dimensional viscometric functions (Attane) **18** (1985) 295
Steady and transient shear flows of polystyrene solutions. 2. Shear-rate dependence of non-dimensional viscometric functions: characteristic relaxation times (Attane) **18** (1985) 319
The reptating rope model: viscometric functions for concentrated polymer solutions and melts in shear flow (Geurts) **31** (1989) 27

Renormalization group calculation of viscometric functions based on conventional polymer kinetic theory (Öttinger) **33** (1989) 53
Viscometric functions for FENE and generalized Lennard-Jones dumbbell liquids in Couette flow: molecular dynamics study (Dlugogorski) **48** (1993) 303

Viscoplastic fluids
Free coating of viscoelastic and viscoplastic fluids onto a vertical surface (Adachi) **3** (1978) 331
Rheodynamics of nonlinear viscoplastic media (Bukhman) **10** (1982) 215
Extremum principles and exact two-side bounds of potential: functional and dissipation for slow motions of nonlinear viscoplastic media (Leonov) **28** (1988) 1
Wall effect for spheres falling at small Reynolds number in a viscoplastic medium (Atapattu) **38** (1990) 31
Flow of viscoplastic fluids in a rotating concentric annulus (Bittleston) **42** (1992) 19
Flow of viscoplastic fluids in eccentric annular geometries (Szabo) **45** (1992) 149
On the relationship between phenomenological models for elastic-viscoplastic metals and polymeric liquids (Rubin) **50** (1993) 79
Creeping sphere motion in Herschel–Bulkley fluids: flow field and drag (Atapattu) **59** (1995) 245

Viscosity
The use of eddy viscosity expressions for predicting velocity profiles in Newtonian, non-Newtonian and drag-reducing turbulent pipe flow (Edwards) **7** (1980) 153
Non-Newtonian viscosity measurements in the intermediate shear rate range with the falling-ball viscometer (Cho) **15** (1984) 61
Viscosity, first normal-stress coefficient, and molecular stretching in dilute polymer solutions (Fan) **17** (1985) 125
Viscosity, first and second normal-stress coefficients, and molecular stretching in concentrated solutions and melts (Fan) **17** (1985) 251
Influence of photodegradation and aging on the viscosity of antimisting polymer solutions (Matthys) **18** (1985) 81
The role of solvent viscosity in dilute solution polymer rheology (Manke) **19** (1985) 43
Historical perspectives on the elasticity of liquids (Joseph) **19** (1986) 237
Change of type and loss of evolution in the flow of viscoelastic fluids (Joseph) **20** (1986) 117
Longitudinal volume viscosity of poly(ethylene oxide) (Aleman) **25** (1987) 365
A low viscosity, highly elastic ideal fluid (Tam) **31** (1989) 163
Preparation and some properties of M1 and its constituents (Nguyen) **35** (1990) 93
Glass transition temperature, specific gravity, viscosity and viscoelastic properties of the test fluid M1 (te Nijenhuis) **35** (1990) 179
An alternative approach to non-isothermal melt spinning with axial and radial viscosity distributions (Zahorski) **36** (1990) 71
Determination of polymer melt viscosity by squeezing flow with constant plate velocity (Winther) **39** (1991) 119
Structural viscosity of electrorheological fluids (Mokeev) **42** (1992) 213

A simple constant-stress rheometer (van den Brule) **43** (1992) 127
Non-Newtonian flow in porous media: a laboratory study of polyacrylamide solutions (Flew) **47** (1993) 169
Effects of surface viscosity on the finite deformation of a liquid drop and the rheology of dilute emulsions in simple shearing flow (Pozrikidis) **51** (1994) 161
A simple empirical model describing the steady state shear viscosity and its prediction of the first normal stress function in shear flow (Seo) **51** (1994) 179
Dynamic measurements of surface tension of solutions of polyisobutylene in mixtures of polybutene oil and decalin (Lewandowski) **52** (1994) 233
Shear and normal stresses of a poly(vinyl alcohol)/sodium borate aqueous solution at the start of shear flow (Osaki) **54** (1994) 109
Large and small force limits for spinning with FENE dumbbell models (Petrie) **54** (1994) 251
A network model for predicting the shear thickening behaviour of a poly(vinyl alcohol)/sodium borate aqueous solution (Ahn) **55** (1994) 215
Opposing-jet viscometry of fluids with viscosity approaching that of water (Hermansky) **56** (1995) 1
Nonequilibrium Brownian dynamics simulations of Hookean and FENE dumbbells with internal viscosity (Hua) **56** (1995) 307
Spinning viscosity (Petrie) **57** (1995) 83
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Viscous dissipation
Corrections for the non-isothermal hole pressure problem (Srinivasan) **27** (1988) 1

Viscous effects
Viscous and elastic effects in extensional flow (Ferguson) **11** (1982) 269
Shearing effects for the flow of surfactant and polymer solutions through a packed bed of spheres (Vorwerk) **51** (1994) 79

Vitrification
Considerations of the "freezing-in" of flow-induced orientation in polymer melts by vitrification with application to processing (White) **4** (1979) 299

Voronoi tesselation
Dynamical modelling of viscoelastic extrusion flows (Yuan) **54** (1994) 423
Flow behaviour of two-dimensional random foams (Yuan) **60** (1995) 335

Vorticies
Non-Newtonian fluid displacement in an irregular annulus of axial symmetry (Graves) **8** (1981) 43
Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem (Huilgol) **8** (1981) 337
Correction and extensions to "Propagation of a vortex sheet in viscoelastic liquids — the Rayleigh problem", J. Non-Newtonian Fluid Mech., 8 (1981) 337–347 (Huilgol) **12** (1983) 249
Decay of shear layers and vortex sheets (Rivlin) **15** (1984) 199
Numerical simulations of viscoelastic flow: the effect of mesh size (Davies) **16** (1984) 117
The propagation of vorticity in a viscoelastic fluid (Rivlin) **17** (1985) 313
Further observations of elastic effects in tubular entry flows (Boger) **20** (1986) 31
The vortex growth of a K-BKZ fluid in an abrupt contraction (Dupont) **29** (1988) 81

Further remarks on the lip-vortex mechanism of vortex enhancement in planar-contraction flows (Evans) **32** (1989) 95
A viscous line vortex in an imposed axisymmetric straining flow of an upper convected Maxwell fluid (Lagnado) **34** (1990) 247
Analogy between the modelling of pullout in solution spinning and the prediction of the vortex size in contraction flows (Bulters) **38** (1990) 43
Numerical simulation of contraction flows using a multi-mode Giesekus model (Hulsen) **38** (1991) 183
Corner flow of a suspension of rigid rods (Keiller) **40** (1991) 323
The structure of anomalous entry flow patterns through a planar contraction (Chiba) **42** (1992) 315
Visualization of the flow of linear low density polyethylene/low density polyethylene blends through sudden contractions (Tremblay) **43** (1992) 1
The stability of inelastic non-Newtonian fluids in Couette flow between concentric cylinders: a finite element study (Lockett) **43** (1992) 165
The interaction of polymer additives with vorticity (a case study on vortex rings) (Gyr) **43** (1992) 179
Vortex breakdown in shear-thinning liquids: experiment and numerical simulation (Bohme) **45** (1992) 1
Entry-flow calculations for the Oldroyd-B and FENE equations (Keiller) **46** (1993) 143
The three-dimensional instability of elliptical vortices in a viscoelastic fluid (Lagnado) **50** (1993) 29
Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modelling (Saramito) **52** (1994) 263
Mechanism for entry flow instability through a forward-facing step channel (Chiba) **57** (1995) 271

Vorticity
Measures of deformation and convected derivatives (Petrie) **5** (1979) 147
The propagation of vorticity in a viscoelastic fluid (Rivlin) **17** (1985) 313
Anomalous elongational flows and change of type (Joseph) **28** (1988) 47
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
A note on the effect of vorticity on the deformation and breakup of polymer drops (Milliken) **42** (1992) 231
The interaction of polymer additives with vorticity (a case study on vortex rings) (Gyr) **43** (1992) 179
Explicit numerical simulation of time-dependent viscoelastic flow problems by a finite element/finite volume method (Sato) **51** (1994) 249

W

Wagner fluid
Numerical prediction of extrudate swell of a high-density polyethylene: further results (Goublomme) **47** (1993) 281
Determination of the elongational behaviour of polypropylene melts from transient shear experiments using Wagner's model (Fulchiron) **48** (1993) 49
A simple empirical model describing the steady state shear viscosity and its prediction of the first normal stress function in shear flow (Seo) **51** (1994) 179

Rheological characterization of the time and strain dependence for polyisobutylene solutions (Liang) **52** (1994) 387
The experimental observation and numerical prediction of planar entry flow and die swell for molten polyethylenes (Ahmed) **59** (1995) 129

Wakes
Some new observation on the effects of drag reducing agents on the early development of wakes (Boyce) **19** (1985) 229
Numerical simulation of the motion of a sphere in a Boger fluid (Satrape) **55** (1994) 91
The negative wake in a second-order fluid (Joseph) **57** (1995) 313

Wall effects
Dynamics of rigid dumbbells in confined geometries. 2. Time-dependent shear flow (Park) **18** (1985) 111
The drag on spheres in viscoelastic fluids with significant wall effects (Sugeng) **20** (1986) 281
Structure of the rate-of-deformation field of Newtonian and viscoelastic fluids in a falling-ball experiment (El Kayloubi) **22** (1987) 335
Wall effects in simple shear of dilute polymer solution: exact results for very narrow and very wide channels (Brunn) **24** (1987) 343
A comparison of the drag coefficients of spheres translating in corn-syrup-based and polybutene-based Boger fluids (Chmielewski) **35** (1990) 37
Creeping motion of spheres in fluid M1 (Tirtaatmadja) **35** (1990) 327
Wall effect for spheres falling at small Reynolds number in a viscoplastic medium (Atapattu) **38** (1990) 31
Hydrodynamics of a vertically falling thin cylinder in non-Newtonian fluids (Cho) **45** (1992) 105
A review of the slip (wall depletion) of polymer solutions, emulsions and particle suspensions in viscometers: its cause, character, and cure (Barnes) **56** (1995) 221
Wall effects on the flow of viscoelastic fluids around a circular cylinder (Huang) **60** (1995) 179

Wall material
Effect of surface properties on polymer melt slip and extrusion defects (El Kissi) **52** (1994) 249

Wall orientation anchoring
Supercritical bifurcations in simple shear flow of a non-aligning nematic: reactive parameter and director anchoring effects (Han) **48** (1993) 181

Wall slip
Influence of wall slip on extrudate swell: a boundary element investigation (Phan-Thien) **26** (1988) 327
Curing-oligomers movement with wall sliding in a round channel (Vaganov) **34** (1990) 1
Short wave instabilities resulting from memory slip (Renardy) **35** (1990) 73
Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip (Malkin) **39** (1991) 55
Elastic short wave instability in extrusion flows of viscoelastic liquids (Chen) **42** (1992) 189
Polymer melt flow in very thin slits (Shidara) **48** (1993) 101
Predicting polymer melt behaviour near the inception of wall slip in oscillatory shear (Jeyaseelan) **53** (1994) 99

Wall-sphere interaction
Aggregation and dispersion of spheres falling in viscoelastic liquids (Joseph) **54** (1994) 45
Aggregation and dispersion of spheres falling in viscoelastic liquids (vol 54, pg 45, 1994) (Joseph) **56** (1995) 217

Wave number
On Hadamard-type stability of single integral constitutive equations for viscoelastic liquids (Kwon) **47** (1993) 77

Wave speeds
Delayed die swell (Joseph) **24** (1987) 31
Climbing constant, second-order correction of Trouton's viscosity, wave speed and delayed die swell for M1 (Hu) **35** (1990) 287
Independent confirmation that delayed die swell is a hyperbolic transition (Joseph) **48** (1993) 225

Waves
On finite amplitude shear waves in viscoelastic fluids (Zahorski) **5** (1979) 315
On an invariance property of the solution to Stokes' first problem for viscoelastic fluids (Preziosi) **33** (1989) 225
Linear theory of gravity waves on a Maxwell fluid (Saasen) **34** (1990) 207
Numerical simulation of viscoelastic flow past a cylinder (Hu) **37** (1990) 347
Shear wave propagation after stepwise increase of shear rate (Lee) **39** (1991) 1
Elastic short wave instability in extrusion flows of viscoelastic liquids (Chen) **42** (1992) 189
The determination of dynamic moduli at high frequencies (Williams) **42** (1992) 267

Wavy motion
Motion induced by a waving plate (Sturges) **8** (1981) 357
The onset of elastically driven wavy motion in the flow of two viscoelastic liquid films down an inclined plane (Chen) **45** (1992) 21

Wedge
On the converging flow of viscoelastic fluids through cones and wedges (Hull) **14** (1984) 219
Squeezing a viscoelastic liquid from a wedge: an exact solution (Phan-Thien) **16** (1984) 329
Squeezing flow of a yield-stress fluid in a wedge of slowly-varying angle (Wilson) **50** (1993) 45

Weighted residuals
A study of some numerical viscoelastic schemes (Tanner) **41** (1991) 171

Weissenberg effect
The Weissenberg effect in molten polymers (Dealy) **3** (1977/1978) 127
Experiments on free surface phenomena (Beavers) **5** (1979) 323
The interaction of yield stress and viscoelasticity on the Weissenberg effect (Elson) **11** (1982) 1
Elementary implications of viscometry on the free surface profile for the problems of climbing and channel flow (Castro) **15** (1984) 127
The Doi–Edwards model in slow flows. Predictions on the Weissenberg effect (Marrucci) **21** (1986) 319
Normal stress measurement by speckle photography on the Weissenberg effect (Dupuis) **33** (1989) 95
Weissenberg effect of the fluid M1. Study by an optical method (Dupuis) **35** (1990) 401

On the numerical simulation of axisymmetric swirling flows of differential viscoelastic liquids: The rod climbing and the Quelleffekt (Debbaut) **43** (1992) 103
On the development of secondary motion induced by the free surface in the rod climbing flow (Debbaut) **48** (1993) 357
On the numerical simulation of axisymmetric swirling flows of differential viscoelastic liquids: The rod climbing and the *Quelleffekt* (Debbaut) **43** (1992) 103
White–Metzner models for rod climbing in A1 (Liao) **51** (1994) 111

Weissenberg number
Plane flow of a fluid of second grade through a contraction (Crochet) **1** (1976) 247
The swelling of plane extrudates at low Weissenberg numbers (Tanner) **7** (1980) 265
The stability of some numerical schemes for model viscoelastic fluids (Tanner) **10** (1982) 169
Numerical filtering and the high Weissenberg number problem (Davies) **16** (1984) 195
The motion of a dumbbell molecule in a torsional flow is unstable at high Weissenberg number (Phan-Thien) **18** (1985) 1
The viscoelastic Ekman layer (Horwitz) **18** (1985) 87
On the high Weissenberg number problem (Keunings) **20** (1986) 209
Multiplicity of solutions in von Karman flows of viscoelastic fluids (Ji) **36** (1990) 1
Flow along the centerline behind a sphere in a uniform stream (Phan-Thien) **41** (1991) 151

Well-posed problems
A sufficient condition for a positive definite configuration tensor in differential models (Hulsen) **38** (1990) 93

White–Metzner fluid
Numerical simulation of non-isothermal extrudate swell at high extrudate rates (Chang) **51** (1994) 1
Steady laminar flow of viscoelastic fluid in a curved pipe of circular cross-section with varying curvature (Iemoto) **22** (1986) 101
Change of type and loss of evolution of the White–Metzner model (Verdier) **31** (1989) 325
Steady flow of a White–Metzner fluid in a 2-D abrupt contraction: computation and experiments (Maders) **45** (1992) 63
White–Metzner models for rod climbing in A1 (Liao) **51** (1994) 111

White–Metzner tensors
A note on kinematical tensors (Walters) **3** (1977/1978) 293

Wiggle flow
Kinematics and normal stress differences of a viscoelastic fluid undergoing wiggle flow (Arikol) **19** (1985) 209

X

X-ray rheometer
A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow (Keates) **52** (1994) 197

Xanthan
Shear rate dependence of the viscoelasticity of polymer solutions. 2. Xanthan gum (Thurston) **9** (1981) 69
Comparison of the behaviour of filaments of Xanthan solutions with that of filaments of polyacrylamide solutions (Jones) **35** (1990) 77
Independent confirmation that delayed die swell is a hyperbolic transition (Joseph) **48** (1993) 225

Y

Yield stress
Use of the parallel-plate plastometer for the characterization of viscous fluids with a yield stress (Covey) **8** (1981) 249
The interaction of yield stress and viscoelasticity on the Weissenberg effect (Elson) **11** (1982) 1
A numerical simulation of a plastic fluid in a parallel-plate plastometer (Gartling) **14** (1984) 347
On the shearing zone around rotating vanes in plastic liquids: theory and experiment (Keentok) **17** (1985) 23
Rheology of foams. 1. Theory for dry foams (Khan) **22** (1986) 1
Shear rheometry of fluids with a yield stress (Magnin) **23** (1987) 91
The rheology of strongly-flocculated suspensions (Buscall) **24** (1987) 183
Cone-and-plate rheometry of yield stress fluids. Study of an aqueous gel (Magnin) **36** (1990) 85
Computer simulation of an electrorheological fluid (Whittle) **37** (1990) 233
Vane rheometry of bentonite gels (Alderman) **39** (1991) 291
Yield stress fluid. Structural model and transient shear flow behaviour (Doremus) **39** (1991) 335
A simple constant-stress rheometer (van den Brule) **43** (1992) 127

Yield surface
A theory of thixotropic plastic viscoelastic fluids with a time-dependent yield surface and its comparison to transient and steady-state experiments on small particle filled polymer melts (Suetsugu) **14** (1984) 121
Flow of Bingham fluids in complex geometries (Lipscomb) **14** (1984) 337
Numerical study of the Bingham squeeze film problem (O'Donovan) **15** (1984) 75
An exact non-stationary solution of simple shear flow in a Bingham fluid (Sekimoto) **39** (1991) 107
Motion of the yield surface in Bingham fluid with a simple-shear flow geometry (Sekimoto) **46** (1993) 219
Squeezing flow of a yield-stress fluid in a wedge of slowly-varying angle (Wilson) **50** (1993) 45

Z

Zero-shear-rate viscosity
An experiment to measure the pressure dependence of the zero-shear-rate viscosity (Foltz) **3** (1978) 347
Zero-shear-rate viscosity measurement for polymer solutions by falling ball viscometry (Gottlieb) **6** (1979) 97
New type of equation for the relation between viscosity and particle content in suspensions (Yao) **25** (1987) 197
